Approval

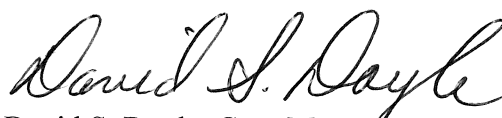

Re: Hudson County Chromate – Honeywell
COPR Site 079 (Route 440 Vehicle Corporation)
Jersey City, Hudson County
SRP PI# G000008706
Activity Number Reference: RPC930001
Case Name/Number: 120715_Site_079_PTSRR_Approval

Dear Ms. Maria Kaouris:

The New Jersey Department of Environmental Protection (Department) has completed review of the **Post-Treatment Sampling Results Report** for Site 079- Route 440 Vehicle Corporation (dated February 2015; cover letter dated February 4, 2015). As reported, Honeywell concluded that although soil treatment was considered successful, the attainment of the 20 milligrams per kilogram criterion was not achieved at every sampling/injection point. No further post-remediation soil or groundwater sampling associated with the soil treatment will be conducted by Honeywell. However, approved post-remediation cap inspections, applicable post-remediation monitoring and reporting requirements will continue under the existing Deed Notice, Remedial Action Soil Permit (Permit No. RAP120001, dated May 4, 2012), and Long-Term Monitoring Plan for Site 079. The Department has determined that the document is in compliance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E, and other applicable requirements. The Department hereby approves the document, effective the date of this letter.

The Department requests Honeywell provide copies of this letter to the appropriate parties. The documents, including this approval letter have been entered into the Department's New Jersey Environmental Management System (NJEMS). If you have any questions regarding this matter, please contact me at (609) 292-2173.

Sincerely,

A handwritten signature in cursive script that reads "David S. Doyle".

David S. Doyle, Case Manager
