# *Langan – Fusion Weld Destruct Sample Laboratory Data*

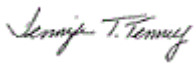
Date: 2015-07-23

**Mail To:**
**Dan Bosworth**
**Langan Environmental Services**
**619 River Drive**
**Elmwood Park , NJ , 07090**

**Bill To:**

**Langan Environmental Services**
**100530001**

e-mail:dbosworth@langan.com



Dear Mr. Bosworth,

Thank you for consulting with TRI/Environmental, Inc. (TRI) for your geosynthetics testing needs. TRI is pleased to submit this final report for laboratory testing.

| | |
|---|---|
| **Project:** | **Honeywell SA-6 South Capping** |
| TRI Job Reference Number: | **17032** |
| Material(s) Tested: | (1) Heat Fusion Weld Seam(s) |
| Test(s) Requested: | SAME DAY Peel and Shear<br>(ASTM D 6392/GRI GM19/D 4437/NSF 54/882 mod.) |

| Codes: | |
|---|---|
| AD | Adhesion Failure (100% Peel) |
| BRK | Break in sheeting away from Seam edge. |
| SE | Break in sheeting at edge of seam. |
| AD-BRK | Break in sheeting after some adhesion failure - partial peel. |
| SIP | Separation in the plane of the sheet (leaving the bond intact). |
| FTB | Film tearing bond (all non "AD" failures). |
| NON-FTB | 100% peel. |

If you have any questions or require any additional information, please call us at 1-800-880-8378.
Sincerely,

Jennifer Tenney
Project Manager
Geosynthetic Services Division

# *Langan – Extrusion Weld Destruct Sample Laboratory Data*

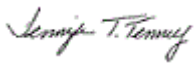
Date: 2015-07-28

**Mail To:**
**Dan Bosworth**
**Langan Environmental Services**
**619 River Drive**
**Elmwood Park , NJ , 07090**

e-mail:dbosworth@langan.com

**Bill To:**

**Langan Environmental Services**
**100530001**



Dear Mr. Bosworth,

Thank you for consulting with TRI/Environmental, Inc. (TRI) for your geosynthetics testing needs. TRI is pleased to submit this final report for laboratory testing.

| | |
|---|---|
| **Project:** | **Honeywell SA-6 South Capping** |
| TRI Job Reference Number: | **17111** |
| Material(s) Tested: | (1) Single Extrusion Weld Seam(s) |
| Test(s) Requested: | SAME DAY Peel and Shear<br>(ASTM D 6392/GRI GM19/D 4437/NSF 54/882 mod.) |

| Codes: | |
|---|---|
| AD | Adhesion Failure (100% Peel) |
| BRK | Break in sheeting away from Seam edge. |
| SE | Break in sheeting at edge of seam. |
| AD-BRK | Break in sheeting after some adhesion failure - partial peel. |
| SIP | Separation in the plane of the sheet (leaving the bond intact). |
| FTB | Film tearing bond (all non "AD" failures). |
| NON-FTB | 100% peel. |

If you have any questions or require any additional information, please call us at 1-800-880-8378.
Sincerely,

Jennifer Tenney

**Date:** 7/22/2015

## QA – Gas Vent and Piezometer Penetrations

***Check applicable Detail:**

- ☒ Fabricated in field
- ☒ 18-in. overlap between boot and geomembrane
- ☒ Neoprene rubber gasket and/or silicone caulking shall be used between the boot or shroud and the penetration structure
- ☒ LLDPE sacrificial sheet shall be used between the boot or shroud and the clamp for protection
- ☒ If penetration is greater than 4-in. in diameter, a second clamp shall be used.
- ☒ Boot connection (minimum 18-inch overlap) field tested to ensure seal (ex. vacuum box testing) and observed boot vertical seam and penetration edges extrusion welded
- ☒ LLDPE telescoping sleeve placed around boot
- ☒ Caulked Butyl Sealant around top edge of liner

**Location:** Well 073-MW-1BR located at western end of SA-6 Cap on Panel 1/2 seam (approx. 135 ft. north of south end of Cap). Identified as RP-6 on *As Built* and *Repair Report*

**AmecFW QA Signature:**

BShea 10/9/15

**Independent CQA Monitor Signature:**

10/9/15

**Comments:** Geomembrane boot fabrication, construction, welding, and testing completed on 7/21/15. Final butyl sealant applied at project completion on 10/9/15.

**STUDY AREA 6 - CAP INSTALLATION**

**Project:** Study Area 6 South

**Date:** 8/11/2015

## QA – Manhole Boot Installation

LINER ANCHOR TO CONCRETE STRUCTURE

NTS

CE TYP C-304

***Check applicable Detail:**

- ☒ Fabricated in field
- ☒18-in. overlap between boot and geomembrane
- ☒ Neoprene rubber gasket and/or silicone caulking shall be used between the boot or shroud and the penetration structure
- ☒ LLDPE sacrificial sheet shall be used between the boot or shroud and the clamp for protection
- ☒ SS Band Clamps tightened and uniform
- ☒ Caulked Butyl Sealant around top edge of liner
- ☒ Boot connection (minimum 18-inch overlap) field tested to ensure seal (ex. vacuum box testing) and observed boot vertical seam and penetration edges extrusion welded

**Location:** Access Manhole #2 located on Panel #47 (P-47) at approximate Sta. 14+00 (SCB Wall Sta. Numbering). Identified as RP-218 on *As-Built* and *Repair Log*

**AmecFW QA Signature:**

B Shea 10/9/15

**Independent CQA Signature:**

10/9/15

**Comments:** Geomembrane boot fabrication, construction, welding, and testing completed on 8/10/15. Final butyl sealant applied at project completion on 10/9/15.

# Appendix P
# Summary of Non-Compliance & Corrective Action Sheets

**LANGAN**

## Notice of Non-Compliance and Corrective Action

Sheet # 1

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 7/21/15<br>Contractor in NC: Entact<br>Non-Compliance No.: 1<br>Notes: Soil Subgrade |
| **Reference** | |
| Item: Soil Subgrade<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Rock / loose debris (>1/2 – inches) observed underneath geomembrane cap at Panel #3 (P-3). This non-compliance issue is also noted on the 7/21/15 Repair Report, and is identified as RP-3. The location of this repair was recorded and logged (via GPS) by the team.

**Contractor's Response**

Loose debris / rock area identified as subgrade irregularity. Rock to be removed and the area will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Remove rock / debris from underneath cap and patch / repair area with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Rock was removed from underneath geomembrane as a small hole (<2-inches) was made in the cap to remove the stone. This hole was then repaired with approximate 2 ft. by 2.5 ft. geomembrane patch. The patch was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372). Refer to Photo #5 of 7/21/15 photo log for repair of RP-3.

Geosynthetic Installer Representative Carlos Ramos Date 7-21-15

# Notice of Non-Compliance and Corrective Action

Sheet # 2

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 7/21/15<br>Contractor in NC: Entact<br>Non-Compliance No.: 2<br>Notes: Soil Subgrade |
| **Reference** | |
| Item: Soil Subgrade<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Rock / loose debris (>1/2 – inches) observed underneath geomembrane cap at Panel #2 (P-2). This non-compliance issue is also noted on the 7/21/15 Repair Report, and is identified as RP-8. The location of this repair was recorded and logged (via GPS) by the team.

**Contractor's Response**

Loose debris / rock area identified as subgrade irregularity. Rock to be removed and the area will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Remove rock / debris from underneath cap and patch / repair area with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Rock was removed from underneath geomembrane as a small hole (<2-inches) was made in the cap to remove the stone. This hole was then repaired with approximate 1.5 ft. by 2 ft. geomembrane patch. The patch was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372).

# Notice of Non-Compliance and Corrective Action

Sheet # 3

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 7/22/15<br>Contractor in NC: ESI / Entact<br>Non-Compliance No.: 3<br>Notes: Non-Destructive Test |
| **Reference** | |
| Item: Non-Destructive Test Failure<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Failure of Non-Destructive Test along Panel seams 7/8 (located on southern end of SA-6). This non-compliance issue is also noted on the 7/22/15 Repair Report, and is identified as RP-13. The location of this repair was recorded and logged (via GPS) by the team.

**Contractor's Response**

Failure of panel seam 7/8 during non-destructive testing confirmed. Based on length of failed seam (approximately 6 ft.), the entire seam length will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Based on length of seam to be repaired the area will be patched and sealed with extrusion welds following the project specifications and as outlined in the Contractor's Response above.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Based on length of failed seam (approximately 6 ft.), the entire seam was patched and repaired. This failure was repaired with approximate 2 ft. by 6 ft. geomembrane patch. The patch was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372).

# Notice of Non-Compliance and Corrective Action

Sheet # 5

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 8/7/15<br>Contractor in NC: Entact<br>Non-Compliance No.: 5<br>Notes: Vacuum Box Test |
| **Reference** | |
| Item: Vacuum Box Test Failure<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Failed vacuum box test (i.e. leak) detected during vacuum box testing of RP-215 at Panel #50 (P-50). This non-compliance issue is also noted on the 8/7/15 Repair Report, and is identified as a failed test result ("F") for RP-215. The location of this repair was recorded and logged (via GPS) by the team.

**Contractor's Response**

Failed vacuum box test for RP-215 identified and confirmed. Failed weld to be patched and welded according to project specifications, and confirmed via vacuum test.

**Follow Up Action Required**

Patch / repair failed weld with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Failed extrusion weld (identified during vacuum box testing) was patched with an approximate 2 ft. by 2 ft. geomembrane patch over the extrusion weld (Noted as RP-222 on Repair Log). The patch was overlapped a minimum of 4-inches beyond the edges of the failed weld, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372). Refer to Photos 3,7 of the 8/10/15 Photo Log for supporting photographs.

# Notice of Non-Compliance and Corrective Action

Sheet # 7

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 9/16/15<br>Contractor in NC: Entact<br>Non-Compliance No.: 7<br>Notes: Subgrade Irregularity |
| **Reference** | |
| Item: Subgrade Irregularity – Hydrated GCL<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane panel cut to expose underlying geosynthetic clay liner (GCL). GCL wet / hydrated from weekend storms. Ground surface elevation outside of the SA-6 cap (along southern end of SA-6) was higher than cap grades which caused surface water to flow towards the cap during a major rain event. Rainwater able to pool / pond and infiltrate underneath geomembrane panels thus hydrating GCL. This non-compliance issue is also noted on the 9/16/15 Repair Report, and is identified as RP-331. The location of this repair was recorded and logged (via GPS) by the team.

**Contractor's Response**

Hydrated GCL confirmed as subgrade irregularity. GCL to be cut (where hydrated), removed, and replaced and the geomembrane will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Remove hydrated GCL from underneath cap and patch / repair area with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane cap was cut and GCL was exposed. Hydrated GCL was removed from underneath geomembrane, and new pieces of GCL were cut and overlapped (minimum of 1 ft.) and sealed with granular bentonite along the seams. The cut in the geomembrane was then repaired with approximate 2 ft. by 18 ft. geomembrane patch. The patch was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372). Refer to Photos #2 and #3 of 9/16/15 photo log for placement of new GCL

| **Reference** | |
| Item: Subgrade Irregularity – Hydrated GCL<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane Panels #121-125 (southern end of SA-6 within swale) cut to expose underlying geosynthetic clay liner (GCL). GCL wet / hydrated from weekend storms. Ground surface elevation outside of the SA-6 cap (along southern end of SA-6) was higher than cap grades which caused surface water to flow towards the cap during a major rain event. Rainwater able to pool / pond and infiltrate underneath geomembrane panels from failure of pump during storms thus hydrating GCL along the southern end of SA-6. This non-compliance issue is also noted on the 10/7/15 Repair Report, and is identified as the following repairs (RP-458 through RP-473). The location of these repairs were recorded and logged (via GPS) by the team (southern swale of SA-6).

**Contractor's Response**

Hydrated GCL confirmed as subgrade irregularity. GCL to be cut (where hydrated), removed, and replaced and the geomembrane will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Remove hydrated GCL from underneath cap and patch / repair area with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane cap was cut and GCL was exposed (southern swale of SA-6). Hydrated GCL was removed from underneath geomembrane, and new pieces of GCL were cut and overlapped (minimum of 1 ft.) and sealed with granular bentonite along the seams. Various cuts in the geomembrane were then repaired. Patches were overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372). | Item: Subgrade Irregularity – Hydrated GCL<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane Panels #117 and Panel #119/120 (northern end of SA-6 along SCB wall) cut to expose underlying geosynthetic clay liner (GCL). GCL wet / hydrated from weekend storms. Ground surface elevation outside of the SA-6 cap (along northern end of SA-6) was higher than cap grades which caused surface water to flow towards the cap during a major rain event. Rainwater and wash out along adjacent roadway (higher elevation) along northern end of SA-6 (SCB wall) able to infiltrate laterally and hydrate GCL. This non-compliance issue is also noted on the 10/7/15 Repair Report, and is identified as RP-474 and RP-475 (two cuts along geomembrane to fold back geomembrane cap). The location of these repairs were recorded and logged (via GPS) by the team.

**Contractor's Response**

Hydrated GCL confirmed as subgrade irregularity. GCL to be cut (where hydrated), removed, and replaced and the geomembrane will be patched / repaired, and sealed with an extrusion weld as outlined in the project specifications. Vacuum box testing will then be conducted to confirm repair.

**Follow Up Action Required**

Remove hydrated GCL from underneath cap and patch / repair area with extrusion welds following project specifications and as outlined in the Contractor's Response.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane cap was cut and GCL was exposed (along northern end of SA-6 at SCB wall). Hydrated GCL was removed from underneath geomembrane, and new pieces of GCL were cut and overlapped (minimum of 1 ft.) and sealed with granular bentonite along the seams. Various cuts in the geomembrane were then repaired (RP-474 & RP-475). Patches were overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the hole was properly patched (as outlined in Section 02372). # Notice of Non-Compliance and Corrective Action

Sheet # 11

| General Project Information | |
|---|---|
| Project Name: SA-6 South<br>Project No.: 100530001<br>Owner/Contr.: Honeywell / AmecFW<br>QA Monitor: Langan | Date: 10/12/15<br>Contractor in NC: Entact<br>Non-Compliance No.: 11<br>Notes: Failed Destruct Sample |
| **Reference** | |
| Item: Failed Destruct Sample<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

Destruct sample DSX-13 (RP-483) collected from RP-477 from Panel #125, failed on one of the five specimens for peel testing completed by the Geosynthetic Installer's Laboratory (Note: average of the five specimens was acceptable). Based on this failure, RP-477 (entire patch) was covered with a new patch and sealed with an extrusion weld. This non-compliance issue was also noted on the 10/12/15 Repair Report, and is identified as RP-486. The location of this repair was recorded and logged (via GPS) by the team (southern swale).

**Contractor's Response**

Destruct sample DSX-13 failure for one of five specimens confirmed. Repair associated with destruct sample (P-125 on southern end of SA-6) to be covered with new patch, sealed, and extrusion welded according to project specifications. Additional destruct sample to be taken from new extrusion weld (from new patch) to confirm repair.

**Follow Up Action Required**

Place patch over RP-477 and repaired and sealed with extrusion weld, according to project specs.

**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane patch was placed over RP-477 and was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Once extrusion welding was completed, vacuum box testing was conducted along the seams to confirm the patch was properly sealed (as outlined in Section 02372). Additionally, once the new patch (RP-486) was completed, an additional extrusion destruct sample (DSX-15) was collected (referred to as RP-487) to confirm the integrity of the new weld. Refer to *10/12/15 Photograph Log* for supporting non-compliance photos.

| Item: Equipment Puncture through Cap<br>Specification Sec. No.: 02372 | Drawing No.:<br>Other: |

**Description of Non-Compliance**

*Cross Reference (QA Inspection Form & Sheet No.):*

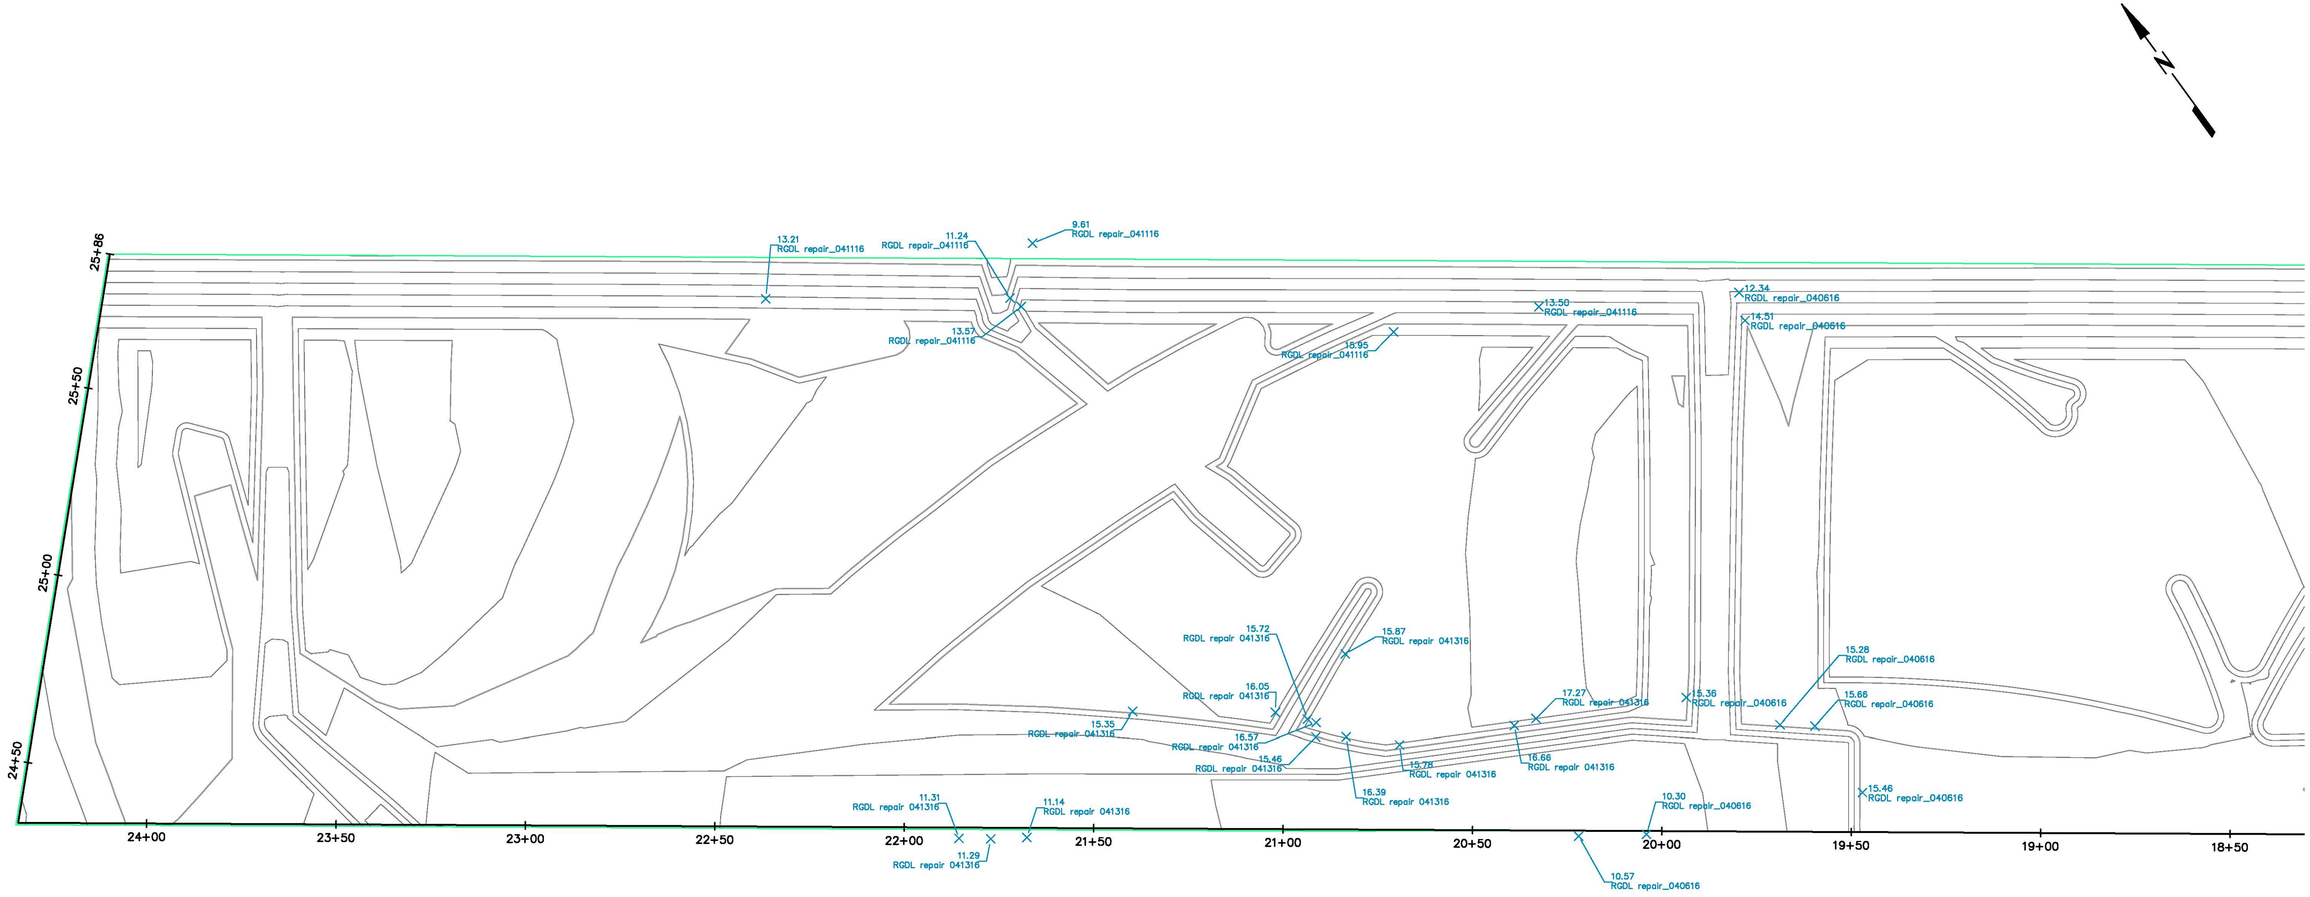
Equipment puncture through geomembrance cap observed along SCB wall (northern end of SA-6 cap). Puncture to be patched / repaired according to project specs. Additional details on the patch / repair work completed are described in the *11/4/15 Daily Report* and *11/4/15 Photograph Log*. This non-compliance issue was also noted on the 11/04/15 Repair Report, and is identified as RP-488. The location of this repair was recorded and logged (via GPS) by the team (along SCB wall).

**Contractor's Response**

Equipment puncture through geomembrane along SCB wall confirmed. Puncture to be covered with new patch, sealed, and extrusion welded according to project specifications.

**Follow Up Action Required**

Place patch over puncture location and repair and seal with extrusion weld according to project specs.



**Follow Up Action Taken**

*Cross Reference (QA Inspection Form & Sheet No.):*

Geomembrane patch was placed over the equipment puncture and was overlapped a minimum of 4-inches beyond the edges of the cut, conformed so that the edges were rounded, and sealed with an extrusion weld (as outlined in Section 02372). Prior to welding, a new piece of GCL was placed along the SCB wall over the puncture area. Upon completion of extrusion welding, vacuum box testing could not be completed based on the location of the patch (along edge of SCB wall). The welds were visually inspected by Entact and Langan. Refer to *11/04/15 Photograph Log* for supporting non-compliance photos.

Geosynthetic Installer Representative Carlos Ramos Date 11/5/15

Independent CQA Monitor Date 11/5/15

- REPAIRS WERE CONDUCTED BETWEEN APRIL 6-13, 2016.
- "X" IDENTIFIES THE GENERAL LOCATION WHERE COVER SOIL HAD BEEN ERODED AND THE GDL EXPOSED FOR MORE THAN 30 DAYS.
- COVER SOIL CLEANED BACK 2 FT. BEYOND THE EXPOSED MARGIN TO PROVIDE WORKING AREA FOR THE REPAIR.
- AN ADDITIONAL LAYER OF SKAPS ORANGE GEOTEXTILE WAS PLACED OVER THE EXPOSED GDL.
- EDGES OF THE NEW GEOTEXTILE WERE "LYSTERED" (HEAT BONDED) TO THE ORIGINAL TOP LAYER OF GEOTEXTILE
- ERODED COVER SOIL WAS DISCARDED AND REPLACED WITH SOIL FROM THE SCREENED COVER SOIL STOCKPILE.

# DEED NOTICE CONCERNING CONTROLS INSTALLED TO CONTAIN CHROMIUM AND HISTORIC FILL CONTAMINATION UNDERLYING THE PROMENADE

This Deed Notice is made as of the __ day of _____, 2017, by ***Bayfront Redevelopment LLC, whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950***. Owner shall mean Bayfront Redevelopment LLC together with its successors and assigns, including all successors in interest in the Property which is the subject of this Deed Notice as described fully below. The Property (also referenced herein as the "Restricted Areas") shall consist of those lands particularly described by metes and bounds in Exhibit A-2 attached hereto.

1. THE PROPERTY. Bayfront Redevelopment LLC is the current owner in fee simple of certain real property designated as those portions of ***Block 24601, Lots 1 through 8*** and portions of ***Block 21901 Lot 8 on the tax map of the City of Jersey City, Hudson County*****, New Jersey**[1]; the New Jersey Department of Environmental Protection ("the Department") Program Interest ("PI") Numbers for the contaminated site which includes this property are ***Hudson County Chromate Site***

[1] All references to Block 24601 Lots 1 through 8 and Block 21901 Lot 8 in this Deed Notice shall mean the applicable portions of Block 24601 Lots 1 through 8 and portions of Block 21901 Lot 8 as shown in the metes and bounds description, regardless of whether the word "portion(s)" is specifically called out or not.

***No. 073 PI #G00000927, Hudson County Chromate Site No. 124 PI# G000008741, Hudson County Chromate Site No. 125 PI# G000008742, Hudson County Chromate Site No. 134 PI# 033312, Hudson County Chromate Site No. 140 PI# 003846*** (NJDEP PI# for non-chromium-related contaminants at the Property is #745719)**,** and known as the Open Space AOC pursuant to the First Amended Consent Decree Regarding the Remediation and Redevelopment of Study Area 6 South ("Consent Decree") which is attached hereto as Appendix I and is entered as an order of the Court in the following consolidated actions *JCMUA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-05955; *JCIA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-5993; and *Hackensack Riverkeeper, Inc. v. Honeywell International, Inc.,* D.N.J., Civ. No. 06-22 (consolidated under Civ. No. 95-2097). The approximate location of the Open Space AOC is also referred to as the Promenade in the Bayfront I Redevelopment Plan adopted by Jersey City on March 12, 2008. The Consent Decree restricts transfer, use and development of the Property. To the extent that there is any conflict or inconsistency between the terms of this Deed Notice and the terms of the Consent Decree, the Consent Decree shall govern.

2. REMEDIATION.

i. The Department's Bureau of State Case Management (BCM) is the entity within the Department that is responsible for the oversight of the chromium remediation of the Property. The matter was Hudson County Chromate Site No. 073 PI# G000000927, Hudson County Chromate Site No. 124 PI# G000008471, Hudson County Chromate Site No. 125 PI# G000008742, Hudson County Chromate Site No. 134 PI# 033312, and Hudson County Chromate Site No. 140 PI# 003846. The Department has approved this Deed Notice as an institutional control for the Property, which is part of the remediation of the Property.

ii. N.J.A.C. 7:26-C-7 requires the Owner, among other persons, including the responsible party Honeywell International Inc. ("Honeywell"), to obtain a soil remedial action permit for the soil remedial action at the Property. That permit will contain the monitoring, maintenance and biennial certification requirements that apply to the Property.

3. SOIL AND GROUNDWATER CONTAMINATION. Honeywell, a corporation of the State of Delaware, licensed to do business in the State of New Jersey whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950, has remediated SA-6 South to address chromium-related and non-chromium soil and shallow groundwater contamination, except for the Open Space Area Property and certain other deed noticed areas where engineering controls were implemented. The Remedial Action Work Plan ("RAWP") for chromium remedial actions was approved by the Department on March 24, 2009 for Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140, which include the Property for chromium. The RAWP for non-chromium remedial actions was approved by the Department on June 28, 2013 for Hudson County Site Nos. 073, 124, 125, 134, and 140. Remedial actions for chromium were further approved pursuant to the Consent Decree.

Under both the Consent Decree and the RAWP, soil and groundwater contamination remain in the Property at concentrations that do not allow for the unrestricted use of the Property. A Remedial Action Report ("RAR") for SA-6 South was submitted to the Department on February 8, 2017. The Department approved the RAR on March 30, 2017. A Construction Completion Report

("CCR") for SA-6 South to document the implementation of the Chromium Remedy pursuant to Article III of the Consent Decree (the "Chromium Remedy") to address chromium-impacted soil and groundwater for SA-6 South was entered by the Court on [DATE], [CITE TO DOCKET AND DOCKET #].

The Property encompasses approximately 8 acres. The horizontal extents of the Property include an existing soil-cement bentonite ("SCB") wall along the northern boundary with SA-7 and the hydraulic barrier walls installed on the other three sides as part of the Chromium Remedy. The engineered barrier in the Property consists of the hydraulic barrier walls and an engineered Resource Conservation and Recovery Act ("RCRA") cap that includes a gas collection system, base protective layer, geomembrane liner, geocomposite drainage layer, filter fabric, warning layer, and cover soils. This Deed Notice includes the hydraulic barrier walls. The Property includes chromium, xylenes, and historic fill. Honeywell will restrict, or will cause Bayfront Redevelopment LLC to restrict, the future use of this area by implementing a conservation restriction, which has been recorded at the Office of the Hudson County Register, and transfer, or cause Bayfront Redevelopment LLC to transfer, title to the City of Jersey City (as called for in Paragraph 61(c)(ii)(3) of the Consent Decree). The provisions of the Long Term Monitoring Plan ("LTMP") and the Open Space Design Standards ("OSDS"), developed pursuant to the Consent Decree, will apply to the Property.

The soil contamination is described, including the type, concentration and specific location of such contaminants, in Exhibit B, which is attached hereto and made a part hereof. Groundwater within the property remains contaminated. Groundwater contaminant concentrations and restrictions for SA-6 South in its entirety are addressed in the Classification Exception Area (CEA) approved by the NJDEP on February 16, 2012 and in a forthcoming Remedial Action Permit for Groundwater. As a result of the remaining soil contamination, there is a statutory requirement for this Deed Notice and engineering controls in accordance with N.J.S.A. 58:10B-13. Under the terms of the Consent Decree and this Deed Notice, Honeywell is responsible for monitoring and maintaining the soil and groundwater remediation for the Property in perpetuity.

4. CONSIDERATION. In accordance with the Department's approval of the chromium and non-chromium RAWPs for the remediation for the Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140 which includes the Property, and in consideration of the terms and conditions of that approval, and in accordance with the Consent Decree, and other good and valuable considerations, Owner has agreed to subject the Property to certain statutory and regulatory requirements which impose restrictions upon the use of the Property, to restrict certain uses of the Property, and to provide notice to subsequent owners, lessees and operators of the restrictions and the monitoring, maintenance, and biennial certification requirements outlined in this Deed Notice and required by law, as set forth herein.

5A. RESTRICTED AREAS. Due to the presence of these contaminants, Owner has agreed, as part of the remedial action for the Property, to restrict the use of the Property (the "Restricted Areas"); a narrative description of these restrictions, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C, which is attached hereto and made a part hereof. Owner will develop a binder containing a list of these restrictions

which will be maintained at either the onsite trailers or within the Groundwater Treatment Plant building, available for review and inspection by governmental enforcement officials if requested.

5B. RESTRICTED LAND USES. The following land use restrictions apply to the Property:

i. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(10), prohibits the conversion of a contaminated site, remediated to non-residential soil remediation standards that require the maintenance of engineering or institutional controls, to a child care facility, or public, private, or charter school without the Department's prior written approval, unless a presumptive remedy is implemented;

ii. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(12), prohibits the conversion of a landfill, with gas venting systems and or leachate collection systems, to a single family residence or a child care facility without the Department's prior written approval;

iii. The Consent Decree, paragraph 74, prohibits development in the Property except as allowed by paragraphs 74(j) and (k) of the Consent Decree; and

iv. The Conservation Restriction, recorded with the Hudson County Register of Deeds at Book 8722, page 105, restricts the use and development of the Property.[2]

5C. ENGINEERING CONTROLS. Due to the presence and concentration of these contaminants, the Owner has also agreed, as part of the remedial action for the Property, to the placement of certain engineering controls within the Property. A narrative description of these engineering controls, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C. Honeywell shall be responsible for monitoring and maintenance of engineering controls and biennial certification requirements as specified in the Consent Decree, the LTMP, and Paragraphs 8A and 8B herein.

5D. LONG TERM MONITORING PLAN. Pursuant to the Consent Decree, Honeywell has prepared an LTMP which sets forth requirements for monitoring, maintaining, and repairing or replacing the soil and groundwater chromium remedial measures including engineering controls within the Property, and requirements for notification and reporting pursuant to the Consent Decree, Deed Notice, and Soil Remedial Action Permit. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950. This Deed Notice is appended to the LTMP.

5E. OPEN SPACE DESIGN STANDARDS. Pursuant to the Consent Decree, Honeywell has prepared the OSDS which set forth the standards that must be met to ensure the protection of the Chromium Remedy during all development and other intrusive work conducted within the Property.

[2] In the future, after the remediation of the area known as the Bulkhead Deferred Area is completed and approved by the Special Master, the boundary of the existing conservation restriction recorded on the Property will be amended to conform to the location of the as-built hydraulic barrier walls.

5F. WORKER TRAINING MATERIALS. All maintenance workers engaged in maintenance at the Property shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. Workers shall be trained using materials developed by Honeywell pursuant to the Consent Decree.

6A. CHANGE IN OWNERSHIP AND REZONING.

i. The Owner and the subsequent owners and lessees, shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. The Owner and the subsequent owners shall provide written notice to the Department of Environmental Protection on a form provided by the Department and available at www.nj.gov/srp/forms within thirty (30) calendar days after the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property.

iii. The Owner and the subsequent owners shall provide written notice to the Department, on a form available from the Department at www.nj.gov/srp/forms, within thirty (30) calendar days after the owner's petition for or filing of any document initiating a rezoning of the Property to residential.

6B. SUCCESSORS AND ASSIGNS. This Deed Notice shall be binding upon Owner and upon Owner's successors and assigns, and subsequent owners, lessees, and operators while each is an owner, lessee, or operator of the Property.

7A. ALTERATIONS, IMPROVEMENTS, AND DISTURBANCES.

i. The Owner and all subsequent owners and lessees shall notify any person of whom it has knowledge, including, without limitation, tenants, employees of tenants, developers, and contractors, intending to conduct invasive work or excavate within the Property, of the nature and location of known contamination in the Property, and, of the precautions necessary to protect the engineering controls and minimize potential human exposure to contaminants.

ii. Except as provided in the Consent Decree and Paragraph 7B below, no person shall make, or allow to be made, any alteration, improvement, or disturbance in, to, or about the Property which disturbs any engineering control at the Property except as (a) permitted in the Consent Decree and Conservation Restriction, (b) as is consistent with the OSDS, and (c) without first obtaining a Soil Remedial Action Permit modification from the Department. Nothing herein shall constitute a waiver of the obligation of any person to comply with all applicable laws and regulations including, without limitation, the applicable rules of the Occupational Safety and Health Administration.

iii. Notwithstanding subparagraph 7A.ii.(c), above, a Soil Remedial Action Permit modification is not required for any alteration, improvement, or disturbance provided that:

(A) Such action is taken in conformance with the Consent Decree, the OSDS, and this Deed Notice; and

(B) The Department of Environmental Protection is notified of the activity by calling the DEP Hotline, at 1-877-WARN-DEP or 1-877-927-6337, within twenty-four (24) hours after the beginning of each alteration, improvement, or disturbance; and

(C) Honeywell is notified of the activity by calling 855-727-2658; and

(D) Honeywell and/or the owner restores any disturbance of an engineering control to pre-disturbance conditions, consistent with the requirements of the Consent Decree and LTMP, within sixty (60) calendar days after the initiation of the alteration, improvement or disturbance; and

(E) All applicable worker health and safety laws and regulations are followed during the alteration, improvement, or disturbance, and during the restoration; and

(F) Appropriate measures are taken so that human exposure, and exposure of the environment outside the containment of the engineering controls, to contamination in excess of the applicable remediation standards does not occur; and

(G) The next biennial certification includes a description of the nature of the alteration, improvement, or disturbance, the dates and duration of the alteration, improvement, or disturbance, the name of key individuals and their affiliations conducting the alteration, improvement, or disturbance, a description of the notice the Owner gave to those persons prior to the disturbance, the amounts of soil generated for disposal, if any, the final disposition and any precautions taken to prevent exposure.

7B. EMERGENCIES. In the event of an emergency which presents, or may present, an unacceptable risk to the public health and safety, or to the environment, or immediate environmental concern, see N.J.S.A. 58:10C-2, any person may temporarily breach an engineering control provided that:

i. The Department of Environmental Protection is immediately notified of the emergency, by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

ii. Immediately after notifying NJDEP, Honeywell is notified of the emergency by calling 855-727-2658; and

iii. Both the actual disturbance and the time needed for the disturbance are limited to the minimum reasonably necessary to adequately respond to the emergency; and

iv. All measures necessary to limit actual or potential, present or future risk of exposure to humans or the environment to the contamination are implemented; and

v. The Department of Environmental Protection is notified when the emergency has ended by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

vi. Honeywell is notified when the emergency has ended by calling 855-727-2658; and

vii. Honeywell restores the engineering control to the pre-emergency conditions, consistent with the requirements of the Consent Decree and LTMP, as soon as possible, and submits a written report to the Department of Environmental Protection of such emergency and restoration efforts within sixty (60) calendar days after completion of the restoration of the engineering control. The report must include all information pertinent to the emergency, potential discharges of contaminants, and restoration measures that were implemented, which, at a minimum, should specify: (a) the nature and likely cause of the emergency, (b) the potential discharges of or exposures to contaminants, if any, that may have occurred, (c) the measures that have been taken to mitigate the effects of the emergency on human health and the environment, (d) the measures completed or implemented to restore the engineering control, and (e) the changes to the engineering control or site operation and maintenance plan to prevent recurrence of such conditions in the future. Honeywell shall submit the report to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413

8A. MONITORING AND MAINTENANCE OF DEED NOTICE, AND PROTECTIVENESS CERTIFICATION. The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the persons responsible for conducting the remediation, Honeywell, the Owner, and the subsequent owners, lessees, and operators, shall monitor and maintain this Deed Notice. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. Honeywell shall certify to the Department on a biennial basis that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the deed notice shall include all of the following:

i. Monitoring and maintaining this Deed Notice according to the requirements in Article III of the Consent Decree, and Exhibit C herein, to ensure that the remedial action that includes the Deed Notice continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes this Deed Notice, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

8B. MONITORING AND MAINTENANCE OF ENGINEERING CONTROLS, AND PROTECTIVENESS CERTIFICATION. Honeywell shall maintain all engineering controls at the Property and certify to the Department on a biennial basis that the remedial action of which each engineering control is a part remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the engineering controls shall include the following:

i. Monitoring and maintaining each engineering control according to the requirements in Article III of the Consent Decree, the LTMP, and Exhibit C herein, so that the remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes the engineering control remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes the engineering control, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

9. ACCESS. The Owner, subsequent owners, lessees, and operators, agree to allow the Department, its agents and representatives access to the Property to inspect and evaluate the continued protectiveness of the remedial action that includes this Deed Notice and to conduct additional remediation to ensure the protection of the public health and safety and of the environment if the persons responsible for monitoring the protectiveness of the remedial action, as described in Paragraph 8, above, fail to conduct such remediation pursuant to this Deed Notice as required by law. The Owner, and the subsequent owners and lessees, shall also cause all leases, subleases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring that all holders thereof provide such access to the Department.

10. NOTICES.

i. Owner shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of

any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. Honeywell or the Owner shall notify any person intending to conduct invasive work or excavate within the Property of the nature and location of contamination and, of the precautions necessary to minimize potential human exposure, and exposure of the environment outside the containment of the engineering controls, to contaminants.

iii. Owner shall provide written notice to the Department of Environmental Protection at least thirty (30) calendar days before the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property. Any such conveyance, grant or gift must be consistent with the terms of the Consent Decree.

iv. Owner shall provide written notice to the Department within thirty (30) calendar days following the Owner's receiving notice of any petition for a rezoning of the Property. Any such rezoning must be consistent with the terms of the Consent Decree. The Owner shall submit the written notice to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413.

11. ENFORCEMENT OF VIOLATIONS.

i. This Deed Notice itself is not intended to create any interest in real estate in favor of the Department of Environmental Protection, nor to create a lien against the Property, but merely is intended to provide notice of certain conditions and restrictions on the Property and to reflect the regulatory and statutory obligations imposed as a conditional remedial action for this Property.

ii. The restrictions provided herein may be enforceable by the Department against any person who violates this Deed Notice. To enforce violations of this Deed Notice, the Department may initiate one or more enforcement actions pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C, and require additional remediation and assess damages pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C.

iii. This Deed Notice is also enforceable in the United States District Court for the District of New Jersey by all residents, owners, lessees, and all commercial tenants on Study Areas 6 and 7 pursuant to paragraphs 80 and 83 of the Consent Decree.

12. SEVERABILITY. If any court of competent jurisdiction determines that any provision of this Deed Notice requires modification, such provision shall be deemed to have been modified automatically to conform to such requirements. If a court of competent jurisdiction determines that

any provision of this Deed Notice is invalid or unenforceable and the provision is of such a nature that it cannot be modified, the provision shall be deemed deleted from this instrument as if the provision had never been included herein. In either case, the remaining provisions of this Deed Notice shall remain in full force and effect.

13. MODIFICATION AND TERMINATION.

i. Any person may request in writing, at any time, that the Department modify this Deed Notice where performance of subsequent remedial actions, a change of conditions at the Property, or the adoption of revised remediation standards suggest that modification of the Deed Notice would be appropriate, provided that any such modification is consistent with the requirements of the Consent Decree.

ii. Any person may request in writing, at any time, that the Department terminate this Deed Notice because the conditions which triggered the need for this Deed Notice are no longer applicable.

iii. Any person seeking a modification or termination of this Deed Notice must also have such modification approved by the United States District Court for the District of New Jersey pursuant to the Consent Decree until such time as the Consent Decree terminates with regard to the Property pursuant to the Consent Decree.

iv. If the United States District Court for the District of New Jersey and NJDEP have concluded that this Deed Notice shall be modified or terminated, such modification or termination will only be effective upon the filing of a Termination of Deed Notice, available at N.J.A.C. 7:26C Appendix C, with the office of the Register of Deeds of Hudson County, New Jersey, expressly modifying or terminating this Deed Notice.

v. Within thirty (30) calendar days after the filing of a Termination of Deed Notice, the owner of the Property shall apply to the Department for modification or termination of the Soil Remedial Action Permit pursuant to N.J.A.C. 7:26C-7.

vi. This Deed Notice may be modified only if it has first been terminated pursuant to subparagraphs 13v above, and upon filing of a modified Deed Notice, executed by the Owner of the Property, in the office of the Register of Deeds of Hudson County, New Jersey.

14A. EXHIBIT A. Exhibit A includes the following maps of the Property and the vicinity:

i. Exhibit A-1: Vicinity Map - A map that identifies by name the roads, and other important geographical features in the vicinity of the Property;

ii. Exhibit A-2: Metes and Bounds Description of Property - A metes and bounds description of the Property, including reference to tax lot and block numbers for the Property and a Tax Map;

iii. Exhibit A-3: Property Maps (Exhibits A-3A and A-3B) - Scaled maps of the Property, scaled at one inch to 200 feet or less, and if more than one map is submitted, the maps shall be presented as overlays, keyed to a base map; the map(s) shall include diagrams of major surface topographical features such as buildings, roads, and parking lots. After development of the Property, this Deed Notice shall be modified to show topographical features constructed on the Property such as buildings, roads, and parking lots.

14B. EXHIBIT B. Exhibit B includes the following descriptions of the Restricted Areas:

i. Exhibit B-1 and B-2 (Exhibits B-1A, B-1B, B-2A, B-2B, and B-2C): Restricted Area Maps - Maps for the Property that include, as applicable:

(A) As-built diagrams of each engineering control, including caps, fences, hydraulic barrier walls, ground water monitoring wells, and ground water pumping system including trenches and pumps;

(B) As-built diagrams of any buildings, roads, parking lots, utility corridors, and other structures that function as engineering controls; and

(C) Designation of all soil and/or sediment sample locations within the restricted areas that exceed any soil or sediment standard that are keyed into one of the tables described below.

ii. Exhibit B-3 (Table B-3): Restricted Area Data Tables - A separate table for each restricted area that includes either (A) or (B) through (F):

(A) Only for historic fill extending over the entire site or a portion of the site and for which analytical data are limited or do not exist, a narrative that states that historic fill is present at the site, a description of the fill material (e.g., ash, cinders, brick, dredge material), and a statement that such material may include, but is not limited to, contaminants such as PAHs and metals;

(B) Sample location designation from Restricted Area map (Exhibit B-1);

(C) Sample elevation based upon mean sea level;

(D) Name and chemical abstract service registry number of each contaminant with a concentration that exceeds the unrestricted use standard;

(E) The restricted and unrestricted use standards for each contaminant in the table; and

(F) The remaining concentration of each contaminant at each sample location at each elevation (or if historic fill, include data from the Department's default concentrations at N.J.A.C. 7:26E-4.6, Table 4-2).

14C. EXHIBIT C. Exhibit C includes narrative descriptions of the institutional controls and engineering controls as follows:

i. Exhibit C-1A through C-1D. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control (attached); Exhibit C-1C: Zoning as Institutional Control; Exhibit C-1D: Conservation Restriction as Institutional Control (recorded at Hudson County Register of Deeds as indicated in Paragraph 3): Exhibit C-1 includes a narrative description of the restrictions and obligations of this Deed Notice that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
(1) Description and estimated size of the Restricted Areas as described above;
(2) Description of the restrictions on the Property by operation of this Deed Notice and the other Institutional Controls; and
(3) The objective of the restrictions;

(B) Description of the monitoring necessary to determine whether:
(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;
(2) There have been any land use changes subsequent to the filing of this Deed Notice and the other Institutional Controls or the most recent biennial certification, whichever is more recent;
(3) The current land use on the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls;
(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the Property; and
(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice and the other Institutional Controls, and conduct the necessary sampling; and

(C) Description of the following items that will be included in the biennial certification:
(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice and the other Institutional Controls;
(2) Land use at the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls; and
(3) The remedial action that includes this Deed Notice and the other Institutional Controls continues to be protective of the public health and safety and of the environment.

ii. Exhibit C-2A through C-2C. Exhibit C-2A: Engineering Controls: Clean Fill and Soil Capping System; Exhibit C-2B: Engineering Controls: Underground Containment Walls; Exhibit C-2C: Engineering Controls: Shallow Groundwater Collection and Treatment System.

Exhibit C-2 includes a narrative description of the engineering controls as follows:

(A) General Description of the engineering control:
(1) Description of the engineering control;
(2) The objective of the engineering control; and
(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:
(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;
(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;
(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;
(4) The engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;
(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering control; and
(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:
(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;
(2) The engineering control continues to operate as designed; and
(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

15. SIGNATURES. IN WITNESS WHEREOF, Owner has executed this Deed Notice as of the date first written above.

**EXHIBIT B**
**Deed Notice #1 Property**
**B-1A and B-1B Restricted Area Maps**
**B-2A and B-2B Chromium Remedy Components**
**B-3 Restricted Area Data Table**
**Portions of Block 24601, Lots 1 through 8 and a portion of Block 21901 Lot 8**
**City of Jersey City, New Jersey**

Exhibit B-1 Restricted Area Maps includes Exhibit B-1A and Exhibit B-1B (Restricted Area Soil Sample Locations).

Exhibit B-2 Chromium Remedy Components includes Exhibit B-2A (Chromium Remedy Components), Exhibit B-2B (Cap System Detail), and Exhibit B-2C (As-Built Restoration Plan).

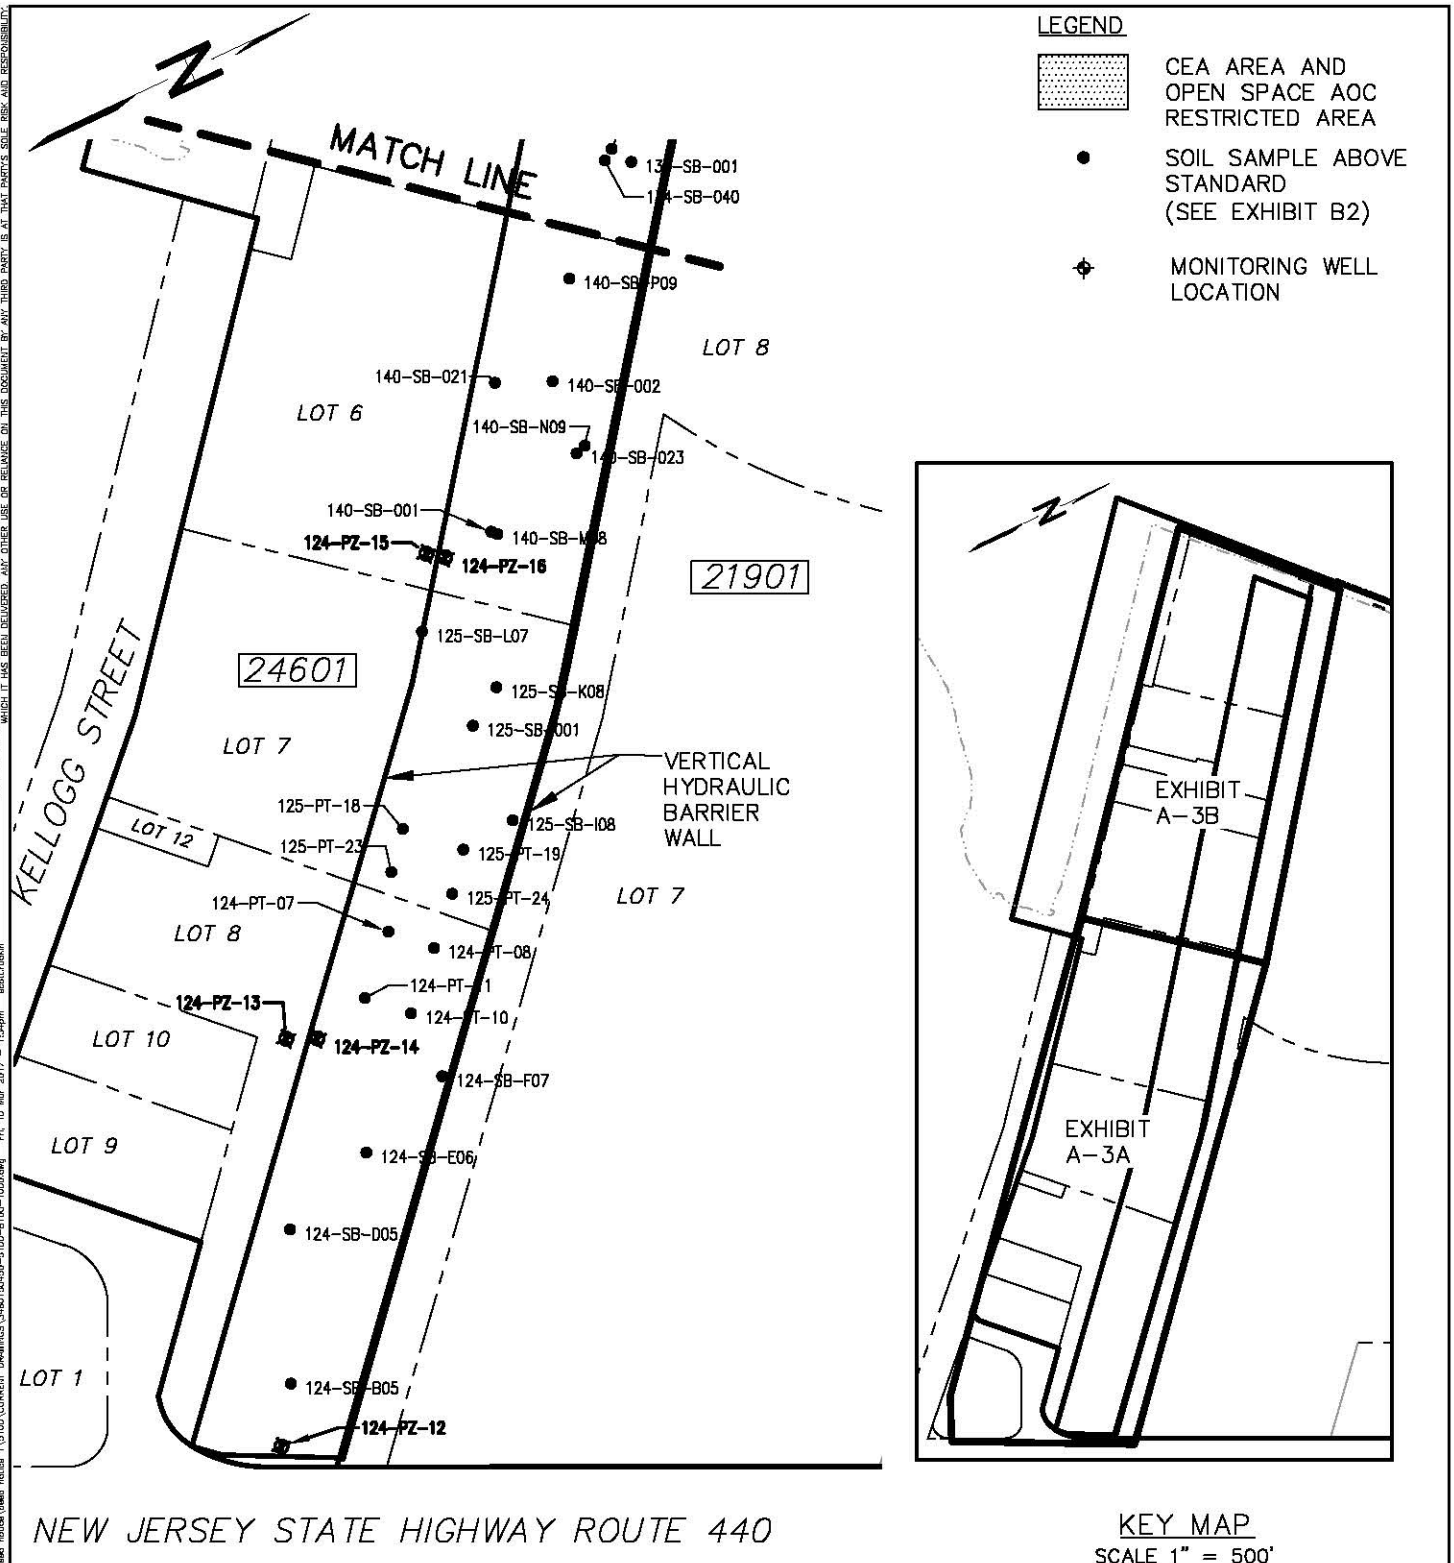
Exhibit B-3 is a Restricted Area Data Table indicating soil sample locations with concentrations of contaminants remaining above the level established in the New Jersey Department of Environmental Protection (NJDEP) Chromium Policy and/or other applicable NJDEP Soil Quality Standards as described below.

**Restricted Area Map Notes:**

Exhibits B-1A and B-1B indicate engineering controls. The engineering controls include (1) underground containment walls, and (2) a capping system consisting of: a warning layer, impervious geo-membrane liner; geo-composite drainage layer; and clean soil cover with minimum 12 inches thickness in areas where pavement is proposed; and an average of 36-inches and a minimum 24-inches thickness in areas where landscaping is proposed.

Exhibit B-2B indicates engineering controls cap system detail.

Exhibits B-1A and B-1B indicate the restricted area for soil containing contaminants of concern, including hexavalent chromium above 20 milligrams per kilogram (mg/kg) pursuant to the Chromium Policy, total xylenes above the NJDEP Residential Direct Contact Soil Remediation Standard (RDCSRS) of 12,000 mg/kg, and soils that are consistent with NJDEP's definition of "historic fill material" found at N.J.A.C. 7:26E-1.8, as shown on Exhibit B-3.



Analytical results and soil borings indicate that historic fill is present onsite and extends over the entire Restricted Area. Historic fill onsite typically consists of the following: metals, PAHs, and miscellaneous debris (including but not limited to coal fragments, brick, timber, and other construction materials).

A table summarizing maximum concentrations of typical contaminants found in the historic fill material in the Restricted Area is included as Exhibit B-3.

**Exhibit B-1A and B-1B**

NOTE:

1. REFER TO FIGURE 2 FOR CONSTRUCTION CONTROL GRID AND ATTACHED TABLES FOR SURVEY DOCUMENTATION OF 6 INCH GRAVEL HISTORIC FILL CAP INSTALLATION.
2. OPEN SPACE CAP AREA WITHIN LIMITS OF THE BARRIER WALLS IS COVERED WITH CLEAN IMPORTED SOILS TO THE DEPTHS IDENTIFIED IN THE DESIGN. THE VEGETATED SLOPE ON THE DEVELOPMENT AREA IS COVERED WITH A MINIMUM OF 12 INCHES OF CLEAN IMPORTED FILL AS SHOWN ON THE TYPICAL VEGETATED SLOPE DETAIL. THE VEGETATED SLOPE ALONG SA–7 WAS CONSTRUCTED ENTIRELY FROM CLEAN IMPORTED FILL.
3. EXISTING PAVEMENT WAS FIELD INSPECTED BY LSRP AND SUBJECT TO MINOR CRACK FILLING TO SATISFY HISTORIC FILL CAP REQUIREMENTS.
4. STEEL SHEETPILE WALL WAS INSTALLED AS EXCAVATION SUPPORT ALONG THIS AREA AND THEN CUT BELOW CURRENT GRADE AND LEFT IN PLACE. THE TOP OF SHEETPILE IS GENERALLY 0.5 TO 2.0 FT BELOW CURRENT GRADES.

NOTE: NO HISTORIC FILL SHALL BE PLACED ON SA–7

**Notes:**

Results reported in mg/kg.

* Soil sample 073-SB-326 <20 mg/kg for hexavalent chromium; total xylenes detected at 33,900 mg/kg.

**Q -Data Qualifiers:**

J - Data indicates the presence of a compound that meets the identification criteria. The concentration given is an approximate value.

**Abbreviations:**

Feet bgs - Feet below ground surface

mg/kg - milligrams per kilogram

NAVD88 - North American Vertical Datum of 1988

NJDEP Chromium SCC - New Jersey Department of Environmental Protection Chromium Soil Cleanup Criteria, revised April 2010

NJDEP RDC - New Jersey Department of Environmental Protection Residential Direct Contact Soil Standard, revised 2012

| Contaminant | CAS No. | NJDEP RDC (mg/kg) |
|---|---|---|
| Hexavalent Chromium | 18540-29-9 | 20 |
| Total Xylenes | 1330-20-7 | 12000 |

CONC: Concentration reported in milligrams per kilogram (mg/kg)

Historic fill is present throughout the Site consisting of PAH and metals.

R or N: Rejected or negated by laboratory or data validator

**EXHIBIT C**
**Deed Notice #1 Property**

**C-1 Institutional Controls**
**C-2 Engineering Controls**
**Portions of Block 24601, Lots 1 through 8 and a Portion of Block 21901 Lot 8 City of Jersey City, New Jersey**

## C-1 Institutional Controls

C-1 Deed Notice, Consent Decree, Zoning, and Conservation Restriction as Institutional Controls: Exhibit C-1 (A through D) for that portion of Block 24601, Lots 1 through 8 and Block 21901 Lot 8, City of Jersey City, New Jersey known as the Property.

Exhibits C-1A through D. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control (attached); Exhibit C-1C: Zoning as Institutional Control; Exhibit C-1D: Conservation Restriction as Institutional Control (recorded at the Office of Hudson County Register as indicated in Paragraph 3): Exhibits C-1A through C-1D include a narrative description of the restrictions and obligations of this Deed Notice and the other Institutional Controls that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
**The Property encompasses approximately 8 acres. The horizontal extent of the Property includes an existing soil-cement bentonite (SCB) wall along the northern boundary of the Property with SA-7 and the hydraulic barrier walls installed on the other three sides as part of the Chromium Remedy. The engineered barrier covering the contamination in the Property consists of an engineered Resource Conservation and Recovery Act (RCRA) cap that includes a gas collection system, base protective layer, geomembrane liner, geocomposite drainage layer, filter fabric, warning layer, and cover soils. The Property includes chromium, xylenes and historic fill. Honeywell has restricted the future use of this area by implementing a conservation restriction, which has been recorded at the Office of the Hudson County Register, and Honeywell will transfer, or cause Bayfront Redevelopment LLC to transfer, title to Jersey City (as called for in Paragraph 61(c)(ii)(3) of the Consent Decree). The provisions of the LTMP and the OSDS, developed pursuant to the Consent Decree, will apply to the Property.**

(1) Description and estimated size of the Restricted Areas as described above;

***The Property constitutes portions of Block 24601, Lots 1 through and 8 and a portion of Block 21901 Lot 8. The estimated size of the Property containing chromium-impacted soils (hexavalent chromium above 20 mg/kg) as identified on Exhibit B-1 is estimated at approximately 8 acres.***

(2) Description of the restrictions on the Property by operation of the Institutional Control;

***The Property shall only be used for activities consistent with this Deed Notice, the Consent Decree, including, but not limited to, Paragraphs 74(j) and 74 (k) of the Consent Decree, the applicable zoning standards, and the Conservation Restriction. Intrusive activities (i.e., excavation or digging) that breach the engineering controls (as described in Exhibit C-2) will not be permitted on the Property except in compliance with the terms of the Consent Decree and the LTMP developed thereunder, and this Deed Notice. See subsections 7A Alterations, Improvements, Disturbances, and 7B, Emergencies for additional information. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950.***

(3) The objective of the restrictions;

***The restrictions will prohibit contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg, soils containing xylenes above the NJDEP RDCSRS of 12,000 mg/kg for xylenes, and soils that are historic fill.***

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;

***Visual inspections of the Property and other monitoring as set forth in the Consent Decree and LTMP established thereunder.***

(2) There have been any land use changes subsequent to the filing of this Deed Notice or the most recent biennial certification, whichever is more recent;

***Same as (B)(1*).**

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice;

***Same as (B)(1).***

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the site; and

***Review of newly promulgated or modified requirements of applicable regulations or laws that potentially may apply to the Property.***

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***Same as (B)(4).***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) Land use at the Property is consistent with the restrictions in the Consent Decree, this Deed Notice, the OSDS, the applicable zoning standards and the Conservation Restriction; and

(3) The remedial action that includes this Deed Notice continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including evaluation of any available documents as a result of changes in land use or incidents.***
- ***A report that determines whether or not the land use at the Property has remained consistent with the restrictions in the Consent Decree, this Deed Notice, the OSDS, the applicable zoning standards and the Conservation Restriction.***
- ***A report that determines whether or not the Deed Notice continues to be protective of the public health and safety and the environment.***

**C-2 Engineering Controls**
**Portion of Block 24601, Lots 1 through 8 and Block 21901 Lot 8**
**City of Jersey City, New Jersey**

Exhibits C-2A through C: Narrative description of the Engineering Controls including (A) the Clean Fill and Soil Capping System; (B) Underground Containment Walls; (C) Shallow Groundwater Collection and Treatment System as follows:

(A) General Description of the engineering controls:

(1) Description of the engineering controls;

***The Engineering Controls consist of the following: (A) a capping system consisting of: a root barrier, a warning layer, impervious geo-membrane liner; geo-composite drainage layer; and clean soil cover with minimum 12 inches thickness in areas where pavement is proposed; and an average of 36-inches and a minimum 24-inches thickness in areas where landscaping is proposed. For the purposes of this deed notice, the engineering controls exclude cover soils that are within 12 inches of the root barrier. (B) Engineering controls will also include underground containment walls around the perimeter of the Property. The Engineering Controls are more fully set forth in the Consent Decree. (C) Engineering controls will also include a system of wells, sumps, french drains, or other collection trenches and associated piping for the collection and treatment of shallow groundwater from the Property.***

(2) The objective of the engineering controls; and

***The objective of the controls is to prevent contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg, soils containing xylenes above the NJDEP RDCSRS of 12,000 mg/kg, and soils that are historic fill material, and to contain shallow groundwater above the NJDEP groundwater quality standard for total chromium.***

(3) How the engineering controls are intended to function.

***The soil engineering controls are intended to function as a barrier to underlying and adjacent impacted soils as defined above. The groundwater engineering controls are intended to restrict the flow of shallow groundwater, and to collect and treat contaminated groundwater within the Property. Monitoring requirements for the engineering controls are set forth in the LTMP.***

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

***Honeywell will perform monitoring by visual inspection of the Property pursuant to the Consent Decree. Other monitoring activities shall be performed as set forth in the LTMP developed pursuant to the Consent Decree.***

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

***Same as (B)(1) above.***

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering controls;

***Same as (B)(1) above. Also, see the Consent Decree and the Deed Notice for additional information: subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies.***

(4) The engineering controls are being inspected and maintained and their integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

***Same as (B)(1) above.***

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering controls. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering controls; and

***Records of the inspections are to be maintained as listed in (5). Should the activities carried out in conformance with the LTMP developed pursuant to the Consent Decree indicate that other activities are necessary, those activities will be listed and executed.***

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***A review of any new standards, regulations, or laws will be conducted. Should the review indicate that other activities are necessary, those activities will be listed and executed.***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including an evaluation to determine whether or not the engineering controls are continuing to meet the original objective and intended function.***
- ***A report to determine whether or not the engineering controls continue to operate as designed.***
- ***A report to determine whether or not the engineering controls continue to be protective of the public health and safety and of the environment.***

91. Chromium Remedy Letter of Credit ..... 55
92. Procedures for Review of the Proposed Chromium Remedy Letter of Credit ..... 56
93. Automatic Renewal. ..... 56
94. Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit ..... 57
95. Bankruptcy Protection. ..... 58
96. Exclusive Court Jurisdiction. ..... 58
97. Application of New York Law. ..... 59
98. Procedures upon Honeywell's Material Default of Its Obligations ..... 59
99. Placement of Proceeds in Court Registry Investment System Account. ..... 60
100. Termination of Chromium Remedy Letter of Credit ..... 61
K. LONG-TERM FINANCIAL ASSURANCES ..... 61
101. Long-Term Financial Assurances. ..... 61
102. Costs Subject to Long-Term Financial Assurances. ..... 61
103. Long-Term Financial Assurance Mechanisms ..... 62
104. Procedures for Review of the Proposed Long-Term Financial Assurances ..... 66
105. Temporary Maintenance of Chromium Remedy Letter of Credit. ..... 66
106. Adjustment of Amount Held in Long-Term Financial Assurances. ..... 67
107. Exclusive Court Jurisdiction. ..... 68
108. Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired: ..... 68
109. Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default ..... 69
110. Use of the Trust Fund in the Event of Honeywell's Default. ..... 70
111. Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109. ..... 70
112. Termination of the Long-Term Financial Assurances. ..... 70

**ARTICLE IV: TERMINATION** ..... 71

113. Termination of this Consent Decree ..... 71
114. Procedures for Withdrawal and Termination. ..... 72
115. Good-Faith Obligation to Avoid Termination ..... 72
116. Effect of Termination. ..... 72

**ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC** ..... 72

117. Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC. ..... 72

**ARTICLE VI: NOTICE** ..... 73

118. Notice ..... 73
119. Payment of Past Fees and Expenses ..... 74
120. Future Fees and Expenses. ..... 75

**ARTICLE VIII: MISCELLANEOUS PROVISIONS** ..... 76

121. Force Majeure. ..... 76
122. Bayfront Redevelopment LLC as a Party. ..... 76
123. Successors and Assigns. ..... 77
124. Successors to Hackensack Riverkeeper, Inc.. ..... 77
125. Reservation of Rights and Claims. ..... 77
126. Governing Law and Continuing Jurisdiction. ..... 77
127. Construction. ..... 78
128. Authority to Enter into Agreement. ..... 78
129. Measures to Effectuate This Consent Decree ..... 78
130. Modifications. ..... 78
131. Severability. ..... 78
132. Signatures. ..... 79

## RECITALS

**Whereas,** on June 30, 2003, the district court for the District of New Jersey (hereafter "the Court") issued a Final Judgment in *Interfaith Community Organization v. Honeywell International Inc.*, Civ. No. 95-2097 (DMC) (*"ICO v. Honeywell"*), ordering the remediation of an area designated by the New Jersey Department of Environmental Protection ("NJDEP") as Study Area 7 by excavation of all chromium contamination on the property, under the oversight of a court-appointed Special Master;

**Whereas**, on or about December 23, 2005, the Jersey City Municipal Utilities Authority ("JCMUA") filed litigation styled *Jersey City Municipal Utilities Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5955 (DMC), bringing claims against Honeywell International Inc. ("Honeywell") under, *inter alia*, Section 6972 of the Resource Conservation and Recovery Act ("RCRA"), and seeking remediation of chromium contamination on property then-owned by JCMUA and other relief;

**Whereas**, on or about December 28, 2005, the Jersey City Incinerator Authority ("JCIA") filed litigation styled *Jersey City Incinerator Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5993 (DMC), bringing claims against Honeywell under, *inter alia*, Section 6972 of RCRA, and seeking remediation of chromium contamination on property then-owned by JCIA and other relief;

**Whereas**, on or about January 4, 2006, the Hackensack Riverkeeper, Inc., Captain William Sheehan, Reverend Winston Clarke, and Lawrence Baker ("Riverkeeper") filed litigation styled *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.,* D.N.J., Civ. No. 06-022 (DMC), bringing a claim against Honeywell under RCRA and seeking remediation of chromium contamination to soils, groundwater, surface waters, and sediments associated with

various properties collectively designated by NJDEP as Study Areas 5, 6 North, which includes the properties formerly owned by JCMUA and JCIA, and 6 South;

**Whereas,** Study Areas 6 North and South are directly adjacent to Study Area 7 on the north and south sides, respectively;

**Whereas,** Study Area 5 is comprised of properties to the east of Study Areas 6 North, 6 South, and 7 across Route 440;

**Whereas,** Riverkeeper also named as defendants in *Riverkeeper v. Honeywell* owners of the properties comprising Study Areas 5, 6 South, and 6 North;

**Whereas,** *JCMUA v. Honeywell*, *JCIA v. Honeywell,* and *Riverkeeper v. Honeywell* were consolidated by the Court (hereinafter the "Consolidated Litigation");

**Whereas,** in the Consolidated Litigation, Riverkeeper has alleged that Honeywell bears responsibility for the presence and remediation of chromite ore processing residue ("COPR") and chromium in soils and groundwater on the Study Area 6 South property;

**Whereas,** on April 21, 2008, the Court entered the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North (hereafter "the Study Area 6 North Consent Decree") resolving issues between Honeywell, Riverkeeper, and the Jersey City Entities related to chromium contamination at Study Area 6 North;

**Whereas**, on April 21, 2008, the district court for the District of New Jersey entered the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. (hereafter "Jersey City/Honeywell Consent Order"), filed in the Consolidated Litigation simultaneously with the Study Area 6 North Decree, which resolved claims and cross-claims between Honeywell and the Jersey City Entities;

**Whereas**, on May 28, 2008, the Court entered the Consent Order on Sediment Remediation and Financial Assurances ("Sediment Consent Order"), resolving issues related to the remediation of chromium contaminated sediments in the Hackensack River in the vicinity of Study Areas 5, 6, and 7;

**Whereas**, on September 3, 2008, the Court entered the Deep Overburden and Bedrock Groundwater Remedies Consent Order (hereafter "the Deep Groundwater Consent Order") resolving all issues related to the remediation of deep overburden and bedrock groundwater in both *ICO v. Honeywell* and the Consolidated Litigation;

**Whereas,** on May 13, 2011, Plaintiffs sent Honeywell a RCRA citizen action suit notice letter with respect to Site 163, and the Parties agree that the incorporation of Site 163 into this Consent Decree resolves any claims asserted, or that could have been asserted, in the RCRA notice letter or in any RCRA citizen suit with respect to Site 163;

**Whereas**, the Parties to this Consent Decree each believe that it is in their mutual interest to move forward productively to resolve their differences so that they can implement environmental remediation at Study Area 6 South that ensures the continued protection of human health and the environment and so that Study Area 6 and Study Area 7 can be redeveloped in keeping with Jersey City's vision for a revitalized West Side;

**Whereas,** the Local Redevelopment and Housing Law, N.J.S.A. 40A:12A-1, *et seq.*, as amended and supplemented (the "Redevelopment Law") provides for municipalities to participate in the redevelopment and improvement of areas in need of redevelopment;

**Whereas**, Study Area 6 and Study Area 7 consist of parcels which by ordinance adopted by the City Council of Jersey City on February 27, 2008, have been determined to be "areas in

need of redevelopment" under the criteria of the Redevelopment Law because of conditions prevalent on those parcels;

**Whereas**, the settlement which is the subject matter of this Consent Decree contemplates the environmental remediation of Study Area 6 South and redevelopment of the parcels that comprise Study Areas 6 and 7 to create a major mixed use project in an important section of Jersey City; and

**Whereas**, each of the actions to implement this Consent Decree have been fully considered by the Honeywell, the Riverkeeper, and Jersey City as a means to accomplish the aforesaid purposes of this settlement:

NOW, THEREFORE, IT IS HEREBY ORDERED AND DECREED AS FOLLOWS:

## ARTICLE I: DEFINITIONS

For purposes of this Consent Decree, the following terms shall have the meanings set forth in this Article:

1. **"20 to 1000 Soils"** shall mean those soils containing less than 1000 mg/kg of hexavalent chromium, but greater than 20 mg/kg. **"20 to 240 Soils"** shall mean those soils containing less than 240 mg/kg of hexavalent chromium, but greater than 20 mg/kg.

2. **Bayfront Redevelopment LLC** shall have the meaning set forth in paragraph 4.1 of the Jersey City/Honeywell Consent Order.

3. **COPR** shall mean Chromite Ore Processing Residue.

4. **Chromium Remedy or Chromium Remediation** shall mean the remedy set forth in Article III.

5. **Consolidated Litigation** shall mean *Jersey City Municipal Utility Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5955 (DMC), *Jersey City Incinerator*

*Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5993 (DMC), and *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-022 (DMC).

6. The **Court** shall mean the United States District Court of the District of New Jersey, which has jurisdiction over the Consolidated Litigation.

7. **Deep Groundwater Consent Order** shall mean the Deep Overburden and Bedrock Groundwater Remedies Consent Order entered by the Court on September 3, 2008, in both *ICO v. Honeywell* and the Consolidated Litigation.

8. **Deep Groundwater Remedy** shall mean the deep overburden and bedrock groundwater pump and treat remedy as required by the Order Approving the Deep Overburden Groundwater Remediation, entered on October 6, 2006, the Stipulation on Consent Regarding the Schedule for Implementation of Deep Groundwater Remedial Actions, entered on August 15, 2008, in *ICO v. Honeywell,* and the remedies required under the Deep Groundwater Consent Order.

9. **Development Area of Concern** ("AOC") shall mean those portions of Study Area 6 South in which the hexavalent chromium concentration in the top 20 feet of soil below ground surfaces exceeds a concentration of 20 mg/kg, and for which future uses of the property may include commercial or residential development. The Open Space AOC shall not be part of the Development AOC and vice versa. The Development AOC consists of two parts: the Kellogg Street Development AOC and the Site 163 Development AOC. Collectively, the two parts shall be referred to as the "Development AOC." The approximate boundaries of the Development AOC as a whole and its two parts are shown on Exhibit A, but the boundaries may be further defined in the implementation of the Chromium Remedy. For the Kellogg Street Development AOC, remedial measures shall assume only a residential use. For the Site 163 Development AOC, remedial measures shall be implemented with the goal of unrestricted use, but limitations

on future uses (including prohibiting residential use) in some or all of the Site 163 Development AOC may be part of the remedy as set forth in paragraph 61.

10. **Hackensack River Watershed Land Trust** shall mean the dedicated fund of the Hackensack Riverkeeper, Inc., established under Section 501(c) of the Internal Revenue Code for the purpose of acquiring and preserving open space within the Hackensack River watershed and administered by the Board of Trustees of the Hackensack Riverkeeper, Inc.

11. **Honeywell** shall mean Honeywell International Inc. and its affiliates, including 425-445 Route 440 Property LLC, Kellogg Street 80 Property LLC, Kellogg Street 60 Property LLC, and Kellogg Street/440 Property LLC.

12. **Honeywell's Treatment Plant** shall mean the treatment plant currently located at 80 Kellogg Street that is used to treat, *inter alia*, chromium contaminated groundwater.

13. ***ICO v. Honeywell*** shall mean *Interfaith Community Organization v. Honeywell International Inc.*, D.N.J., Civ. No. 95-2097 (DMC).

14. **Including** shall mean including, but not limited to.

15. **JCIA** shall mean the Jersey City Incinerator Authority.

16. **JCMUA** shall mean the Jersey City Municipal Utilities Authority.

17. **Jersey City Entities** shall mean the City of Jersey City, including the Department of Public Works ("DPW") and other agencies and branches thereof, the JCIA, and the JCMUA.

18. **Jersey City/Honeywell Consent Order** shall mean the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. entered in the Consolidated Litigation on April 21, 2008.

19. **"L-Well Groundwater"** shall mean the groundwater found at the depth of the "L" wells on and near the former bowling alley property, NJDEP Site 124, located at 427 Route 440. The L-Well Groundwater is located within what has been referred to as the plume diversion area.

20. **NJDEP** shall mean the New Jersey Department of Environmental Protection.

21. **NJDEP Chromium Directive** shall mean the Chromium Directive issued by NJDEP on February 8, 2007, and attached as Exhibit B.

22. **Open Space AOC** shall mean the portion of Study Area 6 South that is identified as The Promenade park and Grand Boulevard extending from Route 440 to the Hackensack River on page 39 of the Redevelopment Plan and for which the future uses of the property shall be restricted pursuant to paragraph 74, following remediation pursuant to paragraph 65. The Development AOC shall not be part of the Open Space AOC and vice versa. The approximate boundaries of the Open Space AOC are shown on Exhibit A, and the boundaries may be further defined in the implementation of the Chromium Remedy.

23. **Party or Parties** shall mean any one or all of the signatories to this Consent Decree.

24. **RCRA** shall mean the Resource Conservation and Recovery Act, 42 U.S.C. § 6901, *et seq.*, as amended.

25. **Redevelopment Area** shall mean Study Area 6 North, Study Area 6 South, and Study Area 7, collectively.

26. **Redevelopment Law** shall mean the New Jersey Local Redevelopment and Housing Law, N.J.S.A. § 40A:12A1, *et seq.*, as amended and supplemented.

27. **Redevelopment Plan** shall mean the Bayfront I Redevelopment Plan as adopted by Jersey City on March 12, 2008.

28. **Remedial Investigation Work Plan Addendum or RIWP Addendum** shall mean the "Remedial Investigation Work Plan Addendum Study Area 6 South" submitted to NJDEP on June 27, 2008.

29. **Riverkeeper** shall mean the plaintiffs in *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-22 (DMC), and includes the Hackensack Riverkeeper, Inc., William Sheehan, Reverend Winston Clarke, and Lawrence Baker.

30. **Sediment Consent Order** shall mean the Consent Order on Sediment Remediation and Financial Assurances, entered by the Court in *ICO v. Honeywell* and this Consolidated Litigation on May 28, 2008.

31. **Shallow Groundwater** or **Shallow Level of Groundwater** shall mean groundwater above the meadow mat, groundwater at stratigraphically equivalent depths in locations where there is no meadow mat, and groundwater that is contaminated by recent contact with COPR or other chromium soil contamination above the meadow mat and subsequently flows downward through or past the meadow mat into the upper portion of the lacustrine sediments. This does not include groundwater found in the bedrock, the deep zone, or any plume of contamination that is in both the intermediate and deep zones, as those zones are defined in the Final Groundwater Investigation Report, prepared in *ICO v. Honeywell*, dated February 2007, p. 1-2.

32. **Site** shall mean Study Area 6 South.

33. **Site Preparation Activities** shall mean those activities necessary to begin implementation of the Chromium Remedy in Article III of this Consent Decree, including, if appropriate, the temporary or permanent relocation of current activities and operations conducted on Study Area 6 South.

34. **Soil** shall mean soils, historic fill, and/or COPR.

35. The **Special Master** shall mean Senator Robert G. Torricelli, appointed as the Special Master in *ICO v. Honeywell* and the Consolidated Litigation, and his successors or whomever the Court may appoint as Special Master.

36. **Stratum O** shall mean the layer composed of soft brown silty fine sand interlayered with soft gray silty clay and fine sandy to clayey silt generally located above the meadow mat below the Historic Fill and/or COPR.

37. **Study Area 5** shall mean that property comprising Sites 79, 90, 117, 153, and 184 of the Chromate Chemical Production Waste Sites designated by NJDEP, comprising approximately 42 acres and including (a) all such property owned by Bob Ciasulli consisting of Block 1291, Lot 76, and Block 1292, Lots 1F, 47, 48, 53, and 54PL, located at 540 Route 440, Jersey City, New Jersey, (b) all such property owned by Elisabeth and Rafael Rosario consisting of Block 1292, Lot 49, located at 93 Fisk Street, Jersey City, New Jersey, (c) all such property owned by Michael Vo consisting of Block 1292, Lot 50, located at 95 Fisk Street, Jersey City, New Jersey, (d) all such property owned by NJCU consisting of Block 1286, Lots 5 and 6D and Block 1286.5, Lots 1 and 2, Jersey City, New Jersey, (e) all such property owned by Inland Southeast Jersey City LLC consisting of Lot 1, Block 1285.5 located at 440 Route 440, Jersey City, New Jersey, and (f) all such property owned by 425/445 Route 440 Property LLC, consisting of Block 1289.5, Lot E, Jersey City, New Jersey.

38. **Study Area 6 North** shall mean the property comprising Sites 87 and 88 of the Chromate Chemical Production Waste Sites designated by NJDEP, which is subject to the Study Area 6 North Consent Decree.

39. **Study Area 6 North Consent Decree** shall mean the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North, entered by the Court on April 21, 2008, in the Consolidated Litigation.

40. **Study Area 6 South** shall mean (a) that property currently owned by Bayfront Redevelopment Property LLC consisting of Site 73, located at 200 Kellogg Street Jersey City, Hudson County, New Jersey; (b) that property currently owned by Bayfront Redevelopment LLC consisting of Site 134, located at 100 Kellogg Street Jersey City, Hudson County, New Jersey; (c) that property currently owned by Bayfront Redevelopment LLC consisting of Site 140 located at 80 Kellogg Street Jersey City, Hudson County, New Jersey; (d) that property currently owned by Bayfront Redevelopment LLC consisting of Site 125, located at 60 Kellogg Street Jersey City, Hudson County, New Jersey; (e) that property currently owned by Bayfront Redevelopment LLC consisting of Site 124, Jersey City, Hudson County, New Jersey; (f) that property currently owned by Kellogg St/Harsimus Cove Realty located at 150 Kellogg Street, Jersey City, Hudson County, New Jersey, (g) that property currently owned by Bayfront Redevelopment LLC located at 38 Kellogg Street, Jersey City, Hudson County, New Jersey; (h) that property currently owned by Bayfront Redevelopment LLC located at 28 Kellogg Street, Jersey City, Hudson County, New Jersey; and (i) that property currently owned by Bayfront Redevelopment LLC, consisting of Site 163, formerly the Colonial Concrete Company, located at 75 Kellogg Street in Jersey City, Hudson County, New Jersey.

41. **Study Area 6** shall mean Study Area 6 North and Study Area 6 South, collectively.

42. **Study Area 7** shall mean (a) that property currently owned by Bayfront Redevelopment LLC located at 425 and 445 Route 440, Jersey City, Hudson County, New Jersey, and (b) that

property currently owned by Bayfront Redevelopment LLC located at 465 Route 440, Jersey City, Hudson County, New Jersey.

43. **Technical Requirements for Site Remediation** shall mean the NJDEP Technical Requirements for Site Remediation, N.J.A.C. Chapter 26E, as duly and properly promulgated and amended.

44. **Unrestricted Use** shall mean that the contaminated medium is restored to a condition or quality suitable for all uses.

## ARTICLE II: SCOPE OF THE CONSENT DECREE, JURISDICTION, AND CLAIMS RESOLVED

45. This Court has jurisdiction over the Parties and subject matter of the Consolidated Litigation pursuant to Section 6972 of RCRA.

46. For purposes of this Consent Decree, the Riverkeeper Complaint in the Consolidated Litigation states claims upon which relief may be granted against Honeywell.

47. In the event that this Decree is not terminated by one or more Parties pursuant to paragraph 113, this Consent Decree resolves, settles, and satisfies all claims by Riverkeeper against Honeywell with respect to soils, shallow groundwater and L-Well groundwater at Study Area 6 South. This Consent Decree does not resolve any claims by Riverkeeper against Honeywell with respect to Study Area 5 or property owned by Regnal Realty consisting of Block 1288.2, lot 1, located at 420 Route 440, Jersey City, New Jersey.

48. Nothing in this Consent Decree shall be construed or interpreted to waive any claim or defense any Party has asserted or may assert against any third party in the Consolidated Litigation except as explicitly stated herein.

49. This Consent Decree does not constitute an admission of liability on the part of any Party with respect to any claims, cross-claims, or counter-claims in the Consolidated Litigation.

## ARTICLE III: CHROMIUM REMEDIATION

### A. General Terms and Requirements

50. **Responsibility for Implementation of Chromium Remediation.** As between the Parties, Honeywell shall be responsible for and shall undertake remediation of COPR and chromium present in Study Area 6 South at Honeywell's sole cost and expense. Remediation of COPR and chromium present in Study Area 6 South shall be undertaken in accordance with the terms of this Consent Decree.

51. **Designation of Chromium Areas of Concern.** For the purposes of remediation, Study Area 6 South shall consist of two AOC's, designated as the Open Space AOC and the Development AOC as shown approximately on Exhibit A. The exact boundaries of the two AOC's shall be subject to further delineation during the design and implementation of the Chromium Remedy.

52. **Consistency of the Chromium Remedy with NJDEP Guidance and Remedial Action Work Plan.** The Chromium Remedy shall be consistent with the NJDEP Technical Requirements for Site Remediation, the Chromium Directive as issued by NJDEP on February 8, 2007 ("the NJDEP Chromium Directive"), and any Remedial Action Work Plan, including any modifications or addenda approved by NJDEP. Prior to submitting any Remedial Action Work Plan, Honeywell shall take all reasonable steps to ensure that the plan is consistent with the Chromium Remedy. However, this Consent Decree shall have precedence over any Remedial Action Work Plan in the event of any inconsistency. The approved Remedial Action Work Plan is a minimum standard, and the Chromium Remedy may be more protective than the remedy NJDEP approves.

53. **General Scope of the Chromium Remedy.** The Chromium Remedy shall address shallow groundwater and L-Well groundwater containing total chromium concentrations of 70 µg/l or greater and soil containing hexavalent chromium at concentrations of 20 mg/kg or greater within the top 20 feet of soil below the ground surface, and shall be consistent with the requirements set forth in this Article. The Chromium Remedy set forth in this Consent Decree addresses only the shallow and L-Well levels of groundwater (see paragraphs 69 - 72). The deep overburden and bedrock groundwater remediation, including source control, is addressed in the Deep Groundwater Consent Order.

54. **Development of a Schedule for the Chromium Remedy.** The Chromium Remedy shall be carried out diligently, and the development and implementation of any remedy required by NJDEP for non-chromium contamination shall not delay satisfaction of the milestones in the Schedule established pursuant to this paragraph. Within 90 days of entry of this Consent Decree, Honeywell shall propose a Master Schedule for the implementation of the Chromium Remedy .

(a) The Master Schedule shall incorporate the following dates:

(i) No later than August 15, 2008, Honeywell shall submit a Chromium Impacted Soils Pilot Test Work Plan to NJDEP and Riverkeeper;

(ii) No later than September 15, 2008, Honeywell shall complete field work in accordance with the RIWP Addendum;

(iii)No later than December 31, 2008, Honeywell shall submit an Initial Treatment Study Report and Remedial Action Work Plan pursuant to paragraph 86(c);

(iv) No later than July 31, 2012, Honeywell shall submit the soil and groundwater data from its 2010 and 2011 supplemental investigation of Site 163, a brief summary report, and

a designation of the boundaries of the Site 163 Development AOC to the Special Master pursuant to paragraph 86(c);

(v) No later than October 1, 2012, Honeywell shall submit an addendum to the Study Area 6 South 100% Design setting forth the 100% Design for the Site 163 Development AOC portion of the Study Area 6 South Chromium Remedy; and

(vi) Honeywell shall undertake, in good faith, to begin implementation of the Chromium Remedy by March 1, 2013.

(b) In addition, the Master Schedule shall propose deadlines for the following milestones:

(i) Submission of all documents subject to submission and review pursuant to paragraph 86(c);

(ii) Completion of those Site Preparation Activities necessary for the implementation of the Chromium Remedy;

(iii)Submission, following implementation of the soil components of the Chromium Remedy for the Development AOC, of the groundwater plans and reports required by paragraphs 70 and 72;

(iv)Completion of additional sampling for shallow groundwater delineation pursuant to paragraph 71 and a proposal for a remedy pursuant to paragraph 71, if needed;

(v) The submission of a 50% Design Report for the Chromium Remedy;

(vi) The submission of a 100% Design Report for the Chromium Remedy;

(vii) The date for completion of the installation of the Chromium Remedy;

(viii)Implementation of the long-term protections of the Open Space AOC established pursuant to paragraph 74; and

(ix) Transfer of the Open Space AOC to Jersey City pursuant to paragraph 74(a)(iii).

### B. Initial Chromium Remedy Steps: Delineation, Treatment Study, and Remedial Action Work Plan

55. **Delineation of Development AOC.** Honeywell shall conduct further soil sampling on Study Area 6 South in accordance with the RIWP Addendum. In addition to the locations set forth in the RIWP Addendum, Honeywell shall conduct further soil sampling pursuant to the provisions of the RIWP Addendum at the boring locations set forth in Exhibit E. Upon completion of the soil sampling required by this paragraph, Honeywell shall submit a Second Supplemental Remedial Investigation Report that sets forth the results of the sampling and Honeywell's proposal as to the delineation of the Development AOC. In conjunction with its proposal, Honeywell shall set forth its rationale as to whether prior sampling data should be included or excluded in the proposed delineation. The soil sampling and submission of a Second Supplemental Remedial Investigation Report shall be completed in accordance with the Schedule set forth in paragraph 54. Honeywell shall submit the Second Supplemental Remedial Investigation Report pursuant to paragraph 86(c). The Site 163 Development AOC shall be exempt from the requirements of paragraphs 55-58.

56. **Conduct of a Treatment Study in the Development AOC.** Honeywell shall conduct a field study of the efficacy of *in situ* treatment of 20 to 1000 Soils in accordance with the Chromium Impacted Soil Pilot Test Work Plan. The purpose of the pilot test shall be to evaluate whether *in situ* chemical treatment of 20 to 1000 Soils with one or more reductants can result in the permanent establishment of hexavalent chromium concentrations below 20 mg/kg under conditions in those areas of the Development AOC that may be subject to treatment as a remedy. Honeywell shall provide the raw data from the pilot test to NJDEP and Riverkeeper in scientifically useable electronic form as soon as the data become available. Honeywell shall

submit an Initial Treatment Study Report setting forth the initial results of the pilot test pursuant to paragraph 86(c) .

57. **Continued Monitoring of the Treatment Study.** As the result of the need to complete Study Area 7 remediation, to maintain Study Area 7 remediation support operations currently located on Study Area 6 South, and to conduct Site Preparation activities including the relocation of operating businesses on Study Area 6 South in advance of implementation of the Chromium Remedy, the Parties do not anticipate that implementation of field work for the Chromium Remedy will begin until March 1, 2013. Honeywell shall continue to monitor the performance of the pilot test and shall submit a Final Treatment Study Monitoring Report assessing the long term effectiveness of treatment for 20 to 1000 Soils in the Development AOC pursuant to paragraph 86(c) no later than December 31, 2011.

58. **Submission of a Remedial Action Work Plan.** On or before December 31, 2008, Honeywell shall submit a Remedial Action Work Plan for the Chromium Remedy pursuant to paragraph 86(c). The Remedial Action Work Plan shall be consistent with the Chromium Remedy set forth in this Consent Decree.

### C. Development AOC Soil Remedy

59. **Remedial Components.** In the Development AOC, soils containing hexavalent chromium at concentrations greater than 20 mg/kg shall be remediated as follows:

(a) Soils with a concentration greater than 1000 mg/kg shall be:

(i) Excavated and disposed of off-site at a waste disposal facility licensed to accept such waste; or

(ii) Treated *ex situ* and consolidated under the cap in the Open Space AOC provided the requirements of paragraphs 60 and 63 are satisfied and provided that such soils do not

require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a).

(b) 20 to 1000 Soils shall be:

(i) Excavated and consolidated within the Open Space AOC provided that such soils do not require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a); or

(ii) Excavated and disposed of off-site pursuant to the requirements of paragraph 59(a); or

(iii) Remediated pursuant to paragraphs 59(c) or 59(d) provided that such soils are also 20 to 240 soils and meet the requirements of paragraphs 59(c) or 59(d).

(c) 20 to 240 Soils may be remediated by excavation and consolidation within the Study Area 6 North AOC 1 Open Space Area, provided that such soils do not require venting of gases and shall not serve as the basis for the inclusion of gas venting as part of the Study Area 6 North AOC 1 Open Space Area remedy.

(d) 20 to 240 Soils within the Site 163 Development AOC may be remediated by *in situ* treatment, provided the requirements of paragraph 61 are satisfied.

60. **Treatment and Consolidation of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** *Ex situ* treatment and consolidation under the Open Space AOC cap may be used as a remedial component for soils containing greater than 1000 mg/kg hexavalent chromium provided that the requirements of this paragraph are satisfied:

(a) Honeywell demonstrates in the Final Treatment Study Monitoring Report that the proposed treatment will likely result in the reduction of the hexavalent chromium concentration of the treated soils such that the post-treatment total chromium concentration shown by Toxicity

Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C);

(b) Following a review of the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d), NJDEP agrees that Honeywell has made the demonstration required by paragraph 60(a).

(c) Plaintiffs have had an opportunity to review and comment on the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d)and pursuant to the Special Master review process set forth in paragraphs 86(e)-86(f); and

(d) Following review of the demonstration required by paragraph 60(a) pursuant to the Special Master review process set forth in paragraph 86(f), the Special Master issues a recommendation finding that Honeywell has made the demonstration required by paragraph 60(a) or the Court finds that Honeywell has made the demonstration required by paragraph 60(a) in the event that any Party seeks the Court's review of the Special Master's recommendations under this paragraph.

61. **Treatment as a Remedial Component for 20 to 240 Soils.** *In situ* treatment may be used as a remedial component for the 20 to 240 Soils in the Site 163 Development ACO, provided that such soils are 3 feet or more below ground surface and the requirements of this paragraph are satisfied:

(a) If Honeywell elects to treat *in situ* 20 to 240 Soils in the Site 163 Development AOC, Honeywell shall include in the 100% Design Addendum for Site 163 a plan for such treatment. Such treatment plan shall be comparable in detail and approach to the pipeline treatability plan which is Appendix F to the Study Area 6 North 100% Design. The goal of such *in situ* treatment

shall be to reduce hexavalent chromium soil concentrations to less than 20 mg/kg in soils 20 feet or less below ground surface;

(b) Three years after conducting the treatment set forth in subparagraph (a), Honeywell shall collect additional soil samples in the treated areas to evaluate the success of the treatment. These soil samples shall be analyzed for EH, pH, hexavalent chromium (using EPA/NJDEP Methods 3060A/7199), and sulfides (using EPA Method 9030B). Within 60 days of its receipt of the final data from such sampling, Honeywell shall submit a report with such data to the Special Master pursuant to paragraph 86(c);

(c) In the event that the sampling pursuant to subparagraph (b) shows that soils with greater than 20 mg/kg hexavalent chromium remain or that excess treatment reductant remains present, Honeywell may elect to pursue one or more of the following approaches after providing notice to the Special Master, Riverkeeper and the Jersey City Entities;

(i) In the case of excess treatment reductant remaining in the soil, continue to monitor such areas pursuant to subparagraph (b) until the excess reductant is no longer present;

(ii) In the case of soils with greater than 20 mg/kg hexavalent chromium:

(1) Excavate such soils and consolidate them under the cap in the Open Space AOC, consolidate them under the cap in the Study Area 6 North AOC 1 Open Space Area, and/or dispose of them off-site provided that in each instance the applicable requirements of paragraph 59 are satisfied;

(2) Conduct further *in situ* treatment using additional treatment reductant and submit a monitoring plan pursuant to paragraph 64; or

(3) In the event that the soils are within the areas depicted as River Front Park, Riverfront Drive or Kellogg Street on page 39 of the Redevelopment Plan, cover the affected

soils with a road, walkway, and/or other hardscape and restrict the use of that area through each of the following institutional controls:

(a) Issuance and recording of a conservation restriction comparable to that required under paragraphs 74(b) and 74(d);

(b) Transfer of title to that area to Jersey City pursuant to paragraphs 74(a)(iii) through 74(a)(iv)(2); and

(c) Issuance and recording of a deed notice comparable to that required under paragraphs 74(c) and 74(d).

62. **Submissions Related to Site 163.** Pursuant to the Schedule, Honeywell shall prepare and submit the following with regard to Site 163:

(a) A summary report of all chromium soil and groundwater data collected during site investigations in 2010 and 2011; and

(b) An addendum incorporating Site 163 into the 100% Design.

63. **Post-Treatment Analysis of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** In the event that *ex situ* treatment is used as a final remedy for any portion of the soils containing greater than 1000 mg/kg pursuant to paragraph 59(a)(ii), Honeywell shall conduct post-treatment analysis of each treated batch of soil to demonstrate that the treatment has resulted in the reduction of the hexavalent chromium concentration such that the post-treatment total chromium concentration shown by Toxicity Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C). Such monitoring and demonstration shall be made prior to consolidation of the treated soils under the Open Space AOC cap pursuant to paragraph 59(a)(ii). In the event that Honeywell fails to make the demonstration required by this paragraph,

Honeywell shall dispose of the soils off-site at a waste disposal facility licensed to accept such waste.

64. **Post-Treatment Monitoring for 20 to 1000 Soils.** In the event that *in situ* treatment is used as a final remedy for any portion of the 20 to 1000 Soils, Honeywell shall conduct post-treatment monitoring to demonstrate that the treatment has resulted in permanent hexavalent chromium concentrations of less than 20 mg/kg in the treated area. Honeywell shall propose a program of post-treatment monitoring in a document that is submitted pursuant to paragraph 86(c). In the event that Honeywell fails to make the demonstration required by this paragraph, Honeywell shall propose further remedial actions pursuant to paragraph 59 in a document that is submitted pursuant to paragraph 86(c).

**D. Open Space AOC Components of the Chromium Remedy**

65. **Open Space AOC Soil Remedy.** In the Open Space AOC, the soil remedy shall consist of an engineered RCRA cap to isolate contaminated soils with gas venting, if necessary, to address the generation of methane and other naturally occurring gases in the Stratum O and/or Stratum D in the Open Space AOC. Soils consolidated under the cap, pursuant to paragraph 59(b)(i), shall not require gas venting and shall not be the basis for the inclusion of gas venting as a component of the cap. The cap shall be designed and constructed so that:

(a) The cap shall consist of a gas collection system, if gas venting is necessary, a base protective layer, an impervious geomembrane liner with a minimum thickness of 40 mil; a geocomposite drainage layer; a filter fabric; and a distinctive colored warning layer with markings in English and Spanish that would deter penetration of the cap in the event that digging occurred in the vicinity of the cap;

(b) All utilities, including those supporting the pump-and-treat system for groundwater remediation, with the exception of any extraction wells or collection trenches, shall be placed above the cap (but may be below the ground surface and/or contained within utility corridors). In the event that above-cap-grade gas collection and treatment is selected or is needed to meet current or future regulatory requirements, such collection and treatment facilities are prohibited in the Open Space AOC, except for piping to connect the sub-liner collection system with the treatment facilities; and

(c) Exclusive of roadways, the cap shall be overlain by layers of clean fill, backfill and/or overburden with an average depth of at least three feet and a minimum depth of at least two feet provided that any layer that incorporates overburden shall be below at least two feet of clean fill. Any clean fill or backfill soil brought to the Site will either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master. One foot of clean fill, covered with bituminous blacktop, shall be sufficient cover where roads, walkways, or other paved surfaces are located within the Open Space AOC. All clean soil fill in areas that will not involve paved roads, walkways, or other paved surfaces shall be vegetated in such a manner as to protect and maintain the required depth of the clean soil fill and to ensure that such vegetation shall not cause any interference with or penetration of the cap.

(d) The existing overburden soils in the Open Space AOC shall first be stripped off and set aside for use. If hexavalent chromium concentrations in the overburden exceed 20 mg/kg, the overburden shall be placed under the cap. If hexavalent chromium concentrations in the overburden do not exceed 20 mg/kg, the overburden may be placed above the cap but below the

two feet of clean fill required by paragraph 65(c). Excavated 20 to 1000 Soils from the Development AOC shall be placed and spread in the Open Space AOC under the cap. Both the chromium impacted soils and the previously stripped overburden shall be suitably compacted according to design specifications. Debris, to the extent it would interfere with the compaction specification requirements of the 100% Design, shall not be placed under the cap. The engineered cap shall be installed over the chromium-impacted soils exceeding 20 mg/kg hexavalent chromium.

**E. Demolition, Grading, and Backfill Requirements**

66. **Demolition and Grading Activities.** During demolition and grading activities, adequate protective measures shall be taken to protect site workers and the community from airborne dusts and exposures to contaminated soils.

67. **Backfill Requirements.** Soils excavated from the Development AOC shall be replaced with backfill soil. Any backfill soil brought to the Site shall either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master.

68. **Vegetation of Clean Fill.** All clean soil fill in areas that will not involve paved roads, sidewalks, paths, walkways, or building structures shall be vegetated in such a manner to protect and maintain the required depth of clean soil fill.

**F. Groundwater Components of the Chromium Remedy**

69. **Shallow Groundwater Remedy for the Open Space AOC.** The Open Space AOC shallow groundwater remedy shall consist of hydraulic barriers with a pump-and-treat system designed to isolate shallow groundwater and to intercept and treat shallow groundwater flowing

above the meadow mat in the Open Space AOC to the extent that such groundwater contains total chromium in concentrations in excess of 70 µg/l. The shallow groundwater remedy shall consist of the following:

(a) The existing soil/cement/bentonite wall on the boundary of Study Area 6 South and Study Area 7 shall be incorporated into the other engineering controls;

(b) Subterranean slurry walls or other hydraulic barriers shall be installed along the southern, eastern and western sides of the Open Space AOC and keyed into the meadow mat or Stratum O or to comparable depths below ground surface;

(c) A groundwater extraction system shall be established that shall consist of (i) one or more shallow extraction wells, sumps, or french drains within the Open Space AOC; (ii) pumps; and (iii) underground piping to convey any extracted water to Honeywell's Treatment Plant;

(d) The capture zone for the shallow groundwater remedy shall include at least the entire area of contaminated shallow groundwater within the Open Space AOC;

(e) A plan for control of water levels shall be developed;

(f) In the event that underground structures are demolished, the plans shall address the need for special attention for structures that extend below the meadow mat in order to control needed water levels; and

(g) Honeywell shall submit such information as is required to allow NJDEP to establish a classification exception area for groundwater at the Site, in accordance with NJDEP regulations.

70. **The Shallow Groundwater Remedy for the Development AOC.** Following implementation of the Development AOC soil components of the Chromium Remedy, Honeywell shall submit a report to (a) determine whether shallow groundwater remaining in the

Development AOC exceeds 70 µg/l total chromium and, (b) if so, evaluate the need for further remedial measures to address any such shallow groundwater remaining in the Development AOC with total chromium concentrations in excess of 70 µg/l. This evaluation shall be subject to review and comment by the Parties and approval by the Special Master.

(a) In the event that the evaluation demonstrates that further remedial measures are necessary, Honeywell shall propose such measures subject to review and comment by the Parties and approval by the Special Master;

(b) The capture zone of any remedy shall include at least the entire area of contaminated shallow groundwater except for shallow groundwater that is captured and subject to the shallow groundwater remedy for the Open Space AOC pursuant to paragraph 69;

(c) In the event that a pump-and-treat system is selected as a contingency measure for shallow groundwater in the Development AOC, all infrastructure for the pump-and-treat contingency system that is needed to ensure that the contingency system is fully operational, as required by paragraph 70(d), shall be installed prior to or in conjunction to any development of the Site. This includes at least one shallow extraction well, sump, or french drain, and the piping to convey any extracted groundwater to Honeywell's water treatment plant;

(d) If it is determined that the pump-and-treat contingency system must be activated, the pump-and-treat system shall be operational no later than six months after the date of the determination.

71. **Off-Site Shallow Groundwater Remedy.** Honeywell shall propose additional sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site. Honeywell shall submit a report of the results of such sampling and, in the event that contaminated shallow groundwater is found to extend off-site, a proposal for a remedy based on

such results. The report and the proposal for a remedy shall be subject to review and comment by the Parties and approval by the Special Master.

72. **L-Well Groundwater Remedy.** At the time this Decree is entered, the L-Well Groundwater is contained and not contributing to further contamination of surrounding waters and/or soils. However, in order to verify that this status continues following implementation of the Chromium Remedy, including any groundwater remedial measures pursuant to paragraphs 70 and 71, Honeywell shall propose a plan for one round of monitoring designed to evaluate whether the L-Well Groundwater remains contained. The plan shall include monitoring for total and hexavalent chromium and major ion chemistry to determine whether there has been movement in the L-Well Groundwater.

(a) In the event that no substantial change is detected in the major ion chemistry, no further action is required unless paragraph 72(c) is applicable.

(b) In the event that substantial changes are detected in the major ion chemistry, Honeywell shall propose a plan for further monitoring of the L-Well Groundwater. Such a plan shall be subject to review and comment by the Parties and approval by the Special Master.

(c) In the event that the initial monitoring or monitoring conducted pursuant to paragraph 72(b) demonstrates that proximate waters have total chromium concentrations in excess of 70 µg/l, regardless of whether there is a change in the major ion chemistry, Honeywell shall propose a remediation plan for the L-Well Groundwater. Such remediation plan shall be subject to review and comment by the Parties and approval by the Special Master.

### G. Permits and Authorizations

73. **Permits and Authorizations.** Honeywell shall obtain all necessary federal, state, and local permits and authorizations to carry out the Chromium Remedy as set forth in this Article.

## H. Long-Term Monitoring, Maintenance, and Protection of Engineering and Institutional Controls

74. **Protection of the Open Space AOC.** Except as provided in paragraphs 74(j) and 74(k), development in the Open Space AOC shall be prohibited. The Open Space AOC shall be protected against activities that may jeopardize the integrity of the cap and/or the groundwater remedial measures that shall be installed in the Open Space AOC pursuant to the Chromium Remedy or that may impede the long-term monitoring and maintenance of the cap and/or groundwater remedial measures. It is the intention of the Parties to implement different layers of protection, which alone or in concert, impose restrictions on development, run with the land, and survive all parties. Accordingly, the following actions shall be taken pursuant to the Schedule provided in paragraph 54:

(a) **Ownership of and Access to the Open Space AOC.** Ownership of and access to the Open Space AOC shall be in accordance with the following:

(i) Bayfront Redevelopment LLC, as the current owner in fee simple absolute of all property that comprises the Open Space AOC, shall not convey any rights or interests in any parcel that comprises the Open Space AOC property except as provided in this Decree. Within 90 days of entry of this decree, Bayfront Redevelopment LLC shall give Jersey City an option to buy all of the Open Space AOC property prior to the planned transfer pursuant to paragraph 74(a)(iii). Such option to buy shall be subject to the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall exercise the option to buy the Open Space AOC in the event that the conditions allowing for withdrawal of funds from the financial assurance mechanisms under paragraphs 98(c) or 98(d) are met;

(ii) Within 90 days of the entry of this Consent Decree, Bayfront Redevelopment LLC shall grant a conservation restriction for the Open Space AOC pursuant to the requirements of paragraph 74(b);

(iii) Upon the final construction of all roads and utility corridors within the Open Space AOC, Bayfront Development LLC shall donate good and marketable title to all the land comprising the Open Space AOC to Jersey City. In conjunction with such donation, Bayfront Redevelopment LLC shall petition to subdivide the properties within Study Area 6 South to create a new parcel(s) comprising the Open Space AOC. At the time of the donation, Jersey City shall grant Honeywell an easement for the purpose of monitoring and maintaining the Chromium Remedy. Jersey City shall also grant Honeywell all necessary access to the Open Space AOC by license or such other mechanisms as may be appropriate for purposes of monitoring and maintaining the Chromium Remedy. After it acquires title pursuant to this paragraph, Jersey City shall retain ownership of the Open Space AOC unless and until it shall have complied with the requirements of paragraph 74(a)(iv);

(iv)After it acquires title pursuant to this paragraph, Jersey City shall not convey or enter into any lease of the Open Space AOC to any other person or entity unless it has first satisfied either of the following conditions:

(1) Jersey City has obtained the Special Master's (or if the Special Master's appointment has expired, the Court's) approval to convey the Open Space AOC to a government entity that has the capacity and willingness to fulfill Jersey City's obligations under the Consent Decree with respect to the Open Space AOC and such entity agrees to submit to the Court's jurisdiction and to be bound by the requirements of the Consent Decree that Jersey City has committed to fulfill with respect to protection of the Open Space AOC pursuant to this paragraph

and routine maintenance of the permissible development in the Open Space AOC pursuant to paragraph 78(d); or

(2) The Open Space AOC has been remediated such that no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive, and Jersey City has demonstrated to the Special Master and/or the Court, as appropriate, that such remediation has been completed in accordance with all applicable requirements.

(b) **Conservation Restriction.** Prior to the grant of the option to buy pursuant to paragraph 74(a)(i), Bayfront Redevelopment LLC shall grant an open space conservation restriction, pursuant to N.J.S.A. 13:8-B-1, *et seq.*, over the Open Space AOC substantially in the form set forth in Exhibit C. Exhibit C is a conservation restriction that is consistent with the terms of this paragraph and this Consent Decree. The conservation restriction shall allow for the implementation, maintenance, monitoring, repair and replacement of the Chromium Remedy and development consistent with paragraphs 74(j) and 74(k), including the construction and placement of roads and utilities. The Conservation Restriction shall also allow for current uses of the Open Space AOC to continue until such time as construction of the Chromium Remedy begins. The Hackensack River Watershed Land Trust shall be the primary holder of the conservation restriction, with all rights of monitoring and enforcement. Riverkeeper shall propose an entity to serve as the secondary holder of the conservation restriction subject to comment by the Parties and review by the Special Master. The secondary holder shall have secondary rights of monitoring and enforcement.

(i) The conservation restriction shall be incorporated into this Consent Decree and made part of this Consent Decree. The final, executed conservation restriction shall be lodged with the Court and entered as an order of the Court. The conservation restriction shall be enforceable in this Court, in the same manner as this Consent Decree.

(ii) The conservation restrictions provided under this Consent Decree shall be consistent with the prohibited and permitted development of the Open Space AOC as set forth in paragraphs 74(j) and 74(k) below.

(iii) Jersey City shall not take any action, whether through exercise of any power of eminent domain, application to the State of New Jersey for approval of a diversion of public park or recreation land, legal challenge to the validity or enforceability of the conservation restriction, or otherwise, the effect of which would be to in any way terminate, abrogate, or diminish the terms, conditions, or purposes of the conservation restriction. If, notwithstanding the preceding sentence, Jersey City proceeds with a condemnation or other action, the result of which would be to terminate, abrogate, or otherwise diminish the terms, conditions, or purposes of the conservation restriction, Jersey City shall, before taking any such action satisfy all of the conditions set forth in paragraph 74(a)(iv)(2).

(iv) Notwithstanding the foregoing, the conservation restriction may be terminated upon application of any Party when no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive.

(c) **Deed Notice.** Upon completion of the Chromium Remedy, the Open Space AOC shall be subjected to the deed notice substantially in the form set forth in Exhibit D that restricts

future activities on the Open Space AOC. Nothing in the deed notice shall be construed as preventing the imposition of more stringent restrictions on the development allowed in the Open Space AOC pursuant to this paragraph and, in particular, the conservation restriction provided for in paragraph 74(b).

(d) **Recording of the Consent Decree, Conservation Restriction, and Deed Notice.** This Consent Decree, the conservation restriction imposed pursuant to paragraph 74(b), and the deed notice imposed pursuant to paragraph 74(c) shall be recorded, pursuant to N.J.S.A. §§ 46:15-1.1, 46:16-1.1, and 46:16-2, in the office of the Hudson County Register and a conspicuous reference to the Consent Decree, conservation restriction, and deed notice shall be included in all instruments concerning title to the Open Space AOC. Any Party shall have the right, periodically, but no more than once every 25 years, to record memoranda or other instruments that reference, incorporate, or attach this Consent Decree, the conservation restriction, the deed notice, and/or any further orders of the Court related to the Open Space AOC in the real estate records related to the Open Space AOC.

(e) **Zoning.** Pursuant to the Redevelopment Plan, the Open Space AOC is designated for open space and park. Jersey City shall not amend or change this designation unless it first satisfies the requirements of paragraph 74(a)(iv)(2).

(f) **Recreation and Open Space Inventory.** Upon acquiring fee simple absolute title to the Open Space AOC, Jersey City shall add those portions of the Open Space AOC not covered by roads, the pedestrian thoroughfare, and utility corridors adjacent to roads onto its Green Acres Program Recreation and Open Space Inventory ("ROSI") pursuant to N.J.A.C. § 7:36 and shall specify in such listing that it is subject to (i) Honeywell's prior easement to monitor, maintain, repair, and replace the Chromium Remedy; (ii) the actions necessary to implement, monitor,

maintain, repair, and replace the Chromium Remedy; (iii) the actions necessary to install any development permissible under paragraphs 74(j) and 74(k); and (iv) the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall also take all steps necessary or appropriate to notify the New Jersey Green Acres Program that such portions of the Open Space AOC have been added to its ROSI, such that those portions of the Open Space AOC shall thereafter be subject to all procedural and regulatory requirements applicable under the Green Acres Program, including prohibitions against diversion.

(g) **Eminent Domain.** If all or part of the Open Space AOC is taken in exercise of the power of eminent domain, or acquired by purchase in lieu of condemnation, by any public, corporate, or other authority so as to terminate, abrogate, or limit the restrictions created by this Consent Decree or the conservation restriction imposed pursuant to paragraph 74(b), in whole or in part, any Party may take appropriate actions to challenge such taking if there is a reasonable legal basis for doing so. In the event that the Parties are unable to prevent a taking notwithstanding their reasonable and appropriate efforts, any Party may take appropriate actions to recover the full value of the interests in the Open Space AOC subject to the taking or in lieu purchase, and all direct and incidental damages, costs, and fees occasioned thereby.

(h) **Environmental Covenant.** In the event that New Jersey enacts the Uniform Environmental Covenants Act or its substantial equivalent, the Parties shall address the issue of whether an environmental covenant shall be established for the Open Space AOC under the statute. If the Parties are unable to reach agreement on establishment of an environmental covenant, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of an environmental covenant if it would provide substantial additional protection for the Open Space AOC without

unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(i) **Future Protections.** Any Party shall have the right to propose consideration of additional or substitute protections for the Open Space AOC. If the Parties are unable to reach agreement with regard to the proposal, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of additional or substitute protections for the Open Space AOC if they would provide substantial additional protection for the Open Space AOC without unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(j) **Prohibited Development in Open Space AOC.** Only development satisfying the requirements of this paragraph and paragraph 74(k) shall be permitted in the Open Space AOC. All other development in the Open Space AOC shall be prohibited.

(i) Honeywell shall establish Open Space Design Standards that shall govern all development in the Open Space AOC regardless of when the construction or installation of permissible development occurs. The Open Space Design Standards shall satisfy each of the requirements set forth in paragraph 74(j)(v) and shall set forth the requirements for development that are necessary for the protection of the integrity of the Chromium Remedy.

(ii) The Initial Development in the Open Space AOC shall be the development undertaken following the completion of the Chromium Remedy in the Open Space AOC. The Initial Development may occur in one or more phases. Honeywell and Bayfront

Redevelopment LLC shall prepare a Development Plan before the initiation of each phase of the Initial Development. The Initial Development Period for each phase shall consist of the period covered by the Initial Development, plus a period of 10 years following the submission of the as-built documentation for the phase pursuant to paragraph 74(j)(viii).

(iii) The Special Master shall have jurisdiction to review the Open Space Design Standards and the Development Plan(s) solely for the purpose of ensuring that any development undertaken during the Initial Development Period is consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy. The Special Master's jurisdiction with regard to development in the Open Space AOC shall run through the Initial Development Period for each phase.

(iv) Honeywell shall ensure that the requirements of this paragraph and paragraph 74(k) are satisfied with regard to any development undertaken within the Initial Development Period. Honeywell shall also ensure that any development undertaken within the Initial Development Period is designed and installed in a manner consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy.

(v) Any development undertaken in the Open Space AOC, regardless of when undertaken, shall satisfy each of the following requirements:

(1) It shall not jeopardize the integrity of the Chromium Remedy;

(2) It shall be limited to the types of development permitted under paragraph 74(k);

(3) It shall be consistent with this Consent Decree, including the conservation restriction imposed pursuant to paragraph 74(b), and the Redevelopment Plan; however, in the

event of any conflict or inconsistency between this Decree and the Redevelopment Plan, this Decree shall govern;

(4) In total, at least 75% of the Open Space AOC, exclusive of the acreage used for roads and the pedestrian thoroughfare, shall be comprised of landscaping, as defined by paragraph 74(k)(xi);

(5) The portion of the Open Space Design Standards necessary for protection of the Chromium Remedy as related to all roads, the pedestrian thoroughfare and associated utility corridors as well as the general location of such items shall be included in the 100% Design of the Chromium Remedy;

(6) If the lowest elevation for the bedding for any utility line, including irrigation or sprinkler lines, is two feet from the top of the warning layer of the cap, the utility line shall be placed in a utility corridor;

(7) In any event, there shall be two feet of soil or more between the warning layer of the cap and the lowest elevation of the bedding for any irrigation or sprinkler lines; and

(8) No permanent concession facilities shall be permitted.

(vi) Honeywell shall submit the Open Space Design Standards and the Development Plan(s) for any development undertaken during the Initial Development Period pursuant to the requirements of paragraph 86(c), except that such documents need not be submitted to NJDEP. Following Honeywell's submission of such documents, the procedures of paragraphs 86(e) and 86(f) shall apply, except that the Special Master need not provide notice to NJDEP.

(vii) During the Initial Development Period, any development in the Open Space AOC shall require the preparation and submission of a Development Plan pursuant to

paragraph 74(j)(vi) and such Development Plan shall be subject to review by the Special Master pursuant to paragraph 74(j)(iii).

(viii) Upon completion of each phase of the Initial Development, Honeywell shall provide as-built documentation for the Initial Development to the Special Master, Riverkeeper, and Jersey City. Upon completion of any further development during the Initial Development Period for the phase, Honeywell shall also provide as-built documentation to the Special Master, Riverkeeper, and Jersey City for the additional development. Such additional as-built documentation for a phase shall not affect the running of the Initial Development Period for the phase.

(ix)During the Initial Development Period, replacement in-kind of development features or facilities included in the Initial Development or minor modifications to the development features or facilities included in the Initial Development shall not require the preparation of a Development Plan or be subject to review by the Special Master, provided that such replacement or modification satisfies the requirements of the Open Space Design Standards, the applicable Development Plan, and paragraphs 74(j)(v) and 74(j)(x)(3)(notice requirement).

(x) After the Initial Development Period, all development is prohibited unless one of the following conditions is met:

(1) Jersey City satisfies the conditions set forth in paragraph 74(a)(iv)(2);

(2) The development is a replacement in-kind and such replacement is made in conformance with the specifications of the Open Space Design Standards, the applicable Development Plan, and paragraph 74(j)(v); or

(3) The development meets the requirements of paragraphs 74(j)(v) and 74(j)(xi), and Jersey City provides notice of its intention to alter or add to the development undertaken in the Initial Development Period. Such notice shall be provided in writing to Honeywell, Riverkeeper, and the holders of the conservation restriction established pursuant to paragraph 74(b) at least 30 days prior to Jersey City's alteration or addition to development undertaken in the Initial Development Period. Honeywell, Riverkeeper, or any holder of the conservation restriction shall have the right to move the Court to prohibit such alteration or addition.

(xi) If any of the development features or facilities that Jersey City seeks to add pursuant to paragraph 74(j)(x) require utilities that would require utility corridors other than the utility corridors installed during the Initial Development Period, Jersey City shall obtain approval from the Court before installing such new utility corridors.

(xii) Jersey City shall provide Honeywell, Riverkeeper, and the holder(s) of the conservation restriction established pursuant to paragraph 74(b) with an annual report that describes any alterations or additions, including those activities under paragraph 74(j)(x)(2), to the development undertaken during the Initial Development Period.

(xiii) All development features or facilities, whether included in the Initial Development or added subsequent thereto, are subject to demolition and/or removal to the extent necessary to maintain, replace, or repair the Chromium Remedy.

(k) **Permissible Development in the Open Space AOC.** The Initial Development or any subsequent addition or alteration thereto may include any or all of the following types of development features or facilities, provided that such development features or facilities satisfy the conditions set forth in paragraph 74(j)(v):

(i) Roads and the pedestrian thoroughfare -- both crossing and running along the Open Space AOC, but no more extensive than provided for in the diagram on page 39 of the Redevelopment Plan;

(ii) Curbing and fences;

(iii) Sidewalks, paths, walkways, and nature trails;

(iv) Utilities and utility corridors, lighting, and restrooms;

(v) Irrigation or sprinkler components or systems;

(vi) Water features;

(vii) Above-ground storm water cisterns;

(viii) Signs, including the signs or display required by paragraph 74(l);

(ix) Benches, trash receptacles, and bicycle racks;

(x) Recreational facilities, such as playground equipment, bocce ball courts, tennis courts, basketball courts, and athletic fields; and

(xi) Landscaping, including natural grasses, small trees, shrubbery, flowers, and potted plants, provided that such landscaping and the anticipated root structure of each landscaping component do not and will not jeopardize the integrity of the Chromium Remedy. Any portion of an athletic field that is covered in natural grass shall be considered landscaping for purposes of the percentage set forth in paragraph 74(j)(v)(4).

(l) **Signs or Displays.** Honeywell shall develop a permanent plan for informing visitors to the Open Space AOC of the history of the chromium production, contamination, and its remediation. Such plan shall provide for appropriate signs or displays that communicate this information. Such plan shall be subject to review and comment by the Parties and approval by the Special Master.

75. **Honeywell's Ongoing Responsibility.** Honeywell shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy in perpetuity. Honeywell shall satisfy this responsibility through establishment and implementation of a Long-Term Monitoring Plan. In the event that Honeywell ceases to exist without a successor-in-interest or its obligations under this Consent Decree are stayed or limited due to a bankruptcy petition, the Court shall appoint an independent third-party fiduciary who shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy pursuant to the requirements of this Consent Decree and the Long-Term Monitoring Plan, unless Jersey City volunteers to assume these responsibilities for the Chromium Remedy.

76. **Long-Term Monitoring Plan.** In consultation with the Parties, and subject to approval by the Special Master and NJDEP, Honeywell shall develop a Long-Term Monitoring Plan to ensure the ongoing effectiveness of the Chromium Remedy to meet the objectives set forth in paragraphs 65, 69, 68, 69, 72, and 77. The Long-Term Monitoring Plan shall be consistent with the applicable EPA policies and guidance, including, among others, EPA's Comprehensive Five Year Review Guidance (2001) (or any subsequent revision) and with NJDEP's Technical Requirements for Site Remediation (or any subsequent revision).

77. **Long-Term Monitoring Plan Objectives.** Honeywell shall design the Long-Term Monitoring Plan to satisfy each of the following objectives:

(a) Provide monitoring to ensure that the integrity and effectiveness of the Chromium Remedy are maintained; and

(b) Provide monitoring to ensure that the restrictions of the institutional controls are being satisfied, including the prohibition on development in the Open Space AOC.

78. **Monitoring and Remediation Under the Long-Term Monitoring Plan.** The Long-Term Monitoring Plan shall include the monitoring and remediation activities set forth in this paragraph and other monitoring and remediation activities, if necessary, to meet the objectives of paragraph 77. Honeywell shall provide Riverkeeper, the Special Master, and NJDEP with annual reports on activities conducted under the Long-Term Monitoring Plan.

(a) **Monitoring Activities in the Long-Term Monitoring Plan.** Honeywell shall undertake the following monitoring activities at intervals to be specified in the Long-Term Monitoring Plan, but no less frequently than set forth below, and, if the monitoring shows it is necessary, Honeywell shall also undertake the remediation activities as set forth below:

(i) Quarterly visual inspection monitoring of the Open Space AOC to ensure that it is not being put to any use that is inconsistent with paragraphs 74(j) and 74(k) or any use that may compromise the integrity of the Chromium Remedy. The Long-Term Monitoring Plan shall include an inventory of the prohibited and permissible uses pursuant to paragraph 74 and a corresponding checklist to be used by the individuals conducting the monitoring. If Honeywell determines that the Open Space AOC is being used in a manner inconsistent with the protections or the integrity and effectiveness of the Chromium Remedy, Honeywell shall act as soon as possible to cause such use to cease and, if there has been damage to the Chromium Remedy, to repair or replace it to original specifications or to a level of protection equivalent to the original Chromium Remedy;

(ii) Quarterly visual inspection monitoring of the Open Space AOC grade and slope to identify whether erosion has occurred or is occurring. Honeywell shall remediate any significant erosion.

(iii)Quarterly visual inspection monitoring to determine whether noticeable differential settlement or subsidence has occurred or is occurring in the Open Space AOC such that the integrity of the Chromium Remedy may be materially impaired. If evidence of differential settlement or subsidence is found, Honeywell shall propose further investigative measures. Honeywell shall remediate any differential settlement or subsidence that is beyond the degree of differential settlement/subsidence allowed for in the 100% Design and repair the cap and/or the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(iv)A baseline topographic survey at the completion of the Chromium Remedy and three additional surveys conducted at five-year intervals beginning five years after the conduct of the baseline survey. The topographic survey shall be of sufficient precision and accuracy to present the results as one-foot contours;

(v) Quarterly visual inspection monitoring to determine whether the Chromium Remedy in the Open Space AOC has been disturbed. Any evidence of the distinctive warning layer materials or any other cap materials as described in paragraph 65(a) at the surface is an indication that the cap has been disturbed. In such an event, Honeywell shall propose further investigative measures to evaluate whether the integrity of the cap has been compromised. In the event that the investigative measures show that the cap integrity has been compromised, Honeywell shall repair or replace the cap and the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vi) Quarterly visual inspection monitoring to ensure that burrowing animals are not materially impairing the integrity of the Chromium Remedy. If evidence of burrowing animals is found, Honeywell shall follow humane removal procedures and repair or replace the cap and

the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vii) Quarterly visual inspection monitoring of the vegetative cover in the Open Space AOC to ensure that vegetative cover is in conformance with the landscaping provisions of the 100% Design and the Redevelopment Plan and will not materially impair the integrity of the Chromium Remedy. Maintenance of the vegetative cover shall include, at a minimum, mowing to ensure that tree species cannot become established and removal of any other vegetation with the potential to damage the Chromium Remedy;

(viii)Quarterly groundwater monitoring to ensure that groundwater levels are maintained in accordance with the requirement to maintain an outward gradient from Study Area 7 and in accordance with the water level control plan developed pursuant to paragraph 69(e);

(ix) Monitoring of vented gases and the gas venting system to ensure proper operation of the system, to evaluate any degradation of the system, to assess the need for treatment of vented gases, either initial, subsequent, or further depending on whether treatment has been previously provided, and to detect any condition that might endanger public health or safety. Such monitoring shall be conducted on a monthly basis for at least one year and, if the readings are stable, such monitoring may be conducted thereafter on a quarterly basis; and

(x) Any additional monitoring as required by specific details added in the design phase of the Open Space AOC.

(b) **Procedures for Proposing Changes to the Long-Term Monitoring Plan.** Any Party may, from time to time, propose changes to the scope of the monitoring activities under the Long-Term Monitoring Plan. If the Parties agree, the Long-Monitoring Plan shall be so changed

subject to approval by NJDEP and by the Special Master, if his appointment has not terminated, or otherwise, by the Court. If the Parties are unable to reach agreement over alterations to the monitoring and the Special Master's appointment has not terminated under this Consent Decree, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation. In the event that the dispute arises after the Special Master's appointment has terminated, any Party may file a motion seeking a resolution of the dispute by the Court.

(c) **Contingency Plan**. As part of the Long-Term Monitoring Plan, Honeywell shall develop a contingency plan to ensure the integrity of the remediation in the event of any planned penetration of the cap or otherwise planned activity that compromises the cap or any unplanned event or accident that penetrates the cap or otherwise compromises the integrity of the Chromium Remedy. The contingency plan shall include, at a minimum, an annually updated plan to notify the relevant persons, including the Special Master, NJDEP, and the Parties, of (i) the event penetrating the cap, compromising the cap, or compromising the integrity of the Chromium Remedy; (ii) the general steps to be taken to identify the extent of the problem; and (iii) the standards for remedying the problem.

(d) **Routine Maintenance**. The title owner of the Open Space AOC shall conduct maintenance of the Open Space AOC features or facilities that are permissible under paragraphs 74(j) and 74(k). The maintenance workers shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. The training shall include the identification and reporting of any uses or features that are not permissible in the Open Space AOC or that may jeopardize the integrity of the Chromium Remedy. Honeywell shall provide all training materials. The title owner of Open Space AOC shall annually provide to the other Parties and

the Special Master a report describing the training which has been provided to its maintenance workers. The title owner of the Open Space AOC shall also provide to the Parties and the Special Master notice of any violations of the restrictions relating to the Open Space AOC identified by its workers during routine maintenance.

(e) **Recordkeeping**. Honeywell shall maintain written logs or other records of those monitoring and remediation activities undertaken pursuant to the Long-Term Monitoring Plan. Such logs shall be provided to Riverkeeper on a quarterly basis.

79. **Monitoring and Reporting to Riverkeeper.** Riverkeeper shall be provided with all documents submitted to NJDEP and/or the Special Master with respect to the Chromium Remedy, including the documents identified in paragraph 86(c).

80. **Notice to Stakeholders.** All residents, regardless of whether they are owners or lessees, and all commercial tenants on Study Areas 6 and 7 are hereby deemed stakeholders. Honeywell shall ensure that all stakeholders shall be provided at the time of their purchase or lease with notice of the contamination, the remedial actions that have been undertaken or are planned, and the importance of reporting activities that may appear to jeopardize the integrity of the engineering controls. Notice shall be accomplished in the following manner:

(a) Bold or otherwise conspicuous language on the first page of the deed provided to all purchasers in the Residential Area;

(b) A summary notice of the Chromium Remedy which:

(i) Has been subject to review and comment by the Parties and approval by the Special Master; and

(ii) Provides a reference to public websites and libraries and/or the future equivalents thereof, where the following can be found:

(1) Zoning and other Jersey City maps showing the Open Space AOC; and

(2) Documents describing the contamination and the remediation, including:

(a) This Consent Decree;

(b) The Remedial Investigation Report and the Final Remedial Action Report,

(c) The annual reports on long-term monitoring and maintenance and repair activities as required by paragraph 78 and annual reports on changes to the Initial Development as required by paragraph 74(j)(xii); and

(d) The Long-Term Monitoring Plan.

(c) The public provision of the maps and documents referred to in paragraph 80(b)(ii) via websites and libraries and/or the future equivalents thereof; and

(d) Notices to lessees and commercial tenants in all lease documents.

81. **Annual Letter to Riverkeeper on Notice to Stakeholders.** Each year beginning one year after the issuance of the first notice in a deed or lease pursuant to paragraph 80, Honeywell shall provide a letter to the Riverkeeper documenting its compliance with paragraph 80.

82. **Future Notice to Stakeholders.** Honeywell shall ensure that all stakeholders are provided with notice, at least annually, of long-term monitoring activities and any additional remediation activities undertaken with respect to the Chromium Remedy. Such notice shall be accomplished by notices on websites or future equivalents thereof, including Jersey City websites, any websites created to provide information about the Chromium Remediation or redevelopment of the Redevelopment Area, and one or more of the following:

(a) Any community message board or other similar site used and/or maintained by stakeholders or the manager(s) of the Redevelopment Area;

(b) Mailings to all stakeholders; and

(c) Posters and flyers throughout the Redevelopment Area.

83. **Stakeholder Enforcement.** Any stakeholder shall have the right to enforce the remedial obligations of this Consent Decree in the Court, including post-implementation monitoring and maintenance obligations, and the terms of any deed notice or use restriction.

**I. Oversight and Enforcement by the Special Master and NJDEP**

84. **Federal Court Jurisdiction.** The Court shall retain jurisdiction for the purpose of overseeing and enforcing this Consent Decree and to review any issue or dispute which is not resolved through the oversight process described in Article III.I.

85. **Appointment and Jurisdiction of the Special Master.** The Chromium Remedy provided for in this Consent Decree is hereby referred to a Special Master pursuant to Rule 53 of the Federal Rules of Civil Procedure. The Special Master is appointed in the Consolidated Litigation for the purpose of overseeing and enforcing the Chromium Remedy, the first five years of long-term monitoring of the Chromium Remedy, financial assurances for the Chromium Remedy, and the Initial Development Period for each phase of development in the Open Space AOC. The Special Master is also appointed in the Consolidated Litigation for the limited purpose of ensuring that the scheduling and implementation of any non-chromium related remedy, any site preparation activities, and any site redevelopment activities do not undermine the integrity of, unreasonably interfere with, or unnecessarily delay the effectuation of the Chromium Remedy, the Study Area 7 remedies, and other remedies within his jurisdiction as of the date of entry of this Consent Decree. The Special Master shall have jurisdiction over all matters for which he is appointed.

86. **Oversight of the Chromium Remedy.**

(a) **NJDEP Authority**. Nothing in or pursuant to this Consent Decree shall limit NJDEP's full statutory and regulatory authority with respect to the Study Area 6 South site, including (i) permitting authority; (ii) authority to review and approve the Treatment Study reports, the Remedial Action Work Plan, the 100% Design, and final Remedial Action Report for the Chromium Remedy; and (iii) authority to issue a no further action letter.

(b) **Special Master Responsibilities**. The Special Master shall have the following responsibilities:

(i) Ensuring that Honeywell's implementation of the Chromium Remedy satisfies the requirements of this Consent Decree;

(ii) Ensuring that Honeywell's implementation of the Chromium Remedy conforms with federal, state, and local permit requirements;

(iii) Establishing a reasonable schedule for the implementation of the Chromium Remedy and monitoring conformance with it;

(iv) Reviewing monthly progress reports and conducting periodic meetings with the Parties to review the progress of the implementation of the Chromium Remedy. NJDEP shall be invited, but not required, to participate in these meetings and the decision as to whether to participate shall be left to NJDEP's sole discretion;

(v) Submitting bi-monthly progress reports to the Court pursuant to the schedule for the submission of such reports established in *ICO v. Honeywell*;

(vi) Overseeing the financial assurances established pursuant to paragraphs 91 through 100, and, until the expiration of his term pursuant to paragraph 90, overseeing the financial assurances established pursuant to paragraphs 101 through 112;

(vii) Coordinating review of the documents as provided in paragraphs 86(c) through 86(g);

(viii) Overseeing all development undertaken in the Open Space AOC during the Initial Development Period pursuant to paragraph 74(j)(iii); and

(ix) To the extent that, in matters within the jurisdiction of the Special Master as set forth herein, a dispute arises between the Parties with respect to implementation of the Chromium Remedy, issuing a recommendation to the Court with respect to the dispute.

(c) **Submission of Documents by Honeywell.** Honeywell shall submit the following documents to Riverkeeper, Jersey City, the Special Master, and NJDEP:

(i) An overall schedule with milestones for the design and implementation of the remedy ("Schedule") consistent with paragraph 54 above;

(ii) A Second Supplemental Remedial Investigation Report reporting the results of the field work conducted pursuant to paragraph 55;

(iii)A Chromium Impacted Soils Pilot Test Work Plan and Analytical Protocol for conduct of the treatment study pursuant to paragraph 56, unless such documents are agreed to by NJDEP and Riverkeeper before the entry of this Consent Decree;

(iv)An Initial Treatment Study Report for the Development AOC;

(v) A Final Treatment Study Monitoring Report;

(vi) The documents for Site 163 submitted pursuant to paragraphs 54(a)(iv), 54(a)(v), 61, and 62;

(vii) A report to evaluate the need for remediation of any potentially remaining contaminated shallow groundwater in the Development AOC after implementation of the Development AOC Soils Remedy and, based on such an evaluation, a proposal;

(viii) A report of the results of the sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site pursuant to paragraph 71 and, based on the results, a proposal for a remedy;

(ix) A plan for one round of monitoring to evaluate whether the L-Well Groundwater remains contained pursuant to paragraph 72;

(x) A proposal for a remedy of the L-Well Groundwater, in the event L-Well Groundwater monitoring indicates the contaminated groundwater is no longer contained, pursuant to paragraph 72;

(xi) A Remedial Action Work Plan;

(xii) A 50% Design Report (which may include the Development AOC Conceptual Design Plan as a component) as well as design drawings and specifications at the 50% level for other components of the Chromium Remedy (hereinafter the 50% Design);

(xiii) Design drawings and specifications at the 100% level (after selection of the contractor) (hereafter "100% Design");

(xiv) The data validation plan, including quality control and quality assurance protocols;

(xv) The site-wide master health and safety plan;

(xvi) The Long-Term Monitoring Plan;

(xvii) The final Remedial Action Report or final construction report (including as-built drawings and such other reports as may be prepared of the remedy as implemented);

(xviii) A program for post-treatment monitoring pursuant to paragraph 63, and, depending on such results, a proposal for further remedial actions;

(xix) A report reviewing measured groundwater levels for the groundwater remedy;

(xx) Documents required during the Initial Development Period pursuant to paragraphs 74(j)(vi), 74(j)(vii), and 74(j)(viii); and

(xxi) Other post-implementation monitoring reports as required by the Long-Term Monitoring Plan.

(d) **Initial Review of Documents by NJDEP.** The Parties and Special Master shall allow the period of time set forth below for NJDEP to conduct its review of a submission (hereinafter "NJDEP Review Period") before the document is subject to the Special Master review and approval process. During the NJDEP Review Period, any Party may submit comments to NJDEP. For the Second Supplemental Remedial Investigation Report, the Remedial Action Work Plan, the Initial Treatment Study, and the Final Treatment Study Monitoring Report, the NJDEP Review Period shall be 90 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. For any other documents identified in paragraph 86(c), the NJDEP Review Period shall be 30 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. The NJDEP review period shall be extended an additional 30 days for any document for which NJDEP provides the Parties and the Special Master with notice that its review will require an additional 30 days. At the conclusion of the NJDEP Review Period, the comment and review process provided for in paragraphs 86(e) and 86(f) shall commence. In the event that any document has been revised during the NJDEP Review Period, Honeywell shall resubmit the applicable document for purposes of the comment and review provided for in paragraphs 86(e) and 86(f).

(e) **Comment on Submitted Documents**. For each of the documents submitted by Honeywell pursuant to paragraph 86(c), and following conclusion of the NJDEP Review Period as described in paragraph 86(d), the Special Master shall establish a schedule for the submission

of comments and responses to comments. For each of the documents submitted, Riverkeeper, Jersey City, the Special Master, and NJDEP shall have the right to submit comments to Honeywell. Honeywell shall address all comments received and submit a revised document. The revised document shall be submitted by Honeywell to Riverkeeper, Jersey City, the Special Master, and NJDEP. The revised document shall be subject to review and approval pursuant to paragraph 86(f), unless the Parties agree both on the revised document and that further review and approval pursuant to paragraph 86(f) is unnecessary. In that event, the Parties shall inform the Special Master that review under paragraph 82(f) is unnecessary and Honeywell shall proceed to implement the revised document.

(f) **Review and Approval of the Submitted/Revised Document**

(i) **Scope of Review**. Subject to the limitations in paragraph 82(e), all documents submitted by Honeywell, pursuant to paragraph 86(c) and 86(e), shall be subject to review and approval by the Special Master in accordance with the following procedure. All such documents, except the Schedule and the 100% Design, shall be subject to the review and approval process and shall not require an order of the Court. The Schedule and 100% Design documents shall be subject to the review and approval process, but shall also require an order of the Court as provided in paragraph 86(g). A document shall be approved if the document (1) complies with this Consent Decree; (2) complies with the Remedial Action Work Plan for the Chromium Remedy; and (3) complies with the Schedule and 100% Design.

(ii) **Procedure**. Prior to making a decision on a document, the Special Master shall notify NJDEP of his intention to rule on the document or make a recommendation to the Court on the document. Such notice shall notify NJDEP that the Special Master will consider any comments NJDEP wishes to submit on the document if such comments are submitted within

the timeframe established by the Special Master in the schedule for comments pursuant to paragraph 86(e). NJDEP shall in its sole discretion determine whether to submit comments to the Special Master.

(iii) **Court Review**. If any Party objects to the Special Master's recommendation to the Court or approval of any document pursuant to this paragraph, that Party may seek further relief from the Court with respect to the document.

(g) **Schedule and 100% Design Documents**. As to the Schedule and the 100% Design documents, Honeywell shall have the responsibility, within 30 days of the Special Master's approval of each document, of (i) moving for entry of an order by the Court approving the document as approved by the Special Master; or (ii) filing objections with the Court to the Special Master's approval (and any recommendations contained therein) and moving for entry of the Schedule or 100% Design (including any such recommendations of the Special Master to which Honeywell agrees). Riverkeeper shall have the right in these proceedings to raise any objections they might have to the Schedule or 100% Design as approved by the Special Master or to the submission by Honeywell to the Court. NJDEP shall receive notice of any motion filed with respect to the Schedule or the 100% Design.

(h) **Flexibility in 50% and 100% Design Documents**. The Parties recognize that work conducted to implement the Chromium Remedy may be conducted by Honeywell contractors and that Honeywell may establish performance-based criteria or specifications for its contractors. As a result, the Parties recognize that the 50% Design and 100% Design documents for the Chromium Remedy may include performance-based standards, criteria, and specifications. These documents shall be sufficiently prescriptive to enable the Parties and the Special Master to evaluate their conformance with the Remedial Action Work Plan and this Consent Decree. The

Parties also recognize that the 100% Design will be completed after Honeywell has selected a contractor. The Parties further recognize that completing the 100% Design after the selection of the contractor(s) shall not make the 100% Design subject to any less stringent or more deferential review. Honeywell's commitment to the contractor(s) shall not be cause to limit review by the Parties and the Special Master.

(i) **Changes to the Schedule.** The Parties recognize that changes to individual line items in the Schedule will occur. To the extent that (i) the Parties and the Special Master agree that such changes do not have a material impact on satisfaction of the Schedule milestones established for items set forth in paragraph 54; and (ii) such changes do not require modifications to any necessary permits or authorizations for the Chromium Remedy, such changes may be made upon agreement of the Parties and the Special Master without further order of the Court.

87. **Retention of Professionals.** The Special Master may retain the services of professionals and/or other technical personnel, as reasonably needed, to fulfill his obligations under this Consent Decree, and for which he will be reimbursed pursuant to paragraph 89.

88. **Insurance for the Special Master.** The Special Master shall obtain insurance coverage relating to the performance of the Special Master's duties and responsibilities under this Consent Decree. Such coverage shall be similar to the Special Master's existing coverage in *ICO v. Honeywell*, procured pursuant to the Court's November 11, 2005 Stipulation and Order Regarding Special Master's Application to Procure Insurance Coverage, and as extended to the Consolidated Litigation by the Sediment Consent Order. The insurance coverage shall be sufficiently extended in duration and scope to cover all additional duties and responsibilities as set forth hereunder. Honeywell shall pay the premiums and other administrative costs of the Special Master's insurance.

89. **Reimbursement of Special Master Fees and Expenses.** The Special Master shall submit fee applications to the Court for approval of reasonable fees and expenses incurred in the oversight of matters referred to him pursuant to this Consent Decree. Any Party may raise with the Court objections to such fee applications. Upon approval of a fee application by the Court, the reimbursement of the Special Master's fees and expenses shall be made from the escrow fund previously established by Honeywell for the purpose of paying the Special Master's fees and expenses in *ICO v. Honeywell* pursuant to this Court's September 15, 2003 Order Setting Financial Assurances and extended to the Consolidated Litigation by the Sediment Consent Order.

90. **Expiration of Special Master's Appointment.** The Special Master's appointment under this Consent Decree shall expire after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy and the Initial Development Period for each phase of development has been concluded as provided in paragraph 74(j)(ii). However, solely to the extent that the Special Master is still supervising other portions of the Consolidated Litigation or *ICO v. Honeywell* after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy or the Initial Development Period for each phase of development as provided in paragraph 74(j)(ii), whichever is later, the Special Master shall continue to have jurisdiction under this Consent Decree until he has completed his specifically enumerated responsibilities under the Final Judgment in *ICO v. Honeywell*, the Sediment Consent Order, the Deep Groundwater Consent Order, the Study Area 6 North Consent Decree, and any other future orders, decrees, or judgments in *ICO v. Honeywell* and the Consolidated Litigation. Enumerated responsibilities under any order, decree, or judgment shall include only those tasks specifically assigned to the Special Master in the order, decree, or judgment. Enumerated responsibilities

shall not include any continued jurisdiction exercised over long-term monitoring beyond the initial period specified in the order, decree, or judgment. For example, the Special Master has jurisdiction over the first five years of long-term monitoring under the Sediment Consent Order. Oversight during these five years shall be an enumerated responsibility, but any continued oversight of long-term monitoring, pursuant to the extension of the Special Master's jurisdiction beyond the first five years, as provided in paragraph 60 of the Sediment Consent Order, shall not be an enumerated responsibility. Such extensions of jurisdiction shall be effective only so long as specific enumerated responsibilities in any order, decree, or judgment have not been fulfilled.

**J. Initial Financial Assurances**

91. **Chromium Remedy Letter of Credit.** Honeywell shall obtain a one-year, irrevocable letter of credit (the "Chromium Remedy Letter of Credit") to be automatically renewed annually in an amount equal to the "Remedial Costs Subject to Financial Assurance."

(a) Remedial Costs Subject to Financial Assurance shall mean:

(i) The costs of implementing the Chromium Remedy calculated using factors, including inflation and discount rates, determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process;

(ii) The costs of monitoring and maintenance activities for five years, as required by the Long-Term Monitoring Plan, calculated using factors including inflation and discount rates determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process; and

(iii) A contingency of 25% with respect to those costs listed in paragraphs 91(a)(i) and 91(a)(ii).

(b) The Chromium Remedy Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution, provided that in either case, the financial institution shall be acceptable to the Special Master.

92. **Procedures for Review of the Proposed Chromium Remedy Letter of Credit.** No later than December 31, 2008, Honeywell shall submit to Riverkeeper and the Special Master for their review the proposed (a) amount of the Chromium Remedy Letter of Credit; (b) form of the Chromium Remedy Letter of Credit; and (c) name of the institution that will issue the Chromium Remedy Letter of Credit. If Riverkeeper does not agree to the terms of the Chromium Remedy Letter of Credit, the Parties shall meet and confer in an effort to resolve their differences. If the Parties are unable to reach agreement over the terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the Chromium Remedy Letter of Credit.

93. **Automatic Renewal.** The Chromium Remedy Letter of Credit shall be automatically renewed annually unless (a) no later than 120 days prior to the anniversary of the Chromium Remedy Letter of Credit issue date, the issuer provides notice of nonrenewal or (b) Honeywell seeks a reduction in the Chromium Remedy Letter of Credit, pursuant to paragraph 94, to correspond to the reduced estimate of Remedial Costs Subject to Financial Assurances. If the issuer provides notice of nonrenewal, Honeywell shall obtain a replacement irrevocable Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit. If Honeywell is not otherwise in default as provided in Article III.J, the Special Master shall direct the cancellation of the prior Chromium Remedy

Letter of Credit within 91 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit. In the event that the Special Master is entitled to draw upon a Chromium Remedy Letter of Credit because there are two Chromium Remedy Letters of Credit currently in place, the Special Master shall not draw an aggregate amount in excess of the highest valued Chromium Remedy Letter of Credit. Upon Honeywell's request, the Special Master may, at his option, decide not to require overlapping letters of credit in any year based on Honeywell's financial strength in that year, provided that Honeywell has submitted all necessary information so that the Special Master can make his determination at least 150 days prior to the expiration of the Chromium Remedy Letter of Credit.

94. **Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit.** Honeywell shall have the right annually to seek a reduction in the Chromium Remedy Letter of Credit. At the time of seeking such reduction, Honeywell shall submit to the Riverkeeper and the Special Master an estimate of the remaining Remedial Costs Subject to Financial Assurance, including the contingency as described in paragraph 91(a)(iii), and shall seek adjustment of the Chromium Remedy Letter of Credit so that the total estimated amount of remaining Remedial Costs Subject to Financial Assurance are covered by the Chromium Remedy Letter of Credit. However, the adjustment shall not result in reducing the Chromium Remedy Letter of Credit to an amount below the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), plus a contingency of 25% of the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), and shall not result in reducing the Chromium Remedy Letter of Credit to an amount less than $20,000,000 as expressed in 2008 dollars unless long-term financial assurances are in place pursuant to Article III.K. Before making any request to reduce the amount or modify the terms of the Chromium Remedy Letter of Credit, Honeywell shall first confer with the Riverkeeper and

in an effort to reach agreement on the modified amount or terms of the Chromium Remedy Letter of Credit. If the Parties are unable to reach agreement over the modified amount or terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall resolve the dispute. Any Party shall have the right to seek review by the Court of the Special Master's decision regarding the modified amount or terms of the Chromium Remedy Letter of Credit. Upon agreement on the amount of the reduction or modified terms of the Chromium Remedy Letter of Credit (or upon order of the Court directing that the Chromium Remedy Letter of Credit be reduced to an identified amount or otherwise modified), Honeywell shall obtain a replacement Chromium Remedy Letter of Credit in such amount and with such terms. If Honeywell is not otherwise in default as provided in Article III.J and the issuer of the primary Chromium Remedy Letter of Credit has not provided notice of non-renewal, within 30 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit, the Special Master shall direct the cancellation of the prior Chromium Remedy Letter of Credit.

95. **Bankruptcy Protection**. Neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy. The Chromium Remedy Letter of Credit shall contain the language necessary to assure that neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

96. **Exclusive Court Jurisdiction**. The Chromium Remedy Letter of Credit shall recite that the issuer submits to the exclusive jurisdiction of this Court for any and all disputes arising under the Letter of Credit.

97. **Application of New York Law.** The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Chromium Remedy Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

98. **Procedures upon Honeywell's Material Default of Its Obligations.** During the period in which the Special Master has jurisdiction pursuant to paragraph 85, the Chromium Remedy Letter of Credit shall be payable to the Special Master and shall not, prior to its expiration date, be revoked or terminated except consistent with this Consent Decree and with the consent of the Special Master and approval by the Court. The Special Master's ability to draw upon the Chromium Remedy Letter of Credit shall not be limited by any agreement between Honeywell and the issuer. The Special Master may, without further order or notice to this Court, draw upon the Chromium Remedy Letter of Credit upon the occurrence of default by Honeywell, which shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 93 to deliver a replacement Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 15 days after written notice to Honeywell thereof and either (i) Honeywell, in the opinion of the Special Master without further input from the Parties, shall have failed to cure the breach; (ii) during the 15-day period, the Court has not entered an order to prevent the Special Master from

drawing on the Chromium Remedy Letter of Credit; or (iii) the Court or the Special Master has not granted Honeywell additional time to cure the breach;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if involuntary filing has not been dismissed within 60 days; the appointment of a custodian, receiver, liquidator, or trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 98(c), and the failure of Honeywell to provide assurance to the Special Master, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

99. **Placement of Proceeds in Court Registry Investment System Account**. In the event that the Special Master draws upon the Chromium Remedy Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Chromium Remedy Letter of Credit which represent the remaining estimated Chromium Remedy costs under paragraphs 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), in an account with the Court Registry Investment System in accordance with Local Civil Rule 67.1 and not expend the proceeds of the Letter of Credit without further order of this Court. The

Special Master shall place all additional proceeds of the Chromium Remedy Letter of Credit in a trust fund pursuant to paragraph 103(b)(v).

100. **Termination of Chromium Remedy Letter of Credit**. The Chromium Remedy Letter of Credit may be withdrawn in its entirety upon the satisfaction of all of the following:

(a) The implementation of the Chromium Remedy; and

(b) Establishment of long-term financial assurance pursuant to Article III.K.

**K. Long-Term Financial Assurances**

101. **Long-Term Financial Assurances.** Honeywell shall fund long-term financial assurances to ensure that the activities set forth in paragraph 102(a) are carried out regardless of whether Honeywell is financially able to carry out such activities in perpetuity.

102. **Costs Subject to Long-Term Financial Assurances.**

(a) Long-term financial assurances shall provide enough funds to cover the costs of the following activities:

(i) Perpetual monitoring and maintenance of the Chromium Remedy, including installation, operation and monitoring of any above-cap-grade gas collection and/or treatment system as may be necessary, but such system is not part of the 100% Design;

(ii) Perpetual operation of the shallow groundwater remedies pursuant to paragraphs 69, 70, and 71;

(iii) Perpetual repair of the cap;

(iv) Perpetual replacement of the cap on a 75-year replacement interval; and

(v) The perpetual administration of the trust fund regardless of whether such trust fund is selected by Honeywell pursuant to paragraph 103(a) or is established from the Long-Term Letter of Credit pursuant to paragraphs 103(b)(ii), 103(b)(v), or 109.

(b) The costs that shall be subject to financial assurances is an amount that will provide the full payment for each of the activities set forth in paragraphs 102(a)(i) through 102(a)(v) plus a 25% contingency when the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to be performed. The costs subject to financial assurances are forward looking because they state an amount valued at the time the funds are needed. As such, they shall be stated in contemporary time as the present value (calculated on the basis of a discount rate of 4.75%) of the estimated future costs of the activities specified in paragraphs 102(a)(i) through 102(a)(v), plus a 25% contingency on those costs.

103. **Long-Term Financial Assurance Mechanisms.** Honeywell shall provide long-term financial assurances in the amount of the costs subject to long-term financial assurances in the form of a trust fund, a letter of credit, or some combination of the two. The selected mechanism(s) shall satisfy the following requirements:

(a) **Trust Fund.** In the event that Honeywell selects a trust fund, Honeywell shall create a trust fund such that it can provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(i) The trust fund shall be at arm's length from Honeywell and shall not be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The trust fund agreement shall contain the language necessary to assure that neither the trust fund nor the earnings of the trust fund shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The trust fund shall be managed by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution managing the

trust fund declares bankruptcy, the Court shall withdraw the funds and appoint another financial institution meeting the requirements of this paragraph to manage the trust.

(iii) No more frequently than once per year, Honeywell may apply to the Court for an order directing the trust manager to reimburse Honeywell for any costs that it has incurred to carry out the activities set forth in paragraphs 102(a)(i) through 102(a)(iv).

(b) **Long-Term Letter of Credit**. In the event that Honeywell selects a letter of credit, Honeywell shall obtain a one-year irrevocable letter of credit (the "Long-Term Letter of Credit") to be automatically renewed annually in an amount that provides sufficient funds such that a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a), could be created. The Long-Term Letter of Credit-funded trust, plus any trust fund established under paragraph 103(a), shall provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The amount of any Long-Term Letter of Credit shall therefore be adjusted periodically as the cap replacement interval is approached because, for example, the money needed in the 10th year to fund a trust that can provide for replacement of the cap in the 75th year is much less than the money that would be needed in the 40th year. Such periodic adjustments shall be proposed and approved by the Court in conjunction with the adjustments under paragraph 106.

(i) Neither the Long-Term Letter of Credit nor the proceeds of the Long-Term Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The Long-Term Letter of Credit shall contain the language necessary to assure that neither the Long-Term Letter of

Credit nor the proceeds of the Long-Term Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The Long-Term Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution issuing the Long-Term Letter of Credit declares bankruptcy, the Court shall authorize the drawing of funds from the Long-Term Letter of Credit and shall deposit those funds in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(iii) The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits) as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Long-Term Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

(iv) The Long-Term Letter of Credit shall be automatically renewed annually, unless, no later than 120 days prior to the anniversary of the Long-Term Letter of Credit issue date, the issuer provides notice of non-renewal. If the issuer provides notice of non-renewal, Honeywell shall obtain a replacement irrevocable Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit. If Honeywell is not otherwise in default as provided in this Article, the Court shall direct the cancellation of the prior Long-Term Letter of Credit within 91 days after delivery to the Court of any replacement of a Long-Term Letter of Credit. In the event that the Court is entitled to draw upon a Long-Term Letter of Credit when there are two Letters of Credit currently in place, the Court shall not draw an aggregate amount in excess of the highest valued Long-Term Letter of Credit.

(v) Prior to the expiration of the Special Master's appointment pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Special Master. During the time the Long-Term Letter of Credit is payable to the Special Master, the Special Master may draw on the Long-Term Letter of Credit as provided in paragraph 98. In the event that the Special Master draws upon the Long-Term Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a). After the Special Master's appointment expires pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Court and, in the event that the Court draws on the Long-Term Letter of Credit, the Court shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(vi) Whether the Long-Term Letter of Credit is payable to the Special Master or the Court, it shall not, prior to its expiration date, be revoked or terminated by Honeywell except consistent with this Consent Decree and with the approval of the Court. The ability of the Special Master or the Court to draw upon the Long-Term Letter of Credit shall not be limited by any agreement between Honeywell and the issuer.

(vii) In the event that the Long-Term Letter of Credit is drawn upon and invested pursuant to paragraph 103(b)(ii), 103(b)(v), or 109 and Honeywell has also selected a trust fund pursuant to paragraph 103(a), resulting in the existence of two trust funds, the two trust funds shall be managed so as to ensure that the combined amount of the trust funds is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(c) **Combination**. Honeywell may use some combination of a trust fund and a letter of credit to achieve the requirements of this paragraph. However, if a combination is used, Honeywell shall ensure that the combined amount of financial assurances is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The trust fund and the letter of credit shall otherwise satisfy all the requirements of paragraphs 103(a) and 103(b).

104. **Procedures for Review of the Proposed Long-Term Financial Assurances**. No later than June 1, 2009, Honeywell shall submit to Riverkeeper and the Special Master, for their review (a) the amount of the proposed long-term financial assurances; (b) the form(s) of the proposed long-term financial assurance mechanisms; and (c) the name(s) of the institution proposed to manage or issue the long-term financial assurances. If Riverkeeper agrees to the terms of the proposed long-term financial assurances, within 60 days of such agreement, Honeywell shall create a trust fund and/or secure a Long-Term Letter of Credit on those terms. If the Parties are unable to reach agreement over the terms of the long-term financial assurances, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the financial assurances.

105. **Temporary Maintenance of Chromium Remedy Letter of Credit**. Until the long-term financial assurances have been put into place, Honeywell shall maintain the Chromium Remedy Letter of Credit required by paragraph 91 in an amount equal to at least $20,000,000 in 2008 dollars. In the event of any default by Honeywell pursuant to paragraph 98 while the Chromium Remedy Letter of Credit is in place, the provisions of paragraph 103(b)(v) for the placement of the proceeds that exceed the remaining estimated Chromium Remedy costs under

paragraph 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), shall apply.

106. **Adjustment of Amount Held in Long-Term Financial Assurances**. Every five years as marked from the establishment of the first long-term financial assurances pursuant to paragraph 103, the Parties shall report to the Court whether the long-term financial assurances are adequately funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. At such time as the Parties report to the Court, any Party may seek an adjustment in the amount of the long-term financial assurances. The Party seeking an adjustment must demonstrate that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Such demonstration shall reflect the actual costs of implementing the remedy and/or any replacement of the remedy, once such actual costs are available. The demonstration shall also reflect the costs of work completed to date and the actual lifetime of the cap, once the cap has been replaced or has passed a replacement interval without requiring replacement. The demonstration shall further reflect the actual performance of the fund and its ability to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Any demonstration shall be forward looking and shall be based upon estimates of what the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to cost at the time they must be performed and the amount of funding projected to be available to undertake such activities at the time they must be performed. If, after reviewing the submission(s) received from the Parties, the Court determines that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to

long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary, the Court shall order an adjustment in the amount held in the long-term financial assurances to overcome the shortage or overage. In the event that the Court determines that the long-term financial assurances are under-funded, it shall order Honeywell to increase the amount held in the long-term financial assurances. In the event that the Court determines that any trust fund established pursuant to paragraph 103(a) is over-funded, the Court shall issue an order directing the trust manager to pay the overage to Honeywell. In the event that the Court determines that the Long-Term Letter of Credit is over-funded, the Court shall issue an order permitting Honeywell to reduce the amount covered during the next annual renewal of the Long-Term Letter of Credit pursuant to paragraph 103(b)(iv). Any adjustment to the amount of the Long-Term Letter of Credit pursuant to this paragraph shall be in addition to any adjustment of the amount of the Long-Term Letter of Credit required pursuant to paragraph 103(b).

107. **Exclusive Court Jurisdiction**. The trust fund agreement and/or the Long-Term Letter of Credit shall recite that the trust fund manager and/or issuer of the Long-Term Letter of Credit submit to the exclusive jurisdiction of this Court for any and all disputes arising under the trust fund or the Long-Term Letter of Credit. The requirements of this paragraph shall apply whether the trust fund is established pursuant to paragraph 103(a), 103(b)(ii), 103(b)(v), or 109.

108. **Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired.** Upon the occurrence of default by Honeywell, after the Special Master's appointment has expired, Riverkeeper may move the Court on an expedited basis for an order to withdraw funds from the trust fund or to draw on the Long-Term Letter of Credit. Default shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 103(b)(iv) to deliver a replacement Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 30 days after written notice by Riverkeeper to Honeywell of the alleged material failure, unless Honeywell cures the alleged breach within the 30-day notice period or such longer period as the Parties may agree to or the Court may order;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if the involuntary filing is not dismissed within 60 days; the appointment of a custodian, receiver, liquidator, trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 108(c), if Honeywell fails to provide assurance to Riverkeeper, and the Court, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

109. **Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default.** If the Court grants any motion by Riverkeeper or pursuant to paragraph 108 to draw on the Long-Term Letter of Credit, the sum approved by the Court's order granting the motion shall be

paid from the Long-Term Letter of Credit into a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

110. **Use of the Trust Fund in the Event of Honeywell's Default.** In the event of Honeywell's default, as defined in paragraphs 108(a) through 108(d), the money in the trust fund established pursuant to paragraph 103(a) shall be available to meet the obligations of paragraph 102(a), as well as for payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

111. **Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109.** In the event that a trust fund is established pursuant to paragraph 99, 103(b)(ii), 103(b)(v), or 109, the money in the trust fund shall be available to meet the obligations of paragraph 102(a), as well as for the payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

112. **Termination of the Long-Term Financial Assurances.** Honeywell's obligations under Article III.K shall be terminated and the long-term financial assurance mechanisms shall be terminated when the Court finds that no hexavalent or total chromium contamination remains in the Open Space AOC or on the Site, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive

standards for Unrestricted Use in place at the time, whichever is more restrictive. Upon determining that long-term financial assurances may be terminated, the Court shall order that any Long-Term Letter of Credit may be withdrawn in its entirety and any trust fund may be terminated. In conjunction with its order terminating any trust fund, the Court in its discretion shall designate a recipient(s) of any remaining trust funds.

## ARTICLE IV: TERMINATION

113. **Termination of this Consent Decree**. This Consent Decree shall terminate upon the withdrawal of any Party as provided for in this paragraph. Any Party may elect to withdraw from this Consent Decree due to the occurrence of one or more of the following events, provided that such Party provides written notice of withdrawal to the other Parties pursuant to paragraph 118:

(a) The Court fails to enter this Consent Decree or this Consent Decree is determined to be invalid on appeal; or

(b) NJDEP takes one of the following actions with respect to the Remedial Action Work Plan:

(i) Rejects or fails to approve the Remedial Action Work Plan for the Chromium Remedy within 180 days of submission of the plan;

(ii) Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in more than a 50% increase in the estimated costs of the Chromium Remedy as set forth in Article III; or

(iii)Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in a substantial reduction of the protection of human health and/or the environment.

114. **Procedures for Withdrawal and Termination.** Any Party electing to withdraw pursuant to paragraph 113 and thereby terminate this Consent Decree shall provide written notice of such withdrawal and termination to all other Parties within 30 days of the occurrence giving rise to the decision to withdraw. If any Party objects to termination of the Consent Decree, or believes that the conditions set forth in paragraph 113 have not been met, such objecting Party may move the Court for an expedited hearing on the issue of whether the conditions for termination have been effectuated.

115. **Good-Faith Obligation to Avoid Termination.** The Parties agree that they will each endeavor to fulfill the terms of this Consent Decree, that they will work diligently and in good faith to meet their obligations hereunder, and that they will promptly and timely take all reasonable steps to give effect to this Consent Decree and to avoid termination under paragraph 113.

116. **Effect of Termination.** If this Consent Decree is terminated pursuant to paragraph 113, the Consent Decree shall no longer be binding on the Parties and shall be of no further effect. In the event that this Consent Decree is terminated by one or more Parties pursuant to paragraph 113, each Party to this Consent Decree reserves all of its rights, claims, and defenses (both legal and factual) against the other Parties with respect to the matters at issue in the Consolidated Litigation and each Party remains free to pursue such rights, claims, and defenses.

## ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC

117. **Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC.** The transfer of title of Study Area 6 South and Study Area 7 properties to Bayfront Redevelopment LLC pursuant to the Jersey City/Honeywell Consent Order and any subsequent transfers shall not impede Honeywell's obligations to (a) complete the remediation of

Study Area 7 and implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or (b) complete the Chromium Remedy and conduct long-term monitoring and fulfill its other obligations set forth in this Consent Decree. Such transfers of Study Areas 6 South and Study Area 7 shall not include a transfer of Honeywell's obligations to implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or a transfer of Honeywell's obligations under this Consent Decree, but shall include a right of access or any other right required by Honeywell to complete the remediation. Any subsequent transfer of Study Area 6 South or Study Area 7 from Bayfront Redevelopment LLC to a redeveloper or other party shall provide all necessary agreements to allow Honeywell all necessary access to Study Area 6 South and Study Area 7 for purposes of completing Honeywell's obligations with respect to Study Area 6 South under this Consent Decree and completing the Study Area 7 remediation and implementing the Final Judgment and subsequent orders in *ICO v. Honeywell*.

## ARTICLE VI: NOTICE

118. **Notice**. Any and all notices given in connection with this Consent Decree shall be deemed adequately given only if in writing and addressed to the Party for whom such notices are intended at the addresses set forth in this paragraph. All notices shall be sent by Federal Express or other nationally recognized overnight messenger service or by first-class registered or certified mail, postage prepaid, return receipt requested. A written notice shall be deemed to have been given to the recipient party on the earlier of (a) the date it shall be delivered to the address set forth in this paragraph; (b) the date delivery shall have been refused at the address set forth in this paragraph; or (c) with respect to notices sent by mail, the date as of which the postal service shall have indicated such notice to be undeliverable at the address set forth in this paragraph.

Any and all notices referred to in this Consent Decree, or which any Party desires to give to the other, shall be addressed as follows:

If to Honeywell and/or
Bayfront Redevelopment LLC :

Tom Byrne, Esq.
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-2775

With copies to:

John Morris
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-4003

If to Jersey City:

William Matsikoudis
Corporation Counsel
City of Jersey City
280 Grove Street
Jersey City, NJ 07305
(201) 547-4667

If to Riverkeeper:

Bruce J. Terris
Carolyn Smith Pravlik
Kathleen L. Millian
Terris, Pravlik & Millian, LLP
1121 12th St., N.W.
Washington, DC 20005-4632
(202) 682-2100

Any party may change its designated recipients or addresses for notice in this paragraph by providing written notice of such change to all other Parties.

## ARTICLE VII: RIVERKEEPER'S ATTORNEYS' FEES

119. **Payment of Past Fees and Expenses.** Within 30 days of the entry of this Consent Decree, Honeywell shall pay Terris, Pravlik & Millian, LLP the sum of $813,000.00 which represents the following:

(a) A compromise of the attorneys' fees incurred by Riverkeeper in the litigation of Study Area 6 South portion of *Riverkeeper v. Honeywell* through August 31, 2008; and

(b) $353,746.67 in out-of-pocket expenses representing a portion of the expenses incurred by Riverkeeper in *Riverkeeper v. Honeywell* from the inception of the litigation after deducting the expenses paid pursuant to the Sediment Consent Order, the Deep Groundwater Consent Order, and the Study Area 6 North Consent Decree.

(c) Payment of the sum of $813,000.00 shall be in full satisfaction of all obligations, duties, and responsibilities of Honeywell with respect to the $879,317.92 in fees and expenses that Riverkeeper claimed with regard to the above described fees and expenses.

120. **Future Fees and Expenses.** Honeywell shall reimburse Riverkeeper's attorneys for reasonable fees and expenses incurred: (a) in negotiating this Consent Decree after August 31, 2008; (b) in the monitoring and enforcement of this Consent Decree; and (c) in participation in the Special Master process established pursuant to this Consent Decree. Honeywell shall also reimburse Riverkeeper for reasonable attorneys' fees and expenses for Riverkeeper's review of and participation in the Long-Term Monitoring Plan and monitoring and enforcement of this Consent Decree following the term of the Special Master. In the event that any dispute arises between the Parties under this Consent Decree that must be resolved by the Court, Riverkeeper shall be entitled to recover its attorneys' fees and expenses for litigation of the dispute to the extent allowed by federal law. Riverkeeper and Honeywell shall use the same informal procedure for attempting to settle fees issues as has been used for post-judgment monitoring fees in *ICO v. Honeywell*. In the event that Riverkeeper and Honeywell are unable to reach a settlement on fees, Riverkeeper shall apply to the Court for an award of attorneys' fees and expenses. If Honeywell objects to only a portion of the Riverkeeper's statement of attorneys' fees and expenses, Honeywell shall pay the undisputed portion within 60 days of Riverkeeper's submittal of the statement to Honeywell. The Court shall resolve any objections to

Riverkeeper's statement of attorneys' fees and expenses and shall enter an appropriate Order. In the event of Honeywell's default, Riverkeeper may seek attorneys' fees from any trust fund or court registry funds established pursuant to the financial assurances provisions of this Consent Decree.

## ARTICLE VIII: MISCELLANEOUS PROVISIONS

121. **Force Majeure.** Force Majeure, for the purposes of this Consent Decree, is defined as an event arising from causes beyond the control of any Party or Parties (or their agents, contractors, subcontractors, representatives, or assigns) which could not have been overcome by reasonable diligence and which delays or prevents the performance of any obligation under this Consent Decree. Examples of events which may constitute force majeure include the refusal of any federal or state governmental authority to grant a permit or authorization necessary for the completion of actions required by this Consent Decree, floods, hurricanes, tornadoes, and other extraordinary weather events, earthquakes and other natural disasters, terrorist attacks, war, and other national emergencies. Examples of events that are not force majeure events include normal inclement weather, increased costs or expense, the failure to timely and fully apply for a permit or authorization necessary for the completion of actions required by this Consent Decree, or financial difficulty of any Party. The Party claiming force majeure shall bear the burden of showing an event was a force majeure event.

122. **Bayfront Redevelopment LLC as a Party.** As a signatory to this Consent Decree, Bayfront Redevelopment LLC subjects itself to the Court's jurisdiction for the purpose of enforcing this Consent Decree and agrees to be bound by this Consent Decree. This Consent Decree shall be fully enforceable against Bayfront Redevelopment LLC.

123. **Successors and Assigns.** This Consent Decree shall be binding upon and shall inure to the benefit of the successors, assigns, heirs, corporate parents, subsidiaries, and affiliates of each Party. No assignment or delegation of the obligations hereunder shall release the assigning Party from its obligations under this Consent Decree.

124. **Successors to Hackensack Riverkeeper, Inc.** In the event that Hackensack Riverkeeper, Inc. disbands or otherwise ceases operations, it shall assign its rights under this Consent Decree to another qualified nonprofit organization. A nonprofit organization shall be qualified for assignment under this Consent Decree if it is a charitable organization under Section 501(c)(3) of the Internal Revenue Code or its substantial equivalent and has an established record of working to enhance or preserve the ecology, natural habitat, or environment. Any such assignment shall be subject to approval by the Court and Honeywell shall have the right to object to any proposed assignment. Any successor organization shall have the duty to assign its rights under this Consent Decree to another qualified nonprofit organization in the event that the successor disbands or otherwise ceases operations. In the event that a successor is not appointed at any given time, the New Jersey Attorney General or equivalent officer shall appoint a successor subject to approval by the Court and objection by Honeywell.

125. **Reservation of Rights and Claims.** Except as set forth expressly herein, this Consent Decree does not affect in any way any of the Parties' claims or defenses against third parties who have not signed the Consent Decree.

126. **Governing Law and Continuing Jurisdiction.** The Court shall retain jurisdiction over the matters addressed in this Consent Decree for purposes of enabling the Parties to apply to the Court for any further order as may be necessary to construe, carry out, or enforce the terms of this Consent Decree. This Consent Decree shall be interpreted and enforced under the laws of

the United States and the State of New Jersey by the United States District Court for the District of New Jersey.

127. **Construction.** Questions regarding the interpretation of this Consent Decree shall not be resolved against any Party on the ground that this Consent Decree has been drafted by that Party. This Consent Decree is the result of review, negotiation, and compromise by each Party.

128. **Authority to Enter into Agreement.** The undersigned representative for each Party represents, certifies, and warrants that he or she is duly authorized by the Party whom he or she represents to enter into the terms of this Consent Decree and bind such Party legally to this Consent Decree.

129. **Measures to Effectuate This Consent Decree.** Jersey City shall take all appropriate steps to ensure that commitments it has agreed to with regard to the Open Space AOC have been duly considered, ratified, and approved. Such steps include consideration of such commitments and an effectuating ordinance at a meeting of the City Council, open to the public, at which members of the public have the opportunity to comment on all aspects of the commitments made by Jersey City..

130. **Modifications.** This Consent Decree may be modified by mutual agreement of the Parties but such agreement must be in writing, duly and properly signed by all Parties, and shall be submitted to the Court for approval.

131. **Severability.** Each of the provisions in paragraph 74 of this Consent Decree shall be deemed severable and, in the event that one or more of such provisions is deemed invalid or unenforceable, it shall not affect the validity or enforceability of the other provisions of the Consent Decree.

132. **Signatures.** This Consent Decree may be signed simultaneously or in counterparts by the respective signatories, which shall be as fully valid and binding as if a single document was signed by all of the signatories. This Consent Decree may be signed electronically by any or all signatories, and such electronic signature shall be as fully valid and binding as a hand-written signature.

# DEED NOTICE CONCERNING CONTROLS INSTALLED FOR CHROMIUM CONTAMINATION UNDERLYING THE PROPERTY

This Deed Notice is made as of the __ day of _____, 2017, by ***Bayfront Redevelopment LLC, whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950***. Owner shall mean Bayfront Redevelopment LLC together with its successors and assigns, including all successors in interest in the Property which is the subject of this Deed Notice as described fully below. The "Property" (also referenced herein as the "Restricted Area(s)" and the "Deferred Area") shall consist of those lands particularly described by metes and bounds in Exhibit A-2 attached hereto.

1. THE PROPERTY. Bayfront Redevelopment LLC is the current owner in fee simple of certain real property designated as a portion of ***Block 24601, Lot 8 on the tax map of the City of Jersey City, Hudson County, New Jersey***[1]; the New Jersey Department of Environmental Protection Program Interest Number for the contaminated site which includes this property is ***Hudson County Chromate Site No. 124 Program Interest ("PI") # G000008741*** (NJDEP PI# for non-chromium-related contaminants at the Property is #745719). Site 124 is part of Study Area 6 South ("SA-6

[1] All references to Block 24601 Lot 8 in this Deed Notice shall mean the applicable portion of Block 24601 Lot 8 as shown in the metes and bounds description, regardless of whether the word "portion(s)" is specifically called out or not.

South"). The Property is located adjacent to and along Route 440 as shown on Exhibit B-1 attached hereto. The Property shall constitute a "Deferred Area" as defined in Paragraph 3 that will be remediated for hexavalent chromium contamination pursuant to the First Amended Consent Decree Regarding the Remediation and Redevelopment of Study Area 6 South ("Consent Decree") which is attached hereto as Appendix I and is entered as an order of the Court in the following consolidated actions *JCMUA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-05955; *JCIA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-5993; and *Hackensack Riverkeeper, Inc. v. Honeywell International, Inc.,* D.N.J., Civ. No. 06-22 (consolidated under Civ. No. 95-2097). The Consent Decree restricts transfer, use and development of the Property. To the extent that there is any conflict or inconsistency between the terms of this Deed Notice and the terms of the Consent Decree, the Consent Decree shall govern.

2. REMEDIATION.

i. The Department's Bureau of State Case Management (BCM) is the entity within the Department that is responsible for the oversight of the chromium remediation of SA-6 South and the Property. The matter was Hudson County Chromate Site No. 124 PI# G000008741. The Department has approved this Deed Notice as an institutional control for the Property, which is part of the remediation of the Property.

ii. N.J.A.C. 7:26-C-7 requires the Owner, among other persons, including the responsible party Honeywell International Inc. ("Honeywell") to obtain a soil remedial action permit for the soil remedial action at the Property. That permit will contain the monitoring, maintenance and biennial certification requirements that apply to the Property.

3. SOIL AND GROUNDWATER CONTAMINATION. Honeywell, a corporation of the State of Delaware, licensed to do business in the State of New Jersey whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950, has remediated SA-6 South to address chromium-related soil and shallow groundwater contamination, except for the Property and certain other deed noticed areas where engineering controls were implemented. The Remedial Action Work Plan ("RAWP") for chromium remedial actions was approved by the Department on March 24, 2009 for Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140, which includes the Property. Remedial actions were further approved pursuant to the Consent Decree.

Under both the Consent Decree and the RAWP, soil contamination remains in the Property at concentrations that do not allow for the unrestricted use of the Property. A Remedial Action Report ("RAR") for SA-6 South was submitted to the Department on February 8, 2017. The Department approved the RAR on March 30, 2017. A Construction Completion Report ("CCR") for SA-6 South to document the implementation of the Chromium Remedy pursuant to Article III of the Consent Decree (the "Chromium Remedy") to address chromium-impacted soil and groundwater for SA-6 South was entered by the Court on [DATE], [CITE TO DOCKET AND DOCKET #].

The Property, also known as the Deferred Area, is an approximately 15-foot wide by 88-foot long, 1,315 square foot area on SA-6 South between the Route 440 Right of Way ("ROW") and the hydraulic barrier along the eastern edge of the SA-6 South Open Space AOC. Public Service

Electric & Gas ("PSE&G") owns and operates a gas main on the Property, thus, excavation of chromium-impacted soil from the Property was not possible. Excavation of residual chromium contamination proximate to the gas line on the Property will be deferred by Honeywell until the gas line is relocated as part of the Route 440 Road Widening Project. Once the chromium-impacted soils on the Property are removed consistent with Article III of the Consent Decree, this deed notice will be terminated consistent with the requirements of paragraph 13 below. The provisions of the Long Term Monitoring Plan ("LTMP"), developed pursuant to the Consent Decree, will apply to the Property.

The soil contamination is described, including the type, concentration and specific location of such contaminants, in Exhibit B, which is attached hereto and made a part hereof. Groundwater contaminant concentrations and restrictions for SA-6 South in its entirety are addressed in the Classification Exception Area (CEA) approved by the NJDEP on February 16, 2012 and in a forthcoming Remedial Action Permit for Groundwater (recent groundwater samples for the Property do not indicate shallow groundwater contamination). As a result of the remaining soil contamination, there is a statutory requirement for this Deed Notice and engineering controls in accordance with N.J.S.A. 58:10B-13. Under the terms of the Consent Decree and this Deed Notice, Honeywell is responsible for monitoring and maintaining the soil remediation for the Property in perpetuity or until remediation is implemented that renders this Deed Notice unnecessary.

4. CONSIDERATION. In accordance with the Department's approval of the chromium RAWP for the remediation for the Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140 which includes the Property, and in consideration of the terms and conditions of that approval, and in accordance with the Consent Decree, and other good and valuable considerations, Owner has agreed to subject the Property to certain statutory and regulatory requirements which impose restrictions upon the use of the Property, to restrict certain uses of the Property, and to provide notice to subsequent owners, lessees and operators of the restrictions and the monitoring, maintenance, and biennial certification requirements outlined in this Deed Notice and required by law, as set forth herein.

5A. RESTRICTED AREAS. Due to the presence of these contaminants, Owner has agreed, as part of the remedial action for the Property, to restrict the use of the Property (the "Restricted Areas"); a narrative description of these restrictions, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C, which is attached hereto and made a part hereof. Owner will develop a binder containing a list of these restrictions which will be maintained either at onsite trailers or within the Groundwater Treatment Plant building, available for review and inspection by governmental enforcement officials if requested.

5B. RESTRICTED LAND USES. The following land use restrictions apply to the Property:

i. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(10), prohibits the conversion of a contaminated site, remediated to non-residential soil remediation standards that require the maintenance of engineering or institutional controls, to a child care facility, or public, private, or charter school without the Department's prior written approval, unless a presumptive remedy is implemented;

ii. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(12), prohibits the conversion of a landfill, with gas venting systems and or leachate collection systems, to a single family residence or a child care facility without the Department's prior written approval; and

iii. The Consent Decree, paragraph 9, prohibits the unrestricted use of the Property until the Chromium Remedy set forth in Article III of the Consent Decree is implemented.

5C. ENGINEERING CONTROLS. Due to the presence and concentration of these contaminants, the Owner has also agreed, as part of the remedial action for the Property, to the placement of certain engineering controls on the Property. The engineering controls include clean cover materials to a depth of approximately 6-inches below ground surface A narrative description of these engineering controls, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C. Honeywell shall be responsible for monitoring and maintenance of engineering controls and biennial certification requirements as specified in the Consent Decree, the LMTP, and Paragraphs 8A and 8B herein.

5D. LONG TERM MONITORING PLAN. Pursuant to the Consent Decree, Honeywell has developed an LTMP which sets forth requirements for monitoring, maintaining, and repairing or replacing the soil and groundwater chromium remedial measures including engineering controls within the Property, and requirements for notification and reporting pursuant to the Consent Decree, Deed Notice, and Soil Remedial Action Permit. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950. This Deed Notice is appended to the LTMP.

5E. WORKER TRAINING MATERIALS. All maintenance workers engaged in maintenance at the Property shall be trained in maintenance procedures that do not jeopardize the integrity of the engineering controls. Workers shall be trained using material developed by Honeywell pursuant to the Consent Decree.

6A. CHANGE IN OWNERSHIP AND REZONING.

i. The Owner and the subsequent owners and lessees, shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. The Owner and the subsequent owners shall provide written notice to the Department of Environmental Protection on a form provided by the Department and available at www.nj.gov/srp/forms within thirty (30) calendar days after the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property.

iii. The Owner and the subsequent owners shall provide written notice to the Department, on a form available from the Department at www.nj.gov/srp/forms, within thirty (30) calendar days after

the owner's petition for or filing of any document initiating a rezoning of the Property to residential.

6B. SUCCESSORS AND ASSIGNS. This Deed Notice shall be binding upon Owner and upon Owner's successors and assigns, and subsequent owners, lessees, and operators while each is an owner, lessee, or operator of the Property.

7A. ALTERATIONS, IMPROVEMENTS, AND DISTURBANCES.

i. The Owner and all subsequent owners and lessees shall notify any person of whom it has knowledge, including, without limitation, tenants, employees of tenants, developers, and contractors, intending to conduct invasive work or excavate within the Property, of the nature and location of known contamination in the Property, and, of the precautions necessary to protect the engineering controls and minimize potential human exposure to contaminants.

ii. Except as provided in the Consent Decree and Paragraph 7B below, no person shall make, or allow to be made, any alteration, improvement, or disturbance in, to, or about the Property which disturbs any engineering control at the Property except as (a) permitted in the Consent Decree and (b) without first obtaining Soil Remedial Action Permit modification from the Department. Nothing herein shall constitute a waiver of the obligation of any person to comply with all applicable laws and regulations including, without limitation, the applicable rules of the Occupational Safety and Health Administration.

iii. Notwithstanding subparagraph 7A.ii.(b), above, a Soil Remedial Action Permit modification is not required for any alteration, improvement, or disturbance provided that:

(A) Such action is taken in conformance with the Consent Decree and this Deed Notice; and

(B) The Department of Environmental Protection is notified of the activity by calling the DEP Hotline, at 1-877-WARN-DEP or 1-877-927-6337, within twenty-four (24) hours after the beginning of each alteration, improvement, or disturbance; and

(C) Honeywell is notified of the activity by calling 855-727-2658; and

(D) Honeywell and/or the owner restores any disturbance of an engineering control to pre-disturbance conditions, consistent with the requirements of the Consent Decree and LTMP, within sixty (60) calendar days after the initiation of the alteration, improvement or disturbance; and

(E) All applicable worker health and safety laws and regulations are followed during the alteration, improvement, or disturbance, and during the restoration; and

(F) Appropriate measures are taken so that human exposure, and exposure of the environment outside the containment of the engineering controls, to contamination in excess of the applicable remediation standards does not occur; and

(G) The next biennial certification includes a description of the nature of the alteration, improvement, or disturbance, the dates and duration of the alteration, improvement, or disturbance, the name of key individuals and their affiliations conducting the alteration, improvement, or disturbance, a description of the notice the Owner gave to those persons prior to the disturbance, the amounts of soil generated for disposal, if any, the final disposition and any precautions taken to prevent exposure.

7B. EMERGENCIES. In the event of an emergency which presents, or may present, an unacceptable risk to the public health and safety, or to the environment, or immediate environmental concern, see N.J.S.A. 58:10C-2, any person may temporarily breach an engineering control provided that:

i. The Department of Environmental Protection is immediately notified of the emergency, by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

ii. Immediately after notifying NJDEP, Honeywell is notified of the emergency by calling 855-727-2658; and

iii. Both the actual disturbance and the time needed for the disturbance are limited to the minimum reasonably necessary to adequately respond to the emergency; and

iv. All measures necessary to limit actual or potential, present or future risk of exposure to humans or the environment to the contamination are implemented; and

v. The Department of Environmental Protection is notified when the emergency has ended by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

vi. Honeywell is notified when the emergency has ended by calling 855-727-2658; and

vii. Honeywell restores the engineering control to the pre-emergency conditions, consistent with the requirements of the Consent Decree and LTMP, as soon as possible, and submits a written report to the Department of Environmental Protection of such emergency and restoration efforts within sixty (60) calendar days after completion of the restoration of the engineering control. The report must include all information pertinent to the emergency, potential discharges of contaminants, and restoration measures that were implemented, which, at a minimum, should specify: (a) the nature and likely cause of the emergency, (b) the potential discharges of or exposures to contaminants, if any, that may have occurred, (c) the measures that have been taken to mitigate the effects of the emergency on human health and the environment, (d) the measures completed or implemented to restore the engineering control, and (e) the changes to the engineering control or site operation and maintenance plan to prevent recurrence of such conditions in the future. Honeywell shall submit the report to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring

Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413

8A. MONITORING AND MAINTENANCE OF DEED NOTICE, AND PROTECTIVENESS CERTIFICATION. The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the persons responsible for conducting the remediation, Honeywell, the Owner, and the subsequent owners, lessees, and operators, shall monitor and maintain this Deed Notice. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. Honeywell shall certify to the Department on a biennial basis that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the deed notice shall include all of the following:

i. Monitoring and maintaining this Deed Notice according to the requirements in Article III of the Consent Decree, and Exhibit C herein, to ensure that the remedial action that includes the Deed Notice continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes this Deed Notice, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

8B. MONITORING AND MAINTENANCE OF ENGINEERING CONTROLS, AND PROTECTIVENESS CERTIFICATION. Honeywell shall maintain all engineering controls at the Property and certify to the Department on a biennial basis that the remedial action of which each engineering control is a part remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the engineering controls shall include the following:

i. Monitoring and maintaining each engineering control according to the requirements in Article III of the Consent Decree, the LTMP, and Exhibit C herein, so that the remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to

the Department pursuant to iii, below, so that the remedial action that includes the engineering control remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes the engineering control, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

9. ACCESS. The Owner, subsequent owners, lessees, and operators, agree to allow the Department, its agents and representatives access to the Property to inspect and evaluate the continued protectiveness of the remedial action that includes this Deed Notice and to conduct additional remediation to ensure the protection of the public health and safety and of the environment if the persons responsible for monitoring the protectiveness of the remedial action, as described in Paragraph 8, above, fail to conduct such remediation pursuant to this Deed Notice as required by law. The Owner, and the subsequent owners and lessees, shall also cause all leases, subleases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring that all holders thereof provide such access to the Department.

10. NOTICES.

i. Owner shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. Honeywell or the Owner shall notify any person intending to conduct invasive work or excavate within the Property of the nature and location of contamination and, of the precautions necessary to minimize potential human exposure, and exposure of the environment outside the containment of the engineering controls, to contaminants.

iii. Owner shall provide written notice to the Department of Environmental Protection at least thirty (30) calendar days before the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property. Any such conveyance, grant or gift must be consistent with the terms of the Consent Decree.

iv. Owner shall provide written notice to the Department within thirty (30) calendar days following the Owner's receiving notice of any petition for a rezoning of the Property. Any such rezoning must be consistent with the terms of the Consent Decree. The Owner shall submit the written notice to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program

P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413.

11. ENFORCEMENT OF VIOLATIONS.

i. This Deed Notice itself is not intended to create any interest in real estate in favor of the Department of Environmental Protection, nor to create a lien against the Property, but merely is intended to provide notice of certain conditions and restrictions on the Property and to reflect the regulatory and statutory obligations imposed as a conditional remedial action for this Property.

ii. The restrictions provided herein may be enforceable by the Department against any person who violates this Deed Notice. To enforce violations of this Deed Notice, the Department may initiate one or more enforcement actions pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C, and require additional remediation and assess damages pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C.

iii. This Deed Notice is also enforceable in the United States District Court for the District of New Jersey by all residents, owners, lessees, and all commercial tenants on Study Areas 6 and 7 pursuant to paragraphs 80 and 83 of the Consent Decree.

12. SEVERABILITY. If any court of competent jurisdiction determines that any provision of this Deed Notice requires modification, such provision shall be deemed to have been modified automatically to conform to such requirements. If a court of competent jurisdiction determines that any provision of this Deed Notice is invalid or unenforceable and the provision is of such a nature that it cannot be modified, the provision shall be deemed deleted from this instrument as if the provision had never been included herein. In either case, the remaining provisions of this Deed Notice shall remain in full force and effect.

13. MODIFICATION AND TERMINATION.

i. Any person may request in writing, at any time, that the Department modify this Deed Notice where performance of subsequent remedial actions, a change of conditions at the Property, or the adoption of revised remediation standards suggest that modification of the Deed Notice would be appropriate, provided that any such modification is consistent with the requirements of the Consent Decree.

ii. Any person may request in writing, at any time, that the Department terminate this Deed Notice because the conditions which triggered the need for this Deed Notice are no longer applicable.

iii. Any person seeking a modification or termination of this Deed Notice must also have such modification approved by the United States District Court for the District of New Jersey pursuant to the Consent Decree until such time as the Consent Decree terminates with regard to the Property pursuant to the Consent Decree.

iv. If the United States District Court for the District of New Jersey and NJDEP have concluded that this Deed Notice shall be modified or terminated, such modification or termination will only be effective upon the filing of a Termination of Deed Notice, available at N.J.A.C. 7:26C Appendix C, with the office of the Register of Deeds of Hudson County, New Jersey, expressly modifying or terminating this Deed Notice.

v. Within thirty (30) calendar days after the filing of a Termination of Deed Notice, the owner of the Property shall apply to the Department for modification or termination of the Soil Remedial Action Permit pursuant to N.J.A.C. 7:26C-7.

vi. This Deed Notice may be modified only if it has first been terminated pursuant to subparagraphs 13v above, and upon filing of a modified Deed Notice, executed by the Owner of the Property, in the office of the Register of Deeds of Hudson County, New Jersey.

14A. EXHIBIT A. Exhibit A includes the following maps of the Property and the vicinity:

i. Exhibit A-1: Vicinity Map - A map that identifies by name the roads, and other important geographical features in the vicinity of the Property;

ii. Exhibit A-2: Metes and Bounds Description - A metes and bounds description of the Property, including reference to tax lot and block numbers for the Property and a Tax Map;

iii. Exhibit A-3: Property Map - A scaled map of the Property, scaled at one inch to 200 feet or less, and if more than one map is submitted, the maps shall be presented as overlays, keyed to a base map; the map(s) shall include diagrams of major surface topographical features such as buildings, roads, and parking lots. After development of the Property, this Deed Notice shall be modified to show topographical features constructed on the Property such as buildings, roads, and parking lots.

14B. EXHIBIT B. Exhibit B includes the following descriptions of the Restricted Areas:

i. Exhibit B-1: Restricted Area Map - Maps for the Property that include, as applicable:

(A) As-built diagrams of each engineering control, including caps, fences, hydraulic barrier walls, ground water monitoring wells, and ground water pumping system;

(B) As-built diagrams of any buildings, roads, parking lots and other structures that function as engineering controls; and

(C) Designation of all soil and/or sediment sample locations within the restricted areas that exceed any soil or sediment standard that are keyed into one of the tables described below.

ii. Exhibit B-2 (Table B-2): Restricted Area Data Tables - Table for the Property that includes:

(A) Sample location designation from Restricted Area maps (Exhibit B-1);

(B) Sample elevation based upon mean sea level;

(C) Name and chemical abstract service registry number of each contaminant with a concentration that exceeds the unrestricted use standard;

(D) The restricted and unrestricted use standards for each contaminant in the table; and

(E) The remaining concentration of each contaminant at each sample location at each elevation (or if historic fill, include data from the Department's default concentrations at N.J.A.C. 7:26E-4.6, Table 4-2).

14C. EXHIBIT C. Exhibit C includes narrative descriptions of the institutional controls and engineering controls as follows:

i. Exhibit C-1A through C-1C. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control (attached); Exhibit C-1C: Zoning as Institutional Control; Exhibit C-1 includes a narrative description of the restrictions and obligations of this Deed Notice that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
(1) Description and estimated size of the Restricted Areas as described above;
(2) Description of the restrictions on the Property by operation of this Deed Notice and the other Institutional Controls; and
(3) The objective of the restrictions;

(B) Description of the monitoring necessary to determine whether:
(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;
(2) There have been any land use changes subsequent to the filing of this Deed Notice and the other Institutional Controls or the most recent biennial certification, whichever is more recent;
(3) The current land use on the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls;
(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the Property; and
(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice and the other Institutional Controls, and conduct the necessary sampling; and

(C) Description of the following items that will be included in the biennial certification:
(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of

the remedial action that includes this Deed Notice and the other Institutional Controls;

(2) Land use at the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls; and

(3) The remedial action that includes this Deed Notice and the other Institutional Controls continues to be protective of the public health and safety and of the environment.

ii. Exhibit C-2. Exhibit C-2: Engineering Controls: Asphalt Cover; Exhibit C-2 includes a narrative description of the engineering controls as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) The engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering control; and

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering control continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

15. SIGNATURES. IN WITNESS WHEREOF, Owner has executed this Deed Notice as of the date first written above.

**DESCRIPTION OF PROPERTY**
**CITY OF JERSEY CITY**
**HUDSON COUNTY, NEW JERSEY**
**PROJECT NO. 10000292Q**

**DEED NOTICE AREA 2**
**BLOCK 24601 LOT 8**
**APRIL 6, 2016**

All that certain lot, tract or parcel of land situate lying and being in the City of Jersey, in the County of Hudson and State of New Jersey, and being a portion of Lot 8 Block 24601, designated as Deed Notice Area 2 as shown on an exhibit entitled, "Deed Notice Area 2, SA6 South, Block 24601, Lot 8, City of Jersey City, Hudson County, New Jersey," prepared by Maser Consulting P.A., dated April 6, 2016 and being more particularly bounded and described as follows, to wit:

**BEGINNING** at the intersection of the westerly line of New Jersey State Highway Route 440 (112 foot wide right of way), and the division line between Lot 8 Block 21901, and Lot 8 Block 24601; thence-

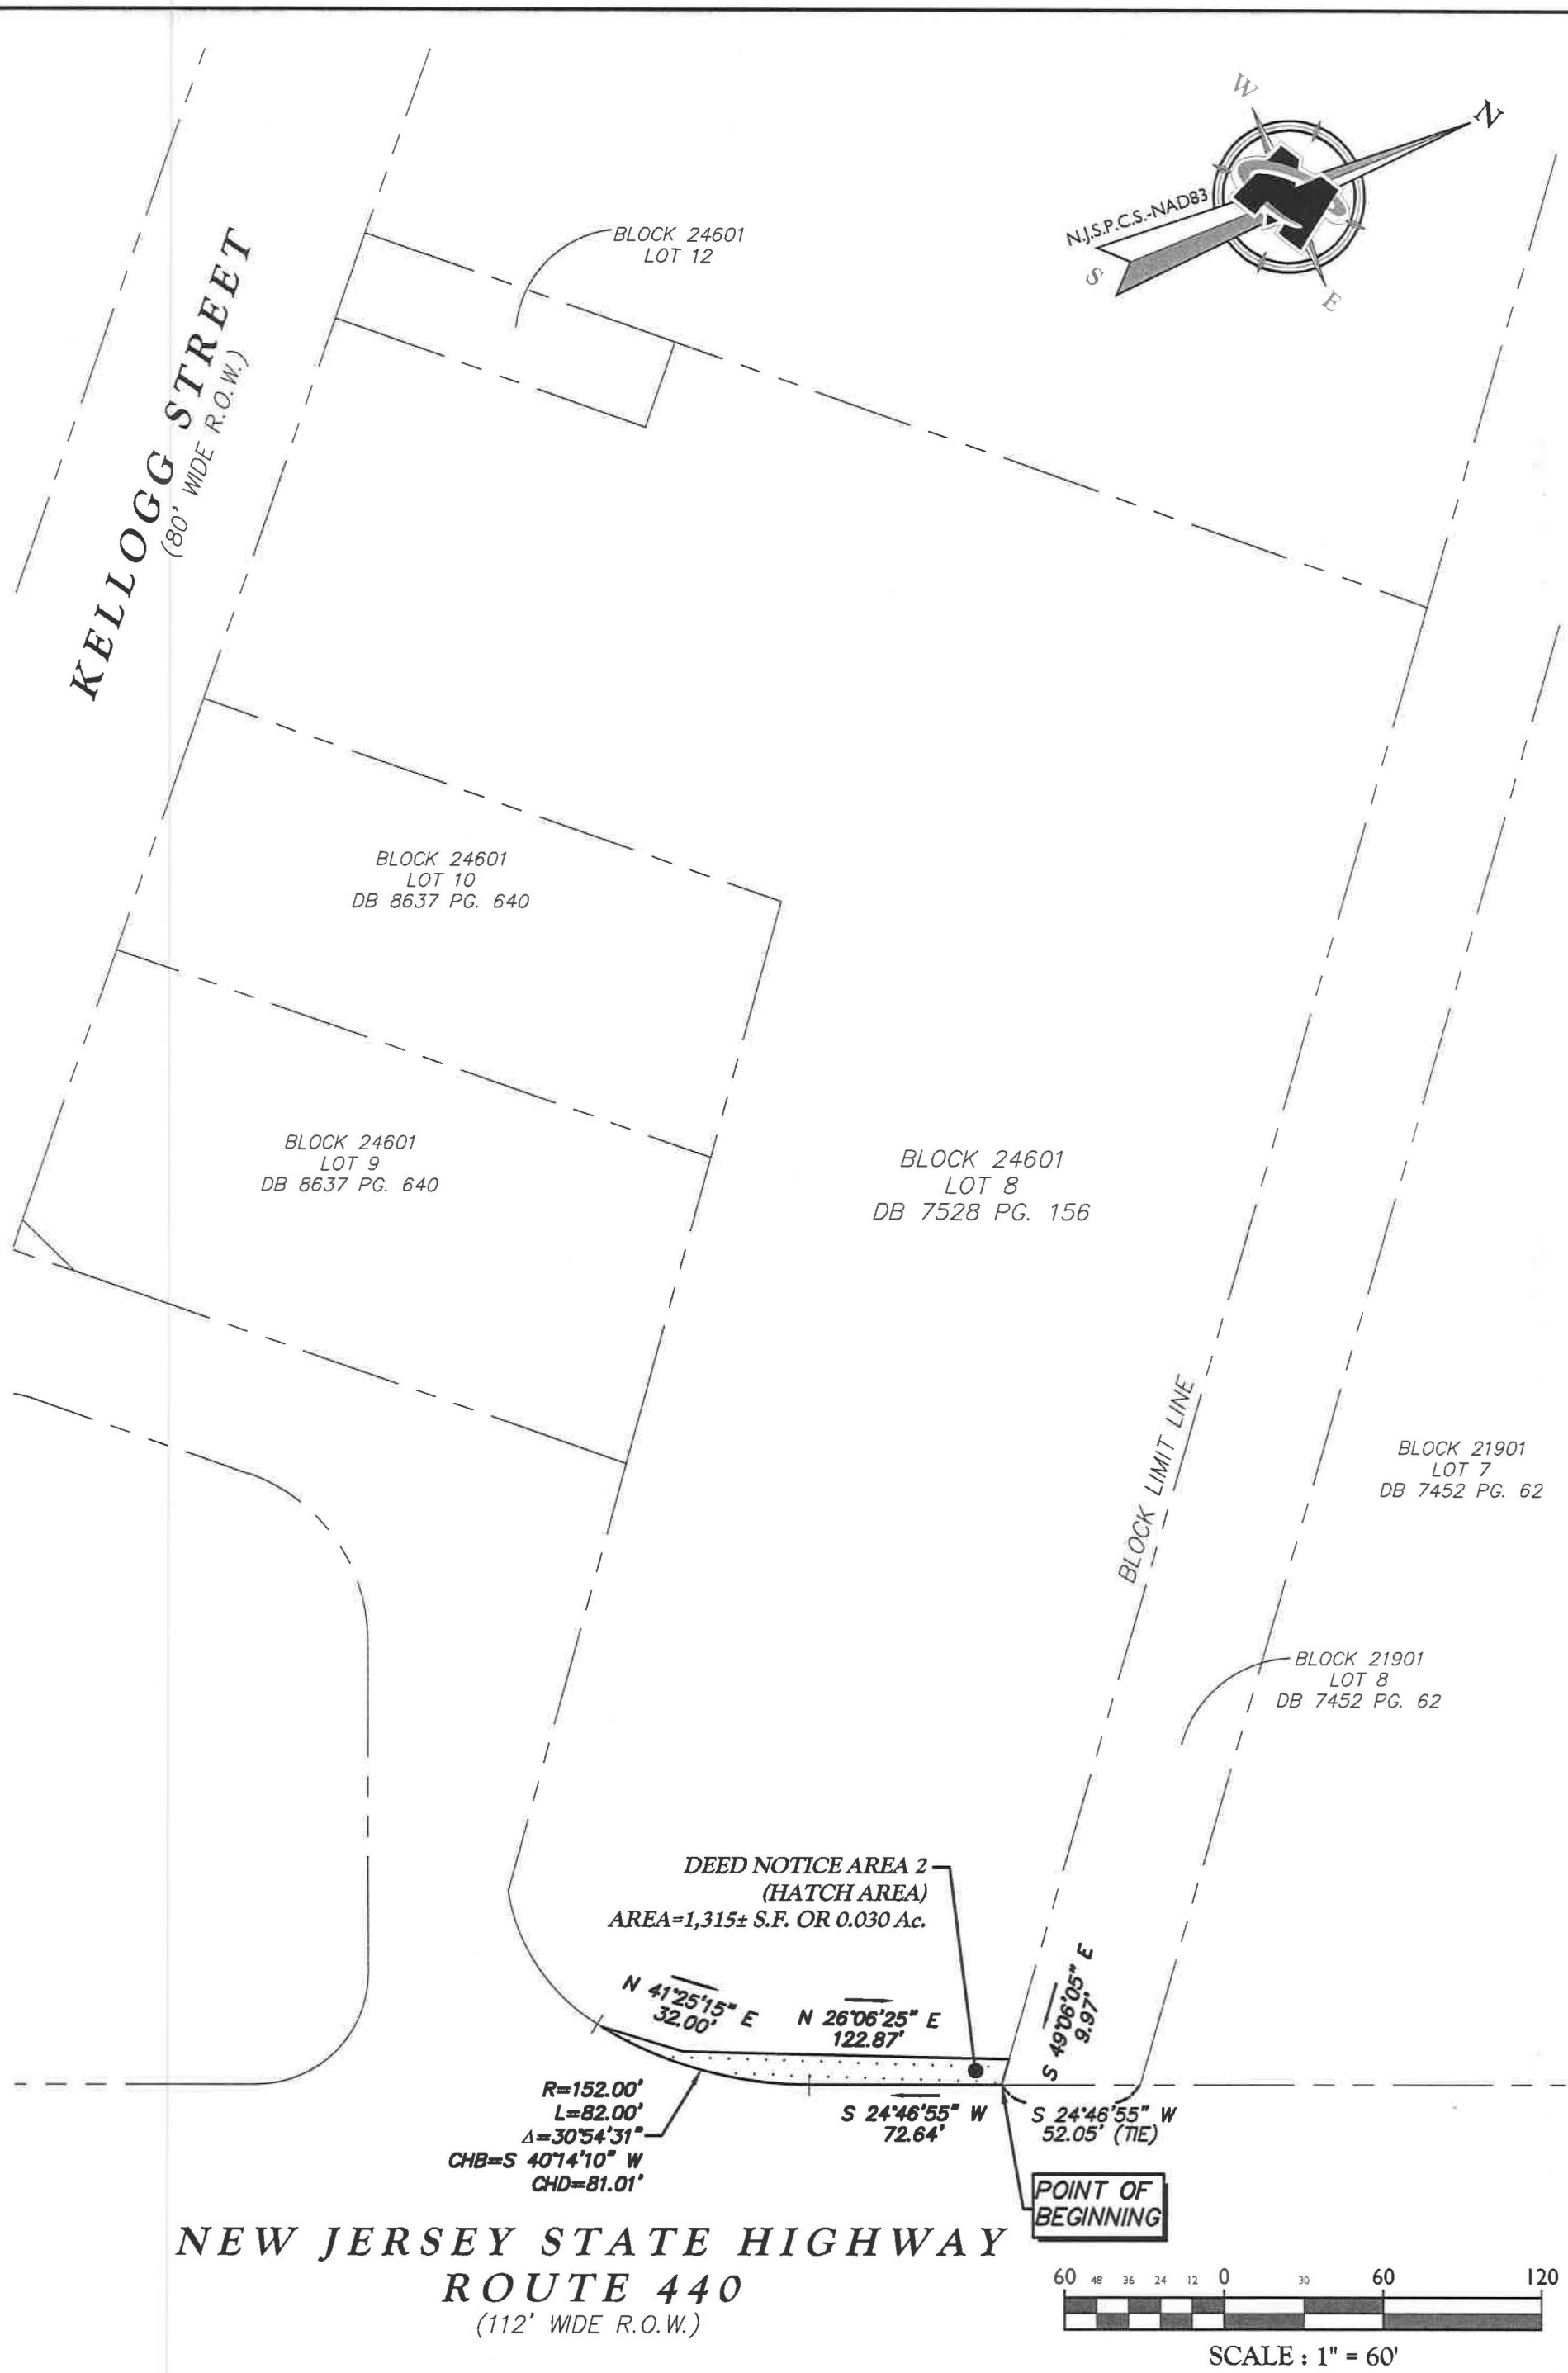
1. **S 24°46'55" W, 72.64 feet,** along the westerly line of New Jersey State Highway route 440 to a point of curvature; thence-

2. **SOUTHWESTWARDLY**, on an arc to the right having a radius of **152.00 feet,** and arc length of **82.00 feet** (central angle of **30°54'31"**), said arc being connected by a chord bearing **S 40° 14'10" W,** a chord distance of **81.01 feet,** along the same, to the intersection of the same with the easterly face of a hydraulic barrier wall; thence-

   Running through said Lot 8 Block 24601, along said easterly wall face the following two (2) courses:

3. **N 41°25'15" E, 32.00 feet,** thence-

4. **N 26°06'25" E, 122.87 feet** to the point and place of **BEGINNING**.



**CONTAINING:** 1,315 S.F. of land more or less or 0.030 acres of land more or less.

**EXHIBIT C**
**Deed Notice #2 SA-6 South Deferred Area Adjacent to Route 440 ROW**

**C-1 Institutional Controls**
**C-2 Engineering Controls**
**Portion of Block 24601, Lot 8**
**City of Jersey City, New Jersey**

## C-1 Institutional Controls

C-1 Deed Notice, Consent Decree (attached), Zoning as Institutional Controls: Exhibit C-1 (A through C) for that portion of Block 24601, Lot 8, City of Jersey City, New Jersey known as the Deferred Area

Exhibits C-1A and C-1B. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control; Exhibits C-1A and C-1B include a narrative description of the restrictions and obligations of this Deed Notice and the other Institutional Controls that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
**The Property is an approximately 15-foot wide, 1,315 square foot area on SA-6 South between the Route 440 Right of Way ("ROW") and the hydraulic barrier along the eastern edge of the SA-6 South Open Space AOC. Public Service Electric & Gas ("PSE&G") owns and operates a gas main on the Property, thus, excavation of chromium-impacted soil from the Property was not possible. Excavation of residual chromium contamination proximate to the gas line on the Property will be deferred by Honeywell until the gas line is relocated as part of the Route 440 Road Widening Project. Once the chromium-impacted soils on the Property are removed consistent with Article III of the Consent Decree, this deed notice will be terminated with the requirements of paragraph 13 above. The provisions of the LTMP, developed pursuant to the Consent Decree, will apply to the Property.**

(1) Description and estimated size of the Restricted Areas as described above;

***The Property constitutes a portion of Block 24601, Lot 8. The estimated size of the Area containing chromium-impacted soils (hexavalent chromium above 20 mg/kg) as identified on Exhibit B-1 is estimated at approximately 1315 square feet or approximately 0.03 acres.***

(2) Description of the restrictions on the Property by operation of the Institutional Control;

***The Property shall only be used for activities consistent with this Deed Notice, the Consent Decree, and the applicable zoning standards. Intrusive activities (i.e., excavation or digging) that breach the engineering controls (as described in Exhibit C-2) will not be permitted on the Property except in compliance with the***

***terms of the Consent Decree and the applicable portions of the LTMP developed thereunder, and this Deed Notice. See subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950.***

(3) The objective of the restrictions;

***The restrictions will prohibit contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg.***

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;

***Visual inspections of the Property and other monitoring as set forth in the Consent Decree and the applicable portions of the LTMP developed thereunder.***

(2) There have been any land use changes subsequent to the filing of this Deed Notice or the most recent biennial certification, whichever is more recent;

***Same as (B)(1).***

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice;

***Same as (B)(1).***

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the site; and

***Review of newly promulgated or modified requirements of applicable regulations or laws that potentially may apply to the site.***

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***Same as (B)(4).***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) Land use at the Property is consistent with the restrictions in the Consent Decree, this Deed Notice, the applicable zoning standards; and

(3) The remedial action that includes this Deed Notice continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including evaluation of any available documents as a result of changes in land use or incidents.***
- ***A report that determines whether or not the land use at the Property has remained consistent with the restrictions in the Consent Decree, this Deed Notice*, and *the applicable zoning standards.***
- ***A report that determines whether or not the Deed Notice continues to be protective of the public health and safety and the environment.***

**C-2 Engineering Controls**
**Deed Notice #2 SA-6 South Deferred Area Adjacent to Route 440 ROW**

**Portion of Block 24601, Lot 8**
**City of Jersey City, New Jersey**

Exhibits C-2: Narrative description of the Engineering Controls including Clean Fill as follows:

(A) General Description of the engineering controls:

(1) Description of the engineering controls;

***The Engineering Controls consist of an asphalt cap.***

(2) The objective of the engineering controls; and

***The objective of the controls is to prevent contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg.***

(3) How the engineering controls are intended to function.

***The soil engineering controls are intended to function as a barrier to underlying and adjacent soils containing hexavalent chromium above 20 mg/kg within the Property. Monitoring requirements for the engineering controls are set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

***Honeywell will perform monitoring by visual inspection of the Property pursuant to the Consent Decree. Other monitoring activities shall be performed as set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

***Same as (B)(1) above.***

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering controls;

***Same as (B)(1) above. Also, see the Consent Decree subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information.***

(4) The engineering controls are being inspected and maintained and their integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

***Same as (B)(1) above.***

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering controls. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering controls; and

***Records of the inspections are to be maintained as listed in (5). Other monitoring activities shall be performed as set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***A review of any new standards, regulations, or laws will be conducted. Should the review indicate that other activities are necessary, those activities will be listed and executed.***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including an evaluation to determine whether or not the engineering controls are continuing to meet the original objective and intended function.***

- ***A report to determine whether or not the engineering controls continue to operate as designed.***
- ***A report to determine whether or not the engineering controls continue to be protective of the public health and safety and of the environment.***

K. LONG-TERM FINANCIAL ASSURANCES ..... 61
101. Long-Term Financial Assurances. ..... 61
102. Costs Subject to Long-Term Financial Assurances. ..... 61
103. Long-Term Financial Assurance Mechanisms ..... 62
104. Procedures for Review of the Proposed Long-Term Financial Assurances ..... 66
105. Temporary Maintenance of Chromium Remedy Letter of Credit. ..... 66
106. Adjustment of Amount Held in Long-Term Financial Assurances. ..... 67
107. Exclusive Court Jurisdiction. ..... 68
108. Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired: ..... 68
109. Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default ..... 69
110. Use of the Trust Fund in the Event of Honeywell's Default. ..... 70
111. Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109. ..... 70
112. Termination of the Long-Term Financial Assurances. ..... 70

**ARTICLE IV: TERMINATION** ..... 71

113. Termination of this Consent Decree ..... 71
114. Procedures for Withdrawal and Termination. ..... 72
115. Good-Faith Obligation to Avoid Termination ..... 72
116. Effect of Termination. ..... 72

**ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC** ..... 72

117. Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC. ..... 72

**ARTICLE VI: NOTICE** ..... 73

118. Notice ..... 73
119. Payment of Past Fees and Expenses ..... 74
120. Future Fees and Expenses. ..... 75

**ARTICLE VIII: MISCELLANEOUS PROVISIONS** ..... 76

121. Force Majeure. ..... 76
122. Bayfront Redevelopment LLC as a Party. ..... 76
123. Successors and Assigns. ..... 77
124. Successors to Hackensack Riverkeeper, Inc.. ..... 77
125. Reservation of Rights and Claims. ..... 77
126. Governing Law and Continuing Jurisdiction. ..... 77
127. Construction. ..... 78
128. Authority to Enter into Agreement. ..... 78
129. Measures to Effectuate This Consent Decree ..... 78
130. Modifications. ..... 78
131. Severability. ..... 78
132. Signatures. ..... 79

## RECITALS

**Whereas,** on June 30, 2003, the district court for the District of New Jersey (hereafter "the Court") issued a Final Judgment in *Interfaith Community Organization v. Honeywell International Inc.*, Civ. No. 95-2097 (DMC) (*"ICO v. Honeywell"*), ordering the remediation of an area designated by the New Jersey Department of Environmental Protection ("NJDEP") as Study Area 7 by excavation of all chromium contamination on the property, under the oversight of a court-appointed Special Master;

**Whereas**, on or about December 23, 2005, the Jersey City Municipal Utilities Authority ("JCMUA") filed litigation styled *Jersey City Municipal Utilities Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5955 (DMC), bringing claims against Honeywell International Inc. ("Honeywell") under, *inter alia*, Section 6972 of the Resource Conservation and Recovery Act ("RCRA"), and seeking remediation of chromium contamination on property then-owned by JCMUA and other relief;

**Whereas**, on or about December 28, 2005, the Jersey City Incinerator Authority ("JCIA") filed litigation styled *Jersey City Incinerator Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5993 (DMC), bringing claims against Honeywell under, *inter alia*, Section 6972 of RCRA, and seeking remediation of chromium contamination on property then-owned by JCIA and other relief;

**Whereas**, on or about January 4, 2006, the Hackensack Riverkeeper, Inc., Captain William Sheehan, Reverend Winston Clarke, and Lawrence Baker ("Riverkeeper") filed litigation styled *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.,* D.N.J., Civ. No. 06-022 (DMC), bringing a claim against Honeywell under RCRA and seeking remediation of chromium contamination to soils, groundwater, surface waters, and sediments associated with

various properties collectively designated by NJDEP as Study Areas 5, 6 North, which includes the properties formerly owned by JCMUA and JCIA, and 6 South;

**Whereas,** Study Areas 6 North and South are directly adjacent to Study Area 7 on the north and south sides, respectively;

**Whereas,** Study Area 5 is comprised of properties to the east of Study Areas 6 North, 6 South, and 7 across Route 440;

**Whereas,** Riverkeeper also named as defendants in *Riverkeeper v. Honeywell* owners of the properties comprising Study Areas 5, 6 South, and 6 North;

**Whereas,** *JCMUA v. Honeywell*, *JCIA v. Honeywell,* and *Riverkeeper v. Honeywell* were consolidated by the Court (hereinafter the "Consolidated Litigation");

**Whereas,** in the Consolidated Litigation, Riverkeeper has alleged that Honeywell bears responsibility for the presence and remediation of chromite ore processing residue ("COPR") and chromium in soils and groundwater on the Study Area 6 South property;

**Whereas,** on April 21, 2008, the Court entered the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North (hereafter "the Study Area 6 North Consent Decree") resolving issues between Honeywell, Riverkeeper, and the Jersey City Entities related to chromium contamination at Study Area 6 North;

**Whereas**, on April 21, 2008, the district court for the District of New Jersey entered the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. (hereafter "Jersey City/Honeywell Consent Order"), filed in the Consolidated Litigation simultaneously with the Study Area 6 North Decree, which resolved claims and cross-claims between Honeywell and the Jersey City Entities;

**Whereas**, on May 28, 2008, the Court entered the Consent Order on Sediment Remediation and Financial Assurances ("Sediment Consent Order"), resolving issues related to the remediation of chromium contaminated sediments in the Hackensack River in the vicinity of Study Areas 5, 6, and 7;

**Whereas**, on September 3, 2008, the Court entered the Deep Overburden and Bedrock Groundwater Remedies Consent Order (hereafter "the Deep Groundwater Consent Order") resolving all issues related to the remediation of deep overburden and bedrock groundwater in both *ICO v. Honeywell* and the Consolidated Litigation;

**Whereas,** on May 13, 2011, Plaintiffs sent Honeywell a RCRA citizen action suit notice letter with respect to Site 163, and the Parties agree that the incorporation of Site 163 into this Consent Decree resolves any claims asserted, or that could have been asserted, in the RCRA notice letter or in any RCRA citizen suit with respect to Site 163;

**Whereas**, the Parties to this Consent Decree each believe that it is in their mutual interest to move forward productively to resolve their differences so that they can implement environmental remediation at Study Area 6 South that ensures the continued protection of human health and the environment and so that Study Area 6 and Study Area 7 can be redeveloped in keeping with Jersey City's vision for a revitalized West Side;

**Whereas,** the Local Redevelopment and Housing Law, N.J.S.A. 40A:12A-1, *et seq.*, as amended and supplemented (the "Redevelopment Law") provides for municipalities to participate in the redevelopment and improvement of areas in need of redevelopment;

**Whereas**, Study Area 6 and Study Area 7 consist of parcels which by ordinance adopted by the City Council of Jersey City on February 27, 2008, have been determined to be "areas in

need of redevelopment" under the criteria of the Redevelopment Law because of conditions prevalent on those parcels;

**Whereas**, the settlement which is the subject matter of this Consent Decree contemplates the environmental remediation of Study Area 6 South and redevelopment of the parcels that comprise Study Areas 6 and 7 to create a major mixed use project in an important section of Jersey City; and

**Whereas**, each of the actions to implement this Consent Decree have been fully considered by the Honeywell, the Riverkeeper, and Jersey City as a means to accomplish the aforesaid purposes of this settlement:

NOW, THEREFORE, IT IS HEREBY ORDERED AND DECREED AS FOLLOWS:

## ARTICLE I: DEFINITIONS

For purposes of this Consent Decree, the following terms shall have the meanings set forth in this Article:

1. **"20 to 1000 Soils"** shall mean those soils containing less than 1000 mg/kg of hexavalent chromium, but greater than 20 mg/kg. **"20 to 240 Soils"** shall mean those soils containing less than 240 mg/kg of hexavalent chromium, but greater than 20 mg/kg.

2. **Bayfront Redevelopment LLC** shall have the meaning set forth in paragraph 4.1 of the Jersey City/Honeywell Consent Order.

3. **COPR** shall mean Chromite Ore Processing Residue.

4. **Chromium Remedy or Chromium Remediation** shall mean the remedy set forth in Article III.

5. **Consolidated Litigation** shall mean *Jersey City Municipal Utility Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5955 (DMC), *Jersey City Incinerator*

*Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5993 (DMC), and *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-022 (DMC).

6. The **Court** shall mean the United States District Court of the District of New Jersey, which has jurisdiction over the Consolidated Litigation.

7. **Deep Groundwater Consent Order** shall mean the Deep Overburden and Bedrock Groundwater Remedies Consent Order entered by the Court on September 3, 2008, in both *ICO v. Honeywell* and the Consolidated Litigation.

8. **Deep Groundwater Remedy** shall mean the deep overburden and bedrock groundwater pump and treat remedy as required by the Order Approving the Deep Overburden Groundwater Remediation, entered on October 6, 2006, the Stipulation on Consent Regarding the Schedule for Implementation of Deep Groundwater Remedial Actions, entered on August 15, 2008, in *ICO v. Honeywell,* and the remedies required under the Deep Groundwater Consent Order.

9. **Development Area of Concern** ("AOC") shall mean those portions of Study Area 6 South in which the hexavalent chromium concentration in the top 20 feet of soil below ground surfaces exceeds a concentration of 20 mg/kg, and for which future uses of the property may include commercial or residential development. The Open Space AOC shall not be part of the Development AOC and vice versa. The Development AOC consists of two parts: the Kellogg Street Development AOC and the Site 163 Development AOC. Collectively, the two parts shall be referred to as the "Development AOC." The approximate boundaries of the Development AOC as a whole and its two parts are shown on Exhibit A, but the boundaries may be further defined in the implementation of the Chromium Remedy. For the Kellogg Street Development AOC, remedial measures shall assume only a residential use. For the Site 163 Development AOC, remedial measures shall be implemented with the goal of unrestricted use, but limitations

on future uses (including prohibiting residential use) in some or all of the Site 163 Development AOC may be part of the remedy as set forth in paragraph 61.

10. **Hackensack River Watershed Land Trust** shall mean the dedicated fund of the Hackensack Riverkeeper, Inc., established under Section 501(c) of the Internal Revenue Code for the purpose of acquiring and preserving open space within the Hackensack River watershed and administered by the Board of Trustees of the Hackensack Riverkeeper, Inc.

11. **Honeywell** shall mean Honeywell International Inc. and its affiliates, including 425-445 Route 440 Property LLC, Kellogg Street 80 Property LLC, Kellogg Street 60 Property LLC, and Kellogg Street/440 Property LLC.

12. **Honeywell's Treatment Plant** shall mean the treatment plant currently located at 80 Kellogg Street that is used to treat, *inter alia*, chromium contaminated groundwater.

13. ***ICO v. Honeywell*** shall mean *Interfaith Community Organization v. Honeywell International Inc.*, D.N.J., Civ. No. 95-2097 (DMC).

14. **Including** shall mean including, but not limited to.

15. **JCIA** shall mean the Jersey City Incinerator Authority.

16. **JCMUA** shall mean the Jersey City Municipal Utilities Authority.

17. **Jersey City Entities** shall mean the City of Jersey City, including the Department of Public Works ("DPW") and other agencies and branches thereof, the JCIA, and the JCMUA.

18. **Jersey City/Honeywell Consent Order** shall mean the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. entered in the Consolidated Litigation on April 21, 2008.

19. **"L-Well Groundwater"** shall mean the groundwater found at the depth of the "L" wells on and near the former bowling alley property, NJDEP Site 124, located at 427 Route 440. The L-Well Groundwater is located within what has been referred to as the plume diversion area.

20. **NJDEP** shall mean the New Jersey Department of Environmental Protection.

21. **NJDEP Chromium Directive** shall mean the Chromium Directive issued by NJDEP on February 8, 2007, and attached as Exhibit B.

22. **Open Space AOC** shall mean the portion of Study Area 6 South that is identified as The Promenade park and Grand Boulevard extending from Route 440 to the Hackensack River on page 39 of the Redevelopment Plan and for which the future uses of the property shall be restricted pursuant to paragraph 74, following remediation pursuant to paragraph 65. The Development AOC shall not be part of the Open Space AOC and vice versa. The approximate boundaries of the Open Space AOC are shown on Exhibit A, and the boundaries may be further defined in the implementation of the Chromium Remedy.

23. **Party or Parties** shall mean any one or all of the signatories to this Consent Decree.

24. **RCRA** shall mean the Resource Conservation and Recovery Act, 42 U.S.C. § 6901, *et seq.*, as amended.

25. **Redevelopment Area** shall mean Study Area 6 North, Study Area 6 South, and Study Area 7, collectively.

26. **Redevelopment Law** shall mean the New Jersey Local Redevelopment and Housing Law, N.J.S.A. § 40A:12A1, *et seq.*, as amended and supplemented.

27. **Redevelopment Plan** shall mean the Bayfront I Redevelopment Plan as adopted by Jersey City on March 12, 2008.

28. **Remedial Investigation Work Plan Addendum or RIWP Addendum** shall mean the "Remedial Investigation Work Plan Addendum Study Area 6 South" submitted to NJDEP on June 27, 2008.

29. **Riverkeeper** shall mean the plaintiffs in *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-22 (DMC), and includes the Hackensack Riverkeeper, Inc., William Sheehan, Reverend Winston Clarke, and Lawrence Baker.

30. **Sediment Consent Order** shall mean the Consent Order on Sediment Remediation and Financial Assurances, entered by the Court in *ICO v. Honeywell* and this Consolidated Litigation on May 28, 2008.

31. **Shallow Groundwater** or **Shallow Level of Groundwater** shall mean groundwater above the meadow mat, groundwater at stratigraphically equivalent depths in locations where there is no meadow mat, and groundwater that is contaminated by recent contact with COPR or other chromium soil contamination above the meadow mat and subsequently flows downward through or past the meadow mat into the upper portion of the lacustrine sediments. This does not include groundwater found in the bedrock, the deep zone, or any plume of contamination that is in both the intermediate and deep zones, as those zones are defined in the Final Groundwater Investigation Report, prepared in *ICO v. Honeywell*, dated February 2007, p. 1-2.

32. **Site** shall mean Study Area 6 South.

33. **Site Preparation Activities** shall mean those activities necessary to begin implementation of the Chromium Remedy in Article III of this Consent Decree, including, if appropriate, the temporary or permanent relocation of current activities and operations conducted on Study Area 6 South.

34. **Soil** shall mean soils, historic fill, and/or COPR.

35. The **Special Master** shall mean Senator Robert G. Torricelli, appointed as the Special Master in *ICO v. Honeywell* and the Consolidated Litigation, and his successors or whomever the Court may appoint as Special Master.

36. **Stratum O** shall mean the layer composed of soft brown silty fine sand interlayered with soft gray silty clay and fine sandy to clayey silt generally located above the meadow mat below the Historic Fill and/or COPR.

37. **Study Area 5** shall mean that property comprising Sites 79, 90, 117, 153, and 184 of the Chromate Chemical Production Waste Sites designated by NJDEP, comprising approximately 42 acres and including (a) all such property owned by Bob Ciasulli consisting of Block 1291, Lot 76, and Block 1292, Lots 1F, 47, 48, 53, and 54PL, located at 540 Route 440, Jersey City, New Jersey, (b) all such property owned by Elisabeth and Rafael Rosario consisting of Block 1292, Lot 49, located at 93 Fisk Street, Jersey City, New Jersey, (c) all such property owned by Michael Vo consisting of Block 1292, Lot 50, located at 95 Fisk Street, Jersey City, New Jersey, (d) all such property owned by NJCU consisting of Block 1286, Lots 5 and 6D and Block 1286.5, Lots 1 and 2, Jersey City, New Jersey, (e) all such property owned by Inland Southeast Jersey City LLC consisting of Lot 1, Block 1285.5 located at 440 Route 440, Jersey City, New Jersey, and (f) all such property owned by 425/445 Route 440 Property LLC, consisting of Block 1289.5, Lot E, Jersey City, New Jersey.

38. **Study Area 6 North** shall mean the property comprising Sites 87 and 88 of the Chromate Chemical Production Waste Sites designated by NJDEP, which is subject to the Study Area 6 North Consent Decree.

39. **Study Area 6 North Consent Decree** shall mean the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North, entered by the Court on April 21, 2008, in the Consolidated Litigation.

40. **Study Area 6 South** shall mean (a) that property currently owned by Bayfront Redevelopment Property LLC consisting of Site 73, located at 200 Kellogg Street Jersey City, Hudson County, New Jersey; (b) that property currently owned by Bayfront Redevelopment LLC consisting of Site 134, located at 100 Kellogg Street Jersey City, Hudson County, New Jersey; (c) that property currently owned by Bayfront Redevelopment LLC consisting of Site 140 located at 80 Kellogg Street Jersey City, Hudson County, New Jersey; (d) that property currently owned by Bayfront Redevelopment LLC consisting of Site 125, located at 60 Kellogg Street Jersey City, Hudson County, New Jersey; (e) that property currently owned by Bayfront Redevelopment LLC consisting of Site 124, Jersey City, Hudson County, New Jersey; (f) that property currently owned by Kellogg St/Harsimus Cove Realty located at 150 Kellogg Street, Jersey City, Hudson County, New Jersey, (g) that property currently owned by Bayfront Redevelopment LLC located at 38 Kellogg Street, Jersey City, Hudson County, New Jersey; (h) that property currently owned by Bayfront Redevelopment LLC located at 28 Kellogg Street, Jersey City, Hudson County, New Jersey; and (i) that property currently owned by Bayfront Redevelopment LLC, consisting of Site 163, formerly the Colonial Concrete Company, located at 75 Kellogg Street in Jersey City, Hudson County, New Jersey.

41. **Study Area 6** shall mean Study Area 6 North and Study Area 6 South, collectively.

42. **Study Area 7** shall mean (a) that property currently owned by Bayfront Redevelopment LLC located at 425 and 445 Route 440, Jersey City, Hudson County, New Jersey, and (b) that

property currently owned by Bayfront Redevelopment LLC located at 465 Route 440, Jersey City, Hudson County, New Jersey.

43. **Technical Requirements for Site Remediation** shall mean the NJDEP Technical Requirements for Site Remediation, N.J.A.C. Chapter 26E, as duly and properly promulgated and amended.

44. **Unrestricted Use** shall mean that the contaminated medium is restored to a condition or quality suitable for all uses.

## ARTICLE II: SCOPE OF THE CONSENT DECREE, JURISDICTION, AND CLAIMS RESOLVED

45. This Court has jurisdiction over the Parties and subject matter of the Consolidated Litigation pursuant to Section 6972 of RCRA.

46. For purposes of this Consent Decree, the Riverkeeper Complaint in the Consolidated Litigation states claims upon which relief may be granted against Honeywell.

47. In the event that this Decree is not terminated by one or more Parties pursuant to paragraph 113, this Consent Decree resolves, settles, and satisfies all claims by Riverkeeper against Honeywell with respect to soils, shallow groundwater and L-Well groundwater at Study Area 6 South. This Consent Decree does not resolve any claims by Riverkeeper against Honeywell with respect to Study Area 5 or property owned by Regnal Realty consisting of Block 1288.2, lot 1, located at 420 Route 440, Jersey City, New Jersey.

48. Nothing in this Consent Decree shall be construed or interpreted to waive any claim or defense any Party has asserted or may assert against any third party in the Consolidated Litigation except as explicitly stated herein.

49. This Consent Decree does not constitute an admission of liability on the part of any Party with respect to any claims, cross-claims, or counter-claims in the Consolidated Litigation.

## ARTICLE III: CHROMIUM REMEDIATION

### A. General Terms and Requirements

50. **Responsibility for Implementation of Chromium Remediation.** As between the Parties, Honeywell shall be responsible for and shall undertake remediation of COPR and chromium present in Study Area 6 South at Honeywell's sole cost and expense. Remediation of COPR and chromium present in Study Area 6 South shall be undertaken in accordance with the terms of this Consent Decree.

51. **Designation of Chromium Areas of Concern.** For the purposes of remediation, Study Area 6 South shall consist of two AOC's, designated as the Open Space AOC and the Development AOC as shown approximately on Exhibit A. The exact boundaries of the two AOC's shall be subject to further delineation during the design and implementation of the Chromium Remedy.

52. **Consistency of the Chromium Remedy with NJDEP Guidance and Remedial Action Work Plan.** The Chromium Remedy shall be consistent with the NJDEP Technical Requirements for Site Remediation, the Chromium Directive as issued by NJDEP on February 8, 2007 ("the NJDEP Chromium Directive"), and any Remedial Action Work Plan, including any modifications or addenda approved by NJDEP. Prior to submitting any Remedial Action Work Plan, Honeywell shall take all reasonable steps to ensure that the plan is consistent with the Chromium Remedy. However, this Consent Decree shall have precedence over any Remedial Action Work Plan in the event of any inconsistency. The approved Remedial Action Work Plan is a minimum standard, and the Chromium Remedy may be more protective than the remedy NJDEP approves.

53. **General Scope of the Chromium Remedy.** The Chromium Remedy shall address shallow groundwater and L-Well groundwater containing total chromium concentrations of 70 µg/l or greater and soil containing hexavalent chromium at concentrations of 20 mg/kg or greater within the top 20 feet of soil below the ground surface, and shall be consistent with the requirements set forth in this Article. The Chromium Remedy set forth in this Consent Decree addresses only the shallow and L-Well levels of groundwater (see paragraphs 69 - 72). The deep overburden and bedrock groundwater remediation, including source control, is addressed in the Deep Groundwater Consent Order.

54. **Development of a Schedule for the Chromium Remedy.** The Chromium Remedy shall be carried out diligently, and the development and implementation of any remedy required by NJDEP for non-chromium contamination shall not delay satisfaction of the milestones in the Schedule established pursuant to this paragraph. Within 90 days of entry of this Consent Decree, Honeywell shall propose a Master Schedule for the implementation of the Chromium Remedy .

(a) The Master Schedule shall incorporate the following dates:

(i) No later than August 15, 2008, Honeywell shall submit a Chromium Impacted Soils Pilot Test Work Plan to NJDEP and Riverkeeper;

(ii) No later than September 15, 2008, Honeywell shall complete field work in accordance with the RIWP Addendum;

(iii)No later than December 31, 2008, Honeywell shall submit an Initial Treatment Study Report and Remedial Action Work Plan pursuant to paragraph 86(c);

(iv) No later than July 31, 2012, Honeywell shall submit the soil and groundwater data from its 2010 and 2011 supplemental investigation of Site 163, a brief summary report, and

a designation of the boundaries of the Site 163 Development AOC to the Special Master pursuant to paragraph 86(c);

(v) No later than October 1, 2012, Honeywell shall submit an addendum to the Study Area 6 South 100% Design setting forth the 100% Design for the Site 163 Development AOC portion of the Study Area 6 South Chromium Remedy; and

(vi) Honeywell shall undertake, in good faith, to begin implementation of the Chromium Remedy by March 1, 2013.

(b) In addition, the Master Schedule shall propose deadlines for the following milestones:

(i) Submission of all documents subject to submission and review pursuant to paragraph 86(c);

(ii) Completion of those Site Preparation Activities necessary for the implementation of the Chromium Remedy;

(iii)Submission, following implementation of the soil components of the Chromium Remedy for the Development AOC, of the groundwater plans and reports required by paragraphs 70 and 72;

(iv)Completion of additional sampling for shallow groundwater delineation pursuant to paragraph 71 and a proposal for a remedy pursuant to paragraph 71, if needed;

(v) The submission of a 50% Design Report for the Chromium Remedy;

(vi) The submission of a 100% Design Report for the Chromium Remedy;

(vii) The date for completion of the installation of the Chromium Remedy;

(viii)Implementation of the long-term protections of the Open Space AOC established pursuant to paragraph 74; and

(ix) Transfer of the Open Space AOC to Jersey City pursuant to paragraph 74(a)(iii).

### B. Initial Chromium Remedy Steps: Delineation, Treatment Study, and Remedial Action Work Plan

55. **Delineation of Development AOC.** Honeywell shall conduct further soil sampling on Study Area 6 South in accordance with the RIWP Addendum. In addition to the locations set forth in the RIWP Addendum, Honeywell shall conduct further soil sampling pursuant to the provisions of the RIWP Addendum at the boring locations set forth in Exhibit E. Upon completion of the soil sampling required by this paragraph, Honeywell shall submit a Second Supplemental Remedial Investigation Report that sets forth the results of the sampling and Honeywell's proposal as to the delineation of the Development AOC. In conjunction with its proposal, Honeywell shall set forth its rationale as to whether prior sampling data should be included or excluded in the proposed delineation. The soil sampling and submission of a Second Supplemental Remedial Investigation Report shall be completed in accordance with the Schedule set forth in paragraph 54. Honeywell shall submit the Second Supplemental Remedial Investigation Report pursuant to paragraph 86(c). The Site 163 Development AOC shall be exempt from the requirements of paragraphs 55-58.

56. **Conduct of a Treatment Study in the Development AOC.** Honeywell shall conduct a field study of the efficacy of *in situ* treatment of 20 to 1000 Soils in accordance with the Chromium Impacted Soil Pilot Test Work Plan. The purpose of the pilot test shall be to evaluate whether *in situ* chemical treatment of 20 to 1000 Soils with one or more reductants can result in the permanent establishment of hexavalent chromium concentrations below 20 mg/kg under conditions in those areas of the Development AOC that may be subject to treatment as a remedy. Honeywell shall provide the raw data from the pilot test to NJDEP and Riverkeeper in scientifically useable electronic form as soon as the data become available. Honeywell shall

submit an Initial Treatment Study Report setting forth the initial results of the pilot test pursuant to paragraph 86(c) .

57. **Continued Monitoring of the Treatment Study.** As the result of the need to complete Study Area 7 remediation, to maintain Study Area 7 remediation support operations currently located on Study Area 6 South, and to conduct Site Preparation activities including the relocation of operating businesses on Study Area 6 South in advance of implementation of the Chromium Remedy, the Parties do not anticipate that implementation of field work for the Chromium Remedy will begin until March 1, 2013. Honeywell shall continue to monitor the performance of the pilot test and shall submit a Final Treatment Study Monitoring Report assessing the long term effectiveness of treatment for 20 to 1000 Soils in the Development AOC pursuant to paragraph 86(c) no later than December 31, 2011.

58. **Submission of a Remedial Action Work Plan.** On or before December 31, 2008, Honeywell shall submit a Remedial Action Work Plan for the Chromium Remedy pursuant to paragraph 86(c). The Remedial Action Work Plan shall be consistent with the Chromium Remedy set forth in this Consent Decree.

### C. Development AOC Soil Remedy

59. **Remedial Components.** In the Development AOC, soils containing hexavalent chromium at concentrations greater than 20 mg/kg shall be remediated as follows:

(a) Soils with a concentration greater than 1000 mg/kg shall be:

(i) Excavated and disposed of off-site at a waste disposal facility licensed to accept such waste; or

(ii) Treated *ex situ* and consolidated under the cap in the Open Space AOC provided the requirements of paragraphs 60 and 63 are satisfied and provided that such soils do not

require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a).

(b) 20 to 1000 Soils shall be:

(i) Excavated and consolidated within the Open Space AOC provided that such soils do not require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a); or

(ii) Excavated and disposed of off-site pursuant to the requirements of paragraph 59(a); or

(iii) Remediated pursuant to paragraphs 59(c) or 59(d) provided that such soils are also 20 to 240 soils and meet the requirements of paragraphs 59(c) or 59(d).

(c) 20 to 240 Soils may be remediated by excavation and consolidation within the Study Area 6 North AOC 1 Open Space Area, provided that such soils do not require venting of gases and shall not serve as the basis for the inclusion of gas venting as part of the Study Area 6 North AOC 1 Open Space Area remedy.

(d) 20 to 240 Soils within the Site 163 Development AOC may be remediated by *in situ* treatment, provided the requirements of paragraph 61 are satisfied.

60. **Treatment and Consolidation of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** *Ex situ* treatment and consolidation under the Open Space AOC cap may be used as a remedial component for soils containing greater than 1000 mg/kg hexavalent chromium provided that the requirements of this paragraph are satisfied:

(a) Honeywell demonstrates in the Final Treatment Study Monitoring Report that the proposed treatment will likely result in the reduction of the hexavalent chromium concentration of the treated soils such that the post-treatment total chromium concentration shown by Toxicity

Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C);

(b) Following a review of the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d), NJDEP agrees that Honeywell has made the demonstration required by paragraph 60(a).

(c) Plaintiffs have had an opportunity to review and comment on the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d)and pursuant to the Special Master review process set forth in paragraphs 86(e)-86(f); and

(d) Following review of the demonstration required by paragraph 60(a) pursuant to the Special Master review process set forth in paragraph 86(f), the Special Master issues a recommendation finding that Honeywell has made the demonstration required by paragraph 60(a) or the Court finds that Honeywell has made the demonstration required by paragraph 60(a) in the event that any Party seeks the Court's review of the Special Master's recommendations under this paragraph.

61. **Treatment as a Remedial Component for 20 to 240 Soils.** *In situ* treatment may be used as a remedial component for the 20 to 240 Soils in the Site 163 Development ACO, provided that such soils are 3 feet or more below ground surface and the requirements of this paragraph are satisfied:

(a) If Honeywell elects to treat *in situ* 20 to 240 Soils in the Site 163 Development AOC, Honeywell shall include in the 100% Design Addendum for Site 163 a plan for such treatment. Such treatment plan shall be comparable in detail and approach to the pipeline treatability plan which is Appendix F to the Study Area 6 North 100% Design. The goal of such *in situ* treatment

shall be to reduce hexavalent chromium soil concentrations to less than 20 mg/kg in soils 20 feet or less below ground surface;

(b) Three years after conducting the treatment set forth in subparagraph (a), Honeywell shall collect additional soil samples in the treated areas to evaluate the success of the treatment. These soil samples shall be analyzed for EH, pH, hexavalent chromium (using EPA/NJDEP Methods 3060A/7199), and sulfides (using EPA Method 9030B). Within 60 days of its receipt of the final data from such sampling, Honeywell shall submit a report with such data to the Special Master pursuant to paragraph 86(c);

(c) In the event that the sampling pursuant to subparagraph (b) shows that soils with greater than 20 mg/kg hexavalent chromium remain or that excess treatment reductant remains present, Honeywell may elect to pursue one or more of the following approaches after providing notice to the Special Master, Riverkeeper and the Jersey City Entities;

(i) In the case of excess treatment reductant remaining in the soil, continue to monitor such areas pursuant to subparagraph (b) until the excess reductant is no longer present;

(ii) In the case of soils with greater than 20 mg/kg hexavalent chromium:

(1) Excavate such soils and consolidate them under the cap in the Open Space AOC, consolidate them under the cap in the Study Area 6 North AOC 1 Open Space Area, and/or dispose of them off-site provided that in each instance the applicable requirements of paragraph 59 are satisfied;

(2) Conduct further *in situ* treatment using additional treatment reductant and submit a monitoring plan pursuant to paragraph 64; or

(3) In the event that the soils are within the areas depicted as River Front Park, Riverfront Drive or Kellogg Street on page 39 of the Redevelopment Plan, cover the affected

soils with a road, walkway, and/or other hardscape and restrict the use of that area through each of the following institutional controls:

(a) Issuance and recording of a conservation restriction comparable to that required under paragraphs 74(b) and 74(d);

(b) Transfer of title to that area to Jersey City pursuant to paragraphs 74(a)(iii) through 74(a)(iv)(2); and

(c) Issuance and recording of a deed notice comparable to that required under paragraphs 74(c) and 74(d).

62. **Submissions Related to Site 163.** Pursuant to the Schedule, Honeywell shall prepare and submit the following with regard to Site 163:

(a) A summary report of all chromium soil and groundwater data collected during site investigations in 2010 and 2011; and

(b) An addendum incorporating Site 163 into the 100% Design.

63. **Post-Treatment Analysis of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** In the event that *ex situ* treatment is used as a final remedy for any portion of the soils containing greater than 1000 mg/kg pursuant to paragraph 59(a)(ii), Honeywell shall conduct post-treatment analysis of each treated batch of soil to demonstrate that the treatment has resulted in the reduction of the hexavalent chromium concentration such that the post-treatment total chromium concentration shown by Toxicity Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C). Such monitoring and demonstration shall be made prior to consolidation of the treated soils under the Open Space AOC cap pursuant to paragraph 59(a)(ii). In the event that Honeywell fails to make the demonstration required by this paragraph,

Honeywell shall dispose of the soils off-site at a waste disposal facility licensed to accept such waste.

64. **Post-Treatment Monitoring for 20 to 1000 Soils.** In the event that *in situ* treatment is used as a final remedy for any portion of the 20 to 1000 Soils, Honeywell shall conduct post-treatment monitoring to demonstrate that the treatment has resulted in permanent hexavalent chromium concentrations of less than 20 mg/kg in the treated area. Honeywell shall propose a program of post-treatment monitoring in a document that is submitted pursuant to paragraph 86(c). In the event that Honeywell fails to make the demonstration required by this paragraph, Honeywell shall propose further remedial actions pursuant to paragraph 59 in a document that is submitted pursuant to paragraph 86(c).

**D. Open Space AOC Components of the Chromium Remedy**

65. **Open Space AOC Soil Remedy.** In the Open Space AOC, the soil remedy shall consist of an engineered RCRA cap to isolate contaminated soils with gas venting, if necessary, to address the generation of methane and other naturally occurring gases in the Stratum O and/or Stratum D in the Open Space AOC. Soils consolidated under the cap, pursuant to paragraph 59(b)(i), shall not require gas venting and shall not be the basis for the inclusion of gas venting as a component of the cap. The cap shall be designed and constructed so that:

(a) The cap shall consist of a gas collection system, if gas venting is necessary, a base protective layer, an impervious geomembrane liner with a minimum thickness of 40 mil; a geocomposite drainage layer; a filter fabric; and a distinctive colored warning layer with markings in English and Spanish that would deter penetration of the cap in the event that digging occurred in the vicinity of the cap;

(b) All utilities, including those supporting the pump-and-treat system for groundwater remediation, with the exception of any extraction wells or collection trenches, shall be placed above the cap (but may be below the ground surface and/or contained within utility corridors). In the event that above-cap-grade gas collection and treatment is selected or is needed to meet current or future regulatory requirements, such collection and treatment facilities are prohibited in the Open Space AOC, except for piping to connect the sub-liner collection system with the treatment facilities; and

(c) Exclusive of roadways, the cap shall be overlain by layers of clean fill, backfill and/or overburden with an average depth of at least three feet and a minimum depth of at least two feet provided that any layer that incorporates overburden shall be below at least two feet of clean fill. Any clean fill or backfill soil brought to the Site will either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master. One foot of clean fill, covered with bituminous blacktop, shall be sufficient cover where roads, walkways, or other paved surfaces are located within the Open Space AOC. All clean soil fill in areas that will not involve paved roads, walkways, or other paved surfaces shall be vegetated in such a manner as to protect and maintain the required depth of the clean soil fill and to ensure that such vegetation shall not cause any interference with or penetration of the cap.

(d) The existing overburden soils in the Open Space AOC shall first be stripped off and set aside for use. If hexavalent chromium concentrations in the overburden exceed 20 mg/kg, the overburden shall be placed under the cap. If hexavalent chromium concentrations in the overburden do not exceed 20 mg/kg, the overburden may be placed above the cap but below the

two feet of clean fill required by paragraph 65(c). Excavated 20 to 1000 Soils from the Development AOC shall be placed and spread in the Open Space AOC under the cap. Both the chromium impacted soils and the previously stripped overburden shall be suitably compacted according to design specifications. Debris, to the extent it would interfere with the compaction specification requirements of the 100% Design, shall not be placed under the cap. The engineered cap shall be installed over the chromium-impacted soils exceeding 20 mg/kg hexavalent chromium.

**E. Demolition, Grading, and Backfill Requirements**

66. **Demolition and Grading Activities.** During demolition and grading activities, adequate protective measures shall be taken to protect site workers and the community from airborne dusts and exposures to contaminated soils.

67. **Backfill Requirements.** Soils excavated from the Development AOC shall be replaced with backfill soil. Any backfill soil brought to the Site shall either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master.

68. **Vegetation of Clean Fill.** All clean soil fill in areas that will not involve paved roads, sidewalks, paths, walkways, or building structures shall be vegetated in such a manner to protect and maintain the required depth of clean soil fill.

**F. Groundwater Components of the Chromium Remedy**

69. **Shallow Groundwater Remedy for the Open Space AOC.** The Open Space AOC shallow groundwater remedy shall consist of hydraulic barriers with a pump-and-treat system designed to isolate shallow groundwater and to intercept and treat shallow groundwater flowing

above the meadow mat in the Open Space AOC to the extent that such groundwater contains total chromium in concentrations in excess of 70 µg/l. The shallow groundwater remedy shall consist of the following:

(a) The existing soil/cement/bentonite wall on the boundary of Study Area 6 South and Study Area 7 shall be incorporated into the other engineering controls;

(b) Subterranean slurry walls or other hydraulic barriers shall be installed along the southern, eastern and western sides of the Open Space AOC and keyed into the meadow mat or Stratum O or to comparable depths below ground surface;

(c) A groundwater extraction system shall be established that shall consist of (i) one or more shallow extraction wells, sumps, or french drains within the Open Space AOC; (ii) pumps; and (iii) underground piping to convey any extracted water to Honeywell's Treatment Plant;

(d) The capture zone for the shallow groundwater remedy shall include at least the entire area of contaminated shallow groundwater within the Open Space AOC;

(e) A plan for control of water levels shall be developed;

(f) In the event that underground structures are demolished, the plans shall address the need for special attention for structures that extend below the meadow mat in order to control needed water levels; and

(g) Honeywell shall submit such information as is required to allow NJDEP to establish a classification exception area for groundwater at the Site, in accordance with NJDEP regulations.

70. **The Shallow Groundwater Remedy for the Development AOC.** Following implementation of the Development AOC soil components of the Chromium Remedy, Honeywell shall submit a report to (a) determine whether shallow groundwater remaining in the

Development AOC exceeds 70 µg/l total chromium and, (b) if so, evaluate the need for further remedial measures to address any such shallow groundwater remaining in the Development AOC with total chromium concentrations in excess of 70 µg/l. This evaluation shall be subject to review and comment by the Parties and approval by the Special Master.

(a) In the event that the evaluation demonstrates that further remedial measures are necessary, Honeywell shall propose such measures subject to review and comment by the Parties and approval by the Special Master;

(b) The capture zone of any remedy shall include at least the entire area of contaminated shallow groundwater except for shallow groundwater that is captured and subject to the shallow groundwater remedy for the Open Space AOC pursuant to paragraph 69;

(c) In the event that a pump-and-treat system is selected as a contingency measure for shallow groundwater in the Development AOC, all infrastructure for the pump-and-treat contingency system that is needed to ensure that the contingency system is fully operational, as required by paragraph 70(d), shall be installed prior to or in conjunction to any development of the Site. This includes at least one shallow extraction well, sump, or french drain, and the piping to convey any extracted groundwater to Honeywell's water treatment plant;

(d) If it is determined that the pump-and-treat contingency system must be activated, the pump-and-treat system shall be operational no later than six months after the date of the determination.

71. **Off-Site Shallow Groundwater Remedy.** Honeywell shall propose additional sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site. Honeywell shall submit a report of the results of such sampling and, in the event that contaminated shallow groundwater is found to extend off-site, a proposal for a remedy based on

such results. The report and the proposal for a remedy shall be subject to review and comment by the Parties and approval by the Special Master.

72. **L-Well Groundwater Remedy.** At the time this Decree is entered, the L-Well Groundwater is contained and not contributing to further contamination of surrounding waters and/or soils. However, in order to verify that this status continues following implementation of the Chromium Remedy, including any groundwater remedial measures pursuant to paragraphs 70 and 71, Honeywell shall propose a plan for one round of monitoring designed to evaluate whether the L-Well Groundwater remains contained. The plan shall include monitoring for total and hexavalent chromium and major ion chemistry to determine whether there has been movement in the L-Well Groundwater.

(a) In the event that no substantial change is detected in the major ion chemistry, no further action is required unless paragraph 72(c) is applicable.

(b) In the event that substantial changes are detected in the major ion chemistry, Honeywell shall propose a plan for further monitoring of the L-Well Groundwater. Such a plan shall be subject to review and comment by the Parties and approval by the Special Master.

(c) In the event that the initial monitoring or monitoring conducted pursuant to paragraph 72(b) demonstrates that proximate waters have total chromium concentrations in excess of 70 µg/l, regardless of whether there is a change in the major ion chemistry, Honeywell shall propose a remediation plan for the L-Well Groundwater. Such remediation plan shall be subject to review and comment by the Parties and approval by the Special Master.

### G. Permits and Authorizations

73. **Permits and Authorizations.** Honeywell shall obtain all necessary federal, state, and local permits and authorizations to carry out the Chromium Remedy as set forth in this Article.

## H. Long-Term Monitoring, Maintenance, and Protection of Engineering and Institutional Controls

74. **Protection of the Open Space AOC.** Except as provided in paragraphs 74(j) and 74(k), development in the Open Space AOC shall be prohibited. The Open Space AOC shall be protected against activities that may jeopardize the integrity of the cap and/or the groundwater remedial measures that shall be installed in the Open Space AOC pursuant to the Chromium Remedy or that may impede the long-term monitoring and maintenance of the cap and/or groundwater remedial measures. It is the intention of the Parties to implement different layers of protection, which alone or in concert, impose restrictions on development, run with the land, and survive all parties. Accordingly, the following actions shall be taken pursuant to the Schedule provided in paragraph 54:

(a) **Ownership of and Access to the Open Space AOC.** Ownership of and access to the Open Space AOC shall be in accordance with the following:

(i) Bayfront Redevelopment LLC, as the current owner in fee simple absolute of all property that comprises the Open Space AOC, shall not convey any rights or interests in any parcel that comprises the Open Space AOC property except as provided in this Decree. Within 90 days of entry of this decree, Bayfront Redevelopment LLC shall give Jersey City an option to buy all of the Open Space AOC property prior to the planned transfer pursuant to paragraph 74(a)(iii). Such option to buy shall be subject to the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall exercise the option to buy the Open Space AOC in the event that the conditions allowing for withdrawal of funds from the financial assurance mechanisms under paragraphs 98(c) or 98(d) are met;

(ii) Within 90 days of the entry of this Consent Decree, Bayfront Redevelopment LLC shall grant a conservation restriction for the Open Space AOC pursuant to the requirements of paragraph 74(b);

(iii) Upon the final construction of all roads and utility corridors within the Open Space AOC, Bayfront Development LLC shall donate good and marketable title to all the land comprising the Open Space AOC to Jersey City. In conjunction with such donation, Bayfront Redevelopment LLC shall petition to subdivide the properties within Study Area 6 South to create a new parcel(s) comprising the Open Space AOC. At the time of the donation, Jersey City shall grant Honeywell an easement for the purpose of monitoring and maintaining the Chromium Remedy. Jersey City shall also grant Honeywell all necessary access to the Open Space AOC by license or such other mechanisms as may be appropriate for purposes of monitoring and maintaining the Chromium Remedy. After it acquires title pursuant to this paragraph, Jersey City shall retain ownership of the Open Space AOC unless and until it shall have complied with the requirements of paragraph 74(a)(iv);

(iv)After it acquires title pursuant to this paragraph, Jersey City shall not convey or enter into any lease of the Open Space AOC to any other person or entity unless it has first satisfied either of the following conditions:

(1) Jersey City has obtained the Special Master's (or if the Special Master's appointment has expired, the Court's) approval to convey the Open Space AOC to a government entity that has the capacity and willingness to fulfill Jersey City's obligations under the Consent Decree with respect to the Open Space AOC and such entity agrees to submit to the Court's jurisdiction and to be bound by the requirements of the Consent Decree that Jersey City has committed to fulfill with respect to protection of the Open Space AOC pursuant to this paragraph

and routine maintenance of the permissible development in the Open Space AOC pursuant to paragraph 78(d); or

(2) The Open Space AOC has been remediated such that no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive, and Jersey City has demonstrated to the Special Master and/or the Court, as appropriate, that such remediation has been completed in accordance with all applicable requirements.

(b) **Conservation Restriction.** Prior to the grant of the option to buy pursuant to paragraph 74(a)(i), Bayfront Redevelopment LLC shall grant an open space conservation restriction, pursuant to N.J.S.A. 13:8-B-1, *et seq.*, over the Open Space AOC substantially in the form set forth in Exhibit C. Exhibit C is a conservation restriction that is consistent with the terms of this paragraph and this Consent Decree. The conservation restriction shall allow for the implementation, maintenance, monitoring, repair and replacement of the Chromium Remedy and development consistent with paragraphs 74(j) and 74(k), including the construction and placement of roads and utilities. The Conservation Restriction shall also allow for current uses of the Open Space AOC to continue until such time as construction of the Chromium Remedy begins. The Hackensack River Watershed Land Trust shall be the primary holder of the conservation restriction, with all rights of monitoring and enforcement. Riverkeeper shall propose an entity to serve as the secondary holder of the conservation restriction subject to comment by the Parties and review by the Special Master. The secondary holder shall have secondary rights of monitoring and enforcement.

(i) The conservation restriction shall be incorporated into this Consent Decree and made part of this Consent Decree. The final, executed conservation restriction shall be lodged with the Court and entered as an order of the Court. The conservation restriction shall be enforceable in this Court, in the same manner as this Consent Decree.

(ii) The conservation restrictions provided under this Consent Decree shall be consistent with the prohibited and permitted development of the Open Space AOC as set forth in paragraphs 74(j) and 74(k) below.

(iii) Jersey City shall not take any action, whether through exercise of any power of eminent domain, application to the State of New Jersey for approval of a diversion of public park or recreation land, legal challenge to the validity or enforceability of the conservation restriction, or otherwise, the effect of which would be to in any way terminate, abrogate, or diminish the terms, conditions, or purposes of the conservation restriction. If, notwithstanding the preceding sentence, Jersey City proceeds with a condemnation or other action, the result of which would be to terminate, abrogate, or otherwise diminish the terms, conditions, or purposes of the conservation restriction, Jersey City shall, before taking any such action satisfy all of the conditions set forth in paragraph 74(a)(iv)(2).

(iv) Notwithstanding the foregoing, the conservation restriction may be terminated upon application of any Party when no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive.

(c) **Deed Notice.** Upon completion of the Chromium Remedy, the Open Space AOC shall be subjected to the deed notice substantially in the form set forth in Exhibit D that restricts

future activities on the Open Space AOC. Nothing in the deed notice shall be construed as preventing the imposition of more stringent restrictions on the development allowed in the Open Space AOC pursuant to this paragraph and, in particular, the conservation restriction provided for in paragraph 74(b).

(d) **Recording of the Consent Decree, Conservation Restriction, and Deed Notice.** This Consent Decree, the conservation restriction imposed pursuant to paragraph 74(b), and the deed notice imposed pursuant to paragraph 74(c) shall be recorded, pursuant to N.J.S.A. §§ 46:15-1.1, 46:16-1.1, and 46:16-2, in the office of the Hudson County Register and a conspicuous reference to the Consent Decree, conservation restriction, and deed notice shall be included in all instruments concerning title to the Open Space AOC. Any Party shall have the right, periodically, but no more than once every 25 years, to record memoranda or other instruments that reference, incorporate, or attach this Consent Decree, the conservation restriction, the deed notice, and/or any further orders of the Court related to the Open Space AOC in the real estate records related to the Open Space AOC.

(e) **Zoning.** Pursuant to the Redevelopment Plan, the Open Space AOC is designated for open space and park. Jersey City shall not amend or change this designation unless it first satisfies the requirements of paragraph 74(a)(iv)(2).

(f) **Recreation and Open Space Inventory.** Upon acquiring fee simple absolute title to the Open Space AOC, Jersey City shall add those portions of the Open Space AOC not covered by roads, the pedestrian thoroughfare, and utility corridors adjacent to roads onto its Green Acres Program Recreation and Open Space Inventory ("ROSI") pursuant to N.J.A.C. § 7:36 and shall specify in such listing that it is subject to (i) Honeywell's prior easement to monitor, maintain, repair, and replace the Chromium Remedy; (ii) the actions necessary to implement, monitor,

maintain, repair, and replace the Chromium Remedy; (iii) the actions necessary to install any development permissible under paragraphs 74(j) and 74(k); and (iv) the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall also take all steps necessary or appropriate to notify the New Jersey Green Acres Program that such portions of the Open Space AOC have been added to its ROSI, such that those portions of the Open Space AOC shall thereafter be subject to all procedural and regulatory requirements applicable under the Green Acres Program, including prohibitions against diversion.

(g) **Eminent Domain.** If all or part of the Open Space AOC is taken in exercise of the power of eminent domain, or acquired by purchase in lieu of condemnation, by any public, corporate, or other authority so as to terminate, abrogate, or limit the restrictions created by this Consent Decree or the conservation restriction imposed pursuant to paragraph 74(b), in whole or in part, any Party may take appropriate actions to challenge such taking if there is a reasonable legal basis for doing so. In the event that the Parties are unable to prevent a taking notwithstanding their reasonable and appropriate efforts, any Party may take appropriate actions to recover the full value of the interests in the Open Space AOC subject to the taking or in lieu purchase, and all direct and incidental damages, costs, and fees occasioned thereby.

(h) **Environmental Covenant.** In the event that New Jersey enacts the Uniform Environmental Covenants Act or its substantial equivalent, the Parties shall address the issue of whether an environmental covenant shall be established for the Open Space AOC under the statute. If the Parties are unable to reach agreement on establishment of an environmental covenant, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of an environmental covenant if it would provide substantial additional protection for the Open Space AOC without

unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(i) **Future Protections.** Any Party shall have the right to propose consideration of additional or substitute protections for the Open Space AOC. If the Parties are unable to reach agreement with regard to the proposal, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of additional or substitute protections for the Open Space AOC if they would provide substantial additional protection for the Open Space AOC without unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(j) **Prohibited Development in Open Space AOC.** Only development satisfying the requirements of this paragraph and paragraph 74(k) shall be permitted in the Open Space AOC. All other development in the Open Space AOC shall be prohibited.

(i) Honeywell shall establish Open Space Design Standards that shall govern all development in the Open Space AOC regardless of when the construction or installation of permissible development occurs. The Open Space Design Standards shall satisfy each of the requirements set forth in paragraph 74(j)(v) and shall set forth the requirements for development that are necessary for the protection of the integrity of the Chromium Remedy.

(ii) The Initial Development in the Open Space AOC shall be the development undertaken following the completion of the Chromium Remedy in the Open Space AOC. The Initial Development may occur in one or more phases. Honeywell and Bayfront

Redevelopment LLC shall prepare a Development Plan before the initiation of each phase of the Initial Development. The Initial Development Period for each phase shall consist of the period covered by the Initial Development, plus a period of 10 years following the submission of the as-built documentation for the phase pursuant to paragraph 74(j)(viii).

(iii) The Special Master shall have jurisdiction to review the Open Space Design Standards and the Development Plan(s) solely for the purpose of ensuring that any development undertaken during the Initial Development Period is consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy. The Special Master's jurisdiction with regard to development in the Open Space AOC shall run through the Initial Development Period for each phase.

(iv) Honeywell shall ensure that the requirements of this paragraph and paragraph 74(k) are satisfied with regard to any development undertaken within the Initial Development Period. Honeywell shall also ensure that any development undertaken within the Initial Development Period is designed and installed in a manner consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy.

(v) Any development undertaken in the Open Space AOC, regardless of when undertaken, shall satisfy each of the following requirements:

(1) It shall not jeopardize the integrity of the Chromium Remedy;

(2) It shall be limited to the types of development permitted under paragraph 74(k);

(3) It shall be consistent with this Consent Decree, including the conservation restriction imposed pursuant to paragraph 74(b), and the Redevelopment Plan; however, in the

event of any conflict or inconsistency between this Decree and the Redevelopment Plan, this Decree shall govern;

(4) In total, at least 75% of the Open Space AOC, exclusive of the acreage used for roads and the pedestrian thoroughfare, shall be comprised of landscaping, as defined by paragraph 74(k)(xi);

(5) The portion of the Open Space Design Standards necessary for protection of the Chromium Remedy as related to all roads, the pedestrian thoroughfare and associated utility corridors as well as the general location of such items shall be included in the 100% Design of the Chromium Remedy;

(6) If the lowest elevation for the bedding for any utility line, including irrigation or sprinkler lines, is two feet from the top of the warning layer of the cap, the utility line shall be placed in a utility corridor;

(7) In any event, there shall be two feet of soil or more between the warning layer of the cap and the lowest elevation of the bedding for any irrigation or sprinkler lines; and

(8) No permanent concession facilities shall be permitted.

(vi) Honeywell shall submit the Open Space Design Standards and the Development Plan(s) for any development undertaken during the Initial Development Period pursuant to the requirements of paragraph 86(c), except that such documents need not be submitted to NJDEP. Following Honeywell's submission of such documents, the procedures of paragraphs 86(e) and 86(f) shall apply, except that the Special Master need not provide notice to NJDEP.

(vii) During the Initial Development Period, any development in the Open Space AOC shall require the preparation and submission of a Development Plan pursuant to

paragraph 74(j)(vi) and such Development Plan shall be subject to review by the Special Master pursuant to paragraph 74(j)(iii).

(viii) Upon completion of each phase of the Initial Development, Honeywell shall provide as-built documentation for the Initial Development to the Special Master, Riverkeeper, and Jersey City. Upon completion of any further development during the Initial Development Period for the phase, Honeywell shall also provide as-built documentation to the Special Master, Riverkeeper, and Jersey City for the additional development. Such additional as-built documentation for a phase shall not affect the running of the Initial Development Period for the phase.

(ix)During the Initial Development Period, replacement in-kind of development features or facilities included in the Initial Development or minor modifications to the development features or facilities included in the Initial Development shall not require the preparation of a Development Plan or be subject to review by the Special Master, provided that such replacement or modification satisfies the requirements of the Open Space Design Standards, the applicable Development Plan, and paragraphs 74(j)(v) and 74(j)(x)(3)(notice requirement).

(x) After the Initial Development Period, all development is prohibited unless one of the following conditions is met:

(1) Jersey City satisfies the conditions set forth in paragraph 74(a)(iv)(2);

(2) The development is a replacement in-kind and such replacement is made in conformance with the specifications of the Open Space Design Standards, the applicable Development Plan, and paragraph 74(j)(v); or

(3) The development meets the requirements of paragraphs 74(j)(v) and 74(j)(xi), and Jersey City provides notice of its intention to alter or add to the development undertaken in the Initial Development Period. Such notice shall be provided in writing to Honeywell, Riverkeeper, and the holders of the conservation restriction established pursuant to paragraph 74(b) at least 30 days prior to Jersey City's alteration or addition to development undertaken in the Initial Development Period. Honeywell, Riverkeeper, or any holder of the conservation restriction shall have the right to move the Court to prohibit such alteration or addition.

(xi) If any of the development features or facilities that Jersey City seeks to add pursuant to paragraph 74(j)(x) require utilities that would require utility corridors other than the utility corridors installed during the Initial Development Period, Jersey City shall obtain approval from the Court before installing such new utility corridors.

(xii) Jersey City shall provide Honeywell, Riverkeeper, and the holder(s) of the conservation restriction established pursuant to paragraph 74(b) with an annual report that describes any alterations or additions, including those activities under paragraph 74(j)(x)(2), to the development undertaken during the Initial Development Period.

(xiii) All development features or facilities, whether included in the Initial Development or added subsequent thereto, are subject to demolition and/or removal to the extent necessary to maintain, replace, or repair the Chromium Remedy.

(k) **Permissible Development in the Open Space AOC.** The Initial Development or any subsequent addition or alteration thereto may include any or all of the following types of development features or facilities, provided that such development features or facilities satisfy the conditions set forth in paragraph 74(j)(v):

(i) Roads and the pedestrian thoroughfare -- both crossing and running along the Open Space AOC, but no more extensive than provided for in the diagram on page 39 of the Redevelopment Plan;

(ii) Curbing and fences;

(iii) Sidewalks, paths, walkways, and nature trails;

(iv) Utilities and utility corridors, lighting, and restrooms;

(v) Irrigation or sprinkler components or systems;

(vi) Water features;

(vii) Above-ground storm water cisterns;

(viii) Signs, including the signs or display required by paragraph 74(l);

(ix) Benches, trash receptacles, and bicycle racks;

(x) Recreational facilities, such as playground equipment, bocce ball courts, tennis courts, basketball courts, and athletic fields; and

(xi) Landscaping, including natural grasses, small trees, shrubbery, flowers, and potted plants, provided that such landscaping and the anticipated root structure of each landscaping component do not and will not jeopardize the integrity of the Chromium Remedy. Any portion of an athletic field that is covered in natural grass shall be considered landscaping for purposes of the percentage set forth in paragraph 74(j)(v)(4).

(l) **Signs or Displays.** Honeywell shall develop a permanent plan for informing visitors to the Open Space AOC of the history of the chromium production, contamination, and its remediation. Such plan shall provide for appropriate signs or displays that communicate this information. Such plan shall be subject to review and comment by the Parties and approval by the Special Master.

75. **Honeywell's Ongoing Responsibility.** Honeywell shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy in perpetuity. Honeywell shall satisfy this responsibility through establishment and implementation of a Long-Term Monitoring Plan. In the event that Honeywell ceases to exist without a successor-in-interest or its obligations under this Consent Decree are stayed or limited due to a bankruptcy petition, the Court shall appoint an independent third-party fiduciary who shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy pursuant to the requirements of this Consent Decree and the Long-Term Monitoring Plan, unless Jersey City volunteers to assume these responsibilities for the Chromium Remedy.

76. **Long-Term Monitoring Plan.** In consultation with the Parties, and subject to approval by the Special Master and NJDEP, Honeywell shall develop a Long-Term Monitoring Plan to ensure the ongoing effectiveness of the Chromium Remedy to meet the objectives set forth in paragraphs 65, 69, 68, 69, 72, and 77. The Long-Term Monitoring Plan shall be consistent with the applicable EPA policies and guidance, including, among others, EPA's Comprehensive Five Year Review Guidance (2001) (or any subsequent revision) and with NJDEP's Technical Requirements for Site Remediation (or any subsequent revision).

77. **Long-Term Monitoring Plan Objectives.** Honeywell shall design the Long-Term Monitoring Plan to satisfy each of the following objectives:

(a) Provide monitoring to ensure that the integrity and effectiveness of the Chromium Remedy are maintained; and

(b) Provide monitoring to ensure that the restrictions of the institutional controls are being satisfied, including the prohibition on development in the Open Space AOC.

78. **Monitoring and Remediation Under the Long-Term Monitoring Plan.** The Long-Term Monitoring Plan shall include the monitoring and remediation activities set forth in this paragraph and other monitoring and remediation activities, if necessary, to meet the objectives of paragraph 77. Honeywell shall provide Riverkeeper, the Special Master, and NJDEP with annual reports on activities conducted under the Long-Term Monitoring Plan.

(a) **Monitoring Activities in the Long-Term Monitoring Plan.** Honeywell shall undertake the following monitoring activities at intervals to be specified in the Long-Term Monitoring Plan, but no less frequently than set forth below, and, if the monitoring shows it is necessary, Honeywell shall also undertake the remediation activities as set forth below:

(i) Quarterly visual inspection monitoring of the Open Space AOC to ensure that it is not being put to any use that is inconsistent with paragraphs 74(j) and 74(k) or any use that may compromise the integrity of the Chromium Remedy. The Long-Term Monitoring Plan shall include an inventory of the prohibited and permissible uses pursuant to paragraph 74 and a corresponding checklist to be used by the individuals conducting the monitoring. If Honeywell determines that the Open Space AOC is being used in a manner inconsistent with the protections or the integrity and effectiveness of the Chromium Remedy, Honeywell shall act as soon as possible to cause such use to cease and, if there has been damage to the Chromium Remedy, to repair or replace it to original specifications or to a level of protection equivalent to the original Chromium Remedy;

(ii) Quarterly visual inspection monitoring of the Open Space AOC grade and slope to identify whether erosion has occurred or is occurring. Honeywell shall remediate any significant erosion.

(iii)Quarterly visual inspection monitoring to determine whether noticeable differential settlement or subsidence has occurred or is occurring in the Open Space AOC such that the integrity of the Chromium Remedy may be materially impaired. If evidence of differential settlement or subsidence is found, Honeywell shall propose further investigative measures. Honeywell shall remediate any differential settlement or subsidence that is beyond the degree of differential settlement/subsidence allowed for in the 100% Design and repair the cap and/or the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(iv)A baseline topographic survey at the completion of the Chromium Remedy and three additional surveys conducted at five-year intervals beginning five years after the conduct of the baseline survey. The topographic survey shall be of sufficient precision and accuracy to present the results as one-foot contours;

(v) Quarterly visual inspection monitoring to determine whether the Chromium Remedy in the Open Space AOC has been disturbed. Any evidence of the distinctive warning layer materials or any other cap materials as described in paragraph 65(a) at the surface is an indication that the cap has been disturbed. In such an event, Honeywell shall propose further investigative measures to evaluate whether the integrity of the cap has been compromised. In the event that the investigative measures show that the cap integrity has been compromised, Honeywell shall repair or replace the cap and the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vi) Quarterly visual inspection monitoring to ensure that burrowing animals are not materially impairing the integrity of the Chromium Remedy. If evidence of burrowing animals is found, Honeywell shall follow humane removal procedures and repair or replace the cap and

the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vii) Quarterly visual inspection monitoring of the vegetative cover in the Open Space AOC to ensure that vegetative cover is in conformance with the landscaping provisions of the 100% Design and the Redevelopment Plan and will not materially impair the integrity of the Chromium Remedy. Maintenance of the vegetative cover shall include, at a minimum, mowing to ensure that tree species cannot become established and removal of any other vegetation with the potential to damage the Chromium Remedy;

(viii)Quarterly groundwater monitoring to ensure that groundwater levels are maintained in accordance with the requirement to maintain an outward gradient from Study Area 7 and in accordance with the water level control plan developed pursuant to paragraph 69(e);

(ix) Monitoring of vented gases and the gas venting system to ensure proper operation of the system, to evaluate any degradation of the system, to assess the need for treatment of vented gases, either initial, subsequent, or further depending on whether treatment has been previously provided, and to detect any condition that might endanger public health or safety. Such monitoring shall be conducted on a monthly basis for at least one year and, if the readings are stable, such monitoring may be conducted thereafter on a quarterly basis; and

(x) Any additional monitoring as required by specific details added in the design phase of the Open Space AOC.

(b) **Procedures for Proposing Changes to the Long-Term Monitoring Plan.** Any Party may, from time to time, propose changes to the scope of the monitoring activities under the Long-Term Monitoring Plan. If the Parties agree, the Long-Monitoring Plan shall be so changed

subject to approval by NJDEP and by the Special Master, if his appointment has not terminated, or otherwise, by the Court. If the Parties are unable to reach agreement over alterations to the monitoring and the Special Master's appointment has not terminated under this Consent Decree, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation. In the event that the dispute arises after the Special Master's appointment has terminated, any Party may file a motion seeking a resolution of the dispute by the Court.

(c) **Contingency Plan**. As part of the Long-Term Monitoring Plan, Honeywell shall develop a contingency plan to ensure the integrity of the remediation in the event of any planned penetration of the cap or otherwise planned activity that compromises the cap or any unplanned event or accident that penetrates the cap or otherwise compromises the integrity of the Chromium Remedy. The contingency plan shall include, at a minimum, an annually updated plan to notify the relevant persons, including the Special Master, NJDEP, and the Parties, of (i) the event penetrating the cap, compromising the cap, or compromising the integrity of the Chromium Remedy; (ii) the general steps to be taken to identify the extent of the problem; and (iii) the standards for remedying the problem.

(d) **Routine Maintenance**. The title owner of the Open Space AOC shall conduct maintenance of the Open Space AOC features or facilities that are permissible under paragraphs 74(j) and 74(k). The maintenance workers shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. The training shall include the identification and reporting of any uses or features that are not permissible in the Open Space AOC or that may jeopardize the integrity of the Chromium Remedy. Honeywell shall provide all training materials. The title owner of Open Space AOC shall annually provide to the other Parties and

the Special Master a report describing the training which has been provided to its maintenance workers. The title owner of the Open Space AOC shall also provide to the Parties and the Special Master notice of any violations of the restrictions relating to the Open Space AOC identified by its workers during routine maintenance.

(e) **Recordkeeping**. Honeywell shall maintain written logs or other records of those monitoring and remediation activities undertaken pursuant to the Long-Term Monitoring Plan. Such logs shall be provided to Riverkeeper on a quarterly basis.

79. **Monitoring and Reporting to Riverkeeper.** Riverkeeper shall be provided with all documents submitted to NJDEP and/or the Special Master with respect to the Chromium Remedy, including the documents identified in paragraph 86(c).

80. **Notice to Stakeholders.** All residents, regardless of whether they are owners or lessees, and all commercial tenants on Study Areas 6 and 7 are hereby deemed stakeholders. Honeywell shall ensure that all stakeholders shall be provided at the time of their purchase or lease with notice of the contamination, the remedial actions that have been undertaken or are planned, and the importance of reporting activities that may appear to jeopardize the integrity of the engineering controls. Notice shall be accomplished in the following manner:

(a) Bold or otherwise conspicuous language on the first page of the deed provided to all purchasers in the Residential Area;

(b) A summary notice of the Chromium Remedy which:

(i) Has been subject to review and comment by the Parties and approval by the Special Master; and

(ii) Provides a reference to public websites and libraries and/or the future equivalents thereof, where the following can be found:

(1) Zoning and other Jersey City maps showing the Open Space AOC; and

(2) Documents describing the contamination and the remediation, including:

(a) This Consent Decree;

(b) The Remedial Investigation Report and the Final Remedial Action Report,

(c) The annual reports on long-term monitoring and maintenance and repair activities as required by paragraph 78 and annual reports on changes to the Initial Development as required by paragraph 74(j)(xii); and

(d) The Long-Term Monitoring Plan.

(c) The public provision of the maps and documents referred to in paragraph 80(b)(ii) via websites and libraries and/or the future equivalents thereof; and

(d) Notices to lessees and commercial tenants in all lease documents.

81. **Annual Letter to Riverkeeper on Notice to Stakeholders.** Each year beginning one year after the issuance of the first notice in a deed or lease pursuant to paragraph 80, Honeywell shall provide a letter to the Riverkeeper documenting its compliance with paragraph 80.

82. **Future Notice to Stakeholders.** Honeywell shall ensure that all stakeholders are provided with notice, at least annually, of long-term monitoring activities and any additional remediation activities undertaken with respect to the Chromium Remedy. Such notice shall be accomplished by notices on websites or future equivalents thereof, including Jersey City websites, any websites created to provide information about the Chromium Remediation or redevelopment of the Redevelopment Area, and one or more of the following:

(a) Any community message board or other similar site used and/or maintained by stakeholders or the manager(s) of the Redevelopment Area;

(b) Mailings to all stakeholders; and

(c) Posters and flyers throughout the Redevelopment Area.

83. **Stakeholder Enforcement.** Any stakeholder shall have the right to enforce the remedial obligations of this Consent Decree in the Court, including post-implementation monitoring and maintenance obligations, and the terms of any deed notice or use restriction.

**I. Oversight and Enforcement by the Special Master and NJDEP**

84. **Federal Court Jurisdiction.** The Court shall retain jurisdiction for the purpose of overseeing and enforcing this Consent Decree and to review any issue or dispute which is not resolved through the oversight process described in Article III.I.

85. **Appointment and Jurisdiction of the Special Master.** The Chromium Remedy provided for in this Consent Decree is hereby referred to a Special Master pursuant to Rule 53 of the Federal Rules of Civil Procedure. The Special Master is appointed in the Consolidated Litigation for the purpose of overseeing and enforcing the Chromium Remedy, the first five years of long-term monitoring of the Chromium Remedy, financial assurances for the Chromium Remedy, and the Initial Development Period for each phase of development in the Open Space AOC. The Special Master is also appointed in the Consolidated Litigation for the limited purpose of ensuring that the scheduling and implementation of any non-chromium related remedy, any site preparation activities, and any site redevelopment activities do not undermine the integrity of, unreasonably interfere with, or unnecessarily delay the effectuation of the Chromium Remedy, the Study Area 7 remedies, and other remedies within his jurisdiction as of the date of entry of this Consent Decree. The Special Master shall have jurisdiction over all matters for which he is appointed.

86. **Oversight of the Chromium Remedy.**

(a) **NJDEP Authority**. Nothing in or pursuant to this Consent Decree shall limit NJDEP's full statutory and regulatory authority with respect to the Study Area 6 South site, including (i) permitting authority; (ii) authority to review and approve the Treatment Study reports, the Remedial Action Work Plan, the 100% Design, and final Remedial Action Report for the Chromium Remedy; and (iii) authority to issue a no further action letter.

(b) **Special Master Responsibilities**. The Special Master shall have the following responsibilities:

(i) Ensuring that Honeywell's implementation of the Chromium Remedy satisfies the requirements of this Consent Decree;

(ii) Ensuring that Honeywell's implementation of the Chromium Remedy conforms with federal, state, and local permit requirements;

(iii) Establishing a reasonable schedule for the implementation of the Chromium Remedy and monitoring conformance with it;

(iv) Reviewing monthly progress reports and conducting periodic meetings with the Parties to review the progress of the implementation of the Chromium Remedy. NJDEP shall be invited, but not required, to participate in these meetings and the decision as to whether to participate shall be left to NJDEP's sole discretion;

(v) Submitting bi-monthly progress reports to the Court pursuant to the schedule for the submission of such reports established in *ICO v. Honeywell*;

(vi) Overseeing the financial assurances established pursuant to paragraphs 91 through 100, and, until the expiration of his term pursuant to paragraph 90, overseeing the financial assurances established pursuant to paragraphs 101 through 112;

(vii) Coordinating review of the documents as provided in paragraphs 86(c) through 86(g);

(viii) Overseeing all development undertaken in the Open Space AOC during the Initial Development Period pursuant to paragraph 74(j)(iii); and

(ix) To the extent that, in matters within the jurisdiction of the Special Master as set forth herein, a dispute arises between the Parties with respect to implementation of the Chromium Remedy, issuing a recommendation to the Court with respect to the dispute.

(c) **Submission of Documents by Honeywell.** Honeywell shall submit the following documents to Riverkeeper, Jersey City, the Special Master, and NJDEP:

(i) An overall schedule with milestones for the design and implementation of the remedy ("Schedule") consistent with paragraph 54 above;

(ii) A Second Supplemental Remedial Investigation Report reporting the results of the field work conducted pursuant to paragraph 55;

(iii)A Chromium Impacted Soils Pilot Test Work Plan and Analytical Protocol for conduct of the treatment study pursuant to paragraph 56, unless such documents are agreed to by NJDEP and Riverkeeper before the entry of this Consent Decree;

(iv)An Initial Treatment Study Report for the Development AOC;

(v) A Final Treatment Study Monitoring Report;

(vi) The documents for Site 163 submitted pursuant to paragraphs 54(a)(iv), 54(a)(v), 61, and 62;

(vii) A report to evaluate the need for remediation of any potentially remaining contaminated shallow groundwater in the Development AOC after implementation of the Development AOC Soils Remedy and, based on such an evaluation, a proposal;

(viii) A report of the results of the sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site pursuant to paragraph 71 and, based on the results, a proposal for a remedy;

(ix) A plan for one round of monitoring to evaluate whether the L-Well Groundwater remains contained pursuant to paragraph 72;

(x) A proposal for a remedy of the L-Well Groundwater, in the event L-Well Groundwater monitoring indicates the contaminated groundwater is no longer contained, pursuant to paragraph 72;

(xi) A Remedial Action Work Plan;

(xii) A 50% Design Report (which may include the Development AOC Conceptual Design Plan as a component) as well as design drawings and specifications at the 50% level for other components of the Chromium Remedy (hereinafter the 50% Design);

(xiii) Design drawings and specifications at the 100% level (after selection of the contractor) (hereafter "100% Design");

(xiv) The data validation plan, including quality control and quality assurance protocols;

(xv) The site-wide master health and safety plan;

(xvi) The Long-Term Monitoring Plan;

(xvii) The final Remedial Action Report or final construction report (including as-built drawings and such other reports as may be prepared of the remedy as implemented);

(xviii) A program for post-treatment monitoring pursuant to paragraph 63, and, depending on such results, a proposal for further remedial actions;

(xix) A report reviewing measured groundwater levels for the groundwater remedy;

(xx) Documents required during the Initial Development Period pursuant to paragraphs 74(j)(vi), 74(j)(vii), and 74(j)(viii); and

(xxi) Other post-implementation monitoring reports as required by the Long-Term Monitoring Plan.

(d) **Initial Review of Documents by NJDEP.** The Parties and Special Master shall allow the period of time set forth below for NJDEP to conduct its review of a submission (hereinafter "NJDEP Review Period") before the document is subject to the Special Master review and approval process. During the NJDEP Review Period, any Party may submit comments to NJDEP. For the Second Supplemental Remedial Investigation Report, the Remedial Action Work Plan, the Initial Treatment Study, and the Final Treatment Study Monitoring Report, the NJDEP Review Period shall be 90 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. For any other documents identified in paragraph 86(c), the NJDEP Review Period shall be 30 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. The NJDEP review period shall be extended an additional 30 days for any document for which NJDEP provides the Parties and the Special Master with notice that its review will require an additional 30 days. At the conclusion of the NJDEP Review Period, the comment and review process provided for in paragraphs 86(e) and 86(f) shall commence. In the event that any document has been revised during the NJDEP Review Period, Honeywell shall resubmit the applicable document for purposes of the comment and review provided for in paragraphs 86(e) and 86(f).

(e) **Comment on Submitted Documents**. For each of the documents submitted by Honeywell pursuant to paragraph 86(c), and following conclusion of the NJDEP Review Period as described in paragraph 86(d), the Special Master shall establish a schedule for the submission

of comments and responses to comments. For each of the documents submitted, Riverkeeper, Jersey City, the Special Master, and NJDEP shall have the right to submit comments to Honeywell. Honeywell shall address all comments received and submit a revised document. The revised document shall be submitted by Honeywell to Riverkeeper, Jersey City, the Special Master, and NJDEP. The revised document shall be subject to review and approval pursuant to paragraph 86(f), unless the Parties agree both on the revised document and that further review and approval pursuant to paragraph 86(f) is unnecessary. In that event, the Parties shall inform the Special Master that review under paragraph 82(f) is unnecessary and Honeywell shall proceed to implement the revised document.

(f) **Review and Approval of the Submitted/Revised Document**

(i) **Scope of Review**. Subject to the limitations in paragraph 82(e), all documents submitted by Honeywell, pursuant to paragraph 86(c) and 86(e), shall be subject to review and approval by the Special Master in accordance with the following procedure. All such documents, except the Schedule and the 100% Design, shall be subject to the review and approval process and shall not require an order of the Court. The Schedule and 100% Design documents shall be subject to the review and approval process, but shall also require an order of the Court as provided in paragraph 86(g). A document shall be approved if the document (1) complies with this Consent Decree; (2) complies with the Remedial Action Work Plan for the Chromium Remedy; and (3) complies with the Schedule and 100% Design.

(ii) **Procedure**. Prior to making a decision on a document, the Special Master shall notify NJDEP of his intention to rule on the document or make a recommendation to the Court on the document. Such notice shall notify NJDEP that the Special Master will consider any comments NJDEP wishes to submit on the document if such comments are submitted within

the timeframe established by the Special Master in the schedule for comments pursuant to paragraph 86(e). NJDEP shall in its sole discretion determine whether to submit comments to the Special Master.

(iii) **Court Review**. If any Party objects to the Special Master's recommendation to the Court or approval of any document pursuant to this paragraph, that Party may seek further relief from the Court with respect to the document.

(g) **Schedule and 100% Design Documents**. As to the Schedule and the 100% Design documents, Honeywell shall have the responsibility, within 30 days of the Special Master's approval of each document, of (i) moving for entry of an order by the Court approving the document as approved by the Special Master; or (ii) filing objections with the Court to the Special Master's approval (and any recommendations contained therein) and moving for entry of the Schedule or 100% Design (including any such recommendations of the Special Master to which Honeywell agrees). Riverkeeper shall have the right in these proceedings to raise any objections they might have to the Schedule or 100% Design as approved by the Special Master or to the submission by Honeywell to the Court. NJDEP shall receive notice of any motion filed with respect to the Schedule or the 100% Design.

(h) **Flexibility in 50% and 100% Design Documents**. The Parties recognize that work conducted to implement the Chromium Remedy may be conducted by Honeywell contractors and that Honeywell may establish performance-based criteria or specifications for its contractors. As a result, the Parties recognize that the 50% Design and 100% Design documents for the Chromium Remedy may include performance-based standards, criteria, and specifications. These documents shall be sufficiently prescriptive to enable the Parties and the Special Master to evaluate their conformance with the Remedial Action Work Plan and this Consent Decree. The

Parties also recognize that the 100% Design will be completed after Honeywell has selected a contractor. The Parties further recognize that completing the 100% Design after the selection of the contractor(s) shall not make the 100% Design subject to any less stringent or more deferential review. Honeywell's commitment to the contractor(s) shall not be cause to limit review by the Parties and the Special Master.

(i) **Changes to the Schedule.** The Parties recognize that changes to individual line items in the Schedule will occur. To the extent that (i) the Parties and the Special Master agree that such changes do not have a material impact on satisfaction of the Schedule milestones established for items set forth in paragraph 54; and (ii) such changes do not require modifications to any necessary permits or authorizations for the Chromium Remedy, such changes may be made upon agreement of the Parties and the Special Master without further order of the Court.

87. **Retention of Professionals.** The Special Master may retain the services of professionals and/or other technical personnel, as reasonably needed, to fulfill his obligations under this Consent Decree, and for which he will be reimbursed pursuant to paragraph 89.

88. **Insurance for the Special Master.** The Special Master shall obtain insurance coverage relating to the performance of the Special Master's duties and responsibilities under this Consent Decree. Such coverage shall be similar to the Special Master's existing coverage in *ICO v. Honeywell*, procured pursuant to the Court's November 11, 2005 Stipulation and Order Regarding Special Master's Application to Procure Insurance Coverage, and as extended to the Consolidated Litigation by the Sediment Consent Order. The insurance coverage shall be sufficiently extended in duration and scope to cover all additional duties and responsibilities as set forth hereunder. Honeywell shall pay the premiums and other administrative costs of the Special Master's insurance.

89. **Reimbursement of Special Master Fees and Expenses.** The Special Master shall submit fee applications to the Court for approval of reasonable fees and expenses incurred in the oversight of matters referred to him pursuant to this Consent Decree. Any Party may raise with the Court objections to such fee applications. Upon approval of a fee application by the Court, the reimbursement of the Special Master's fees and expenses shall be made from the escrow fund previously established by Honeywell for the purpose of paying the Special Master's fees and expenses in *ICO v. Honeywell* pursuant to this Court's September 15, 2003 Order Setting Financial Assurances and extended to the Consolidated Litigation by the Sediment Consent Order.

90. **Expiration of Special Master's Appointment.** The Special Master's appointment under this Consent Decree shall expire after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy and the Initial Development Period for each phase of development has been concluded as provided in paragraph 74(j)(ii). However, solely to the extent that the Special Master is still supervising other portions of the Consolidated Litigation or *ICO v. Honeywell* after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy or the Initial Development Period for each phase of development as provided in paragraph 74(j)(ii), whichever is later, the Special Master shall continue to have jurisdiction under this Consent Decree until he has completed his specifically enumerated responsibilities under the Final Judgment in *ICO v. Honeywell*, the Sediment Consent Order, the Deep Groundwater Consent Order, the Study Area 6 North Consent Decree, and any other future orders, decrees, or judgments in *ICO v. Honeywell* and the Consolidated Litigation. Enumerated responsibilities under any order, decree, or judgment shall include only those tasks specifically assigned to the Special Master in the order, decree, or judgment. Enumerated responsibilities

shall not include any continued jurisdiction exercised over long-term monitoring beyond the initial period specified in the order, decree, or judgment. For example, the Special Master has jurisdiction over the first five years of long-term monitoring under the Sediment Consent Order. Oversight during these five years shall be an enumerated responsibility, but any continued oversight of long-term monitoring, pursuant to the extension of the Special Master's jurisdiction beyond the first five years, as provided in paragraph 60 of the Sediment Consent Order, shall not be an enumerated responsibility. Such extensions of jurisdiction shall be effective only so long as specific enumerated responsibilities in any order, decree, or judgment have not been fulfilled.

**J. Initial Financial Assurances**

91. **Chromium Remedy Letter of Credit.** Honeywell shall obtain a one-year, irrevocable letter of credit (the "Chromium Remedy Letter of Credit") to be automatically renewed annually in an amount equal to the "Remedial Costs Subject to Financial Assurance."

(a) Remedial Costs Subject to Financial Assurance shall mean:

(i) The costs of implementing the Chromium Remedy calculated using factors, including inflation and discount rates, determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process;

(ii) The costs of monitoring and maintenance activities for five years, as required by the Long-Term Monitoring Plan, calculated using factors including inflation and discount rates determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process; and

(iii) A contingency of 25% with respect to those costs listed in paragraphs 91(a)(i) and 91(a)(ii).

(b) The Chromium Remedy Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution, provided that in either case, the financial institution shall be acceptable to the Special Master.

92. **Procedures for Review of the Proposed Chromium Remedy Letter of Credit.** No later than December 31, 2008, Honeywell shall submit to Riverkeeper and the Special Master for their review the proposed (a) amount of the Chromium Remedy Letter of Credit; (b) form of the Chromium Remedy Letter of Credit; and (c) name of the institution that will issue the Chromium Remedy Letter of Credit. If Riverkeeper does not agree to the terms of the Chromium Remedy Letter of Credit, the Parties shall meet and confer in an effort to resolve their differences. If the Parties are unable to reach agreement over the terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the Chromium Remedy Letter of Credit.

93. **Automatic Renewal.** The Chromium Remedy Letter of Credit shall be automatically renewed annually unless (a) no later than 120 days prior to the anniversary of the Chromium Remedy Letter of Credit issue date, the issuer provides notice of nonrenewal or (b) Honeywell seeks a reduction in the Chromium Remedy Letter of Credit, pursuant to paragraph 94, to correspond to the reduced estimate of Remedial Costs Subject to Financial Assurances. If the issuer provides notice of nonrenewal, Honeywell shall obtain a replacement irrevocable Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit. If Honeywell is not otherwise in default as provided in Article III.J, the Special Master shall direct the cancellation of the prior Chromium Remedy

Letter of Credit within 91 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit. In the event that the Special Master is entitled to draw upon a Chromium Remedy Letter of Credit because there are two Chromium Remedy Letters of Credit currently in place, the Special Master shall not draw an aggregate amount in excess of the highest valued Chromium Remedy Letter of Credit. Upon Honeywell's request, the Special Master may, at his option, decide not to require overlapping letters of credit in any year based on Honeywell's financial strength in that year, provided that Honeywell has submitted all necessary information so that the Special Master can make his determination at least 150 days prior to the expiration of the Chromium Remedy Letter of Credit.

94. **Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit.** Honeywell shall have the right annually to seek a reduction in the Chromium Remedy Letter of Credit. At the time of seeking such reduction, Honeywell shall submit to the Riverkeeper and the Special Master an estimate of the remaining Remedial Costs Subject to Financial Assurance, including the contingency as described in paragraph 91(a)(iii), and shall seek adjustment of the Chromium Remedy Letter of Credit so that the total estimated amount of remaining Remedial Costs Subject to Financial Assurance are covered by the Chromium Remedy Letter of Credit. However, the adjustment shall not result in reducing the Chromium Remedy Letter of Credit to an amount below the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), plus a contingency of 25% of the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), and shall not result in reducing the Chromium Remedy Letter of Credit to an amount less than $20,000,000 as expressed in 2008 dollars unless long-term financial assurances are in place pursuant to Article III.K. Before making any request to reduce the amount or modify the terms of the Chromium Remedy Letter of Credit, Honeywell shall first confer with the Riverkeeper and

in an effort to reach agreement on the modified amount or terms of the Chromium Remedy Letter of Credit. If the Parties are unable to reach agreement over the modified amount or terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall resolve the dispute. Any Party shall have the right to seek review by the Court of the Special Master's decision regarding the modified amount or terms of the Chromium Remedy Letter of Credit. Upon agreement on the amount of the reduction or modified terms of the Chromium Remedy Letter of Credit (or upon order of the Court directing that the Chromium Remedy Letter of Credit be reduced to an identified amount or otherwise modified), Honeywell shall obtain a replacement Chromium Remedy Letter of Credit in such amount and with such terms. If Honeywell is not otherwise in default as provided in Article III.J and the issuer of the primary Chromium Remedy Letter of Credit has not provided notice of non-renewal, within 30 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit, the Special Master shall direct the cancellation of the prior Chromium Remedy Letter of Credit.

95. **Bankruptcy Protection**. Neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy. The Chromium Remedy Letter of Credit shall contain the language necessary to assure that neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

96. **Exclusive Court Jurisdiction**. The Chromium Remedy Letter of Credit shall recite that the issuer submits to the exclusive jurisdiction of this Court for any and all disputes arising under the Letter of Credit.

97. **Application of New York Law.** The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Chromium Remedy Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

98. **Procedures upon Honeywell's Material Default of Its Obligations.** During the period in which the Special Master has jurisdiction pursuant to paragraph 85, the Chromium Remedy Letter of Credit shall be payable to the Special Master and shall not, prior to its expiration date, be revoked or terminated except consistent with this Consent Decree and with the consent of the Special Master and approval by the Court. The Special Master's ability to draw upon the Chromium Remedy Letter of Credit shall not be limited by any agreement between Honeywell and the issuer. The Special Master may, without further order or notice to this Court, draw upon the Chromium Remedy Letter of Credit upon the occurrence of default by Honeywell, which shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 93 to deliver a replacement Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 15 days after written notice to Honeywell thereof and either (i) Honeywell, in the opinion of the Special Master without further input from the Parties, shall have failed to cure the breach; (ii) during the 15-day period, the Court has not entered an order to prevent the Special Master from

drawing on the Chromium Remedy Letter of Credit; or (iii) the Court or the Special Master has not granted Honeywell additional time to cure the breach;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if involuntary filing has not been dismissed within 60 days; the appointment of a custodian, receiver, liquidator, or trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 98(c), and the failure of Honeywell to provide assurance to the Special Master, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

99. **Placement of Proceeds in Court Registry Investment System Account**. In the event that the Special Master draws upon the Chromium Remedy Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Chromium Remedy Letter of Credit which represent the remaining estimated Chromium Remedy costs under paragraphs 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), in an account with the Court Registry Investment System in accordance with Local Civil Rule 67.1 and not expend the proceeds of the Letter of Credit without further order of this Court. The

Special Master shall place all additional proceeds of the Chromium Remedy Letter of Credit in a trust fund pursuant to paragraph 103(b)(v).

100. **Termination of Chromium Remedy Letter of Credit**. The Chromium Remedy Letter of Credit may be withdrawn in its entirety upon the satisfaction of all of the following:

(a) The implementation of the Chromium Remedy; and

(b) Establishment of long-term financial assurance pursuant to Article III.K.

**K. Long-Term Financial Assurances**

101. **Long-Term Financial Assurances.** Honeywell shall fund long-term financial assurances to ensure that the activities set forth in paragraph 102(a) are carried out regardless of whether Honeywell is financially able to carry out such activities in perpetuity.

102. **Costs Subject to Long-Term Financial Assurances.**

(a) Long-term financial assurances shall provide enough funds to cover the costs of the following activities:

(i) Perpetual monitoring and maintenance of the Chromium Remedy, including installation, operation and monitoring of any above-cap-grade gas collection and/or treatment system as may be necessary, but such system is not part of the 100% Design;

(ii) Perpetual operation of the shallow groundwater remedies pursuant to paragraphs 69, 70, and 71;

(iii) Perpetual repair of the cap;

(iv) Perpetual replacement of the cap on a 75-year replacement interval; and

(v) The perpetual administration of the trust fund regardless of whether such trust fund is selected by Honeywell pursuant to paragraph 103(a) or is established from the Long-Term Letter of Credit pursuant to paragraphs 103(b)(ii), 103(b)(v), or 109.

(b) The costs that shall be subject to financial assurances is an amount that will provide the full payment for each of the activities set forth in paragraphs 102(a)(i) through 102(a)(v) plus a 25% contingency when the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to be performed. The costs subject to financial assurances are forward looking because they state an amount valued at the time the funds are needed. As such, they shall be stated in contemporary time as the present value (calculated on the basis of a discount rate of 4.75%) of the estimated future costs of the activities specified in paragraphs 102(a)(i) through 102(a)(v), plus a 25% contingency on those costs.

103. **Long-Term Financial Assurance Mechanisms.** Honeywell shall provide long-term financial assurances in the amount of the costs subject to long-term financial assurances in the form of a trust fund, a letter of credit, or some combination of the two. The selected mechanism(s) shall satisfy the following requirements:

(a) **Trust Fund.** In the event that Honeywell selects a trust fund, Honeywell shall create a trust fund such that it can provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(i) The trust fund shall be at arm's length from Honeywell and shall not be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The trust fund agreement shall contain the language necessary to assure that neither the trust fund nor the earnings of the trust fund shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The trust fund shall be managed by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution managing the

trust fund declares bankruptcy, the Court shall withdraw the funds and appoint another financial institution meeting the requirements of this paragraph to manage the trust.

(iii) No more frequently than once per year, Honeywell may apply to the Court for an order directing the trust manager to reimburse Honeywell for any costs that it has incurred to carry out the activities set forth in paragraphs 102(a)(i) through 102(a)(iv).

(b) **Long-Term Letter of Credit**. In the event that Honeywell selects a letter of credit, Honeywell shall obtain a one-year irrevocable letter of credit (the "Long-Term Letter of Credit") to be automatically renewed annually in an amount that provides sufficient funds such that a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a), could be created. The Long-Term Letter of Credit-funded trust, plus any trust fund established under paragraph 103(a), shall provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The amount of any Long-Term Letter of Credit shall therefore be adjusted periodically as the cap replacement interval is approached because, for example, the money needed in the 10th year to fund a trust that can provide for replacement of the cap in the 75th year is much less than the money that would be needed in the 40th year. Such periodic adjustments shall be proposed and approved by the Court in conjunction with the adjustments under paragraph 106.

(i) Neither the Long-Term Letter of Credit nor the proceeds of the Long-Term Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The Long-Term Letter of Credit shall contain the language necessary to assure that neither the Long-Term Letter of

Credit nor the proceeds of the Long-Term Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The Long-Term Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution issuing the Long-Term Letter of Credit declares bankruptcy, the Court shall authorize the drawing of funds from the Long-Term Letter of Credit and shall deposit those funds in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(iii) The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits) as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Long-Term Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

(iv) The Long-Term Letter of Credit shall be automatically renewed annually, unless, no later than 120 days prior to the anniversary of the Long-Term Letter of Credit issue date, the issuer provides notice of non-renewal. If the issuer provides notice of non-renewal, Honeywell shall obtain a replacement irrevocable Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit. If Honeywell is not otherwise in default as provided in this Article, the Court shall direct the cancellation of the prior Long-Term Letter of Credit within 91 days after delivery to the Court of any replacement of a Long-Term Letter of Credit. In the event that the Court is entitled to draw upon a Long-Term Letter of Credit when there are two Letters of Credit currently in place, the Court shall not draw an aggregate amount in excess of the highest valued Long-Term Letter of Credit.

(v) Prior to the expiration of the Special Master's appointment pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Special Master. During the time the Long-Term Letter of Credit is payable to the Special Master, the Special Master may draw on the Long-Term Letter of Credit as provided in paragraph 98. In the event that the Special Master draws upon the Long-Term Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a). After the Special Master's appointment expires pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Court and, in the event that the Court draws on the Long-Term Letter of Credit, the Court shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(vi) Whether the Long-Term Letter of Credit is payable to the Special Master or the Court, it shall not, prior to its expiration date, be revoked or terminated by Honeywell except consistent with this Consent Decree and with the approval of the Court. The ability of the Special Master or the Court to draw upon the Long-Term Letter of Credit shall not be limited by any agreement between Honeywell and the issuer.

(vii) In the event that the Long-Term Letter of Credit is drawn upon and invested pursuant to paragraph 103(b)(ii), 103(b)(v), or 109 and Honeywell has also selected a trust fund pursuant to paragraph 103(a), resulting in the existence of two trust funds, the two trust funds shall be managed so as to ensure that the combined amount of the trust funds is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(c) **Combination**. Honeywell may use some combination of a trust fund and a letter of credit to achieve the requirements of this paragraph. However, if a combination is used, Honeywell shall ensure that the combined amount of financial assurances is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The trust fund and the letter of credit shall otherwise satisfy all the requirements of paragraphs 103(a) and 103(b).

104. **Procedures for Review of the Proposed Long-Term Financial Assurances**. No later than June 1, 2009, Honeywell shall submit to Riverkeeper and the Special Master, for their review (a) the amount of the proposed long-term financial assurances; (b) the form(s) of the proposed long-term financial assurance mechanisms; and (c) the name(s) of the institution proposed to manage or issue the long-term financial assurances. If Riverkeeper agrees to the terms of the proposed long-term financial assurances, within 60 days of such agreement, Honeywell shall create a trust fund and/or secure a Long-Term Letter of Credit on those terms. If the Parties are unable to reach agreement over the terms of the long-term financial assurances, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the financial assurances.

105. **Temporary Maintenance of Chromium Remedy Letter of Credit**. Until the long-term financial assurances have been put into place, Honeywell shall maintain the Chromium Remedy Letter of Credit required by paragraph 91 in an amount equal to at least $20,000,000 in 2008 dollars. In the event of any default by Honeywell pursuant to paragraph 98 while the Chromium Remedy Letter of Credit is in place, the provisions of paragraph 103(b)(v) for the placement of the proceeds that exceed the remaining estimated Chromium Remedy costs under

paragraph 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), shall apply.

106. **Adjustment of Amount Held in Long-Term Financial Assurances**. Every five years as marked from the establishment of the first long-term financial assurances pursuant to paragraph 103, the Parties shall report to the Court whether the long-term financial assurances are adequately funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. At such time as the Parties report to the Court, any Party may seek an adjustment in the amount of the long-term financial assurances. The Party seeking an adjustment must demonstrate that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Such demonstration shall reflect the actual costs of implementing the remedy and/or any replacement of the remedy, once such actual costs are available. The demonstration shall also reflect the costs of work completed to date and the actual lifetime of the cap, once the cap has been replaced or has passed a replacement interval without requiring replacement. The demonstration shall further reflect the actual performance of the fund and its ability to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Any demonstration shall be forward looking and shall be based upon estimates of what the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to cost at the time they must be performed and the amount of funding projected to be available to undertake such activities at the time they must be performed. If, after reviewing the submission(s) received from the Parties, the Court determines that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to

long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary, the Court shall order an adjustment in the amount held in the long-term financial assurances to overcome the shortage or overage. In the event that the Court determines that the long-term financial assurances are under-funded, it shall order Honeywell to increase the amount held in the long-term financial assurances. In the event that the Court determines that any trust fund established pursuant to paragraph 103(a) is over-funded, the Court shall issue an order directing the trust manager to pay the overage to Honeywell. In the event that the Court determines that the Long-Term Letter of Credit is over-funded, the Court shall issue an order permitting Honeywell to reduce the amount covered during the next annual renewal of the Long-Term Letter of Credit pursuant to paragraph 103(b)(iv). Any adjustment to the amount of the Long-Term Letter of Credit pursuant to this paragraph shall be in addition to any adjustment of the amount of the Long-Term Letter of Credit required pursuant to paragraph 103(b).

107. **Exclusive Court Jurisdiction**. The trust fund agreement and/or the Long-Term Letter of Credit shall recite that the trust fund manager and/or issuer of the Long-Term Letter of Credit submit to the exclusive jurisdiction of this Court for any and all disputes arising under the trust fund or the Long-Term Letter of Credit. The requirements of this paragraph shall apply whether the trust fund is established pursuant to paragraph 103(a), 103(b)(ii), 103(b)(v), or 109.

108. **Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired.** Upon the occurrence of default by Honeywell, after the Special Master's appointment has expired, Riverkeeper may move the Court on an expedited basis for an order to withdraw funds from the trust fund or to draw on the Long-Term Letter of Credit. Default shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 103(b)(iv) to deliver a replacement Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 30 days after written notice by Riverkeeper to Honeywell of the alleged material failure, unless Honeywell cures the alleged breach within the 30-day notice period or such longer period as the Parties may agree to or the Court may order;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if the involuntary filing is not dismissed within 60 days; the appointment of a custodian, receiver, liquidator, trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 108(c), if Honeywell fails to provide assurance to Riverkeeper, and the Court, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

109. **Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default.** If the Court grants any motion by Riverkeeper or pursuant to paragraph 108 to draw on the Long-Term Letter of Credit, the sum approved by the Court's order granting the motion shall be

paid from the Long-Term Letter of Credit into a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

110. **Use of the Trust Fund in the Event of Honeywell's Default.** In the event of Honeywell's default, as defined in paragraphs 108(a) through 108(d), the money in the trust fund established pursuant to paragraph 103(a) shall be available to meet the obligations of paragraph 102(a), as well as for payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

111. **Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109.** In the event that a trust fund is established pursuant to paragraph 99, 103(b)(ii), 103(b)(v), or 109, the money in the trust fund shall be available to meet the obligations of paragraph 102(a), as well as for the payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

112. **Termination of the Long-Term Financial Assurances.** Honeywell's obligations under Article III.K shall be terminated and the long-term financial assurance mechanisms shall be terminated when the Court finds that no hexavalent or total chromium contamination remains in the Open Space AOC or on the Site, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive

standards for Unrestricted Use in place at the time, whichever is more restrictive. Upon determining that long-term financial assurances may be terminated, the Court shall order that any Long-Term Letter of Credit may be withdrawn in its entirety and any trust fund may be terminated. In conjunction with its order terminating any trust fund, the Court in its discretion shall designate a recipient(s) of any remaining trust funds.

## ARTICLE IV: TERMINATION

113. **Termination of this Consent Decree**. This Consent Decree shall terminate upon the withdrawal of any Party as provided for in this paragraph. Any Party may elect to withdraw from this Consent Decree due to the occurrence of one or more of the following events, provided that such Party provides written notice of withdrawal to the other Parties pursuant to paragraph 118:

(a) The Court fails to enter this Consent Decree or this Consent Decree is determined to be invalid on appeal; or

(b) NJDEP takes one of the following actions with respect to the Remedial Action Work Plan:

(i) Rejects or fails to approve the Remedial Action Work Plan for the Chromium Remedy within 180 days of submission of the plan;

(ii) Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in more than a 50% increase in the estimated costs of the Chromium Remedy as set forth in Article III; or

(iii)Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in a substantial reduction of the protection of human health and/or the environment.

114. **Procedures for Withdrawal and Termination.** Any Party electing to withdraw pursuant to paragraph 113 and thereby terminate this Consent Decree shall provide written notice of such withdrawal and termination to all other Parties within 30 days of the occurrence giving rise to the decision to withdraw. If any Party objects to termination of the Consent Decree, or believes that the conditions set forth in paragraph 113 have not been met, such objecting Party may move the Court for an expedited hearing on the issue of whether the conditions for termination have been effectuated.

115. **Good-Faith Obligation to Avoid Termination.** The Parties agree that they will each endeavor to fulfill the terms of this Consent Decree, that they will work diligently and in good faith to meet their obligations hereunder, and that they will promptly and timely take all reasonable steps to give effect to this Consent Decree and to avoid termination under paragraph 113.

116. **Effect of Termination.** If this Consent Decree is terminated pursuant to paragraph 113, the Consent Decree shall no longer be binding on the Parties and shall be of no further effect. In the event that this Consent Decree is terminated by one or more Parties pursuant to paragraph 113, each Party to this Consent Decree reserves all of its rights, claims, and defenses (both legal and factual) against the other Parties with respect to the matters at issue in the Consolidated Litigation and each Party remains free to pursue such rights, claims, and defenses.

## ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC

117. **Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC.** The transfer of title of Study Area 6 South and Study Area 7 properties to Bayfront Redevelopment LLC pursuant to the Jersey City/Honeywell Consent Order and any subsequent transfers shall not impede Honeywell's obligations to (a) complete the remediation of

Study Area 7 and implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or (b) complete the Chromium Remedy and conduct long-term monitoring and fulfill its other obligations set forth in this Consent Decree. Such transfers of Study Areas 6 South and Study Area 7 shall not include a transfer of Honeywell's obligations to implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or a transfer of Honeywell's obligations under this Consent Decree, but shall include a right of access or any other right required by Honeywell to complete the remediation. Any subsequent transfer of Study Area 6 South or Study Area 7 from Bayfront Redevelopment LLC to a redeveloper or other party shall provide all necessary agreements to allow Honeywell all necessary access to Study Area 6 South and Study Area 7 for purposes of completing Honeywell's obligations with respect to Study Area 6 South under this Consent Decree and completing the Study Area 7 remediation and implementing the Final Judgment and subsequent orders in *ICO v. Honeywell*.

## ARTICLE VI: NOTICE

118. **Notice**. Any and all notices given in connection with this Consent Decree shall be deemed adequately given only if in writing and addressed to the Party for whom such notices are intended at the addresses set forth in this paragraph. All notices shall be sent by Federal Express or other nationally recognized overnight messenger service or by first-class registered or certified mail, postage prepaid, return receipt requested. A written notice shall be deemed to have been given to the recipient party on the earlier of (a) the date it shall be delivered to the address set forth in this paragraph; (b) the date delivery shall have been refused at the address set forth in this paragraph; or (c) with respect to notices sent by mail, the date as of which the postal service shall have indicated such notice to be undeliverable at the address set forth in this paragraph.

Any and all notices referred to in this Consent Decree, or which any Party desires to give to the other, shall be addressed as follows:

If to Honeywell and/or
Bayfront Redevelopment LLC :

Tom Byrne, Esq.
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-2775

With copies to:

John Morris
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-4003

If to Jersey City:

William Matsikoudis
Corporation Counsel
City of Jersey City
280 Grove Street
Jersey City, NJ 07305
(201) 547-4667

If to Riverkeeper:

Bruce J. Terris
Carolyn Smith Pravlik
Kathleen L. Millian
Terris, Pravlik & Millian, LLP
1121 12th St., N.W.
Washington, DC 20005-4632
(202) 682-2100

Any party may change its designated recipients or addresses for notice in this paragraph by providing written notice of such change to all other Parties.

## ARTICLE VII: RIVERKEEPER'S ATTORNEYS' FEES

119. **Payment of Past Fees and Expenses.** Within 30 days of the entry of this Consent Decree, Honeywell shall pay Terris, Pravlik & Millian, LLP the sum of $813,000.00 which represents the following:

(a) A compromise of the attorneys' fees incurred by Riverkeeper in the litigation of Study Area 6 South portion of *Riverkeeper v. Honeywell* through August 31, 2008; and

(b) $353,746.67 in out-of-pocket expenses representing a portion of the expenses incurred by Riverkeeper in *Riverkeeper v. Honeywell* from the inception of the litigation after deducting the expenses paid pursuant to the Sediment Consent Order, the Deep Groundwater Consent Order, and the Study Area 6 North Consent Decree.

(c) Payment of the sum of $813,000.00 shall be in full satisfaction of all obligations, duties, and responsibilities of Honeywell with respect to the $879,317.92 in fees and expenses that Riverkeeper claimed with regard to the above described fees and expenses.

120. **Future Fees and Expenses.** Honeywell shall reimburse Riverkeeper's attorneys for reasonable fees and expenses incurred: (a) in negotiating this Consent Decree after August 31, 2008; (b) in the monitoring and enforcement of this Consent Decree; and (c) in participation in the Special Master process established pursuant to this Consent Decree. Honeywell shall also reimburse Riverkeeper for reasonable attorneys' fees and expenses for Riverkeeper's review of and participation in the Long-Term Monitoring Plan and monitoring and enforcement of this Consent Decree following the term of the Special Master. In the event that any dispute arises between the Parties under this Consent Decree that must be resolved by the Court, Riverkeeper shall be entitled to recover its attorneys' fees and expenses for litigation of the dispute to the extent allowed by federal law. Riverkeeper and Honeywell shall use the same informal procedure for attempting to settle fees issues as has been used for post-judgment monitoring fees in *ICO v. Honeywell*. In the event that Riverkeeper and Honeywell are unable to reach a settlement on fees, Riverkeeper shall apply to the Court for an award of attorneys' fees and expenses. If Honeywell objects to only a portion of the Riverkeeper's statement of attorneys' fees and expenses, Honeywell shall pay the undisputed portion within 60 days of Riverkeeper's submittal of the statement to Honeywell. The Court shall resolve any objections to

Riverkeeper's statement of attorneys' fees and expenses and shall enter an appropriate Order. In the event of Honeywell's default, Riverkeeper may seek attorneys' fees from any trust fund or court registry funds established pursuant to the financial assurances provisions of this Consent Decree.

## ARTICLE VIII: MISCELLANEOUS PROVISIONS

121. **Force Majeure.** Force Majeure, for the purposes of this Consent Decree, is defined as an event arising from causes beyond the control of any Party or Parties (or their agents, contractors, subcontractors, representatives, or assigns) which could not have been overcome by reasonable diligence and which delays or prevents the performance of any obligation under this Consent Decree. Examples of events which may constitute force majeure include the refusal of any federal or state governmental authority to grant a permit or authorization necessary for the completion of actions required by this Consent Decree, floods, hurricanes, tornadoes, and other extraordinary weather events, earthquakes and other natural disasters, terrorist attacks, war, and other national emergencies. Examples of events that are not force majeure events include normal inclement weather, increased costs or expense, the failure to timely and fully apply for a permit or authorization necessary for the completion of actions required by this Consent Decree, or financial difficulty of any Party. The Party claiming force majeure shall bear the burden of showing an event was a force majeure event.

122. **Bayfront Redevelopment LLC as a Party.** As a signatory to this Consent Decree, Bayfront Redevelopment LLC subjects itself to the Court's jurisdiction for the purpose of enforcing this Consent Decree and agrees to be bound by this Consent Decree. This Consent Decree shall be fully enforceable against Bayfront Redevelopment LLC.

123. **Successors and Assigns.** This Consent Decree shall be binding upon and shall inure to the benefit of the successors, assigns, heirs, corporate parents, subsidiaries, and affiliates of each Party. No assignment or delegation of the obligations hereunder shall release the assigning Party from its obligations under this Consent Decree.

124. **Successors to Hackensack Riverkeeper, Inc.** In the event that Hackensack Riverkeeper, Inc. disbands or otherwise ceases operations, it shall assign its rights under this Consent Decree to another qualified nonprofit organization. A nonprofit organization shall be qualified for assignment under this Consent Decree if it is a charitable organization under Section 501(c)(3) of the Internal Revenue Code or its substantial equivalent and has an established record of working to enhance or preserve the ecology, natural habitat, or environment. Any such assignment shall be subject to approval by the Court and Honeywell shall have the right to object to any proposed assignment. Any successor organization shall have the duty to assign its rights under this Consent Decree to another qualified nonprofit organization in the event that the successor disbands or otherwise ceases operations. In the event that a successor is not appointed at any given time, the New Jersey Attorney General or equivalent officer shall appoint a successor subject to approval by the Court and objection by Honeywell.

125. **Reservation of Rights and Claims.** Except as set forth expressly herein, this Consent Decree does not affect in any way any of the Parties' claims or defenses against third parties who have not signed the Consent Decree.

126. **Governing Law and Continuing Jurisdiction.** The Court shall retain jurisdiction over the matters addressed in this Consent Decree for purposes of enabling the Parties to apply to the Court for any further order as may be necessary to construe, carry out, or enforce the terms of this Consent Decree. This Consent Decree shall be interpreted and enforced under the laws of

the United States and the State of New Jersey by the United States District Court for the District of New Jersey.

127. **Construction.** Questions regarding the interpretation of this Consent Decree shall not be resolved against any Party on the ground that this Consent Decree has been drafted by that Party. This Consent Decree is the result of review, negotiation, and compromise by each Party.

128. **Authority to Enter into Agreement.** The undersigned representative for each Party represents, certifies, and warrants that he or she is duly authorized by the Party whom he or she represents to enter into the terms of this Consent Decree and bind such Party legally to this Consent Decree.

129. **Measures to Effectuate This Consent Decree.** Jersey City shall take all appropriate steps to ensure that commitments it has agreed to with regard to the Open Space AOC have been duly considered, ratified, and approved. Such steps include consideration of such commitments and an effectuating ordinance at a meeting of the City Council, open to the public, at which members of the public have the opportunity to comment on all aspects of the commitments made by Jersey City..

130. **Modifications.** This Consent Decree may be modified by mutual agreement of the Parties but such agreement must be in writing, duly and properly signed by all Parties, and shall be submitted to the Court for approval.

131. **Severability.** Each of the provisions in paragraph 74 of this Consent Decree shall be deemed severable and, in the event that one or more of such provisions is deemed invalid or unenforceable, it shall not affect the validity or enforceability of the other provisions of the Consent Decree.

132. **Signatures.** This Consent Decree may be signed simultaneously or in counterparts by the respective signatories, which shall be as fully valid and binding as if a single document was signed by all of the signatories. This Consent Decree may be signed electronically by any or all signatories, and such electronic signature shall be as fully valid and binding as a hand-written signature.

# DEED NOTICE CONCERNING CONTROLS INSTALLED FOR CHROMIUM AND HISTORIC FILL CONTAMINATION UNDERLYING THE PROPERTY

This Deed Notice is made as of the __ day of _____, 2017, by ***Bayfront Redevelopment LLC, whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950***. "Owner" shall mean Bayfront Redevelopment LLC together with its successors and assigns, including all successors in interest in the Property which is the subject of this Deed Notice as described fully below. The Property (also referred to herein as the "Restricted Area(s)") shall consist of those lands particularly described by metes and bounds in Exhibit A-2 attached.

1. THE PROPERTY. Bayfront Redevelopment LLC is the current owner in fee simple of certain real property designated as a portion of ***Block 24601, Lot 11 on the tax map of the City of Jersey City, Hudson County, New Jersey***[1]; the New Jersey Department of Environmental Protection Program Interest Number for the contaminated site which includes this property is ***Hudson County Chromate Site No. 163 (a.k.a. Posnak & Turkish) Program Interest ("PI") #010374*** [NJDEP PI# for non-chromium-related contaminants at the Property is #745719], and known as the Site 163

[1] All references to Block 24601 Lot 11 in this Deed Notice shall mean the applicable portions of Block 24601 Lot 11 as shown in the metes and bounds description, regardless of whether the word "portion(s)" is specifically called out or not.

Development Area of Concern ("AOC") pursuant to the First Amended Consent Decree Regarding the Remediation and Redevelopment of Study Area 6 South ("Consent Decree") which is attached hereto as Appendix I and is entered as an order of the Court in the following consolidated actions *JCMUA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-05955; *JCIA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-5993; and *Hackensack Riverkeeper, Inc. v. Honeywell International, Inc.,* D.N.J., Civ. No. 06-22 (consolidated under Civ. No. 95-2097). The Property is part of Study Area 6 South ("SA-6 South"), a group of sites containing chromium contamination being addressed by Honeywell International Inc. ("Honeywell") as described in Paragraph 3. The Property is located along Droyers Cove as shown in Exhibit B-1 attached hereto.

This deed notice applies only to a portion of the Site 163 Development AOC which will become the Future Kellogg Street/Riverside Drive/Riverwalk during site redevelopment. The Consent Decree restricts transfer, use and development of the Property. To the extent that there is any conflict or inconsistency between the terms of this Deed Notice and the terms of the Consent Decree, the Consent Decree shall govern.

2. REMEDIATION.

i. The Department's Bureau of State Case Management (BCM) is the entity within the Department that is responsible for the chromium oversight of the remediation of the SA-6 South. The matter was Hudson County Chromate Site No. 163 PI No. 010374. The Department has approved this Deed Notice as an institutional control for the Property, which is part of the remediation of the Property.

ii. N.J.A.C. 7:26-C-7 requires the Owner, among other persons, including the responsible party Honeywell International Inc. ("Honeywell"), to obtain a soil remedial action permit for the soil remedial action at the Property. That permit will contain the monitoring, maintenance and biennial certification requirements that apply to the Property.

3. SOIL AND GROUNDWATER CONTAMINATION. Honeywell, a corporation of the State of Delaware, licensed to do business in the State of New Jersey whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950, has remediated SA-6 South to address chromium-related and non-chromium soil and shallow groundwater contamination, except for the Property and certain other deed noticed areas where engineering controls were implemented. The Remedial Action Work Plan ("RAWP") for chromium remedial actions was approved by the Department on June 22, 2012 for Hudson County Chromate Site No. 163, which includes remedial actions for chromium at the Property. The RAWP for non-chromium remedial actions pertaining to Site 163 was submitted to the Licensed Site Remediation Professional on March 21, 2011. Remedial actions were further approved pursuant to the Consent Decree.

Under both the Consent Decree and the RAWP, soil contamination remains at the Site 163 Property which contains contaminants at concentrations that do not allow for the unrestricted use of the Property. A Remedial Action Report ("RAR") was submitted to the Department on February 8, 2017. The Department approved the RAR on March 30, 2017. A Construction Completion Report ("CCR") for SA-6 South to document the implementation of the Chromium Remedy pursuant to Article III of the Consent Decree (the "Chromium Remedy") to address chromium-impacted soil

and groundwater for SA-6 South was entered by the Court on [DATE], [CITE TO DOCKET AND DOCKET #].

The Property is a portion of Site 163 at SA-6 South where remaining chromium-impacted soils were identified in the area south of the northern curbline of the future River Front Park/Riverside Drive/Kellogg Street. This deed notice area includes chromium and historic fill. The engineering control barrier on the Property includes clean fill material to a depth of approximately 4-feet below ground surface. During redevelopment of the Property additional engineering control barriers in the form of a roadway, walkway, and/or other hardscape will be constructed on the Property as required by paragraph 61(c)(ii)(3) of the Consent Decree. Honeywell will, or cause Bayfront Redevelopment LLC to, restrict the future use of this area by implementing a conservation restriction, which will be been recorded at the Hudson County Register of Deeds, and transfer, or cause Bayfront Redevelopment LLC to transfer, title to the City of Jersey City (as called for in Paragraph 61(c)(ii)(3) of the Consent Decree). The provisions of the Long Term Monitoring Plan ("LTMP"), developed pursuant to the Consent Decree, will apply to the Property.

The soil contamination is described, including the type, concentration and specific location of such contaminants, in Exhibit B, which is attached hereto and made a part hereof. Groundwater contaminant concentrations and restrictions for SA-6 South in its entirety are addressed in the Classification Exception Area (CEA) approved by the NJDEP on February 16, 2012 and in a forthcoming Remedial Action Permit for Groundwater (recent groundwater samples for the Property do not indicate shallow groundwater contamination). As a result of the remaining soil contamination, there is a statutory requirement for this Deed Notice and engineering controls in accordance with N.J.S.A. 58:10B-13. Under the terms of the Consent Decree and this Deed Notice, Honeywell is responsible for monitoring and maintaining the soil remediation for the Property in perpetuity.

4. CONSIDERATION. In accordance with the Department's approval of the chromium and non-chromium RAWPs for the remediation for the Hudson County Chromate Site No. 163 which includes the Property, and in consideration of the terms and conditions of that approval, and in accordance with the Consent Decree, and other good and valuable considerations, Owner has agreed to subject the Property to certain statutory and regulatory requirements which impose restrictions upon the use of the Property, to restrict certain uses of the Property, and to provide notice to subsequent owners, lessees and operators of the restrictions and the monitoring, maintenance, and biennial certification requirements outlined in this Deed Notice and required by law, as set forth herein.

5A. RESTRICTED AREAS. Due to the presence of contamination remaining at concentrations that do not allow for unrestricted use, Owner has agreed, as part of the remedial action for the Property, to restrict the use of the Property (the "Restricted Areas"); a narrative description of these restrictions, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C, which is attached hereto and made a part hereof. Owner will develop a binder containing a list of these restrictions which will be maintained either on on-site trailers or within the Groundwater Treatment Plant building, available for inspection by governmental enforcement officials if requested.

5B. RESTRICTED LAND USES. The following land use restrictions apply to the Property:

i. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(10), prohibits the conversion of a contaminated site, remediated to non-residential soil remediation standards that require the maintenance of engineering or institutional controls, to a child care facility, or public, private, or charter school without the Department's prior written approval, unless a presumptive remedy is implemented;

ii. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(12), prohibits the conversion of a landfill, with gas venting systems and or leachate collection systems, to a single family residence or a child care facility without the Department's prior written approval;

iii. The Consent Decree, paragraph 61(c), restricts the ownership, use, and development of the Property; and

iv. The Conservation Restriction, to be recorded with the Hudson County Register of Deeds, will restrict the use and development of the Property.

5C. ENGINEERING CONTROLS. Due to the presence and concentration of these contaminants, the Owner has also agreed, as part of the remedial action for the Property, to the placement of certain engineering controls on the Property. A narrative description of these engineering controls, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C. Honeywell shall be responsible for monitoring and maintenance of engineering controls and biennial certification requirements as specified in the Consent Decree, the LTMP, and Paragraphs 8A and 8B herein.

5D. LONG TERM MONITORING PLAN. Pursuant to the Consent Decree, Honeywell has developed an LTMP which sets forth requirements for monitoring, maintaining, and repairing or and replacing the soil and groundwater chromium remedial measures including engineering controls within the Property, and requirements for notification and reporting pursuant to the Consent Decree, Deed Notice, and Soil Remedial Action Permit. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950. This Deed Notice is appended to the LTMP.

5E. WORKER TRAINING MATERIALS. All maintenance workers engaged in maintenance at the Property shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy Workers shall be trained using materials developed by Honeywell pursuant to the Consent Decree.

6A. CHANGE IN OWNERSHIP AND REZONING.

i. The Owner and the subsequent owners and lessees, shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall

be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. The Owner and the subsequent owners shall provide written notice to the Department of Environmental Protection on a form provided by the Department and available at www.nj.gov/srp/forms within thirty (30) calendar days after the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property.

iii. The Owner and the subsequent owners shall provide written notice to the Department, on a form available from the Department at www.nj.gov/srp/forms, within thirty (30) calendar days after the owner's petition for or filing of any document initiating a rezoning of the Property to residential.

6B. SUCCESSORS AND ASSIGNS. This Deed Notice shall be binding upon Owner and upon Owner's successors and assigns, and subsequent owners, lessees and operators while each is an owner, lessee, or operator of the Property.

7A. ALTERATIONS, IMPROVEMENTS, AND DISTURBANCES.

i. The Owner and all subsequent owners and lessees shall notify any person of whom it has knowledge, including, without limitation, tenants, employees of tenants, developers, and contractors, intending to conduct invasive work or excavate within the Restricted Areas, of the nature and location of known contamination in the Restricted Areas, and, of the precautions necessary to protect the engineering controls and minimize potential human exposure to contaminants.

ii. Except as provided in the Consent Decree and Paragraph 7B below, no person shall make, or allow to be made, any alteration, improvement, or disturbance in, to, or about the Property which disturbs any engineering control at the Property except as (a) permitted in the Consent Decree and Conservation Restriction, and (b) without first obtaining a Soil Remedial Action Permit modification from the Department. Nothing herein shall constitute a waiver of the obligation of any person to comply with all applicable laws and regulations including, without limitation, the applicable rules of the Occupational Safety and Health Administration.

iii. Notwithstanding subparagraph 7A.ii.(b), above, a Soil Remedial Action Permit modification is not required for any alteration, improvement, or disturbance provided that:

(A) Such action is taken in conformance with the Consent Decree and this Deed Notice; and

(B) The Department of Environmental Protection is notified of the activity by calling the DEP Hotline, at 1-877-WARN-DEP or 1-877-927-6337, within twenty-four (24) hours after the beginning of each alteration, improvement, or disturbance; and

(C) Honeywell is notified of the activity by calling 855-727-2658; and

(D) Honeywell and/or the owner restores any disturbance of an engineering control to pre-disturbance conditions, consistent with the requirements of the Consent Decree and LTMP, within sixty (60) calendar days after the initiation of the alteration, improvement or disturbance; and

(E) All applicable worker health and safety laws and regulations are followed during the alteration, improvement, or disturbance, and during the restoration; and

(F) Appropriate measures are taken so that human exposure, and exposure of the environment outside the containment of the engineering controls, to contamination in excess of the applicable remediation standards does not occur; and

(G) The next biennial certification includes a description of the nature of the alteration, improvement, or disturbance, the dates and duration of the alteration, improvement, or disturbance, the name of key individuals and their affiliations conducting the alteration, improvement, or disturbance, a description of the notice the Owner gave to those persons prior to the disturbance, the amounts of soil generated for disposal, if any, the final disposition and any precautions taken to prevent exposure.

7B. EMERGENCIES. In the event of an emergency which presents, or may present, an unacceptable risk to the public health and safety, or to the environment, or immediate environmental concern, see N.J.S.A. 58:10C-2, any person may temporarily breach an engineering control provided that:

i. The Department of Environmental Protection is immediately notified of the emergency, by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

ii. Immediately after notifying NJDEP, Honeywell is notified of the emergency by calling 855-727-2658; and

iii. Both the actual disturbance and the time needed for the disturbance are limited to the minimum reasonably necessary to adequately respond to the emergency; and

iv. All measures necessary to limit actual or potential, present or future risk of exposure to humans or the environment to the contamination are implemented; and

v. The Department of Environmental Protection is notified when the emergency has ended by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

vi. Honeywell is notified when the emergency has ended by calling 855-727-2658; and

vii. Honeywell restores the engineering control to the pre-emergency conditions, consistent with the requirements of the Consent Decree and LTMP, as soon as possible, and submits a written report to the Department of Environmental Protection of such emergency and restoration efforts within sixty (60) calendar days after completion of the restoration of the engineering control. The report must include all information pertinent to the emergency, potential discharges of

contaminants, and restoration measures that were implemented, which, at a minimum, should specify: (a) the nature and likely cause of the emergency, (b) the potential discharges of or exposures to contaminants, if any, that may have occurred, (c) the measures that have been taken to mitigate the effects of the emergency on human health and the environment, (d) the measures completed or implemented to restore the engineering control, and (e) the changes to the engineering control or site operation and maintenance plan to prevent recurrence of such conditions in the future. Honeywell shall submit the report to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413

8A. MONITORING AND MAINTENANCE OF DEED NOTICE, AND PROTECTIVENESS CERTIFICATION. The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the persons responsible for conducting the remediation, Honeywell, the Owner, and the subsequent owners, lessees, and operators, shall monitor and maintain this Deed Notice. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. Honeywell shall certify to the Department on a biennial basis that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the deed notice shall include all of the following:

i. Monitoring and maintaining this Deed Notice according to the requirements in Article III of the Consent Decree, and Exhibit C herein, to ensure that the remedial action that includes the Deed Notice continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes this Deed Notice, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

8B. MONITORING AND MAINTENANCE OF ENGINEERING CONTROLS, AND PROTECTIVENESS CERTIFICATION. Honeywell shall maintain all engineering controls at the Property and certify to the Department on a biennial basis that the remedial action of which each engineering control is a part remains protective of the public health and safety and of the

environment. The specific obligations to monitor and maintain the engineering controls shall include the following:

i. Monitoring and maintaining each engineering control according to the requirements in Article III of the Consent Decree, the LTMP, and Exhibit C here, so that the remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes the engineering control remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes the engineering control, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

9. ACCESS. The Owner, subsequent owners, lessees, and operators, agree to allow the Department, its agents and representatives access to the Property to inspect and evaluate the continued protectiveness of the remedial action that includes this Deed Notice and to conduct additional remediation to ensure the protection of the public health and safety and of the environment if the persons responsible for monitoring the protectiveness of the remedial action, as described in Paragraph 8, above, fail to conduct such remediation pursuant to this Deed Notice as required by law. The Owner, and the subsequent owners and lessees, shall also cause all leases, subleases, grants, and other written transfers of an interest in the Restricted Areas to contain a provision expressly requiring that all holders thereof provide such access to the Department.

10. NOTICES.

i. Owner shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. Honeywell or the Owner shall notify any person intending to conduct invasive work or excavate within the Property of the nature and location of contamination and, of the precautions necessary to minimize potential human exposure, and exposure of the environment outside the containment of the engineering controls, to contaminants.

iii. Owner shall provide written notice to the Department of Environmental Protection at least thirty (30) calendar days before the effective date of any conveyance, grant, gift, or other transfer,

in whole or in part, of the owner's interest in the Property . Any such conveyance, grant or gift must be consistent with the terms of the Consent Decree.

iv. Owner shall provide written notice to the Department within thirty (30) calendar days following the Owner's receiving notice of any petition for a rezoning of the Property. Any such rezoning must be consistent with the terms of the Consent Decree. The Owner shall submit the written notice to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413.

11. ENFORCEMENT OF VIOLATIONS.

i. This Deed Notice itself is not intended to create any interest in real estate in favor of the Department of Environmental Protection, nor to create a lien against the Property, but merely is intended to provide notice of certain conditions and restrictions on the Property and to reflect the regulatory and statutory obligations imposed as a conditional remedial action for this Property.

ii. The restrictions provided herein may be enforceable by the Department against any person who violates this Deed Notice. To enforce violations of this Deed Notice, the Department may initiate one or more enforcement actions pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C, and require additional remediation and assess damages pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C.

iii. This Deed Notice is also enforceable in the United States District Court for the District of New Jersey by all residents, owners, lessees, and all commercial tenants on Study Areas 6 and 7 pursuant to paragraphs 80 and 83 of the Consent Decree.

12. SEVERABILITY. If any court of competent jurisdiction determines that any provision of this Deed Notice requires modification, such provision shall be deemed to have been modified automatically to conform to such requirements. If a court of competent jurisdiction determines that any provision of this Deed Notice is invalid or unenforceable and the provision is of such a nature that it cannot be modified, the provision shall be deemed deleted from this instrument as if the provision had never been included herein. In either case, the remaining provisions of this Deed Notice shall remain in full force and effect.

13. MODIFICATION AND TERMINATION.

i. Any person may request in writing, at any time, that the Department modify this Deed Notice where performance of subsequent remedial actions, a change of conditions at the Property, or the adoption of revised remediation standards suggest that modification of the Deed Notice

would be appropriate, provided that any such modification is consistent with the requirements of the Consent Decree.

ii. Any person may request in writing, at any time, that the Department terminate this Deed Notice because the conditions which triggered the need for this Deed Notice are no longer applicable.

iii. Any person seeking a modification or termination of this Deed Notice must also have such modification approved by the United States District Court for the District of New Jersey pursuant to the Consent Decree until such time as the Consent Decree terminates with regard to the Property pursuant to the Consent Decree.

iv. If the United States District Court for the District of New Jersey and NJDEP have concluded that this Deed Notice shall be modified or terminated, such modification or termination will only be effective upon the filing of a Termination of Deed Notice, available at N.J.A.C. 7:26C Appendix C, with the office of the Register of Deeds of Hudson County, New Jersey, expressly modifying or terminating this Deed Notice.

v. Within thirty (30) calendar days after the filing of a Termination of Deed Notice, the owner of the Property shall apply to the Department for modification or termination of the Soil Remedial Action Permit pursuant to N.J.A.C. 7:26C-7.

vi. This Deed Notice may be modified only if it has first been terminated pursuant to subparagraphs 13v above, and upon filing of a modified Deed Notice, executed by the Owner of the Property, in the office of the Register of Deeds of Hudson County, New Jersey.

14A. EXHIBIT A. Exhibit A includes the following maps of the Property and the vicinity:

i. Exhibit A-1: Vicinity Map - A map that identifies by name the roads, and other important geographical features in the vicinity of the Property;

ii. Exhibit A-2: Metes and Bounds Description - A metes and bounds description of the Property, including reference to tax lot and block numbers for the Property and a Tax Map;

iii. Exhibit A-3: Property Map - A scaled map of the Property, scaled at one inch to 200 feet or less, and if more than one map is submitted, the maps shall be presented as overlays, keyed to a base map; the map(s) shall include diagrams of major surface topographical features such as buildings, roads, and parking lots. After development of the Property, this Deed Notice shall be modified to show further engineering controls and topographical features constructed on the Property, such as roads, walkways or other hardscape.

14B. EXHIBIT B. Exhibit B includes the following descriptions of the Restricted Areas:

i. Exhibit B-1: Restricted Area Map - Maps for the Property that include, as applicable:

(A) As-built diagrams of each engineering control, including caps, fences, hydraulic barrier walls, ground water monitoring wells, and ground water pumping system;

(B) As-built diagrams of any buildings, roads, parking lots, utility corridors, and other structures that function as engineering controls; and

(C) Designation of all soil and/or sediment sample locations within the restricted areas that exceed any soil or sediment standard that are keyed into one of the tables described below.

ii. Exhibit B-2 (Table B-2): Restricted Area Data Tables - A separate table for each restricted area that includes either (A) or (B) through (F):

(A) Only for historic fill extending over the entire site or a portion of the site and for which analytical data are limited or do not exist, a narrative that states that historic fill is present at the site, a description of the fill material (e.g., ash, cinders, brick, dredge material), and a statement that such material may include, but is not limited to, contaminants such as PAHs and metals;

(B) Sample location designation from Restricted Area map (Exhibit B-1);

(C) Sample elevation based upon mean sea level;

(D) Name and chemical abstract service registry number of each contaminant with a concentration that exceeds the unrestricted use standard;

(E) The restricted and unrestricted use standards for each contaminant in the table; and

(F) The remaining concentration of each contaminant at each sample location at each elevation (or if historic fill, include data from the Department's default concentrations at N.J.A.C. 7:26E-4.6, Table 4-2).

14C. EXHIBIT C. Exhibit C includes narrative descriptions of the institutional controls and engineering controls as follows:

i. Exhibit C-1A through C. Exhibit C-1A: Institutional Controls; Exhibit C-1B: Consent Decree as Institutional Control (attached); Exhibit C-1C: Zoning as Institutional Control; Exhibit C-1D: Conservation Restriction as Institutional Control (recorded at Hudson County Register of Deeds as indicated in Paragraph 3): Exhibit C-1 (A through D) includes a narrative description of the restrictions and obligations of this Deed Notice that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:

(1) Description and estimated size of the Restricted Areas as described above;

(2) Description of the restrictions on the Property by operation of this Deed Notice and the other Institutional Controls; and

(3) The objective of the restrictions;

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;

(2) There have been any land use changes subsequent to the filing of this Deed Notice and the other Institutional Controls or the most recent biennial certification, whichever is more recent;

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls;

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the Property; and

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice and the other Institutional Controls, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice and the other Institutional Controls;

(2) Land use at the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls; and

(3) The remedial action that includes this Deed Notice and the other Institutional Controls continues to be protective of the public health and safety and of the environment.

ii. Exhibit C-2. Exhibit C-2: Engineering Controls: Clean Fill Cover; Exhibit C-2 includes a narrative description of the engineering controls as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) The engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering control; and

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering control continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

15. SIGNATURES. IN WITNESS WHEREOF, Owner has executed this Deed Notice as of the date first written above.

**DESCRIPTION OF PROPERTY**
**CITY OF JERSEY CITY**
**HUDSON COUNTY, NEW JERSEY**

**DEED NOTICE AREA 3**
**BLOCK 24601 LOT 11**
**PROJECT NO. 10000292R**
**APRIL 12, 2016**
**REVISED SEPTEMBER 11, 2017**

All that certain lot, tract or parcel of land situate lying and being in the City of Jersey, in the County of Hudson and State of New Jersey, and being a portion of Lot 11 Block 24601, designated as Deed Notice Area 3 as shown on an exhibit entitled, "Deed Notice Area 3, SA6 South, Block 24601 Lot 11, City of Jersey City, Hudson County, New Jersey," prepared by Maser Consulting P.A., dated April 6, 2016, revised September 11, 2017 and being more particularly bounded and described as follows, to wit:

**COMMENCING** at the intersection of the division line between Lots 5 and 11, Block 24601, with the northwesterly terminus of Kellogg Street (80 foot wide right of way); thence-

A. **S40°39'55" W, 3.74 feet**, along said northwesterly terminus to the **True** point of **BEGINNING**, and running; thence-

1. **S40° 39' 55"W, 80.21 feet,** along the same; thence-

Running through Lot 11 the following three (3) courses:

2. **N51°13'02" W, 1,061.96 feet,** to a point of curvature; thence-

3. **NORTHWESTWARDLY**, on an arc to the right having a radius of **26.00 feet,** and arc length of **43.82 feet** (central angle of **96°33'55"**), said arc being connected by a chord bearing **N 02° 56'04" W,** a chord distance of **38.81 feet**, to a point of tangency; thence-

4. **N45°20'54" E, 82.45 feet,** to the division line between Lots 11 and 1; thence-

5. **S51° 06' 45"E, 184.04 feet,** along said division line to a point of non-tangent curvature; thence -

Running through said Lot 11 the following twenty-three (23) courses:

6. **SOUTHEASTWARDLY**, on an arc to the left having a radius of **273.50 feet,** and arc length of **42.65 feet** (central angle of **08°56'07"**), said arc being connected by a chord bearing **S 03° 18'43" E,** a chord distance of **42.61 feet,** to a point of non-tangency; thence –

7. **S50° 24' 32"W, 42.19 feet,** thence -

8. **S18° 06' 16"W, 7.09 feet,** to a point of non-tangent curvature; thence -

**EXHIBIT B**
**Deed Notice #3 Site 163**
**B-1 Restricted Area Maps**
**B-2 Restricted Area Data Table**
**Portion of Block 24601, Lot 11**
**City of Jersey City, New Jersey**

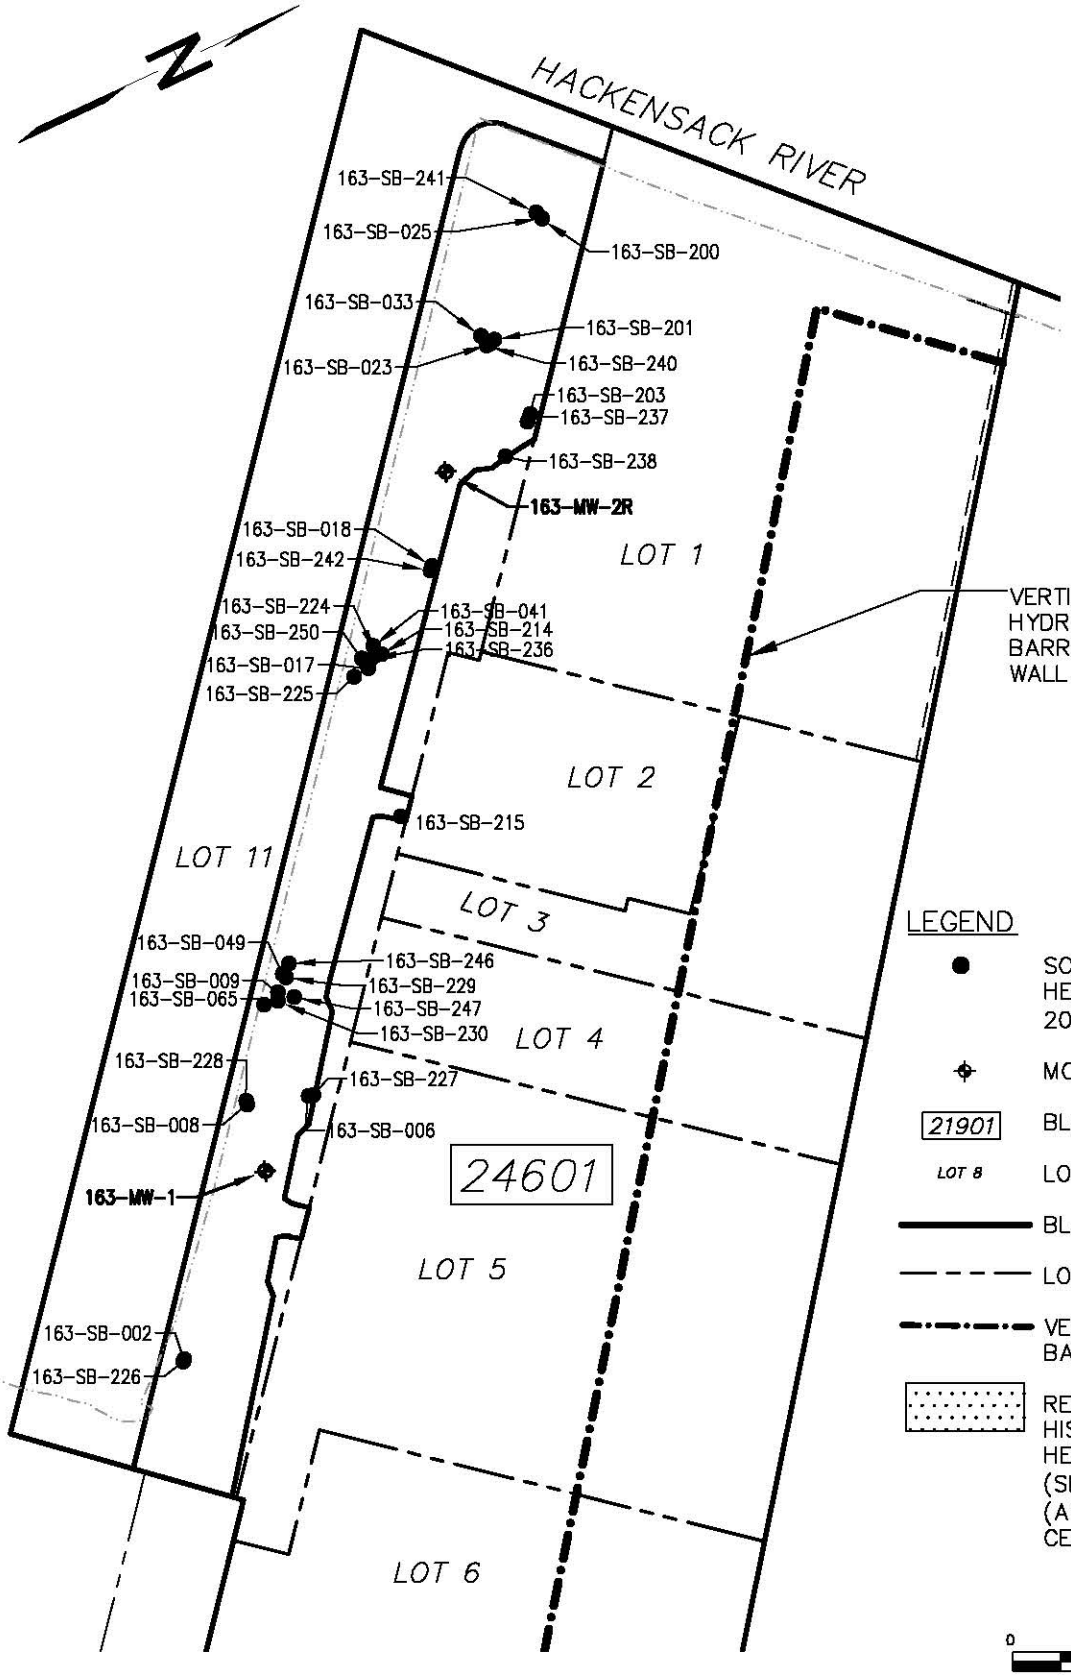
Exhibit B-1 Restricted Area Maps include Exhibit B-1A (Restricted Area and Soil Sample Locations), Exhibit B-1B (Cap System Detail), and Exhibit B-1C (As-Built Restoration Plan).

Exhibit B-2 is a Restricted Area Data Table indicating soil sample locations with concentrations of contaminants remaining above the level established in the New Jersey Department of Environmental Protection (NJDEP) Chromium Policy and/or other applicable NJDEP Soil Quality Standards as described below.

**Restricted Area Map Notes:**

Exhibit B-1 indicates engineering controls. The engineering controls include 4 to 6-inches crushed stone cover overlying 4 to 6-feet of clean soils above the impacted soil. (As part of the Bayfront Redevelopment Plan, the engineering control will also include a paved road, walkway or other hardscape. At that time, this Deed Notice will be revised to reflect the revision to the engineering controls.).

Exhibits B-1A indicates the restricted area for soil containing contaminants of concern, including hexavalent chromium above 20 milligrams per kilogram (mg/kg) pursuant to the Chromium Policy, and soils that are consistent with NJDEP's definition of "historic fill material" found at N.J.A.C. 7:26E-1.8, as shown on Exhibit B-3.



Analytical results and soil borings indicate that historic fill is present onsite and extends over the entire Restricted Area. Historic fill onsite typically consists of the following: metals, PAHs, and miscellaneous debris (including but not limited to coal fragments, brick, timber, and other construction materials).

A table summarizing maximum concentrations of typical contaminants found in the historic fill material in the Restricted Area is included as Exhibit B-2.

NOTE:

1. REFER TO FIGURE 2 FOR CONSTRUCTION CONTROL GRID AND ATTACHED TABLES FOR SURVEY DOCUMENTATION OF 6 INCH GRAVEL HISTORIC FILL CAP INSTALLATION.
2. OPEN SPACE CAP AREA WITHIN LIMITS OF THE BARRIER WALLS IS COVERED WITH CLEAN IMPORTED SOILS TO THE DEPTHS IDENTIFIED IN THE DESIGN. THE VEGETATED SLOPE ON THE DEVELOPMENT AREA IS COVERED WITH A MINIMUM OF 12 INCHES OF CLEAN IMPORTED FILL AS SHOWN ON THE TYPICAL VEGETATED SLOPE DETAIL. THE VEGETATED SLOPE ALONG SA–7 WAS CONSTRUCTED ENTIRELY FROM CLEAN IMPORTED FILL.
3. EXISTING PAVEMENT WAS FIELD INSPECTED BY LSRP AND SUBJECT TO MINOR CRACK FILLING TO SATISFY HISTORIC FILL CAP REQUIREMENTS.
4. STEEL SHEETPILE WALL WAS INSTALLED AS EXCAVATION SUPPORT ALONG THIS AREA AND THEN CUT BELOW CURRENT GRADE AND LEFT IN PLACE. THE TOP OF SHEETPILE IS GENERALLY 0.5 TO 2.0 FT BELOW CURRENT GRADES.

NOTE: NO HISTORIC FILL SHALL BE PLACED ON SA–7

## C-1 Institutional Controls

C-1 Deed Notice, Consent Decree, Zoning, Conservation Restriction as Institutional Controls: Exhibit C-1 (A through D) for that portion of Block 24601, Lot 11, City of Jersey City, New Jersey known as Site 163.

Exhibits C-1A through D. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control (attached); Exhibit C-1C: Zoning as Institutional Control; Exhibit C-1D: Conservation Restriction as Institutional Control (recorded at Hudson County Register of Deeds as indicated in Paragraph 3): Exhibits C-1A through C-1D include a narrative description of the restrictions and obligations of this Deed Notice and the other Institutional Controls that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
**The Property is a portion of Site 163 at SA-6 South where remaining chromium-impacted soils were identified in the area south of the northern curbline of the future River Front Park/Riverside Drive/Kellogg Street. This deed notice area includes chromium and historic fill. Honeywell will restrict, or will cause Bayfront Redevelopment LLC to restrict, the future use of this area by implementing a conservation restriction, which will be recorded at the Office of the Hudson County Register. In addition, Honeywell will transfer, or will cause Bayfront Redevelopment LLC to transfer title to the Property to Jersey City (as called for in Paragraph 61(c)(ii)(3) of the Consent Decree). The provisions of the LTMP, developed pursuant to the Consent Decree, will apply to the Property.**

(1) Description and estimated size of the Restricted Areas as described above;

***The Property constitutes a portion of Block 24601, Lot 11. The estimated size of the Area containing chromium-impacted soils (hexavalent chromium above 20 mg/kg) as identified on Exhibit B-1 is estimated at approximately 82,868 square feet or approximately 1.902 acres.***

(2) Description of the restrictions on the Property by operation of the Institutional Control;

***The Property shall only be used for activities consistent with this Deed Notice, the Consent Decree, the applicable zoning standards, and the Conservation Restriction. Intrusive activities (i.e., excavation or digging) that breach the***

***engineering controls (as described in Exhibit C-2) will not be permitted on the Property except in compliance with the terms of the Consent Decree and the applicable portions of the LTMP developed thereunder, and this Deed Notice. See subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950.***

(3) The objective of the restrictions;

***The restrictions will prohibit contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg and soils that are historic fill.***

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;

***Visual inspections of the Property and other monitoring as set forth in the Consent Decree and the applicable portions of the LTMP established thereunder.***

(2) There have been any land use changes subsequent to the filing of this Deed Notice or the most recent biennial certification, whichever is more recent;

***Same as (B)(1).***

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice;

***Same as (B)(1).***

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the site; and

***Review of newly promulgated or modified requirements of applicable regulations or laws that potentially may apply to the site.***

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***Same as (B)(4).***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) Land use at the Property is consistent with the restrictions in the Consent Decree, this Deed Notice, the applicable zoning standards and the Conservation Restriction; and

(3) The remedial action that includes this Deed Notice continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including evaluation of any available documents as a result of changes in land use or incidents.***
- ***A report that determines whether or not the land use at the Property has remained consistent with the restrictions in the Consent Decree, this Deed Notice, the applicable zoning standards and the Conservation Restriction.***
- ***A report that determines whether or not the Deed Notice continues to be protective of the public health and safety and the environment.***

**C-2 Engineering Controls**
**Deed Notice #3 Site 163**
**Portion of Block 24601, Lot 11**
**City of Jersey City, New Jersey**

Exhibits C-2A through C: Narrative description of the Engineering Controls including Clean Fill as follows:

(A) General Description of the engineering controls:

(1) Description of the engineering controls;

***The Engineering Controls consist of the following: 4 to 6-inches crushed stone cover overlying 4 to 6-feet of clean soils above the hexavalent chromium impacted soil. (As part of the Bayfront Redevelopment Plan, the engineering control will also include a paved road, walkway or other hardscape. At that time, this Deed Notice will be revised to reflect the revision to the engineering controls.)***

(2) The objective of the engineering controls; and

***The objective of the controls is to prevent contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg and soils that are historic fill.***

(3) How the engineering controls are intended to function.

***The soil engineering controls are intended to function as a barrier to underlying and adjacent soils containing hexavalent chromium above 20 mg/kg and soils that are historic fill within the Property. Monitoring requirements for the engineering controls are set forth in the applicable portions of the LTMP.***

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

***Honeywell will perform monitoring by visual inspection of the Property pursuant to the Consent Decree. Other monitoring activities shall be performed as set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

***Same as (B)(1) above.***

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering controls;

***Same as (B)(1) above. Also, see the Consent Decree and subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information.***

(4) The engineering controls are being inspected and maintained and their integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

***Same as (B)(1) above.***

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering controls. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering controls; and

***Records of the inspections are to be maintained as listed in (5). Should the activities carried out in conformance with the applicable portions of the LTMP developed pursuant to the Consent Decree indicate that other activities are necessary, those activities will be listed and executed.***

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***A review of any new standards, regulations, or laws will be conducted. Should the review indicate that other activities are necessary, those activities will be listed and executed.***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including an evaluation to determine whether or not the engineering controls are continuing to meet the original objective and intended function.***
- ***A report to determine whether or not the engineering controls continue to operate as designed.***
  ***A report to determine whether or not the engineering controls continue to be protective of the public health and safety and of the environment.***

101. Long-Term Financial Assurances. ..... 61
102. Costs Subject to Long-Term Financial Assurances. ..... 61
103. Long-Term Financial Assurance Mechanisms ..... 62
104. Procedures for Review of the Proposed Long-Term Financial Assurances ..... 66
105. Temporary Maintenance of Chromium Remedy Letter of Credit. ..... 66
106. Adjustment of Amount Held in Long-Term Financial Assurances. ..... 67
107. Exclusive Court Jurisdiction. ..... 68
108. Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired: ..... 68
109. Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default ..... 69
110. Use of the Trust Fund in the Event of Honeywell's Default. ..... 70
111. Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109. ..... 70
112. Termination of the Long-Term Financial Assurances. ..... 70

**ARTICLE IV: TERMINATION** ..... 71

113. Termination of this Consent Decree ..... 71
114. Procedures for Withdrawal and Termination. ..... 72
115. Good-Faith Obligation to Avoid Termination ..... 72
116. Effect of Termination. ..... 72

**ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC** ..... 72

117. Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC. ..... 72

**ARTICLE VI: NOTICE** ..... 73

118. Notice ..... 73
119. Payment of Past Fees and Expenses ..... 74
120. Future Fees and Expenses. ..... 75

**ARTICLE VIII: MISCELLANEOUS PROVISIONS** ..... 76

121. Force Majeure. ..... 76
122. Bayfront Redevelopment LLC as a Party. ..... 76
123. Successors and Assigns. ..... 77
124. Successors to Hackensack Riverkeeper, Inc.. ..... 77
125. Reservation of Rights and Claims. ..... 77
126. Governing Law and Continuing Jurisdiction. ..... 77
127. Construction. ..... 78
128. Authority to Enter into Agreement. ..... 78
129. Measures to Effectuate This Consent Decree ..... 78
130. Modifications. ..... 78
131. Severability. ..... 78
132. Signatures. ..... 79

## RECITALS

**Whereas,** on June 30, 2003, the district court for the District of New Jersey (hereafter "the Court") issued a Final Judgment in *Interfaith Community Organization v. Honeywell International Inc.*, Civ. No. 95-2097 (DMC) (*"ICO v. Honeywell"*), ordering the remediation of an area designated by the New Jersey Department of Environmental Protection ("NJDEP") as Study Area 7 by excavation of all chromium contamination on the property, under the oversight of a court-appointed Special Master;

**Whereas**, on or about December 23, 2005, the Jersey City Municipal Utilities Authority ("JCMUA") filed litigation styled *Jersey City Municipal Utilities Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5955 (DMC), bringing claims against Honeywell International Inc. ("Honeywell") under, *inter alia*, Section 6972 of the Resource Conservation and Recovery Act ("RCRA"), and seeking remediation of chromium contamination on property then-owned by JCMUA and other relief;

**Whereas**, on or about December 28, 2005, the Jersey City Incinerator Authority ("JCIA") filed litigation styled *Jersey City Incinerator Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5993 (DMC), bringing claims against Honeywell under, *inter alia*, Section 6972 of RCRA, and seeking remediation of chromium contamination on property then-owned by JCIA and other relief;

**Whereas**, on or about January 4, 2006, the Hackensack Riverkeeper, Inc., Captain William Sheehan, Reverend Winston Clarke, and Lawrence Baker ("Riverkeeper") filed litigation styled *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.,* D.N.J., Civ. No. 06-022 (DMC), bringing a claim against Honeywell under RCRA and seeking remediation of chromium contamination to soils, groundwater, surface waters, and sediments associated with

various properties collectively designated by NJDEP as Study Areas 5, 6 North, which includes the properties formerly owned by JCMUA and JCIA, and 6 South;

**Whereas,** Study Areas 6 North and South are directly adjacent to Study Area 7 on the north and south sides, respectively;

**Whereas,** Study Area 5 is comprised of properties to the east of Study Areas 6 North, 6 South, and 7 across Route 440;

**Whereas,** Riverkeeper also named as defendants in *Riverkeeper v. Honeywell* owners of the properties comprising Study Areas 5, 6 South, and 6 North;

**Whereas,** *JCMUA v. Honeywell*, *JCIA v. Honeywell,* and *Riverkeeper v. Honeywell* were consolidated by the Court (hereinafter the "Consolidated Litigation");

**Whereas,** in the Consolidated Litigation, Riverkeeper has alleged that Honeywell bears responsibility for the presence and remediation of chromite ore processing residue ("COPR") and chromium in soils and groundwater on the Study Area 6 South property;

**Whereas,** on April 21, 2008, the Court entered the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North (hereafter "the Study Area 6 North Consent Decree") resolving issues between Honeywell, Riverkeeper, and the Jersey City Entities related to chromium contamination at Study Area 6 North;

**Whereas**, on April 21, 2008, the district court for the District of New Jersey entered the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. (hereafter "Jersey City/Honeywell Consent Order"), filed in the Consolidated Litigation simultaneously with the Study Area 6 North Decree, which resolved claims and cross-claims between Honeywell and the Jersey City Entities;

**Whereas**, on May 28, 2008, the Court entered the Consent Order on Sediment Remediation and Financial Assurances ("Sediment Consent Order"), resolving issues related to the remediation of chromium contaminated sediments in the Hackensack River in the vicinity of Study Areas 5, 6, and 7;

**Whereas**, on September 3, 2008, the Court entered the Deep Overburden and Bedrock Groundwater Remedies Consent Order (hereafter "the Deep Groundwater Consent Order") resolving all issues related to the remediation of deep overburden and bedrock groundwater in both *ICO v. Honeywell* and the Consolidated Litigation;

**Whereas,** on May 13, 2011, Plaintiffs sent Honeywell a RCRA citizen action suit notice letter with respect to Site 163, and the Parties agree that the incorporation of Site 163 into this Consent Decree resolves any claims asserted, or that could have been asserted, in the RCRA notice letter or in any RCRA citizen suit with respect to Site 163;

**Whereas**, the Parties to this Consent Decree each believe that it is in their mutual interest to move forward productively to resolve their differences so that they can implement environmental remediation at Study Area 6 South that ensures the continued protection of human health and the environment and so that Study Area 6 and Study Area 7 can be redeveloped in keeping with Jersey City's vision for a revitalized West Side;

**Whereas,** the Local Redevelopment and Housing Law, N.J.S.A. 40A:12A-1, *et seq.*, as amended and supplemented (the "Redevelopment Law") provides for municipalities to participate in the redevelopment and improvement of areas in need of redevelopment;

**Whereas**, Study Area 6 and Study Area 7 consist of parcels which by ordinance adopted by the City Council of Jersey City on February 27, 2008, have been determined to be "areas in

need of redevelopment" under the criteria of the Redevelopment Law because of conditions prevalent on those parcels;

**Whereas**, the settlement which is the subject matter of this Consent Decree contemplates the environmental remediation of Study Area 6 South and redevelopment of the parcels that comprise Study Areas 6 and 7 to create a major mixed use project in an important section of Jersey City; and

**Whereas**, each of the actions to implement this Consent Decree have been fully considered by the Honeywell, the Riverkeeper, and Jersey City as a means to accomplish the aforesaid purposes of this settlement:

NOW, THEREFORE, IT IS HEREBY ORDERED AND DECREED AS FOLLOWS:

## ARTICLE I: DEFINITIONS

For purposes of this Consent Decree, the following terms shall have the meanings set forth in this Article:

1. **"20 to 1000 Soils"** shall mean those soils containing less than 1000 mg/kg of hexavalent chromium, but greater than 20 mg/kg. **"20 to 240 Soils"** shall mean those soils containing less than 240 mg/kg of hexavalent chromium, but greater than 20 mg/kg.

2. **Bayfront Redevelopment LLC** shall have the meaning set forth in paragraph 4.1 of the Jersey City/Honeywell Consent Order.

3. **COPR** shall mean Chromite Ore Processing Residue.

4. **Chromium Remedy or Chromium Remediation** shall mean the remedy set forth in Article III.

5. **Consolidated Litigation** shall mean *Jersey City Municipal Utility Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5955 (DMC), *Jersey City Incinerator*

*Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5993 (DMC), and *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-022 (DMC).

6. The **Court** shall mean the United States District Court of the District of New Jersey, which has jurisdiction over the Consolidated Litigation.

7. **Deep Groundwater Consent Order** shall mean the Deep Overburden and Bedrock Groundwater Remedies Consent Order entered by the Court on September 3, 2008, in both *ICO v. Honeywell* and the Consolidated Litigation.

8. **Deep Groundwater Remedy** shall mean the deep overburden and bedrock groundwater pump and treat remedy as required by the Order Approving the Deep Overburden Groundwater Remediation, entered on October 6, 2006, the Stipulation on Consent Regarding the Schedule for Implementation of Deep Groundwater Remedial Actions, entered on August 15, 2008, in *ICO v. Honeywell,* and the remedies required under the Deep Groundwater Consent Order.

9. **Development Area of Concern** ("AOC") shall mean those portions of Study Area 6 South in which the hexavalent chromium concentration in the top 20 feet of soil below ground surfaces exceeds a concentration of 20 mg/kg, and for which future uses of the property may include commercial or residential development. The Open Space AOC shall not be part of the Development AOC and vice versa. The Development AOC consists of two parts: the Kellogg Street Development AOC and the Site 163 Development AOC. Collectively, the two parts shall be referred to as the "Development AOC." The approximate boundaries of the Development AOC as a whole and its two parts are shown on Exhibit A, but the boundaries may be further defined in the implementation of the Chromium Remedy. For the Kellogg Street Development AOC, remedial measures shall assume only a residential use. For the Site 163 Development AOC, remedial measures shall be implemented with the goal of unrestricted use, but limitations

on future uses (including prohibiting residential use) in some or all of the Site 163 Development AOC may be part of the remedy as set forth in paragraph 61.

10. **Hackensack River Watershed Land Trust** shall mean the dedicated fund of the Hackensack Riverkeeper, Inc., established under Section 501(c) of the Internal Revenue Code for the purpose of acquiring and preserving open space within the Hackensack River watershed and administered by the Board of Trustees of the Hackensack Riverkeeper, Inc.

11. **Honeywell** shall mean Honeywell International Inc. and its affiliates, including 425-445 Route 440 Property LLC, Kellogg Street 80 Property LLC, Kellogg Street 60 Property LLC, and Kellogg Street/440 Property LLC.

12. **Honeywell's Treatment Plant** shall mean the treatment plant currently located at 80 Kellogg Street that is used to treat, *inter alia*, chromium contaminated groundwater.

13. ***ICO v. Honeywell*** shall mean *Interfaith Community Organization v. Honeywell International Inc.*, D.N.J., Civ. No. 95-2097 (DMC).

14. **Including** shall mean including, but not limited to.

15. **JCIA** shall mean the Jersey City Incinerator Authority.

16. **JCMUA** shall mean the Jersey City Municipal Utilities Authority.

17. **Jersey City Entities** shall mean the City of Jersey City, including the Department of Public Works ("DPW") and other agencies and branches thereof, the JCIA, and the JCMUA.

18. **Jersey City/Honeywell Consent Order** shall mean the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. entered in the Consolidated Litigation on April 21, 2008.

19. **"L-Well Groundwater"** shall mean the groundwater found at the depth of the "L" wells on and near the former bowling alley property, NJDEP Site 124, located at 427 Route 440. The L-Well Groundwater is located within what has been referred to as the plume diversion area.

20. **NJDEP** shall mean the New Jersey Department of Environmental Protection.

21. **NJDEP Chromium Directive** shall mean the Chromium Directive issued by NJDEP on February 8, 2007, and attached as Exhibit B.

22. **Open Space AOC** shall mean the portion of Study Area 6 South that is identified as The Promenade park and Grand Boulevard extending from Route 440 to the Hackensack River on page 39 of the Redevelopment Plan and for which the future uses of the property shall be restricted pursuant to paragraph 74, following remediation pursuant to paragraph 65. The Development AOC shall not be part of the Open Space AOC and vice versa. The approximate boundaries of the Open Space AOC are shown on Exhibit A, and the boundaries may be further defined in the implementation of the Chromium Remedy.

23. **Party or Parties** shall mean any one or all of the signatories to this Consent Decree.

24. **RCRA** shall mean the Resource Conservation and Recovery Act, 42 U.S.C. § 6901, *et seq.*, as amended.

25. **Redevelopment Area** shall mean Study Area 6 North, Study Area 6 South, and Study Area 7, collectively.

26. **Redevelopment Law** shall mean the New Jersey Local Redevelopment and Housing Law, N.J.S.A. § 40A:12A1, *et seq.*, as amended and supplemented.

27. **Redevelopment Plan** shall mean the Bayfront I Redevelopment Plan as adopted by Jersey City on March 12, 2008.

28. **Remedial Investigation Work Plan Addendum or RIWP Addendum** shall mean the "Remedial Investigation Work Plan Addendum Study Area 6 South" submitted to NJDEP on June 27, 2008.

29. **Riverkeeper** shall mean the plaintiffs in *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-22 (DMC), and includes the Hackensack Riverkeeper, Inc., William Sheehan, Reverend Winston Clarke, and Lawrence Baker.

30. **Sediment Consent Order** shall mean the Consent Order on Sediment Remediation and Financial Assurances, entered by the Court in *ICO v. Honeywell* and this Consolidated Litigation on May 28, 2008.

31. **Shallow Groundwater** or **Shallow Level of Groundwater** shall mean groundwater above the meadow mat, groundwater at stratigraphically equivalent depths in locations where there is no meadow mat, and groundwater that is contaminated by recent contact with COPR or other chromium soil contamination above the meadow mat and subsequently flows downward through or past the meadow mat into the upper portion of the lacustrine sediments. This does not include groundwater found in the bedrock, the deep zone, or any plume of contamination that is in both the intermediate and deep zones, as those zones are defined in the Final Groundwater Investigation Report, prepared in *ICO v. Honeywell*, dated February 2007, p. 1-2.

32. **Site** shall mean Study Area 6 South.

33. **Site Preparation Activities** shall mean those activities necessary to begin implementation of the Chromium Remedy in Article III of this Consent Decree, including, if appropriate, the temporary or permanent relocation of current activities and operations conducted on Study Area 6 South.

34. **Soil** shall mean soils, historic fill, and/or COPR.

35. The **Special Master** shall mean Senator Robert G. Torricelli, appointed as the Special Master in *ICO v. Honeywell* and the Consolidated Litigation, and his successors or whomever the Court may appoint as Special Master.

36. **Stratum O** shall mean the layer composed of soft brown silty fine sand interlayered with soft gray silty clay and fine sandy to clayey silt generally located above the meadow mat below the Historic Fill and/or COPR.

37. **Study Area 5** shall mean that property comprising Sites 79, 90, 117, 153, and 184 of the Chromate Chemical Production Waste Sites designated by NJDEP, comprising approximately 42 acres and including (a) all such property owned by Bob Ciasulli consisting of Block 1291, Lot 76, and Block 1292, Lots 1F, 47, 48, 53, and 54PL, located at 540 Route 440, Jersey City, New Jersey, (b) all such property owned by Elisabeth and Rafael Rosario consisting of Block 1292, Lot 49, located at 93 Fisk Street, Jersey City, New Jersey, (c) all such property owned by Michael Vo consisting of Block 1292, Lot 50, located at 95 Fisk Street, Jersey City, New Jersey, (d) all such property owned by NJCU consisting of Block 1286, Lots 5 and 6D and Block 1286.5, Lots 1 and 2, Jersey City, New Jersey, (e) all such property owned by Inland Southeast Jersey City LLC consisting of Lot 1, Block 1285.5 located at 440 Route 440, Jersey City, New Jersey, and (f) all such property owned by 425/445 Route 440 Property LLC, consisting of Block 1289.5, Lot E, Jersey City, New Jersey.

38. **Study Area 6 North** shall mean the property comprising Sites 87 and 88 of the Chromate Chemical Production Waste Sites designated by NJDEP, which is subject to the Study Area 6 North Consent Decree.

39. **Study Area 6 North Consent Decree** shall mean the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North, entered by the Court on April 21, 2008, in the Consolidated Litigation.

40. **Study Area 6 South** shall mean (a) that property currently owned by Bayfront Redevelopment Property LLC consisting of Site 73, located at 200 Kellogg Street Jersey City, Hudson County, New Jersey; (b) that property currently owned by Bayfront Redevelopment LLC consisting of Site 134, located at 100 Kellogg Street Jersey City, Hudson County, New Jersey; (c) that property currently owned by Bayfront Redevelopment LLC consisting of Site 140 located at 80 Kellogg Street Jersey City, Hudson County, New Jersey; (d) that property currently owned by Bayfront Redevelopment LLC consisting of Site 125, located at 60 Kellogg Street Jersey City, Hudson County, New Jersey; (e) that property currently owned by Bayfront Redevelopment LLC consisting of Site 124, Jersey City, Hudson County, New Jersey; (f) that property currently owned by Kellogg St/Harsimus Cove Realty located at 150 Kellogg Street, Jersey City, Hudson County, New Jersey, (g) that property currently owned by Bayfront Redevelopment LLC located at 38 Kellogg Street, Jersey City, Hudson County, New Jersey; (h) that property currently owned by Bayfront Redevelopment LLC located at 28 Kellogg Street, Jersey City, Hudson County, New Jersey; and (i) that property currently owned by Bayfront Redevelopment LLC, consisting of Site 163, formerly the Colonial Concrete Company, located at 75 Kellogg Street in Jersey City, Hudson County, New Jersey.

41. **Study Area 6** shall mean Study Area 6 North and Study Area 6 South, collectively.

42. **Study Area 7** shall mean (a) that property currently owned by Bayfront Redevelopment LLC located at 425 and 445 Route 440, Jersey City, Hudson County, New Jersey, and (b) that

property currently owned by Bayfront Redevelopment LLC located at 465 Route 440, Jersey City, Hudson County, New Jersey.

43. **Technical Requirements for Site Remediation** shall mean the NJDEP Technical Requirements for Site Remediation, N.J.A.C. Chapter 26E, as duly and properly promulgated and amended.

44. **Unrestricted Use** shall mean that the contaminated medium is restored to a condition or quality suitable for all uses.

## ARTICLE II: SCOPE OF THE CONSENT DECREE, JURISDICTION, AND CLAIMS RESOLVED

45. This Court has jurisdiction over the Parties and subject matter of the Consolidated Litigation pursuant to Section 6972 of RCRA.

46. For purposes of this Consent Decree, the Riverkeeper Complaint in the Consolidated Litigation states claims upon which relief may be granted against Honeywell.

47. In the event that this Decree is not terminated by one or more Parties pursuant to paragraph 113, this Consent Decree resolves, settles, and satisfies all claims by Riverkeeper against Honeywell with respect to soils, shallow groundwater and L-Well groundwater at Study Area 6 South. This Consent Decree does not resolve any claims by Riverkeeper against Honeywell with respect to Study Area 5 or property owned by Regnal Realty consisting of Block 1288.2, lot 1, located at 420 Route 440, Jersey City, New Jersey.

48. Nothing in this Consent Decree shall be construed or interpreted to waive any claim or defense any Party has asserted or may assert against any third party in the Consolidated Litigation except as explicitly stated herein.

49. This Consent Decree does not constitute an admission of liability on the part of any Party with respect to any claims, cross-claims, or counter-claims in the Consolidated Litigation.

## ARTICLE III: CHROMIUM REMEDIATION

### A. General Terms and Requirements

50. **Responsibility for Implementation of Chromium Remediation.** As between the Parties, Honeywell shall be responsible for and shall undertake remediation of COPR and chromium present in Study Area 6 South at Honeywell's sole cost and expense. Remediation of COPR and chromium present in Study Area 6 South shall be undertaken in accordance with the terms of this Consent Decree.

51. **Designation of Chromium Areas of Concern.** For the purposes of remediation, Study Area 6 South shall consist of two AOC's, designated as the Open Space AOC and the Development AOC as shown approximately on Exhibit A. The exact boundaries of the two AOC's shall be subject to further delineation during the design and implementation of the Chromium Remedy.

52. **Consistency of the Chromium Remedy with NJDEP Guidance and Remedial Action Work Plan.** The Chromium Remedy shall be consistent with the NJDEP Technical Requirements for Site Remediation, the Chromium Directive as issued by NJDEP on February 8, 2007 ("the NJDEP Chromium Directive"), and any Remedial Action Work Plan, including any modifications or addenda approved by NJDEP. Prior to submitting any Remedial Action Work Plan, Honeywell shall take all reasonable steps to ensure that the plan is consistent with the Chromium Remedy. However, this Consent Decree shall have precedence over any Remedial Action Work Plan in the event of any inconsistency. The approved Remedial Action Work Plan is a minimum standard, and the Chromium Remedy may be more protective than the remedy NJDEP approves.

53. **General Scope of the Chromium Remedy.** The Chromium Remedy shall address shallow groundwater and L-Well groundwater containing total chromium concentrations of 70 µg/l or greater and soil containing hexavalent chromium at concentrations of 20 mg/kg or greater within the top 20 feet of soil below the ground surface, and shall be consistent with the requirements set forth in this Article. The Chromium Remedy set forth in this Consent Decree addresses only the shallow and L-Well levels of groundwater (see paragraphs 69 - 72). The deep overburden and bedrock groundwater remediation, including source control, is addressed in the Deep Groundwater Consent Order.

54. **Development of a Schedule for the Chromium Remedy.** The Chromium Remedy shall be carried out diligently, and the development and implementation of any remedy required by NJDEP for non-chromium contamination shall not delay satisfaction of the milestones in the Schedule established pursuant to this paragraph. Within 90 days of entry of this Consent Decree, Honeywell shall propose a Master Schedule for the implementation of the Chromium Remedy .

(a) The Master Schedule shall incorporate the following dates:

(i) No later than August 15, 2008, Honeywell shall submit a Chromium Impacted Soils Pilot Test Work Plan to NJDEP and Riverkeeper;

(ii) No later than September 15, 2008, Honeywell shall complete field work in accordance with the RIWP Addendum;

(iii)No later than December 31, 2008, Honeywell shall submit an Initial Treatment Study Report and Remedial Action Work Plan pursuant to paragraph 86(c);

(iv) No later than July 31, 2012, Honeywell shall submit the soil and groundwater data from its 2010 and 2011 supplemental investigation of Site 163, a brief summary report, and

a designation of the boundaries of the Site 163 Development AOC to the Special Master pursuant to paragraph 86(c);

(v) No later than October 1, 2012, Honeywell shall submit an addendum to the Study Area 6 South 100% Design setting forth the 100% Design for the Site 163 Development AOC portion of the Study Area 6 South Chromium Remedy; and

(vi) Honeywell shall undertake, in good faith, to begin implementation of the Chromium Remedy by March 1, 2013.

(b) In addition, the Master Schedule shall propose deadlines for the following milestones:

(i) Submission of all documents subject to submission and review pursuant to paragraph 86(c);

(ii) Completion of those Site Preparation Activities necessary for the implementation of the Chromium Remedy;

(iii)Submission, following implementation of the soil components of the Chromium Remedy for the Development AOC, of the groundwater plans and reports required by paragraphs 70 and 72;

(iv)Completion of additional sampling for shallow groundwater delineation pursuant to paragraph 71 and a proposal for a remedy pursuant to paragraph 71, if needed;

(v) The submission of a 50% Design Report for the Chromium Remedy;

(vi) The submission of a 100% Design Report for the Chromium Remedy;

(vii) The date for completion of the installation of the Chromium Remedy;

(viii)Implementation of the long-term protections of the Open Space AOC established pursuant to paragraph 74; and

(ix) Transfer of the Open Space AOC to Jersey City pursuant to paragraph 74(a)(iii).

### B. Initial Chromium Remedy Steps: Delineation, Treatment Study, and Remedial Action Work Plan

55. **Delineation of Development AOC.** Honeywell shall conduct further soil sampling on Study Area 6 South in accordance with the RIWP Addendum. In addition to the locations set forth in the RIWP Addendum, Honeywell shall conduct further soil sampling pursuant to the provisions of the RIWP Addendum at the boring locations set forth in Exhibit E. Upon completion of the soil sampling required by this paragraph, Honeywell shall submit a Second Supplemental Remedial Investigation Report that sets forth the results of the sampling and Honeywell's proposal as to the delineation of the Development AOC. In conjunction with its proposal, Honeywell shall set forth its rationale as to whether prior sampling data should be included or excluded in the proposed delineation. The soil sampling and submission of a Second Supplemental Remedial Investigation Report shall be completed in accordance with the Schedule set forth in paragraph 54. Honeywell shall submit the Second Supplemental Remedial Investigation Report pursuant to paragraph 86(c). The Site 163 Development AOC shall be exempt from the requirements of paragraphs 55-58.

56. **Conduct of a Treatment Study in the Development AOC.** Honeywell shall conduct a field study of the efficacy of *in situ* treatment of 20 to 1000 Soils in accordance with the Chromium Impacted Soil Pilot Test Work Plan. The purpose of the pilot test shall be to evaluate whether *in situ* chemical treatment of 20 to 1000 Soils with one or more reductants can result in the permanent establishment of hexavalent chromium concentrations below 20 mg/kg under conditions in those areas of the Development AOC that may be subject to treatment as a remedy. Honeywell shall provide the raw data from the pilot test to NJDEP and Riverkeeper in scientifically useable electronic form as soon as the data become available. Honeywell shall

submit an Initial Treatment Study Report setting forth the initial results of the pilot test pursuant to paragraph 86(c) .

57. **Continued Monitoring of the Treatment Study.** As the result of the need to complete Study Area 7 remediation, to maintain Study Area 7 remediation support operations currently located on Study Area 6 South, and to conduct Site Preparation activities including the relocation of operating businesses on Study Area 6 South in advance of implementation of the Chromium Remedy, the Parties do not anticipate that implementation of field work for the Chromium Remedy will begin until March 1, 2013. Honeywell shall continue to monitor the performance of the pilot test and shall submit a Final Treatment Study Monitoring Report assessing the long term effectiveness of treatment for 20 to 1000 Soils in the Development AOC pursuant to paragraph 86(c) no later than December 31, 2011.

58. **Submission of a Remedial Action Work Plan.** On or before December 31, 2008, Honeywell shall submit a Remedial Action Work Plan for the Chromium Remedy pursuant to paragraph 86(c). The Remedial Action Work Plan shall be consistent with the Chromium Remedy set forth in this Consent Decree.

### C. Development AOC Soil Remedy

59. **Remedial Components.** In the Development AOC, soils containing hexavalent chromium at concentrations greater than 20 mg/kg shall be remediated as follows:

(a) Soils with a concentration greater than 1000 mg/kg shall be:

(i) Excavated and disposed of off-site at a waste disposal facility licensed to accept such waste; or

(ii) Treated *ex situ* and consolidated under the cap in the Open Space AOC provided the requirements of paragraphs 60 and 63 are satisfied and provided that such soils do not

require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a).

(b) 20 to 1000 Soils shall be:

(i) Excavated and consolidated within the Open Space AOC provided that such soils do not require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a); or

(ii) Excavated and disposed of off-site pursuant to the requirements of paragraph 59(a); or

(iii) Remediated pursuant to paragraphs 59(c) or 59(d) provided that such soils are also 20 to 240 soils and meet the requirements of paragraphs 59(c) or 59(d).

(c) 20 to 240 Soils may be remediated by excavation and consolidation within the Study Area 6 North AOC 1 Open Space Area, provided that such soils do not require venting of gases and shall not serve as the basis for the inclusion of gas venting as part of the Study Area 6 North AOC 1 Open Space Area remedy.

(d) 20 to 240 Soils within the Site 163 Development AOC may be remediated by *in situ* treatment, provided the requirements of paragraph 61 are satisfied.

60. **Treatment and Consolidation of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** *Ex situ* treatment and consolidation under the Open Space AOC cap may be used as a remedial component for soils containing greater than 1000 mg/kg hexavalent chromium provided that the requirements of this paragraph are satisfied:

(a) Honeywell demonstrates in the Final Treatment Study Monitoring Report that the proposed treatment will likely result in the reduction of the hexavalent chromium concentration of the treated soils such that the post-treatment total chromium concentration shown by Toxicity

Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C);

(b) Following a review of the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d), NJDEP agrees that Honeywell has made the demonstration required by paragraph 60(a).

(c) Plaintiffs have had an opportunity to review and comment on the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d)and pursuant to the Special Master review process set forth in paragraphs 86(e)-86(f); and

(d) Following review of the demonstration required by paragraph 60(a) pursuant to the Special Master review process set forth in paragraph 86(f), the Special Master issues a recommendation finding that Honeywell has made the demonstration required by paragraph 60(a) or the Court finds that Honeywell has made the demonstration required by paragraph 60(a) in the event that any Party seeks the Court's review of the Special Master's recommendations under this paragraph.

61. **Treatment as a Remedial Component for 20 to 240 Soils.** *In situ* treatment may be used as a remedial component for the 20 to 240 Soils in the Site 163 Development ACO, provided that such soils are 3 feet or more below ground surface and the requirements of this paragraph are satisfied:

(a) If Honeywell elects to treat *in situ* 20 to 240 Soils in the Site 163 Development AOC, Honeywell shall include in the 100% Design Addendum for Site 163 a plan for such treatment. Such treatment plan shall be comparable in detail and approach to the pipeline treatability plan which is Appendix F to the Study Area 6 North 100% Design. The goal of such *in situ* treatment

shall be to reduce hexavalent chromium soil concentrations to less than 20 mg/kg in soils 20 feet or less below ground surface;

(b) Three years after conducting the treatment set forth in subparagraph (a), Honeywell shall collect additional soil samples in the treated areas to evaluate the success of the treatment. These soil samples shall be analyzed for EH, pH, hexavalent chromium (using EPA/NJDEP Methods 3060A/7199), and sulfides (using EPA Method 9030B). Within 60 days of its receipt of the final data from such sampling, Honeywell shall submit a report with such data to the Special Master pursuant to paragraph 86(c);

(c) In the event that the sampling pursuant to subparagraph (b) shows that soils with greater than 20 mg/kg hexavalent chromium remain or that excess treatment reductant remains present, Honeywell may elect to pursue one or more of the following approaches after providing notice to the Special Master, Riverkeeper and the Jersey City Entities;

(i) In the case of excess treatment reductant remaining in the soil, continue to monitor such areas pursuant to subparagraph (b) until the excess reductant is no longer present;

(ii) In the case of soils with greater than 20 mg/kg hexavalent chromium:

(1) Excavate such soils and consolidate them under the cap in the Open Space AOC, consolidate them under the cap in the Study Area 6 North AOC 1 Open Space Area, and/or dispose of them off-site provided that in each instance the applicable requirements of paragraph 59 are satisfied;

(2) Conduct further *in situ* treatment using additional treatment reductant and submit a monitoring plan pursuant to paragraph 64; or

(3) In the event that the soils are within the areas depicted as River Front Park, Riverfront Drive or Kellogg Street on page 39 of the Redevelopment Plan, cover the affected

soils with a road, walkway, and/or other hardscape and restrict the use of that area through each of the following institutional controls:

(a) Issuance and recording of a conservation restriction comparable to that required under paragraphs 74(b) and 74(d);

(b) Transfer of title to that area to Jersey City pursuant to paragraphs 74(a)(iii) through 74(a)(iv)(2); and

(c) Issuance and recording of a deed notice comparable to that required under paragraphs 74(c) and 74(d).

62. **Submissions Related to Site 163.** Pursuant to the Schedule, Honeywell shall prepare and submit the following with regard to Site 163:

(a) A summary report of all chromium soil and groundwater data collected during site investigations in 2010 and 2011; and

(b) An addendum incorporating Site 163 into the 100% Design.

63. **Post-Treatment Analysis of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** In the event that *ex situ* treatment is used as a final remedy for any portion of the soils containing greater than 1000 mg/kg pursuant to paragraph 59(a)(ii), Honeywell shall conduct post-treatment analysis of each treated batch of soil to demonstrate that the treatment has resulted in the reduction of the hexavalent chromium concentration such that the post-treatment total chromium concentration shown by Toxicity Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C). Such monitoring and demonstration shall be made prior to consolidation of the treated soils under the Open Space AOC cap pursuant to paragraph 59(a)(ii). In the event that Honeywell fails to make the demonstration required by this paragraph,

Honeywell shall dispose of the soils off-site at a waste disposal facility licensed to accept such waste.

64. **Post-Treatment Monitoring for 20 to 1000 Soils.** In the event that *in situ* treatment is used as a final remedy for any portion of the 20 to 1000 Soils, Honeywell shall conduct post-treatment monitoring to demonstrate that the treatment has resulted in permanent hexavalent chromium concentrations of less than 20 mg/kg in the treated area. Honeywell shall propose a program of post-treatment monitoring in a document that is submitted pursuant to paragraph 86(c). In the event that Honeywell fails to make the demonstration required by this paragraph, Honeywell shall propose further remedial actions pursuant to paragraph 59 in a document that is submitted pursuant to paragraph 86(c).

**D. Open Space AOC Components of the Chromium Remedy**

65. **Open Space AOC Soil Remedy.** In the Open Space AOC, the soil remedy shall consist of an engineered RCRA cap to isolate contaminated soils with gas venting, if necessary, to address the generation of methane and other naturally occurring gases in the Stratum O and/or Stratum D in the Open Space AOC. Soils consolidated under the cap, pursuant to paragraph 59(b)(i), shall not require gas venting and shall not be the basis for the inclusion of gas venting as a component of the cap. The cap shall be designed and constructed so that:

(a) The cap shall consist of a gas collection system, if gas venting is necessary, a base protective layer, an impervious geomembrane liner with a minimum thickness of 40 mil; a geocomposite drainage layer; a filter fabric; and a distinctive colored warning layer with markings in English and Spanish that would deter penetration of the cap in the event that digging occurred in the vicinity of the cap;

(b) All utilities, including those supporting the pump-and-treat system for groundwater remediation, with the exception of any extraction wells or collection trenches, shall be placed above the cap (but may be below the ground surface and/or contained within utility corridors). In the event that above-cap-grade gas collection and treatment is selected or is needed to meet current or future regulatory requirements, such collection and treatment facilities are prohibited in the Open Space AOC, except for piping to connect the sub-liner collection system with the treatment facilities; and

(c) Exclusive of roadways, the cap shall be overlain by layers of clean fill, backfill and/or overburden with an average depth of at least three feet and a minimum depth of at least two feet provided that any layer that incorporates overburden shall be below at least two feet of clean fill. Any clean fill or backfill soil brought to the Site will either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master. One foot of clean fill, covered with bituminous blacktop, shall be sufficient cover where roads, walkways, or other paved surfaces are located within the Open Space AOC. All clean soil fill in areas that will not involve paved roads, walkways, or other paved surfaces shall be vegetated in such a manner as to protect and maintain the required depth of the clean soil fill and to ensure that such vegetation shall not cause any interference with or penetration of the cap.

(d) The existing overburden soils in the Open Space AOC shall first be stripped off and set aside for use. If hexavalent chromium concentrations in the overburden exceed 20 mg/kg, the overburden shall be placed under the cap. If hexavalent chromium concentrations in the overburden do not exceed 20 mg/kg, the overburden may be placed above the cap but below the

two feet of clean fill required by paragraph 65(c). Excavated 20 to 1000 Soils from the Development AOC shall be placed and spread in the Open Space AOC under the cap. Both the chromium impacted soils and the previously stripped overburden shall be suitably compacted according to design specifications. Debris, to the extent it would interfere with the compaction specification requirements of the 100% Design, shall not be placed under the cap. The engineered cap shall be installed over the chromium-impacted soils exceeding 20 mg/kg hexavalent chromium.

**E. Demolition, Grading, and Backfill Requirements**

66. **Demolition and Grading Activities.** During demolition and grading activities, adequate protective measures shall be taken to protect site workers and the community from airborne dusts and exposures to contaminated soils.

67. **Backfill Requirements.** Soils excavated from the Development AOC shall be replaced with backfill soil. Any backfill soil brought to the Site shall either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master.

68. **Vegetation of Clean Fill.** All clean soil fill in areas that will not involve paved roads, sidewalks, paths, walkways, or building structures shall be vegetated in such a manner to protect and maintain the required depth of clean soil fill.

**F. Groundwater Components of the Chromium Remedy**

69. **Shallow Groundwater Remedy for the Open Space AOC.** The Open Space AOC shallow groundwater remedy shall consist of hydraulic barriers with a pump-and-treat system designed to isolate shallow groundwater and to intercept and treat shallow groundwater flowing

above the meadow mat in the Open Space AOC to the extent that such groundwater contains total chromium in concentrations in excess of 70 µg/l. The shallow groundwater remedy shall consist of the following:

(a) The existing soil/cement/bentonite wall on the boundary of Study Area 6 South and Study Area 7 shall be incorporated into the other engineering controls;

(b) Subterranean slurry walls or other hydraulic barriers shall be installed along the southern, eastern and western sides of the Open Space AOC and keyed into the meadow mat or Stratum O or to comparable depths below ground surface;

(c) A groundwater extraction system shall be established that shall consist of (i) one or more shallow extraction wells, sumps, or french drains within the Open Space AOC; (ii) pumps; and (iii) underground piping to convey any extracted water to Honeywell's Treatment Plant;

(d) The capture zone for the shallow groundwater remedy shall include at least the entire area of contaminated shallow groundwater within the Open Space AOC;

(e) A plan for control of water levels shall be developed;

(f) In the event that underground structures are demolished, the plans shall address the need for special attention for structures that extend below the meadow mat in order to control needed water levels; and

(g) Honeywell shall submit such information as is required to allow NJDEP to establish a classification exception area for groundwater at the Site, in accordance with NJDEP regulations.

70. **The Shallow Groundwater Remedy for the Development AOC.** Following implementation of the Development AOC soil components of the Chromium Remedy, Honeywell shall submit a report to (a) determine whether shallow groundwater remaining in the

Development AOC exceeds 70 µg/l total chromium and, (b) if so, evaluate the need for further remedial measures to address any such shallow groundwater remaining in the Development AOC with total chromium concentrations in excess of 70 µg/l. This evaluation shall be subject to review and comment by the Parties and approval by the Special Master.

(a) In the event that the evaluation demonstrates that further remedial measures are necessary, Honeywell shall propose such measures subject to review and comment by the Parties and approval by the Special Master;

(b) The capture zone of any remedy shall include at least the entire area of contaminated shallow groundwater except for shallow groundwater that is captured and subject to the shallow groundwater remedy for the Open Space AOC pursuant to paragraph 69;

(c) In the event that a pump-and-treat system is selected as a contingency measure for shallow groundwater in the Development AOC, all infrastructure for the pump-and-treat contingency system that is needed to ensure that the contingency system is fully operational, as required by paragraph 70(d), shall be installed prior to or in conjunction to any development of the Site. This includes at least one shallow extraction well, sump, or french drain, and the piping to convey any extracted groundwater to Honeywell's water treatment plant;

(d) If it is determined that the pump-and-treat contingency system must be activated, the pump-and-treat system shall be operational no later than six months after the date of the determination.

71. **Off-Site Shallow Groundwater Remedy.** Honeywell shall propose additional sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site. Honeywell shall submit a report of the results of such sampling and, in the event that contaminated shallow groundwater is found to extend off-site, a proposal for a remedy based on

such results. The report and the proposal for a remedy shall be subject to review and comment by the Parties and approval by the Special Master.

72. **L-Well Groundwater Remedy.** At the time this Decree is entered, the L-Well Groundwater is contained and not contributing to further contamination of surrounding waters and/or soils. However, in order to verify that this status continues following implementation of the Chromium Remedy, including any groundwater remedial measures pursuant to paragraphs 70 and 71, Honeywell shall propose a plan for one round of monitoring designed to evaluate whether the L-Well Groundwater remains contained. The plan shall include monitoring for total and hexavalent chromium and major ion chemistry to determine whether there has been movement in the L-Well Groundwater.

(a) In the event that no substantial change is detected in the major ion chemistry, no further action is required unless paragraph 72(c) is applicable.

(b) In the event that substantial changes are detected in the major ion chemistry, Honeywell shall propose a plan for further monitoring of the L-Well Groundwater. Such a plan shall be subject to review and comment by the Parties and approval by the Special Master.

(c) In the event that the initial monitoring or monitoring conducted pursuant to paragraph 72(b) demonstrates that proximate waters have total chromium concentrations in excess of 70 µg/l, regardless of whether there is a change in the major ion chemistry, Honeywell shall propose a remediation plan for the L-Well Groundwater. Such remediation plan shall be subject to review and comment by the Parties and approval by the Special Master.

### G. Permits and Authorizations

73. **Permits and Authorizations.** Honeywell shall obtain all necessary federal, state, and local permits and authorizations to carry out the Chromium Remedy as set forth in this Article.

## H. Long-Term Monitoring, Maintenance, and Protection of Engineering and Institutional Controls

74. **Protection of the Open Space AOC.** Except as provided in paragraphs 74(j) and 74(k), development in the Open Space AOC shall be prohibited. The Open Space AOC shall be protected against activities that may jeopardize the integrity of the cap and/or the groundwater remedial measures that shall be installed in the Open Space AOC pursuant to the Chromium Remedy or that may impede the long-term monitoring and maintenance of the cap and/or groundwater remedial measures. It is the intention of the Parties to implement different layers of protection, which alone or in concert, impose restrictions on development, run with the land, and survive all parties. Accordingly, the following actions shall be taken pursuant to the Schedule provided in paragraph 54:

(a) **Ownership of and Access to the Open Space AOC.** Ownership of and access to the Open Space AOC shall be in accordance with the following:

(i) Bayfront Redevelopment LLC, as the current owner in fee simple absolute of all property that comprises the Open Space AOC, shall not convey any rights or interests in any parcel that comprises the Open Space AOC property except as provided in this Decree. Within 90 days of entry of this decree, Bayfront Redevelopment LLC shall give Jersey City an option to buy all of the Open Space AOC property prior to the planned transfer pursuant to paragraph 74(a)(iii). Such option to buy shall be subject to the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall exercise the option to buy the Open Space AOC in the event that the conditions allowing for withdrawal of funds from the financial assurance mechanisms under paragraphs 98(c) or 98(d) are met;

(ii) Within 90 days of the entry of this Consent Decree, Bayfront Redevelopment LLC shall grant a conservation restriction for the Open Space AOC pursuant to the requirements of paragraph 74(b);

(iii) Upon the final construction of all roads and utility corridors within the Open Space AOC, Bayfront Development LLC shall donate good and marketable title to all the land comprising the Open Space AOC to Jersey City. In conjunction with such donation, Bayfront Redevelopment LLC shall petition to subdivide the properties within Study Area 6 South to create a new parcel(s) comprising the Open Space AOC. At the time of the donation, Jersey City shall grant Honeywell an easement for the purpose of monitoring and maintaining the Chromium Remedy. Jersey City shall also grant Honeywell all necessary access to the Open Space AOC by license or such other mechanisms as may be appropriate for purposes of monitoring and maintaining the Chromium Remedy. After it acquires title pursuant to this paragraph, Jersey City shall retain ownership of the Open Space AOC unless and until it shall have complied with the requirements of paragraph 74(a)(iv);

(iv)After it acquires title pursuant to this paragraph, Jersey City shall not convey or enter into any lease of the Open Space AOC to any other person or entity unless it has first satisfied either of the following conditions:

(1) Jersey City has obtained the Special Master's (or if the Special Master's appointment has expired, the Court's) approval to convey the Open Space AOC to a government entity that has the capacity and willingness to fulfill Jersey City's obligations under the Consent Decree with respect to the Open Space AOC and such entity agrees to submit to the Court's jurisdiction and to be bound by the requirements of the Consent Decree that Jersey City has committed to fulfill with respect to protection of the Open Space AOC pursuant to this paragraph

and routine maintenance of the permissible development in the Open Space AOC pursuant to paragraph 78(d); or

(2) The Open Space AOC has been remediated such that no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive, and Jersey City has demonstrated to the Special Master and/or the Court, as appropriate, that such remediation has been completed in accordance with all applicable requirements.

(b) **Conservation Restriction.** Prior to the grant of the option to buy pursuant to paragraph 74(a)(i), Bayfront Redevelopment LLC shall grant an open space conservation restriction, pursuant to N.J.S.A. 13:8-B-1, *et seq.*, over the Open Space AOC substantially in the form set forth in Exhibit C. Exhibit C is a conservation restriction that is consistent with the terms of this paragraph and this Consent Decree. The conservation restriction shall allow for the implementation, maintenance, monitoring, repair and replacement of the Chromium Remedy and development consistent with paragraphs 74(j) and 74(k), including the construction and placement of roads and utilities. The Conservation Restriction shall also allow for current uses of the Open Space AOC to continue until such time as construction of the Chromium Remedy begins. The Hackensack River Watershed Land Trust shall be the primary holder of the conservation restriction, with all rights of monitoring and enforcement. Riverkeeper shall propose an entity to serve as the secondary holder of the conservation restriction subject to comment by the Parties and review by the Special Master. The secondary holder shall have secondary rights of monitoring and enforcement.

(i) The conservation restriction shall be incorporated into this Consent Decree and made part of this Consent Decree. The final, executed conservation restriction shall be lodged with the Court and entered as an order of the Court. The conservation restriction shall be enforceable in this Court, in the same manner as this Consent Decree.

(ii) The conservation restrictions provided under this Consent Decree shall be consistent with the prohibited and permitted development of the Open Space AOC as set forth in paragraphs 74(j) and 74(k) below.

(iii) Jersey City shall not take any action, whether through exercise of any power of eminent domain, application to the State of New Jersey for approval of a diversion of public park or recreation land, legal challenge to the validity or enforceability of the conservation restriction, or otherwise, the effect of which would be to in any way terminate, abrogate, or diminish the terms, conditions, or purposes of the conservation restriction. If, notwithstanding the preceding sentence, Jersey City proceeds with a condemnation or other action, the result of which would be to terminate, abrogate, or otherwise diminish the terms, conditions, or purposes of the conservation restriction, Jersey City shall, before taking any such action satisfy all of the conditions set forth in paragraph 74(a)(iv)(2).

(iv) Notwithstanding the foregoing, the conservation restriction may be terminated upon application of any Party when no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive.

(c) **Deed Notice.** Upon completion of the Chromium Remedy, the Open Space AOC shall be subjected to the deed notice substantially in the form set forth in Exhibit D that restricts

future activities on the Open Space AOC. Nothing in the deed notice shall be construed as preventing the imposition of more stringent restrictions on the development allowed in the Open Space AOC pursuant to this paragraph and, in particular, the conservation restriction provided for in paragraph 74(b).

(d) **Recording of the Consent Decree, Conservation Restriction, and Deed Notice.** This Consent Decree, the conservation restriction imposed pursuant to paragraph 74(b), and the deed notice imposed pursuant to paragraph 74(c) shall be recorded, pursuant to N.J.S.A. §§ 46:15-1.1, 46:16-1.1, and 46:16-2, in the office of the Hudson County Register and a conspicuous reference to the Consent Decree, conservation restriction, and deed notice shall be included in all instruments concerning title to the Open Space AOC. Any Party shall have the right, periodically, but no more than once every 25 years, to record memoranda or other instruments that reference, incorporate, or attach this Consent Decree, the conservation restriction, the deed notice, and/or any further orders of the Court related to the Open Space AOC in the real estate records related to the Open Space AOC.

(e) **Zoning.** Pursuant to the Redevelopment Plan, the Open Space AOC is designated for open space and park. Jersey City shall not amend or change this designation unless it first satisfies the requirements of paragraph 74(a)(iv)(2).

(f) **Recreation and Open Space Inventory.** Upon acquiring fee simple absolute title to the Open Space AOC, Jersey City shall add those portions of the Open Space AOC not covered by roads, the pedestrian thoroughfare, and utility corridors adjacent to roads onto its Green Acres Program Recreation and Open Space Inventory ("ROSI") pursuant to N.J.A.C. § 7:36 and shall specify in such listing that it is subject to (i) Honeywell's prior easement to monitor, maintain, repair, and replace the Chromium Remedy; (ii) the actions necessary to implement, monitor,

maintain, repair, and replace the Chromium Remedy; (iii) the actions necessary to install any development permissible under paragraphs 74(j) and 74(k); and (iv) the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall also take all steps necessary or appropriate to notify the New Jersey Green Acres Program that such portions of the Open Space AOC have been added to its ROSI, such that those portions of the Open Space AOC shall thereafter be subject to all procedural and regulatory requirements applicable under the Green Acres Program, including prohibitions against diversion.

(g) **Eminent Domain.** If all or part of the Open Space AOC is taken in exercise of the power of eminent domain, or acquired by purchase in lieu of condemnation, by any public, corporate, or other authority so as to terminate, abrogate, or limit the restrictions created by this Consent Decree or the conservation restriction imposed pursuant to paragraph 74(b), in whole or in part, any Party may take appropriate actions to challenge such taking if there is a reasonable legal basis for doing so. In the event that the Parties are unable to prevent a taking notwithstanding their reasonable and appropriate efforts, any Party may take appropriate actions to recover the full value of the interests in the Open Space AOC subject to the taking or in lieu purchase, and all direct and incidental damages, costs, and fees occasioned thereby.

(h) **Environmental Covenant.** In the event that New Jersey enacts the Uniform Environmental Covenants Act or its substantial equivalent, the Parties shall address the issue of whether an environmental covenant shall be established for the Open Space AOC under the statute. If the Parties are unable to reach agreement on establishment of an environmental covenant, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of an environmental covenant if it would provide substantial additional protection for the Open Space AOC without

unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(i) **Future Protections.** Any Party shall have the right to propose consideration of additional or substitute protections for the Open Space AOC. If the Parties are unable to reach agreement with regard to the proposal, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of additional or substitute protections for the Open Space AOC if they would provide substantial additional protection for the Open Space AOC without unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(j) **Prohibited Development in Open Space AOC.** Only development satisfying the requirements of this paragraph and paragraph 74(k) shall be permitted in the Open Space AOC. All other development in the Open Space AOC shall be prohibited.

(i) Honeywell shall establish Open Space Design Standards that shall govern all development in the Open Space AOC regardless of when the construction or installation of permissible development occurs. The Open Space Design Standards shall satisfy each of the requirements set forth in paragraph 74(j)(v) and shall set forth the requirements for development that are necessary for the protection of the integrity of the Chromium Remedy.

(ii) The Initial Development in the Open Space AOC shall be the development undertaken following the completion of the Chromium Remedy in the Open Space AOC. The Initial Development may occur in one or more phases. Honeywell and Bayfront

Redevelopment LLC shall prepare a Development Plan before the initiation of each phase of the Initial Development. The Initial Development Period for each phase shall consist of the period covered by the Initial Development, plus a period of 10 years following the submission of the as-built documentation for the phase pursuant to paragraph 74(j)(viii).

(iii) The Special Master shall have jurisdiction to review the Open Space Design Standards and the Development Plan(s) solely for the purpose of ensuring that any development undertaken during the Initial Development Period is consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy. The Special Master's jurisdiction with regard to development in the Open Space AOC shall run through the Initial Development Period for each phase.

(iv) Honeywell shall ensure that the requirements of this paragraph and paragraph 74(k) are satisfied with regard to any development undertaken within the Initial Development Period. Honeywell shall also ensure that any development undertaken within the Initial Development Period is designed and installed in a manner consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy.

(v) Any development undertaken in the Open Space AOC, regardless of when undertaken, shall satisfy each of the following requirements:

(1) It shall not jeopardize the integrity of the Chromium Remedy;

(2) It shall be limited to the types of development permitted under paragraph 74(k);

(3) It shall be consistent with this Consent Decree, including the conservation restriction imposed pursuant to paragraph 74(b), and the Redevelopment Plan; however, in the

event of any conflict or inconsistency between this Decree and the Redevelopment Plan, this Decree shall govern;

(4) In total, at least 75% of the Open Space AOC, exclusive of the acreage used for roads and the pedestrian thoroughfare, shall be comprised of landscaping, as defined by paragraph 74(k)(xi);

(5) The portion of the Open Space Design Standards necessary for protection of the Chromium Remedy as related to all roads, the pedestrian thoroughfare and associated utility corridors as well as the general location of such items shall be included in the 100% Design of the Chromium Remedy;

(6) If the lowest elevation for the bedding for any utility line, including irrigation or sprinkler lines, is two feet from the top of the warning layer of the cap, the utility line shall be placed in a utility corridor;

(7) In any event, there shall be two feet of soil or more between the warning layer of the cap and the lowest elevation of the bedding for any irrigation or sprinkler lines; and

(8) No permanent concession facilities shall be permitted.

(vi) Honeywell shall submit the Open Space Design Standards and the Development Plan(s) for any development undertaken during the Initial Development Period pursuant to the requirements of paragraph 86(c), except that such documents need not be submitted to NJDEP. Following Honeywell's submission of such documents, the procedures of paragraphs 86(e) and 86(f) shall apply, except that the Special Master need not provide notice to NJDEP.

(vii) During the Initial Development Period, any development in the Open Space AOC shall require the preparation and submission of a Development Plan pursuant to

paragraph 74(j)(vi) and such Development Plan shall be subject to review by the Special Master pursuant to paragraph 74(j)(iii).

(viii) Upon completion of each phase of the Initial Development, Honeywell shall provide as-built documentation for the Initial Development to the Special Master, Riverkeeper, and Jersey City. Upon completion of any further development during the Initial Development Period for the phase, Honeywell shall also provide as-built documentation to the Special Master, Riverkeeper, and Jersey City for the additional development. Such additional as-built documentation for a phase shall not affect the running of the Initial Development Period for the phase.

(ix)During the Initial Development Period, replacement in-kind of development features or facilities included in the Initial Development or minor modifications to the development features or facilities included in the Initial Development shall not require the preparation of a Development Plan or be subject to review by the Special Master, provided that such replacement or modification satisfies the requirements of the Open Space Design Standards, the applicable Development Plan, and paragraphs 74(j)(v) and 74(j)(x)(3)(notice requirement).

(x) After the Initial Development Period, all development is prohibited unless one of the following conditions is met:

(1) Jersey City satisfies the conditions set forth in paragraph 74(a)(iv)(2);

(2) The development is a replacement in-kind and such replacement is made in conformance with the specifications of the Open Space Design Standards, the applicable Development Plan, and paragraph 74(j)(v); or

(3) The development meets the requirements of paragraphs 74(j)(v) and 74(j)(xi), and Jersey City provides notice of its intention to alter or add to the development undertaken in the Initial Development Period. Such notice shall be provided in writing to Honeywell, Riverkeeper, and the holders of the conservation restriction established pursuant to paragraph 74(b) at least 30 days prior to Jersey City's alteration or addition to development undertaken in the Initial Development Period. Honeywell, Riverkeeper, or any holder of the conservation restriction shall have the right to move the Court to prohibit such alteration or addition.

(xi) If any of the development features or facilities that Jersey City seeks to add pursuant to paragraph 74(j)(x) require utilities that would require utility corridors other than the utility corridors installed during the Initial Development Period, Jersey City shall obtain approval from the Court before installing such new utility corridors.

(xii) Jersey City shall provide Honeywell, Riverkeeper, and the holder(s) of the conservation restriction established pursuant to paragraph 74(b) with an annual report that describes any alterations or additions, including those activities under paragraph 74(j)(x)(2), to the development undertaken during the Initial Development Period.

(xiii) All development features or facilities, whether included in the Initial Development or added subsequent thereto, are subject to demolition and/or removal to the extent necessary to maintain, replace, or repair the Chromium Remedy.

(k) **Permissible Development in the Open Space AOC.** The Initial Development or any subsequent addition or alteration thereto may include any or all of the following types of development features or facilities, provided that such development features or facilities satisfy the conditions set forth in paragraph 74(j)(v):

(i) Roads and the pedestrian thoroughfare -- both crossing and running along the Open Space AOC, but no more extensive than provided for in the diagram on page 39 of the Redevelopment Plan;

(ii) Curbing and fences;

(iii) Sidewalks, paths, walkways, and nature trails;

(iv) Utilities and utility corridors, lighting, and restrooms;

(v) Irrigation or sprinkler components or systems;

(vi) Water features;

(vii) Above-ground storm water cisterns;

(viii) Signs, including the signs or display required by paragraph 74(l);

(ix) Benches, trash receptacles, and bicycle racks;

(x) Recreational facilities, such as playground equipment, bocce ball courts, tennis courts, basketball courts, and athletic fields; and

(xi) Landscaping, including natural grasses, small trees, shrubbery, flowers, and potted plants, provided that such landscaping and the anticipated root structure of each landscaping component do not and will not jeopardize the integrity of the Chromium Remedy. Any portion of an athletic field that is covered in natural grass shall be considered landscaping for purposes of the percentage set forth in paragraph 74(j)(v)(4).

(l) **Signs or Displays.** Honeywell shall develop a permanent plan for informing visitors to the Open Space AOC of the history of the chromium production, contamination, and its remediation. Such plan shall provide for appropriate signs or displays that communicate this information. Such plan shall be subject to review and comment by the Parties and approval by the Special Master.

75. **Honeywell's Ongoing Responsibility.** Honeywell shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy in perpetuity. Honeywell shall satisfy this responsibility through establishment and implementation of a Long-Term Monitoring Plan. In the event that Honeywell ceases to exist without a successor-in-interest or its obligations under this Consent Decree are stayed or limited due to a bankruptcy petition, the Court shall appoint an independent third-party fiduciary who shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy pursuant to the requirements of this Consent Decree and the Long-Term Monitoring Plan, unless Jersey City volunteers to assume these responsibilities for the Chromium Remedy.

76. **Long-Term Monitoring Plan.** In consultation with the Parties, and subject to approval by the Special Master and NJDEP, Honeywell shall develop a Long-Term Monitoring Plan to ensure the ongoing effectiveness of the Chromium Remedy to meet the objectives set forth in paragraphs 65, 69, 68, 69, 72, and 77. The Long-Term Monitoring Plan shall be consistent with the applicable EPA policies and guidance, including, among others, EPA's Comprehensive Five Year Review Guidance (2001) (or any subsequent revision) and with NJDEP's Technical Requirements for Site Remediation (or any subsequent revision).

77. **Long-Term Monitoring Plan Objectives.** Honeywell shall design the Long-Term Monitoring Plan to satisfy each of the following objectives:

(a) Provide monitoring to ensure that the integrity and effectiveness of the Chromium Remedy are maintained; and

(b) Provide monitoring to ensure that the restrictions of the institutional controls are being satisfied, including the prohibition on development in the Open Space AOC.

78. **Monitoring and Remediation Under the Long-Term Monitoring Plan.** The Long-Term Monitoring Plan shall include the monitoring and remediation activities set forth in this paragraph and other monitoring and remediation activities, if necessary, to meet the objectives of paragraph 77. Honeywell shall provide Riverkeeper, the Special Master, and NJDEP with annual reports on activities conducted under the Long-Term Monitoring Plan.

(a) **Monitoring Activities in the Long-Term Monitoring Plan.** Honeywell shall undertake the following monitoring activities at intervals to be specified in the Long-Term Monitoring Plan, but no less frequently than set forth below, and, if the monitoring shows it is necessary, Honeywell shall also undertake the remediation activities as set forth below:

(i) Quarterly visual inspection monitoring of the Open Space AOC to ensure that it is not being put to any use that is inconsistent with paragraphs 74(j) and 74(k) or any use that may compromise the integrity of the Chromium Remedy. The Long-Term Monitoring Plan shall include an inventory of the prohibited and permissible uses pursuant to paragraph 74 and a corresponding checklist to be used by the individuals conducting the monitoring. If Honeywell determines that the Open Space AOC is being used in a manner inconsistent with the protections or the integrity and effectiveness of the Chromium Remedy, Honeywell shall act as soon as possible to cause such use to cease and, if there has been damage to the Chromium Remedy, to repair or replace it to original specifications or to a level of protection equivalent to the original Chromium Remedy;

(ii) Quarterly visual inspection monitoring of the Open Space AOC grade and slope to identify whether erosion has occurred or is occurring. Honeywell shall remediate any significant erosion.

(iii)Quarterly visual inspection monitoring to determine whether noticeable differential settlement or subsidence has occurred or is occurring in the Open Space AOC such that the integrity of the Chromium Remedy may be materially impaired. If evidence of differential settlement or subsidence is found, Honeywell shall propose further investigative measures. Honeywell shall remediate any differential settlement or subsidence that is beyond the degree of differential settlement/subsidence allowed for in the 100% Design and repair the cap and/or the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(iv)A baseline topographic survey at the completion of the Chromium Remedy and three additional surveys conducted at five-year intervals beginning five years after the conduct of the baseline survey. The topographic survey shall be of sufficient precision and accuracy to present the results as one-foot contours;

(v) Quarterly visual inspection monitoring to determine whether the Chromium Remedy in the Open Space AOC has been disturbed. Any evidence of the distinctive warning layer materials or any other cap materials as described in paragraph 65(a) at the surface is an indication that the cap has been disturbed. In such an event, Honeywell shall propose further investigative measures to evaluate whether the integrity of the cap has been compromised. In the event that the investigative measures show that the cap integrity has been compromised, Honeywell shall repair or replace the cap and the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vi) Quarterly visual inspection monitoring to ensure that burrowing animals are not materially impairing the integrity of the Chromium Remedy. If evidence of burrowing animals is found, Honeywell shall follow humane removal procedures and repair or replace the cap and

the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vii) Quarterly visual inspection monitoring of the vegetative cover in the Open Space AOC to ensure that vegetative cover is in conformance with the landscaping provisions of the 100% Design and the Redevelopment Plan and will not materially impair the integrity of the Chromium Remedy. Maintenance of the vegetative cover shall include, at a minimum, mowing to ensure that tree species cannot become established and removal of any other vegetation with the potential to damage the Chromium Remedy;

(viii)Quarterly groundwater monitoring to ensure that groundwater levels are maintained in accordance with the requirement to maintain an outward gradient from Study Area 7 and in accordance with the water level control plan developed pursuant to paragraph 69(e);

(ix) Monitoring of vented gases and the gas venting system to ensure proper operation of the system, to evaluate any degradation of the system, to assess the need for treatment of vented gases, either initial, subsequent, or further depending on whether treatment has been previously provided, and to detect any condition that might endanger public health or safety. Such monitoring shall be conducted on a monthly basis for at least one year and, if the readings are stable, such monitoring may be conducted thereafter on a quarterly basis; and

(x) Any additional monitoring as required by specific details added in the design phase of the Open Space AOC.

(b) **Procedures for Proposing Changes to the Long-Term Monitoring Plan.** Any Party may, from time to time, propose changes to the scope of the monitoring activities under the Long-Term Monitoring Plan. If the Parties agree, the Long-Monitoring Plan shall be so changed

subject to approval by NJDEP and by the Special Master, if his appointment has not terminated, or otherwise, by the Court. If the Parties are unable to reach agreement over alterations to the monitoring and the Special Master's appointment has not terminated under this Consent Decree, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation. In the event that the dispute arises after the Special Master's appointment has terminated, any Party may file a motion seeking a resolution of the dispute by the Court.

(c) **Contingency Plan**. As part of the Long-Term Monitoring Plan, Honeywell shall develop a contingency plan to ensure the integrity of the remediation in the event of any planned penetration of the cap or otherwise planned activity that compromises the cap or any unplanned event or accident that penetrates the cap or otherwise compromises the integrity of the Chromium Remedy. The contingency plan shall include, at a minimum, an annually updated plan to notify the relevant persons, including the Special Master, NJDEP, and the Parties, of (i) the event penetrating the cap, compromising the cap, or compromising the integrity of the Chromium Remedy; (ii) the general steps to be taken to identify the extent of the problem; and (iii) the standards for remedying the problem.

(d) **Routine Maintenance**. The title owner of the Open Space AOC shall conduct maintenance of the Open Space AOC features or facilities that are permissible under paragraphs 74(j) and 74(k). The maintenance workers shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. The training shall include the identification and reporting of any uses or features that are not permissible in the Open Space AOC or that may jeopardize the integrity of the Chromium Remedy. Honeywell shall provide all training materials. The title owner of Open Space AOC shall annually provide to the other Parties and

the Special Master a report describing the training which has been provided to its maintenance workers. The title owner of the Open Space AOC shall also provide to the Parties and the Special Master notice of any violations of the restrictions relating to the Open Space AOC identified by its workers during routine maintenance.

(e) **Recordkeeping**. Honeywell shall maintain written logs or other records of those monitoring and remediation activities undertaken pursuant to the Long-Term Monitoring Plan. Such logs shall be provided to Riverkeeper on a quarterly basis.

79. **Monitoring and Reporting to Riverkeeper.** Riverkeeper shall be provided with all documents submitted to NJDEP and/or the Special Master with respect to the Chromium Remedy, including the documents identified in paragraph 86(c).

80. **Notice to Stakeholders.** All residents, regardless of whether they are owners or lessees, and all commercial tenants on Study Areas 6 and 7 are hereby deemed stakeholders. Honeywell shall ensure that all stakeholders shall be provided at the time of their purchase or lease with notice of the contamination, the remedial actions that have been undertaken or are planned, and the importance of reporting activities that may appear to jeopardize the integrity of the engineering controls. Notice shall be accomplished in the following manner:

(a) Bold or otherwise conspicuous language on the first page of the deed provided to all purchasers in the Residential Area;

(b) A summary notice of the Chromium Remedy which:

(i) Has been subject to review and comment by the Parties and approval by the Special Master; and

(ii) Provides a reference to public websites and libraries and/or the future equivalents thereof, where the following can be found:

(1) Zoning and other Jersey City maps showing the Open Space AOC; and

(2) Documents describing the contamination and the remediation, including:

(a) This Consent Decree;

(b) The Remedial Investigation Report and the Final Remedial Action Report,

(c) The annual reports on long-term monitoring and maintenance and repair activities as required by paragraph 78 and annual reports on changes to the Initial Development as required by paragraph 74(j)(xii); and

(d) The Long-Term Monitoring Plan.

(c) The public provision of the maps and documents referred to in paragraph 80(b)(ii) via websites and libraries and/or the future equivalents thereof; and

(d) Notices to lessees and commercial tenants in all lease documents.

81. **Annual Letter to Riverkeeper on Notice to Stakeholders.** Each year beginning one year after the issuance of the first notice in a deed or lease pursuant to paragraph 80, Honeywell shall provide a letter to the Riverkeeper documenting its compliance with paragraph 80.

82. **Future Notice to Stakeholders.** Honeywell shall ensure that all stakeholders are provided with notice, at least annually, of long-term monitoring activities and any additional remediation activities undertaken with respect to the Chromium Remedy. Such notice shall be accomplished by notices on websites or future equivalents thereof, including Jersey City websites, any websites created to provide information about the Chromium Remediation or redevelopment of the Redevelopment Area, and one or more of the following:

(a) Any community message board or other similar site used and/or maintained by stakeholders or the manager(s) of the Redevelopment Area;

(b) Mailings to all stakeholders; and

(c) Posters and flyers throughout the Redevelopment Area.

83. **Stakeholder Enforcement.** Any stakeholder shall have the right to enforce the remedial obligations of this Consent Decree in the Court, including post-implementation monitoring and maintenance obligations, and the terms of any deed notice or use restriction.

**I. Oversight and Enforcement by the Special Master and NJDEP**

84. **Federal Court Jurisdiction.** The Court shall retain jurisdiction for the purpose of overseeing and enforcing this Consent Decree and to review any issue or dispute which is not resolved through the oversight process described in Article III.I.

85. **Appointment and Jurisdiction of the Special Master.** The Chromium Remedy provided for in this Consent Decree is hereby referred to a Special Master pursuant to Rule 53 of the Federal Rules of Civil Procedure. The Special Master is appointed in the Consolidated Litigation for the purpose of overseeing and enforcing the Chromium Remedy, the first five years of long-term monitoring of the Chromium Remedy, financial assurances for the Chromium Remedy, and the Initial Development Period for each phase of development in the Open Space AOC. The Special Master is also appointed in the Consolidated Litigation for the limited purpose of ensuring that the scheduling and implementation of any non-chromium related remedy, any site preparation activities, and any site redevelopment activities do not undermine the integrity of, unreasonably interfere with, or unnecessarily delay the effectuation of the Chromium Remedy, the Study Area 7 remedies, and other remedies within his jurisdiction as of the date of entry of this Consent Decree. The Special Master shall have jurisdiction over all matters for which he is appointed.

86. **Oversight of the Chromium Remedy.**

(a) **NJDEP Authority**. Nothing in or pursuant to this Consent Decree shall limit NJDEP's full statutory and regulatory authority with respect to the Study Area 6 South site, including (i) permitting authority; (ii) authority to review and approve the Treatment Study reports, the Remedial Action Work Plan, the 100% Design, and final Remedial Action Report for the Chromium Remedy; and (iii) authority to issue a no further action letter.

(b) **Special Master Responsibilities**. The Special Master shall have the following responsibilities:

(i) Ensuring that Honeywell's implementation of the Chromium Remedy satisfies the requirements of this Consent Decree;

(ii) Ensuring that Honeywell's implementation of the Chromium Remedy conforms with federal, state, and local permit requirements;

(iii) Establishing a reasonable schedule for the implementation of the Chromium Remedy and monitoring conformance with it;

(iv) Reviewing monthly progress reports and conducting periodic meetings with the Parties to review the progress of the implementation of the Chromium Remedy. NJDEP shall be invited, but not required, to participate in these meetings and the decision as to whether to participate shall be left to NJDEP's sole discretion;

(v) Submitting bi-monthly progress reports to the Court pursuant to the schedule for the submission of such reports established in *ICO v. Honeywell*;

(vi) Overseeing the financial assurances established pursuant to paragraphs 91 through 100, and, until the expiration of his term pursuant to paragraph 90, overseeing the financial assurances established pursuant to paragraphs 101 through 112;

(vii) Coordinating review of the documents as provided in paragraphs 86(c) through 86(g);

(viii) Overseeing all development undertaken in the Open Space AOC during the Initial Development Period pursuant to paragraph 74(j)(iii); and

(ix) To the extent that, in matters within the jurisdiction of the Special Master as set forth herein, a dispute arises between the Parties with respect to implementation of the Chromium Remedy, issuing a recommendation to the Court with respect to the dispute.

(c) **Submission of Documents by Honeywell.** Honeywell shall submit the following documents to Riverkeeper, Jersey City, the Special Master, and NJDEP:

(i) An overall schedule with milestones for the design and implementation of the remedy ("Schedule") consistent with paragraph 54 above;

(ii) A Second Supplemental Remedial Investigation Report reporting the results of the field work conducted pursuant to paragraph 55;

(iii)A Chromium Impacted Soils Pilot Test Work Plan and Analytical Protocol for conduct of the treatment study pursuant to paragraph 56, unless such documents are agreed to by NJDEP and Riverkeeper before the entry of this Consent Decree;

(iv)An Initial Treatment Study Report for the Development AOC;

(v) A Final Treatment Study Monitoring Report;

(vi) The documents for Site 163 submitted pursuant to paragraphs 54(a)(iv), 54(a)(v), 61, and 62;

(vii) A report to evaluate the need for remediation of any potentially remaining contaminated shallow groundwater in the Development AOC after implementation of the Development AOC Soils Remedy and, based on such an evaluation, a proposal;

(viii) A report of the results of the sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site pursuant to paragraph 71 and, based on the results, a proposal for a remedy;

(ix) A plan for one round of monitoring to evaluate whether the L-Well Groundwater remains contained pursuant to paragraph 72;

(x) A proposal for a remedy of the L-Well Groundwater, in the event L-Well Groundwater monitoring indicates the contaminated groundwater is no longer contained, pursuant to paragraph 72;

(xi) A Remedial Action Work Plan;

(xii) A 50% Design Report (which may include the Development AOC Conceptual Design Plan as a component) as well as design drawings and specifications at the 50% level for other components of the Chromium Remedy (hereinafter the 50% Design);

(xiii) Design drawings and specifications at the 100% level (after selection of the contractor) (hereafter "100% Design");

(xiv) The data validation plan, including quality control and quality assurance protocols;

(xv) The site-wide master health and safety plan;

(xvi) The Long-Term Monitoring Plan;

(xvii) The final Remedial Action Report or final construction report (including as-built drawings and such other reports as may be prepared of the remedy as implemented);

(xviii) A program for post-treatment monitoring pursuant to paragraph 63, and, depending on such results, a proposal for further remedial actions;

(xix) A report reviewing measured groundwater levels for the groundwater remedy;

(xx) Documents required during the Initial Development Period pursuant to paragraphs 74(j)(vi), 74(j)(vii), and 74(j)(viii); and

(xxi) Other post-implementation monitoring reports as required by the Long-Term Monitoring Plan.

(d) **Initial Review of Documents by NJDEP.** The Parties and Special Master shall allow the period of time set forth below for NJDEP to conduct its review of a submission (hereinafter "NJDEP Review Period") before the document is subject to the Special Master review and approval process. During the NJDEP Review Period, any Party may submit comments to NJDEP. For the Second Supplemental Remedial Investigation Report, the Remedial Action Work Plan, the Initial Treatment Study, and the Final Treatment Study Monitoring Report, the NJDEP Review Period shall be 90 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. For any other documents identified in paragraph 86(c), the NJDEP Review Period shall be 30 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. The NJDEP review period shall be extended an additional 30 days for any document for which NJDEP provides the Parties and the Special Master with notice that its review will require an additional 30 days. At the conclusion of the NJDEP Review Period, the comment and review process provided for in paragraphs 86(e) and 86(f) shall commence. In the event that any document has been revised during the NJDEP Review Period, Honeywell shall resubmit the applicable document for purposes of the comment and review provided for in paragraphs 86(e) and 86(f).

(e) **Comment on Submitted Documents**. For each of the documents submitted by Honeywell pursuant to paragraph 86(c), and following conclusion of the NJDEP Review Period as described in paragraph 86(d), the Special Master shall establish a schedule for the submission

of comments and responses to comments. For each of the documents submitted, Riverkeeper, Jersey City, the Special Master, and NJDEP shall have the right to submit comments to Honeywell. Honeywell shall address all comments received and submit a revised document. The revised document shall be submitted by Honeywell to Riverkeeper, Jersey City, the Special Master, and NJDEP. The revised document shall be subject to review and approval pursuant to paragraph 86(f), unless the Parties agree both on the revised document and that further review and approval pursuant to paragraph 86(f) is unnecessary. In that event, the Parties shall inform the Special Master that review under paragraph 82(f) is unnecessary and Honeywell shall proceed to implement the revised document.

(f) **Review and Approval of the Submitted/Revised Document**

(i) **Scope of Review**. Subject to the limitations in paragraph 82(e), all documents submitted by Honeywell, pursuant to paragraph 86(c) and 86(e), shall be subject to review and approval by the Special Master in accordance with the following procedure. All such documents, except the Schedule and the 100% Design, shall be subject to the review and approval process and shall not require an order of the Court. The Schedule and 100% Design documents shall be subject to the review and approval process, but shall also require an order of the Court as provided in paragraph 86(g). A document shall be approved if the document (1) complies with this Consent Decree; (2) complies with the Remedial Action Work Plan for the Chromium Remedy; and (3) complies with the Schedule and 100% Design.

(ii) **Procedure**. Prior to making a decision on a document, the Special Master shall notify NJDEP of his intention to rule on the document or make a recommendation to the Court on the document. Such notice shall notify NJDEP that the Special Master will consider any comments NJDEP wishes to submit on the document if such comments are submitted within

the timeframe established by the Special Master in the schedule for comments pursuant to paragraph 86(e). NJDEP shall in its sole discretion determine whether to submit comments to the Special Master.

(iii) **Court Review**. If any Party objects to the Special Master's recommendation to the Court or approval of any document pursuant to this paragraph, that Party may seek further relief from the Court with respect to the document.

(g) **Schedule and 100% Design Documents**. As to the Schedule and the 100% Design documents, Honeywell shall have the responsibility, within 30 days of the Special Master's approval of each document, of (i) moving for entry of an order by the Court approving the document as approved by the Special Master; or (ii) filing objections with the Court to the Special Master's approval (and any recommendations contained therein) and moving for entry of the Schedule or 100% Design (including any such recommendations of the Special Master to which Honeywell agrees). Riverkeeper shall have the right in these proceedings to raise any objections they might have to the Schedule or 100% Design as approved by the Special Master or to the submission by Honeywell to the Court. NJDEP shall receive notice of any motion filed with respect to the Schedule or the 100% Design.

(h) **Flexibility in 50% and 100% Design Documents**. The Parties recognize that work conducted to implement the Chromium Remedy may be conducted by Honeywell contractors and that Honeywell may establish performance-based criteria or specifications for its contractors. As a result, the Parties recognize that the 50% Design and 100% Design documents for the Chromium Remedy may include performance-based standards, criteria, and specifications. These documents shall be sufficiently prescriptive to enable the Parties and the Special Master to evaluate their conformance with the Remedial Action Work Plan and this Consent Decree. The

Parties also recognize that the 100% Design will be completed after Honeywell has selected a contractor. The Parties further recognize that completing the 100% Design after the selection of the contractor(s) shall not make the 100% Design subject to any less stringent or more deferential review. Honeywell's commitment to the contractor(s) shall not be cause to limit review by the Parties and the Special Master.

(i) **Changes to the Schedule.** The Parties recognize that changes to individual line items in the Schedule will occur. To the extent that (i) the Parties and the Special Master agree that such changes do not have a material impact on satisfaction of the Schedule milestones established for items set forth in paragraph 54; and (ii) such changes do not require modifications to any necessary permits or authorizations for the Chromium Remedy, such changes may be made upon agreement of the Parties and the Special Master without further order of the Court.

87. **Retention of Professionals.** The Special Master may retain the services of professionals and/or other technical personnel, as reasonably needed, to fulfill his obligations under this Consent Decree, and for which he will be reimbursed pursuant to paragraph 89.

88. **Insurance for the Special Master.** The Special Master shall obtain insurance coverage relating to the performance of the Special Master's duties and responsibilities under this Consent Decree. Such coverage shall be similar to the Special Master's existing coverage in *ICO v. Honeywell*, procured pursuant to the Court's November 11, 2005 Stipulation and Order Regarding Special Master's Application to Procure Insurance Coverage, and as extended to the Consolidated Litigation by the Sediment Consent Order. The insurance coverage shall be sufficiently extended in duration and scope to cover all additional duties and responsibilities as set forth hereunder. Honeywell shall pay the premiums and other administrative costs of the Special Master's insurance.

89. **Reimbursement of Special Master Fees and Expenses.** The Special Master shall submit fee applications to the Court for approval of reasonable fees and expenses incurred in the oversight of matters referred to him pursuant to this Consent Decree. Any Party may raise with the Court objections to such fee applications. Upon approval of a fee application by the Court, the reimbursement of the Special Master's fees and expenses shall be made from the escrow fund previously established by Honeywell for the purpose of paying the Special Master's fees and expenses in *ICO v. Honeywell* pursuant to this Court's September 15, 2003 Order Setting Financial Assurances and extended to the Consolidated Litigation by the Sediment Consent Order.

90. **Expiration of Special Master's Appointment.** The Special Master's appointment under this Consent Decree shall expire after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy and the Initial Development Period for each phase of development has been concluded as provided in paragraph 74(j)(ii). However, solely to the extent that the Special Master is still supervising other portions of the Consolidated Litigation or *ICO v. Honeywell* after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy or the Initial Development Period for each phase of development as provided in paragraph 74(j)(ii), whichever is later, the Special Master shall continue to have jurisdiction under this Consent Decree until he has completed his specifically enumerated responsibilities under the Final Judgment in *ICO v. Honeywell*, the Sediment Consent Order, the Deep Groundwater Consent Order, the Study Area 6 North Consent Decree, and any other future orders, decrees, or judgments in *ICO v. Honeywell* and the Consolidated Litigation. Enumerated responsibilities under any order, decree, or judgment shall include only those tasks specifically assigned to the Special Master in the order, decree, or judgment. Enumerated responsibilities

shall not include any continued jurisdiction exercised over long-term monitoring beyond the initial period specified in the order, decree, or judgment. For example, the Special Master has jurisdiction over the first five years of long-term monitoring under the Sediment Consent Order. Oversight during these five years shall be an enumerated responsibility, but any continued oversight of long-term monitoring, pursuant to the extension of the Special Master's jurisdiction beyond the first five years, as provided in paragraph 60 of the Sediment Consent Order, shall not be an enumerated responsibility. Such extensions of jurisdiction shall be effective only so long as specific enumerated responsibilities in any order, decree, or judgment have not been fulfilled.

**J. Initial Financial Assurances**

91. **Chromium Remedy Letter of Credit.** Honeywell shall obtain a one-year, irrevocable letter of credit (the "Chromium Remedy Letter of Credit") to be automatically renewed annually in an amount equal to the "Remedial Costs Subject to Financial Assurance."

(a) Remedial Costs Subject to Financial Assurance shall mean:

(i) The costs of implementing the Chromium Remedy calculated using factors, including inflation and discount rates, determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process;

(ii) The costs of monitoring and maintenance activities for five years, as required by the Long-Term Monitoring Plan, calculated using factors including inflation and discount rates determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process; and

(iii) A contingency of 25% with respect to those costs listed in paragraphs 91(a)(i) and 91(a)(ii).

(b) The Chromium Remedy Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution, provided that in either case, the financial institution shall be acceptable to the Special Master.

92. **Procedures for Review of the Proposed Chromium Remedy Letter of Credit.** No later than December 31, 2008, Honeywell shall submit to Riverkeeper and the Special Master for their review the proposed (a) amount of the Chromium Remedy Letter of Credit; (b) form of the Chromium Remedy Letter of Credit; and (c) name of the institution that will issue the Chromium Remedy Letter of Credit. If Riverkeeper does not agree to the terms of the Chromium Remedy Letter of Credit, the Parties shall meet and confer in an effort to resolve their differences. If the Parties are unable to reach agreement over the terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the Chromium Remedy Letter of Credit.

93. **Automatic Renewal.** The Chromium Remedy Letter of Credit shall be automatically renewed annually unless (a) no later than 120 days prior to the anniversary of the Chromium Remedy Letter of Credit issue date, the issuer provides notice of nonrenewal or (b) Honeywell seeks a reduction in the Chromium Remedy Letter of Credit, pursuant to paragraph 94, to correspond to the reduced estimate of Remedial Costs Subject to Financial Assurances. If the issuer provides notice of nonrenewal, Honeywell shall obtain a replacement irrevocable Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit. If Honeywell is not otherwise in default as provided in Article III.J, the Special Master shall direct the cancellation of the prior Chromium Remedy

Letter of Credit within 91 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit. In the event that the Special Master is entitled to draw upon a Chromium Remedy Letter of Credit because there are two Chromium Remedy Letters of Credit currently in place, the Special Master shall not draw an aggregate amount in excess of the highest valued Chromium Remedy Letter of Credit. Upon Honeywell's request, the Special Master may, at his option, decide not to require overlapping letters of credit in any year based on Honeywell's financial strength in that year, provided that Honeywell has submitted all necessary information so that the Special Master can make his determination at least 150 days prior to the expiration of the Chromium Remedy Letter of Credit.

94. **Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit.** Honeywell shall have the right annually to seek a reduction in the Chromium Remedy Letter of Credit. At the time of seeking such reduction, Honeywell shall submit to the Riverkeeper and the Special Master an estimate of the remaining Remedial Costs Subject to Financial Assurance, including the contingency as described in paragraph 91(a)(iii), and shall seek adjustment of the Chromium Remedy Letter of Credit so that the total estimated amount of remaining Remedial Costs Subject to Financial Assurance are covered by the Chromium Remedy Letter of Credit. However, the adjustment shall not result in reducing the Chromium Remedy Letter of Credit to an amount below the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), plus a contingency of 25% of the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), and shall not result in reducing the Chromium Remedy Letter of Credit to an amount less than $20,000,000 as expressed in 2008 dollars unless long-term financial assurances are in place pursuant to Article III.K. Before making any request to reduce the amount or modify the terms of the Chromium Remedy Letter of Credit, Honeywell shall first confer with the Riverkeeper and

in an effort to reach agreement on the modified amount or terms of the Chromium Remedy Letter of Credit. If the Parties are unable to reach agreement over the modified amount or terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall resolve the dispute. Any Party shall have the right to seek review by the Court of the Special Master's decision regarding the modified amount or terms of the Chromium Remedy Letter of Credit. Upon agreement on the amount of the reduction or modified terms of the Chromium Remedy Letter of Credit (or upon order of the Court directing that the Chromium Remedy Letter of Credit be reduced to an identified amount or otherwise modified), Honeywell shall obtain a replacement Chromium Remedy Letter of Credit in such amount and with such terms. If Honeywell is not otherwise in default as provided in Article III.J and the issuer of the primary Chromium Remedy Letter of Credit has not provided notice of non-renewal, within 30 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit, the Special Master shall direct the cancellation of the prior Chromium Remedy Letter of Credit.

95. **Bankruptcy Protection**. Neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy. The Chromium Remedy Letter of Credit shall contain the language necessary to assure that neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

96. **Exclusive Court Jurisdiction**. The Chromium Remedy Letter of Credit shall recite that the issuer submits to the exclusive jurisdiction of this Court for any and all disputes arising under the Letter of Credit.

97. **Application of New York Law.** The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Chromium Remedy Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

98. **Procedures upon Honeywell's Material Default of Its Obligations.** During the period in which the Special Master has jurisdiction pursuant to paragraph 85, the Chromium Remedy Letter of Credit shall be payable to the Special Master and shall not, prior to its expiration date, be revoked or terminated except consistent with this Consent Decree and with the consent of the Special Master and approval by the Court. The Special Master's ability to draw upon the Chromium Remedy Letter of Credit shall not be limited by any agreement between Honeywell and the issuer. The Special Master may, without further order or notice to this Court, draw upon the Chromium Remedy Letter of Credit upon the occurrence of default by Honeywell, which shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 93 to deliver a replacement Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 15 days after written notice to Honeywell thereof and either (i) Honeywell, in the opinion of the Special Master without further input from the Parties, shall have failed to cure the breach; (ii) during the 15-day period, the Court has not entered an order to prevent the Special Master from

drawing on the Chromium Remedy Letter of Credit; or (iii) the Court or the Special Master has not granted Honeywell additional time to cure the breach;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if involuntary filing has not been dismissed within 60 days; the appointment of a custodian, receiver, liquidator, or trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 98(c), and the failure of Honeywell to provide assurance to the Special Master, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

99. **Placement of Proceeds in Court Registry Investment System Account**. In the event that the Special Master draws upon the Chromium Remedy Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Chromium Remedy Letter of Credit which represent the remaining estimated Chromium Remedy costs under paragraphs 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), in an account with the Court Registry Investment System in accordance with Local Civil Rule 67.1 and not expend the proceeds of the Letter of Credit without further order of this Court. The

Special Master shall place all additional proceeds of the Chromium Remedy Letter of Credit in a trust fund pursuant to paragraph 103(b)(v).

100. **Termination of Chromium Remedy Letter of Credit**. The Chromium Remedy Letter of Credit may be withdrawn in its entirety upon the satisfaction of all of the following:

(a) The implementation of the Chromium Remedy; and

(b) Establishment of long-term financial assurance pursuant to Article III.K.

**K. Long-Term Financial Assurances**

101. **Long-Term Financial Assurances.** Honeywell shall fund long-term financial assurances to ensure that the activities set forth in paragraph 102(a) are carried out regardless of whether Honeywell is financially able to carry out such activities in perpetuity.

102. **Costs Subject to Long-Term Financial Assurances.**

(a) Long-term financial assurances shall provide enough funds to cover the costs of the following activities:

(i) Perpetual monitoring and maintenance of the Chromium Remedy, including installation, operation and monitoring of any above-cap-grade gas collection and/or treatment system as may be necessary, but such system is not part of the 100% Design;

(ii) Perpetual operation of the shallow groundwater remedies pursuant to paragraphs 69, 70, and 71;

(iii) Perpetual repair of the cap;

(iv) Perpetual replacement of the cap on a 75-year replacement interval; and

(v) The perpetual administration of the trust fund regardless of whether such trust fund is selected by Honeywell pursuant to paragraph 103(a) or is established from the Long-Term Letter of Credit pursuant to paragraphs 103(b)(ii), 103(b)(v), or 109.

(b) The costs that shall be subject to financial assurances is an amount that will provide the full payment for each of the activities set forth in paragraphs 102(a)(i) through 102(a)(v) plus a 25% contingency when the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to be performed. The costs subject to financial assurances are forward looking because they state an amount valued at the time the funds are needed. As such, they shall be stated in contemporary time as the present value (calculated on the basis of a discount rate of 4.75%) of the estimated future costs of the activities specified in paragraphs 102(a)(i) through 102(a)(v), plus a 25% contingency on those costs.

103. **Long-Term Financial Assurance Mechanisms.** Honeywell shall provide long-term financial assurances in the amount of the costs subject to long-term financial assurances in the form of a trust fund, a letter of credit, or some combination of the two. The selected mechanism(s) shall satisfy the following requirements:

(a) **Trust Fund.** In the event that Honeywell selects a trust fund, Honeywell shall create a trust fund such that it can provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(i) The trust fund shall be at arm's length from Honeywell and shall not be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The trust fund agreement shall contain the language necessary to assure that neither the trust fund nor the earnings of the trust fund shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The trust fund shall be managed by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution managing the

trust fund declares bankruptcy, the Court shall withdraw the funds and appoint another financial institution meeting the requirements of this paragraph to manage the trust.

(iii) No more frequently than once per year, Honeywell may apply to the Court for an order directing the trust manager to reimburse Honeywell for any costs that it has incurred to carry out the activities set forth in paragraphs 102(a)(i) through 102(a)(iv).

(b) **Long-Term Letter of Credit**. In the event that Honeywell selects a letter of credit, Honeywell shall obtain a one-year irrevocable letter of credit (the "Long-Term Letter of Credit") to be automatically renewed annually in an amount that provides sufficient funds such that a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a), could be created. The Long-Term Letter of Credit-funded trust, plus any trust fund established under paragraph 103(a), shall provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The amount of any Long-Term Letter of Credit shall therefore be adjusted periodically as the cap replacement interval is approached because, for example, the money needed in the 10th year to fund a trust that can provide for replacement of the cap in the 75th year is much less than the money that would be needed in the 40th year. Such periodic adjustments shall be proposed and approved by the Court in conjunction with the adjustments under paragraph 106.

(i) Neither the Long-Term Letter of Credit nor the proceeds of the Long-Term Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The Long-Term Letter of Credit shall contain the language necessary to assure that neither the Long-Term Letter of

Credit nor the proceeds of the Long-Term Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The Long-Term Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution issuing the Long-Term Letter of Credit declares bankruptcy, the Court shall authorize the drawing of funds from the Long-Term Letter of Credit and shall deposit those funds in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(iii) The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits) as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Long-Term Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

(iv) The Long-Term Letter of Credit shall be automatically renewed annually, unless, no later than 120 days prior to the anniversary of the Long-Term Letter of Credit issue date, the issuer provides notice of non-renewal. If the issuer provides notice of non-renewal, Honeywell shall obtain a replacement irrevocable Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit. If Honeywell is not otherwise in default as provided in this Article, the Court shall direct the cancellation of the prior Long-Term Letter of Credit within 91 days after delivery to the Court of any replacement of a Long-Term Letter of Credit. In the event that the Court is entitled to draw upon a Long-Term Letter of Credit when there are two Letters of Credit currently in place, the Court shall not draw an aggregate amount in excess of the highest valued Long-Term Letter of Credit.

(v) Prior to the expiration of the Special Master's appointment pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Special Master. During the time the Long-Term Letter of Credit is payable to the Special Master, the Special Master may draw on the Long-Term Letter of Credit as provided in paragraph 98. In the event that the Special Master draws upon the Long-Term Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a). After the Special Master's appointment expires pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Court and, in the event that the Court draws on the Long-Term Letter of Credit, the Court shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(vi) Whether the Long-Term Letter of Credit is payable to the Special Master or the Court, it shall not, prior to its expiration date, be revoked or terminated by Honeywell except consistent with this Consent Decree and with the approval of the Court. The ability of the Special Master or the Court to draw upon the Long-Term Letter of Credit shall not be limited by any agreement between Honeywell and the issuer.

(vii) In the event that the Long-Term Letter of Credit is drawn upon and invested pursuant to paragraph 103(b)(ii), 103(b)(v), or 109 and Honeywell has also selected a trust fund pursuant to paragraph 103(a), resulting in the existence of two trust funds, the two trust funds shall be managed so as to ensure that the combined amount of the trust funds is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(c) **Combination**. Honeywell may use some combination of a trust fund and a letter of credit to achieve the requirements of this paragraph. However, if a combination is used, Honeywell shall ensure that the combined amount of financial assurances is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The trust fund and the letter of credit shall otherwise satisfy all the requirements of paragraphs 103(a) and 103(b).

104. **Procedures for Review of the Proposed Long-Term Financial Assurances**. No later than June 1, 2009, Honeywell shall submit to Riverkeeper and the Special Master, for their review (a) the amount of the proposed long-term financial assurances; (b) the form(s) of the proposed long-term financial assurance mechanisms; and (c) the name(s) of the institution proposed to manage or issue the long-term financial assurances. If Riverkeeper agrees to the terms of the proposed long-term financial assurances, within 60 days of such agreement, Honeywell shall create a trust fund and/or secure a Long-Term Letter of Credit on those terms. If the Parties are unable to reach agreement over the terms of the long-term financial assurances, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the financial assurances.

105. **Temporary Maintenance of Chromium Remedy Letter of Credit**. Until the long-term financial assurances have been put into place, Honeywell shall maintain the Chromium Remedy Letter of Credit required by paragraph 91 in an amount equal to at least $20,000,000 in 2008 dollars. In the event of any default by Honeywell pursuant to paragraph 98 while the Chromium Remedy Letter of Credit is in place, the provisions of paragraph 103(b)(v) for the placement of the proceeds that exceed the remaining estimated Chromium Remedy costs under

paragraph 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), shall apply.

106. **Adjustment of Amount Held in Long-Term Financial Assurances**. Every five years as marked from the establishment of the first long-term financial assurances pursuant to paragraph 103, the Parties shall report to the Court whether the long-term financial assurances are adequately funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. At such time as the Parties report to the Court, any Party may seek an adjustment in the amount of the long-term financial assurances. The Party seeking an adjustment must demonstrate that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Such demonstration shall reflect the actual costs of implementing the remedy and/or any replacement of the remedy, once such actual costs are available. The demonstration shall also reflect the costs of work completed to date and the actual lifetime of the cap, once the cap has been replaced or has passed a replacement interval without requiring replacement. The demonstration shall further reflect the actual performance of the fund and its ability to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Any demonstration shall be forward looking and shall be based upon estimates of what the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to cost at the time they must be performed and the amount of funding projected to be available to undertake such activities at the time they must be performed. If, after reviewing the submission(s) received from the Parties, the Court determines that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to

long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary, the Court shall order an adjustment in the amount held in the long-term financial assurances to overcome the shortage or overage. In the event that the Court determines that the long-term financial assurances are under-funded, it shall order Honeywell to increase the amount held in the long-term financial assurances. In the event that the Court determines that any trust fund established pursuant to paragraph 103(a) is over-funded, the Court shall issue an order directing the trust manager to pay the overage to Honeywell. In the event that the Court determines that the Long-Term Letter of Credit is over-funded, the Court shall issue an order permitting Honeywell to reduce the amount covered during the next annual renewal of the Long-Term Letter of Credit pursuant to paragraph 103(b)(iv). Any adjustment to the amount of the Long-Term Letter of Credit pursuant to this paragraph shall be in addition to any adjustment of the amount of the Long-Term Letter of Credit required pursuant to paragraph 103(b).

107. **Exclusive Court Jurisdiction**. The trust fund agreement and/or the Long-Term Letter of Credit shall recite that the trust fund manager and/or issuer of the Long-Term Letter of Credit submit to the exclusive jurisdiction of this Court for any and all disputes arising under the trust fund or the Long-Term Letter of Credit. The requirements of this paragraph shall apply whether the trust fund is established pursuant to paragraph 103(a), 103(b)(ii), 103(b)(v), or 109.

108. **Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired.** Upon the occurrence of default by Honeywell, after the Special Master's appointment has expired, Riverkeeper may move the Court on an expedited basis for an order to withdraw funds from the trust fund or to draw on the Long-Term Letter of Credit. Default shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 103(b)(iv) to deliver a replacement Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 30 days after written notice by Riverkeeper to Honeywell of the alleged material failure, unless Honeywell cures the alleged breach within the 30-day notice period or such longer period as the Parties may agree to or the Court may order;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if the involuntary filing is not dismissed within 60 days; the appointment of a custodian, receiver, liquidator, trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 108(c), if Honeywell fails to provide assurance to Riverkeeper, and the Court, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

109. **Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default.** If the Court grants any motion by Riverkeeper or pursuant to paragraph 108 to draw on the Long-Term Letter of Credit, the sum approved by the Court's order granting the motion shall be

paid from the Long-Term Letter of Credit into a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

110. **Use of the Trust Fund in the Event of Honeywell's Default.** In the event of Honeywell's default, as defined in paragraphs 108(a) through 108(d), the money in the trust fund established pursuant to paragraph 103(a) shall be available to meet the obligations of paragraph 102(a), as well as for payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

111. **Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109.** In the event that a trust fund is established pursuant to paragraph 99, 103(b)(ii), 103(b)(v), or 109, the money in the trust fund shall be available to meet the obligations of paragraph 102(a), as well as for the payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

112. **Termination of the Long-Term Financial Assurances.** Honeywell's obligations under Article III.K shall be terminated and the long-term financial assurance mechanisms shall be terminated when the Court finds that no hexavalent or total chromium contamination remains in the Open Space AOC or on the Site, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive

standards for Unrestricted Use in place at the time, whichever is more restrictive. Upon determining that long-term financial assurances may be terminated, the Court shall order that any Long-Term Letter of Credit may be withdrawn in its entirety and any trust fund may be terminated. In conjunction with its order terminating any trust fund, the Court in its discretion shall designate a recipient(s) of any remaining trust funds.

## ARTICLE IV: TERMINATION

113. **Termination of this Consent Decree**. This Consent Decree shall terminate upon the withdrawal of any Party as provided for in this paragraph. Any Party may elect to withdraw from this Consent Decree due to the occurrence of one or more of the following events, provided that such Party provides written notice of withdrawal to the other Parties pursuant to paragraph 118:

(a) The Court fails to enter this Consent Decree or this Consent Decree is determined to be invalid on appeal; or

(b) NJDEP takes one of the following actions with respect to the Remedial Action Work Plan:

(i) Rejects or fails to approve the Remedial Action Work Plan for the Chromium Remedy within 180 days of submission of the plan;

(ii) Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in more than a 50% increase in the estimated costs of the Chromium Remedy as set forth in Article III; or

(iii)Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in a substantial reduction of the protection of human health and/or the environment.

114. **Procedures for Withdrawal and Termination.** Any Party electing to withdraw pursuant to paragraph 113 and thereby terminate this Consent Decree shall provide written notice of such withdrawal and termination to all other Parties within 30 days of the occurrence giving rise to the decision to withdraw. If any Party objects to termination of the Consent Decree, or believes that the conditions set forth in paragraph 113 have not been met, such objecting Party may move the Court for an expedited hearing on the issue of whether the conditions for termination have been effectuated.

115. **Good-Faith Obligation to Avoid Termination.** The Parties agree that they will each endeavor to fulfill the terms of this Consent Decree, that they will work diligently and in good faith to meet their obligations hereunder, and that they will promptly and timely take all reasonable steps to give effect to this Consent Decree and to avoid termination under paragraph 113.

116. **Effect of Termination.** If this Consent Decree is terminated pursuant to paragraph 113, the Consent Decree shall no longer be binding on the Parties and shall be of no further effect. In the event that this Consent Decree is terminated by one or more Parties pursuant to paragraph 113, each Party to this Consent Decree reserves all of its rights, claims, and defenses (both legal and factual) against the other Parties with respect to the matters at issue in the Consolidated Litigation and each Party remains free to pursue such rights, claims, and defenses.

## ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC

117. **Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC.** The transfer of title of Study Area 6 South and Study Area 7 properties to Bayfront Redevelopment LLC pursuant to the Jersey City/Honeywell Consent Order and any subsequent transfers shall not impede Honeywell's obligations to (a) complete the remediation of

Study Area 7 and implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or (b) complete the Chromium Remedy and conduct long-term monitoring and fulfill its other obligations set forth in this Consent Decree. Such transfers of Study Areas 6 South and Study Area 7 shall not include a transfer of Honeywell's obligations to implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or a transfer of Honeywell's obligations under this Consent Decree, but shall include a right of access or any other right required by Honeywell to complete the remediation. Any subsequent transfer of Study Area 6 South or Study Area 7 from Bayfront Redevelopment LLC to a redeveloper or other party shall provide all necessary agreements to allow Honeywell all necessary access to Study Area 6 South and Study Area 7 for purposes of completing Honeywell's obligations with respect to Study Area 6 South under this Consent Decree and completing the Study Area 7 remediation and implementing the Final Judgment and subsequent orders in *ICO v. Honeywell*.

## ARTICLE VI: NOTICE

118. **Notice**. Any and all notices given in connection with this Consent Decree shall be deemed adequately given only if in writing and addressed to the Party for whom such notices are intended at the addresses set forth in this paragraph. All notices shall be sent by Federal Express or other nationally recognized overnight messenger service or by first-class registered or certified mail, postage prepaid, return receipt requested. A written notice shall be deemed to have been given to the recipient party on the earlier of (a) the date it shall be delivered to the address set forth in this paragraph; (b) the date delivery shall have been refused at the address set forth in this paragraph; or (c) with respect to notices sent by mail, the date as of which the postal service shall have indicated such notice to be undeliverable at the address set forth in this paragraph.

Any and all notices referred to in this Consent Decree, or which any Party desires to give to the other, shall be addressed as follows:

If to Honeywell and/or
Bayfront Redevelopment LLC :

Tom Byrne, Esq.
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-2775

With copies to:

John Morris
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-4003

If to Jersey City:

William Matsikoudis
Corporation Counsel
City of Jersey City
280 Grove Street
Jersey City, NJ 07305
(201) 547-4667

If to Riverkeeper:

Bruce J. Terris
Carolyn Smith Pravlik
Kathleen L. Millian
Terris, Pravlik & Millian, LLP
1121 12th St., N.W.
Washington, DC 20005-4632
(202) 682-2100

Any party may change its designated recipients or addresses for notice in this paragraph by providing written notice of such change to all other Parties.

## ARTICLE VII: RIVERKEEPER'S ATTORNEYS' FEES

119. **Payment of Past Fees and Expenses.** Within 30 days of the entry of this Consent Decree, Honeywell shall pay Terris, Pravlik & Millian, LLP the sum of $813,000.00 which represents the following:

(a) A compromise of the attorneys' fees incurred by Riverkeeper in the litigation of Study Area 6 South portion of *Riverkeeper v. Honeywell* through August 31, 2008; and

(b) $353,746.67 in out-of-pocket expenses representing a portion of the expenses incurred by Riverkeeper in *Riverkeeper v. Honeywell* from the inception of the litigation after deducting the expenses paid pursuant to the Sediment Consent Order, the Deep Groundwater Consent Order, and the Study Area 6 North Consent Decree.

(c) Payment of the sum of $813,000.00 shall be in full satisfaction of all obligations, duties, and responsibilities of Honeywell with respect to the $879,317.92 in fees and expenses that Riverkeeper claimed with regard to the above described fees and expenses.

120. **Future Fees and Expenses.** Honeywell shall reimburse Riverkeeper's attorneys for reasonable fees and expenses incurred: (a) in negotiating this Consent Decree after August 31, 2008; (b) in the monitoring and enforcement of this Consent Decree; and (c) in participation in the Special Master process established pursuant to this Consent Decree. Honeywell shall also reimburse Riverkeeper for reasonable attorneys' fees and expenses for Riverkeeper's review of and participation in the Long-Term Monitoring Plan and monitoring and enforcement of this Consent Decree following the term of the Special Master. In the event that any dispute arises between the Parties under this Consent Decree that must be resolved by the Court, Riverkeeper shall be entitled to recover its attorneys' fees and expenses for litigation of the dispute to the extent allowed by federal law. Riverkeeper and Honeywell shall use the same informal procedure for attempting to settle fees issues as has been used for post-judgment monitoring fees in *ICO v. Honeywell*. In the event that Riverkeeper and Honeywell are unable to reach a settlement on fees, Riverkeeper shall apply to the Court for an award of attorneys' fees and expenses. If Honeywell objects to only a portion of the Riverkeeper's statement of attorneys' fees and expenses, Honeywell shall pay the undisputed portion within 60 days of Riverkeeper's submittal of the statement to Honeywell. The Court shall resolve any objections to

Riverkeeper's statement of attorneys' fees and expenses and shall enter an appropriate Order. In the event of Honeywell's default, Riverkeeper may seek attorneys' fees from any trust fund or court registry funds established pursuant to the financial assurances provisions of this Consent Decree.

## ARTICLE VIII: MISCELLANEOUS PROVISIONS

121. **Force Majeure.** Force Majeure, for the purposes of this Consent Decree, is defined as an event arising from causes beyond the control of any Party or Parties (or their agents, contractors, subcontractors, representatives, or assigns) which could not have been overcome by reasonable diligence and which delays or prevents the performance of any obligation under this Consent Decree. Examples of events which may constitute force majeure include the refusal of any federal or state governmental authority to grant a permit or authorization necessary for the completion of actions required by this Consent Decree, floods, hurricanes, tornadoes, and other extraordinary weather events, earthquakes and other natural disasters, terrorist attacks, war, and other national emergencies. Examples of events that are not force majeure events include normal inclement weather, increased costs or expense, the failure to timely and fully apply for a permit or authorization necessary for the completion of actions required by this Consent Decree, or financial difficulty of any Party. The Party claiming force majeure shall bear the burden of showing an event was a force majeure event.

122. **Bayfront Redevelopment LLC as a Party.** As a signatory to this Consent Decree, Bayfront Redevelopment LLC subjects itself to the Court's jurisdiction for the purpose of enforcing this Consent Decree and agrees to be bound by this Consent Decree. This Consent Decree shall be fully enforceable against Bayfront Redevelopment LLC.

123. **Successors and Assigns.** This Consent Decree shall be binding upon and shall inure to the benefit of the successors, assigns, heirs, corporate parents, subsidiaries, and affiliates of each Party. No assignment or delegation of the obligations hereunder shall release the assigning Party from its obligations under this Consent Decree.

124. **Successors to Hackensack Riverkeeper, Inc.** In the event that Hackensack Riverkeeper, Inc. disbands or otherwise ceases operations, it shall assign its rights under this Consent Decree to another qualified nonprofit organization. A nonprofit organization shall be qualified for assignment under this Consent Decree if it is a charitable organization under Section 501(c)(3) of the Internal Revenue Code or its substantial equivalent and has an established record of working to enhance or preserve the ecology, natural habitat, or environment. Any such assignment shall be subject to approval by the Court and Honeywell shall have the right to object to any proposed assignment. Any successor organization shall have the duty to assign its rights under this Consent Decree to another qualified nonprofit organization in the event that the successor disbands or otherwise ceases operations. In the event that a successor is not appointed at any given time, the New Jersey Attorney General or equivalent officer shall appoint a successor subject to approval by the Court and objection by Honeywell.

125. **Reservation of Rights and Claims.** Except as set forth expressly herein, this Consent Decree does not affect in any way any of the Parties' claims or defenses against third parties who have not signed the Consent Decree.

126. **Governing Law and Continuing Jurisdiction.** The Court shall retain jurisdiction over the matters addressed in this Consent Decree for purposes of enabling the Parties to apply to the Court for any further order as may be necessary to construe, carry out, or enforce the terms of this Consent Decree. This Consent Decree shall be interpreted and enforced under the laws of

the United States and the State of New Jersey by the United States District Court for the District of New Jersey.

127. **Construction.** Questions regarding the interpretation of this Consent Decree shall not be resolved against any Party on the ground that this Consent Decree has been drafted by that Party. This Consent Decree is the result of review, negotiation, and compromise by each Party.

128. **Authority to Enter into Agreement.** The undersigned representative for each Party represents, certifies, and warrants that he or she is duly authorized by the Party whom he or she represents to enter into the terms of this Consent Decree and bind such Party legally to this Consent Decree.

129. **Measures to Effectuate This Consent Decree.** Jersey City shall take all appropriate steps to ensure that commitments it has agreed to with regard to the Open Space AOC have been duly considered, ratified, and approved. Such steps include consideration of such commitments and an effectuating ordinance at a meeting of the City Council, open to the public, at which members of the public have the opportunity to comment on all aspects of the commitments made by Jersey City..

130. **Modifications.** This Consent Decree may be modified by mutual agreement of the Parties but such agreement must be in writing, duly and properly signed by all Parties, and shall be submitted to the Court for approval.

131. **Severability.** Each of the provisions in paragraph 74 of this Consent Decree shall be deemed severable and, in the event that one or more of such provisions is deemed invalid or unenforceable, it shall not affect the validity or enforceability of the other provisions of the Consent Decree.

132. **Signatures.** This Consent Decree may be signed simultaneously or in counterparts by the respective signatories, which shall be as fully valid and binding as if a single document was signed by all of the signatories. This Consent Decree may be signed electronically by any or all signatories, and such electronic signature shall be as fully valid and binding as a hand-written signature.

# DEED NOTICE CONCERNING CONTROLS INSTALLED FOR CHROMIUM CONTAMINATION UNDERLYING THE PROPERTY

This Deed Notice is made as of the __ day of _____, 2017, by ***Bayfront Redevelopment LLC, whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950***. "Owner" shall mean Bayfront Redevelopment LLC together with its successors and assigns, including all successors in interest in the Property which is the subject of this Deed Notice as described fully below. The Property (also referenced herein as the "Restricted Area(s)") shall consist of those lands particularly described by metes and bounds in Exhibit A-2 attached.

1. THE PROPERTY. Bayfront Redevelopment LLC is the current owner in fee simple of certain real property designated as a portion of ***Block 24601, Lot 1 and Block 21901 Lots 8 and 10 on the tax map of the City of Jersey City, Hudson County, New Jersey***[1]; the New Jersey Department of Environmental Protection Program Interest Numbers for the contaminated site which includes this property are ***Hudson County Chromate Site No. 073 Program Interest ("PI") No. G000000927 and Hudson County Chromate Site No. 115 PI No. G000002548*** (NJDEP PI# for non-chromium-related contaminants at the Property is #745719). The Property is located between the Hackensack

[1] All references to Block 24601 Lot 1 and Block 21901 Lots 8 and 10 in this Deed Notice shall mean those applicable portions of Block 24601 Lot 1 and applicable portions of Block 21901 Lots 8 and 10 as shown in the metes and bounds description, regardless of whether the word "portion(s)" is specifically called out or not.

River bulkhead and the western hydraulic barrier walls installed within Study Areas 6 South and 7 as shown on Exhibit B-1, attached hereto. A portion of the Property (Tract 1) is part of the site referred to as Study Area 7 (Site 115) and the subject of an Administrative Consent Order (ACO) between Honeywell International Inc. ("Honeywell") and the Department dated June 17, 1993, and a Court-Ordered Remedy pursuant to the U.S. District Court for the District of New Jersey ("Court") Final Judgment in *Interfaith Community Organization v. Honeywell International Inc*., Case No. 95-2097, entered on June 30, 2003. The second portion of the Property (Tract 2) is subject to the ACO and to litigation captioned *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J. Civ. No. 05-5955, and *Jersey City Incinerator Authority v. Honeywell International Inc.*, D.N.J. Civ. No. 05-5993. Study Area 7 was previously remediated by Honeywell and received a No Further Action/Covenant Not to Sue letter, dated December 23, 2010, which did not include Tract 1. Tract 2 of the Property is part of the site referred to as Study Area 6 South (Site 073) for which Honeywell recently completed the Chromium Remedy pursuant to the First Amended Consent Decree Regarding the Remediation and Redevelopment of Study Area 6 South ("Consent Decree") which is attached hereto as Appendix I and is entered as an order of the Court in the following consolidated actions *JCMUA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-05955; *JCIA v. Honeywell International, Inc.,* D.N.J., Civ. No. 05-5993; and *Hackensack Riverkeeper, Inc. v. Honeywell International, Inc.,* D.N.J., Civ. No. 06-22 (consolidated under Civ. No. 95-2097). The Consent Decree restricts transfer, use, and development of the Property. To the extent that there is any conflict or inconsistency between the terms of this Deed Notice and the terms of the Consent Decree, the Consent Decree shall govern.

2. REMEDIATION.

i. The Department's Bureau of State Case Management (BCM) is the entity within the Department that is responsible for the chromium oversight of the remediation of SA-6 South and SA-7. The matter for SA-6 South was Hudson County Chromate Site No. 073 Program Interest (PI) No. G000000927. The matter for SA-7 was Hudson County Chromate Site No. 115 PI No. G000002548. The Department has approved this Deed Notice as an institutional control for the Property, which is part of the remediation of the Property.

ii. N.J.A.C. 7:26-C-7 requires the Owner, among other persons, including the responsible party Honeywell International Inc. ("Honeywell"), to obtain a soil remedial action permit for the soil remedial action at the Property. That permit will contain the monitoring, maintenance and biennial certification requirements that apply to the Property.

3. SOIL AND GROUNDWATER CONTAMINATION. Honeywell, a corporation of the State of Delaware, licensed to do business in the State of New Jersey whose post office address is 115 Tabor Road, Morris Plains, New Jersey 07950, has remediated SA-6 South and SA-7 to address chromium-related soil and shallow groundwater contamination, except for the Property and certain other deed noticed areas where engineering controls were implemented.

For SA-6 South, the Remedial Action Work Plan ("RAWP") was approved by the Department on March 24, 2009 for Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140, which included portions of the Property. Remedial actions were further approved pursuant to the Consent Decree. Under both the Consent Decree and the RAWP, soil contamination remains in the

Property at concentrations that do not allow for the unrestricted use of the Property. A Remedial Action Report ("RAR") for SA-6 South was submitted to the Department on February 8, 2017. The Department approved the RAR on March 30, 2017. A Construction Completion Report ("CCR") for SA-6 South to document the implementation of the Chromium Remedy pursuant to Article III of the Consent Decree (the "Chromium Remedy") to address chromium-impacted soil and groundwater for SA-6 South was entered by the Court on [DATE], [CITE TO DOCKET AND DOCKET #].

For SA-7, the Court-Ordered Remedy 100% Design was approved by the Court on March 14, 2005. Remediation was completed to comply with the court order to remove all materials containing hexavalent chromium in excess of 240 milligrams per kilogram ("mg/kg"). The remedial action achieved compliance with the Department's current most stringent soil cleanup criteria of 20 mg/kg, with the exception of a small portion of the Property at the bulkhead along the Hackensack River where excavation was technically impractical (the Technically Impracticable Area (or "TI Area")) (*i.e.*, Tract 1). Completion of the excavation remedy at SA-7 was acknowledged by the Court in the Amended Order Modifying the Judgment, January 13, 2012, ECF No. 1116, in Interfaith Community Organization v. Honeywell International Inc., Civ. No. 95-2097. Remedial actions for soils are also documented in a Remedial Action Report for Soils ("RAR") submitted to the New Jersey Department of Environmental Protection during December 2010.

The Property is comprised of two tracts of land; Tract 1 is on a portion of SA-7 and Tract 2 is on a portion of Site 073 on SA-6 South. Tract 1 is an approximately 22,323 square foot area on SA-7 between the bulkhead and the western hydraulic barrier installed at SA-7. Tract 1 includes the western hydraulic barrier of SA-7. Tract 1 is the "Technically Impracticable Area or TI Area" identified in the SA-7 RAR. NJDEP issued a conditional No Further Action letter for SA-7 soils on December 23, 2010, that excludes the TI Area. Soils within Tract 1 do not meet the 20 mg/kg objective in the NJDEP Chromium Policy. Tract 1 soils exceeding 20 mg/kg hexavalent chromium are covered by at least 7 feet of clean soils. Tract 1 will not be remediated by Honeywell; instead the 7-foot thick clean soil cap will remain in place and Tract 1 will be subject to this Deed Notice. Tract 1 also includes two steel sheetpile "wing walls" that project toward the bulkhead from the northern and southern corners of the hydraulic barrier intersections. These wing walls are part of the SA-7 Remedy in that they act to minimize re-contamination of the clean backfill material placed in the TI area from either the north or south. The Riverwalk feature including bulkhead improvements, additional fill soils and hardscape features will be constructed over the top of the Tract 1 Deed Notice Area. The provisions of the Long Term Monitoring Plan ("LTMP"), developed pursuant to the Consent Decree, will apply to Tract 1 of the Property.

Tract 2 is an approximately 11,689 square foot area adjacent to the bulkhead partially between the western boundary of the SA 6 South western hydraulic barrier wall and the bulkhead and extending south. The 100% Design plan for the Tract 2 area was to excavate the top 4 feet of soils within the area and defer additional excavation below a depth of 4 feet until implementation of the Bayfront Redevelopment Project when the bulkhead will either be repaired or replaced. Because an approximately 5-foot thick concrete slab was unexpectedly encountered while excavating in this area and because removal of this concrete would jeopardize the integrity of the bulkhead, excavation of residual chromium-impacted soil at any depth in Tract 2 will be coordinated with

bulkhead improvement work to be implemented during the Bayfront Redevelopment Project. Tract 2 soils exceeding 20 mg/kg hexavalent chromium are covered by at least 1 foot of clean soils.

Honeywell is instituting this deed notice on the Property (both Tracts 1 and 2 together). Once the remediation of the Tract 2 area is complete (*i.e.*, the excavation of soils with hexavalent chromium concentration of 20 mg/kg or greater to a depth of 20 feet below ground surface), Honeywell will terminate the deed notice for Tract 2 consistent with the requirements of Paragraph 13 below. In the meantime, the provisions of the LTMP, developed pursuant to the Consent Decree, will apply to Tract 2 of the Property.

The soil contamination is described, including the type, concentration and specific location of such contaminants, in Exhibit B, which is attached hereto and made a part hereof. Groundwater contaminant concentrations and restrictions for SA-6 South in its entirety are addressed in the Classification Exception Area (CEA) approved by the NJDEP on February 16, 2012 and in a forthcoming Remedial Action Permit for Groundwater (recent groundwater samples collected in the Tract 1 portion of the Property do not indicate shallow groundwater contamination within the Property). As a result of the remaining soil contamination, there is a statutory requirement for this Deed Notice and engineering controls in accordance with N.J.S.A. 58:10B-13. Under the terms of the Consent Decree (for Tract 2), Honeywell is responsible for monitoring and maintaining the soil remediation for the Property in perpetuity or until remediation is implemented that renders this Deed Notice unnecessary.

4. CONSIDERATION. In accordance with the Department's approval of the chromium RAWP for the Hudson County Chromate Site Nos. 073, 124, 125, 134, and 140 and the Department's issuance of the No Further Action/Covenant Not to Sue letter for soils at SA-7, and in consideration of the terms and conditions of that approval, and in accordance with the Consent Decree, and other good and valuable considerations, Owner has agreed to subject the Property to certain statutory and regulatory requirements which impose restrictions upon the use of the Property, to restrict certain uses of the Property, and to provide notice to subsequent owners, lessees and operators of the restrictions and the monitoring, maintenance, and biennial certification requirements outlined in this Deed Notice and required by law, as set forth herein.

5A. RESTRICTED AREAS. Due to the presence of contamination remaining at concentrations that do not allow for unrestricted use, Owner has agreed, as part of the remedial action for the Property, to restrict the use of the Property (the "Restricted Areas"); a narrative description of these restrictions, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C, which is attached hereto and made a part hereof. Owner will develop a binder containing a list of these restrictions which will be maintained either at onsite trailers or within the Groundwater Treatment Plant building, available for review and inspection by governmental enforcement officials if requested.

5B. RESTRICTED LAND USES. The following land use restrictions apply to the Property:

i. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(10), prohibits the conversion of a contaminated site, remediated to non-residential soil remediation standards that require the maintenance of engineering or institutional controls, to a child care

facility, or public, private, or charter school without the Department's prior written approval, unless a presumptive remedy is implemented;

ii. The Brownfield and Contaminated Site Remediation Act, N.J.S.A. 58:10B-12.g(12), prohibits the conversion of a landfill, with gas venting systems and or leachate collection systems, to a single-family residence or a child care facility without the Department's prior written approval;

iii. The Consent Decree, paragraph 9, prohibits the unrestricted use of Tract 2 of the Property until the Chromium Remedy set forth in Article III of the Consent Decree is implemented; and

iv. The Conservation Restriction, recorded with the Hudson County Register of Deeds at Book 8772, page 105, restricts the use and development of Tract 2 of the Property; the Conservation Restriction will be removed if the Chromium Remedy set forth in Article III of the Consent Decree is implemented and the Deed Notice for Tract 2 is terminated.

5C. ENGINEERING CONTROLS. Due to the presence and concentration of these contaminants, the Owner has also agreed, as part of the remedial action for the Property, to the placement of certain engineering controls within the Property. A narrative description of these engineering controls, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C. Honeywell shall be responsible for monitoring and maintenance of engineering controls and biennial certification requirements as specified in the Consent Decree, the LTMP, and Paragraphs 8A and 8B herein.

5D. LONG TERM MONITORING PLAN. Pursuant to the Consent Decree, Honeywell has developed an LTMP which sets forth requirements for monitoring, maintenance, and repairing or replacing the soil and groundwater chromium remedial measures including engineering controls within the Property, with limitations for Tract 1 of the Property as described above, and requirements for notification and reporting pursuant to the Consent Decree, Deed Notice, and Soil Remedial Action Permit. A copy of the LTMP is maintained by Honeywell at 115 Mount Tabor Road, Morris Plains, NJ 07950. This Deed Notice is appended to the LTMP.

5F. WORKER TRAINING MATERIALS. All maintenance workers engaged in maintenance at the Property shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. Workers shall be trained using materials developed by Honeywell pursuant to the Consent Decree.

6A. CHANGE IN OWNERSHIP AND REZONING.

i. The Owner and the subsequent owners and lessees, shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. The Owner and the subsequent owners shall provide written notice to the Department of Environmental Protection on a form provided by the Department and available at www.nj.gov/srp/forms within thirty (30) calendar days after the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property.

iii. The Owner and the subsequent owners shall provide written notice to the Department, on a form available from the Department at www.nj.gov/srp/forms, within thirty (30) calendar days after the owner's petition for or filing of any document initiating a rezoning of the Property to residential.

6B. SUCCESSORS AND ASSIGNS. This Deed Notice shall be binding upon Owner and upon Owner's successors and assigns, and subsequent owners, lessees, and operators while each is an owner, lessee, or operator of the Property.

7A. ALTERATIONS, IMPROVEMENTS, AND DISTURBANCES.

i. The Owner and all subsequent owners and lessees shall notify any person of whom it has knowledge, including, without limitation, tenants, employees of tenants, developers, and contractors, intending to conduct invasive work or excavate within the Restricted Areas, of the nature and location of known contamination in the Restricted Areas, and, of the precautions necessary to protect the engineering controls and minimize potential human exposure to contaminants.

ii. Except as provided in the Consent Decree and Paragraph 7B below, no person shall make, or allow to be made, any alteration, improvement, or disturbance in, to, or about the Property which disturbs any engineering control at the Property except as (a) permitted in the Consent Decree and Conservation Restriction, and (b) without first obtaining a Soil Remedial Action Permit modification from the Department. Nothing herein shall constitute a waiver of the obligation of any person to comply with all applicable laws and regulations including, without limitation, the applicable rules of the Occupational Safety and Health Administration.

iii. Notwithstanding subparagraph 7A.ii.(b), above, a Soil Remedial Action Permit modification is not required for any alteration, improvement, or disturbance provided that:

(A) Such action is taken in conformance with the Consent Decree and this Deed Notice; and

(B) The Department of Environmental Protection is notified of the activity by calling the DEP Hotline, at 1-877-WARN-DEP or 1-877-927-6337, within twenty-four (24) hours after the beginning of each alteration, improvement, or disturbance; and

(C) Honeywell is notified of the activity by calling 855-727-2658; and

(D) Honeywell and/or the owner restores any disturbance of an engineering control to pre-disturbance conditions, consistent with the requirements of the Consent Decree and

LTMP, within sixty (60) calendar days after the initiation of the alteration, improvement or disturbance; and

(E) All applicable worker health and safety laws and regulations are followed during the alteration, improvement, or disturbance, and during the restoration; and

(F) Appropriate measures are taken so that human exposure, and exposure of the environment outside the containment of the engineering controls, to contamination in excess of the applicable remediation standards does not occur; and

(G) The next biennial certification includes a description of the nature of the alteration, improvement, or disturbance, the dates and duration of the alteration, improvement, or disturbance, the name of key individuals and their affiliations conducting the alteration, improvement, or disturbance, a description of the notice the Owner gave to those persons prior to the disturbance, the amounts of soil generated for disposal, if any, the final disposition and any precautions taken to prevent exposure.

7B. EMERGENCIES. In the event of an emergency which presents, or may present, an unacceptable risk to the public health and safety, or to the environment, or immediate environmental concern, see N.J.S.A. 58:10C-2, any person may temporarily breach an engineering control provided that:

i. The Department of Environmental Protection is immediately notified of the emergency, by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

ii. Immediately after notifying NJDEP, Honeywell is notified of the emergency by calling 855-727-2658; and

iii. Both the actual disturbance and the time needed for the disturbance are limited to the minimum reasonably necessary to adequately respond to the emergency; and

iv. All measures necessary to limit actual or potential, present or future risk of exposure to humans or the environment to the contamination are implemented; and

v. The Department of Environmental Protection is notified when the emergency has ended by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337; and

vi. Honeywell is notified when the emergency has ended by calling 855-727-2658; and

vii. Honeywell restores the engineering control to the pre-emergency conditions, consistent with the requirements of the Consent Decree and LTMP, as soon as possible, and submits a written report to the Department of Environmental Protection of such emergency and restoration efforts within sixty (60) calendar days after completion of the restoration of the engineering control. The report must include all information pertinent to the emergency, potential discharges of contaminants, and restoration measures that were implemented, which, at a minimum, should specify: (a) the nature and likely cause of the emergency, (b) the potential discharges of or

exposures to contaminants, if any, that may have occurred, (c) the measures that have been taken to mitigate the effects of the emergency on human health and the environment, (d) the measures completed or implemented to restore the engineering control, and (e) the changes to the engineering control or site operation and maintenance plan to prevent recurrence of such conditions in the future. Honeywell shall submit the report to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413

8A. MONITORING AND MAINTENANCE OF DEED NOTICE, AND PROTECTIVENESS CERTIFICATION. The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the persons responsible for conducting the remediation, Honeywell, the Owner, and the subsequent owners, lessees, and operators, shall monitor and maintain this Deed Notice. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. Honeywell shall certify to the Department on a biennial basis that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the deed notice shall include all of the following:

i. Monitoring and maintaining this Deed Notice according to the requirements in Article III of the Consent Decree and Exhibit C herein, to ensure that the remedial action that includes the Deed Notice continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes this Deed Notice, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

8B. MONITORING AND MAINTENANCE OF ENGINEERING CONTROLS, AND PROTECTIVENESS CERTIFICATION. Honeywell shall maintain all engineering controls at the Property and certify to the Department on a biennial basis that the remedial action of which each engineering control is a part remains protective of the public health and safety and of the environment. The specific obligations to monitor and maintain the engineering controls shall include the following:

i. Monitoring and maintaining each engineering control according to the requirements in Article III of the Consent Decree, the LTMP, and Exhibit C herein, to ensure that the remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment; and

ii. Conducting any additional remedial investigations and implementing any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, so that the remedial action that includes the engineering control remains protective of the public health and safety and of the environment; and

iii. Certifying to the Department of Environmental Protection the continued protectiveness of the remedial action that includes the engineering control, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the Deed Notice that indicates when the Deed Notice was recorded.

9. ACCESS. The Owner, subsequent owners, lessees, and operators, agree to allow the Department, its agents and representatives access to the Property to inspect and evaluate the continued protectiveness of the remedial action that includes this Deed Notice and to conduct additional remediation to ensure the protection of the public health and safety and of the environment if the persons responsible for monitoring the protectiveness of the remedial action, as described in Paragraph 8, above, fail to conduct such remediation pursuant to this Deed Notice as required by law. The Owner, and the subsequent owners and lessees, shall also cause all leases, subleases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring that all holders thereof provide such access to the Department.

10. NOTICES.

i. Owner shall cause all leases, grants, and other written transfers of an interest in the Property to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. Honeywell or the Owner shall notify any person intending to conduct invasive work or excavate within the Property of the nature and location of contamination and, of the precautions necessary to minimize potential human exposure, and exposure of the environment outside the containment of the engineering controls, to contaminants.

iii. Owner shall provide written notice to the Department of Environmental Protection at least thirty (30) calendar days before the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Property. Any such conveyance, grant or gift must be consistent with the terms of the Consent Decree.

iv. Owner shall provide written notice to the Department within thirty (30) calendar days following the Owner's receiving notice of any petition for a rezoning of the Property. Any such rezoning must be consistent with the terms of the Consent Decree. The Owner shall submit the written notice to:

Department of Environmental Protection
Division of Remediation Management and Response
Bureau of Operation, Maintenance and Monitoring
Deed Notice Inspection Program
P.O. Box 413
401 E. State Street
Trenton, NJ 08625-0413.

11. ENFORCEMENT OF VIOLATIONS.

i. This Deed Notice itself is not intended to create any interest in real estate in favor of the Department of Environmental Protection, nor to create a lien against the Property, but merely is intended to provide notice of certain conditions and restrictions on the Property and to reflect the regulatory and statutory obligations imposed as a conditional remedial action for this Property.

ii. The restrictions provided herein may be enforceable by the Department against any person who violates this Deed Notice. To enforce violations of this Deed Notice, the Department may initiate one or more enforcement actions pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C, and require additional remediation and assess damages pursuant to N.J.S.A. 58:10-23.11, and N.J.S.A. 58:10C.

iii. This Deed Notice as to Tract 2 is also enforceable in the United States District Court for the District of New Jersey by all residents, owners, lessees, and all commercial tenants on Study Areas 6 and 7 pursuant to paragraphs 80 and 83 of the Consent Decree.

12. SEVERABILITY. If any court of competent jurisdiction determines that any provision of this Deed Notice requires modification, such provision shall be deemed to have been modified automatically to conform to such requirements. If a court of competent jurisdiction determines that any provision of this Deed Notice is invalid or unenforceable and the provision is of such a nature that it cannot be modified, the provision shall be deemed deleted from this instrument as if the provision had never been included herein. In either case, the remaining provisions of this Deed Notice shall remain in full force and effect.

13. MODIFICATION AND TERMINATION.

i. Any person may request in writing, at any time, that the Department modify this Deed Notice where performance of subsequent remedial actions, a change of conditions at the Property, or the adoption of revised remediation standards suggest that modification of the Deed Notice would be appropriate, provided that any such modification is consistent with the requirements of the Consent Decree.

ii. Any person may request in writing, at any time, that the Department terminate this Deed Notice because the conditions which triggered the need for this Deed Notice are no longer applicable.

iii. Any person seeking a modification or termination of this Deed Notice must also have such modification approved by the United States District Court for the District of New Jersey pursuant to the Consent Decree until such time as the Consent Decree terminates with regard to the Property pursuant to the Consent Decree.

iv. If the United States District Court for the District of New Jersey and NJDEP have concluded that this Deed Notice shall be modified or terminated, such modification or termination will only be effective upon the filing of a Termination of Deed Notice, available at N.J.A.C. 7:26C Appendix C, with the office of the Register of Deeds of Hudson County, New Jersey, expressly modifying or terminating this Deed Notice.

v. Within thirty (30) calendar days after the filing of a Termination of Deed Notice, the owner of the Property shall apply to the Department for modification or termination of the Soil Remedial Action Permit pursuant to N.J.A.C. 7:26C-7.

vi. This Deed Notice may be modified only if it has first been terminated pursuant to subparagraphs 13v above, and upon filing of a modified Deed Notice, executed by the Owner of the Property, in the office of the Register of Deeds of Hudson County, New Jersey.

14A. EXHIBIT A. Exhibit A includes the following maps of the Property and the vicinity:

i. Exhibit A-1: Vicinity Map - A map that identifies by name the roads, and other important geographical features in the vicinity of the Property;

ii. Exhibit A-2: Metes and Bounds Description - A metes and bounds description of the Property, including reference to tax lot and block numbers for the Property and a Tax Map;

iii. Exhibit A-3: Property Map - A scaled map of the Property, scaled at one inch to 200 feet or less, and if more than one map is submitted, the maps shall be presented as overlays, keyed to a base map; the map(s) shall include diagrams of major surface topographical features such as buildings, roads, and parking lots. After development of the Property, this Deed Notice shall be modified to show topographical features constructed on the Property such as roads, walkways and other hardscape.

14B. EXHIBIT B. Exhibit B includes the following descriptions of the Restricted Areas:

i. Exhibit B-1: Restricted Area Map - Maps for the Property that include, as applicable:

(A) As-built diagrams of each engineering control, including caps, fences, hydraulic barrier walls, ground water monitoring wells, and ground water pumping system;

(B) As-built diagrams of any buildings, roads, parking lots, utility corridors, and other structures that function as engineering controls; and

(C) Designation of all soil and/or sediment sample locations within the restricted areas that exceed any soil or sediment standard that are keyed into one of the tables described below.

ii. Exhibit B-2 (Table B-2): Restricted Area Data Tables - Table for the Property that includes:

(A) Sample location designation from Restricted Area maps (Exhibit B-1);

(B) Sample elevation based upon mean sea level;

(C) Name and chemical abstract service registry number of each contaminant with a concentration that exceeds the unrestricted use standard;

(D) The restricted and unrestricted use standards for each contaminant in the table; and

(E) The remaining concentration of each contaminant at each sample location at each elevation (or if historic fill, include data from the Department's default concentrations at N.J.A.C. 7:26E-4.6, Table 4-2).

14C. EXHIBIT C. Exhibit C includes narrative descriptions of the institutional controls and engineering controls as follows:

i. Exhibit C-1A and B. Exhibit C-1-A: Deed Notice as Institutional Control; Exhibit C-1-B: Consent Decree as Institutional Control (attached): Exhibit C-1 (A and B) includes a narrative description of the restrictions and obligations of this Deed Notice that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
(1) Description and estimated size of the Restricted Areas as described above;
(2) Description of the restrictions on the Property by operation of this Deed Notice and the other Institutional Controls; and
(3) The objective of the restrictions;

(B) Description of the monitoring necessary to determine whether:
(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;
(2) There have been any land use changes subsequent to the filing of this Deed Notice and the other Institutional Controls or the most recent biennial certification, whichever is more recent;
(3) The current land use on the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls;
(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the Property; and

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice and the other Institutional Controls, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice and the other Institutional Controls;

(2) Land use at the Property is consistent with the restrictions in this Deed Notice and the other Institutional Controls; and

(3) The remedial action that includes this Deed Notice and the other Institutional Controls continues to be protective of the public health and safety and of the environment.

ii. Exhibit C-2. Exhibit C-2: Engineering Controls: Clean Fill/Crushed Stone Cover; Exhibit C-2 includes a narrative description of the engineering controls as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) The engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering control; and

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering control continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

15. SIGNATURES. IN WITNESS WHEREOF, Owner has executed this Deed Notice as of the date first written above.

**DESCRIPTION OF PROPERTY**
**CITY OF JERSEY CITY**
**HUDSON COUNTY, NEW JERSEY**
**PROJECT NO. 10000292Q**

**DEED NOTICE AREA 4**
**BLOCK 24601 LOT 1**
**& BLOCK 21901 LOTS 8 & 10**
**APRIL 6, 2016**
**REVISED: JUNE 28, 2017**

All that certain lot, tract or parcel of land situate lying and being in the City of Jersey, in the County of Hudson and State of New Jersey, and being a portion of Lot 1 Block 24601, and a portion of Lot 8 Block 21901, designated as Deed Notice Area 4 as shown on an exhibit entitled, "Deed Notice Area 4, SA6 South, Block 21901, Lot 8, Block 24601, Lot 1, City of Jersey City, Hudson County, New Jersey," prepared by Maser Consulting P.A., dated April 6, 2016, revised June 28, 2017 and being more particularly bounded and described as follows, to wit:

**TRACT I:**

**COMMENCING** at the intersection of the division line between Lots 8 and 10, Block 21901, with the northwesterly line of said Lot 8; thence-

A. **S 59°39'05" E, 23.69 feet**, along said division line to the **True** point of **BEGINNING**, and running; thence-

1. **N 44° 21' 38" E, 6.65 feet,** through a portion of Lot 10, Block 21901; thence-

2. **S 50° 26' 45" E, 40.33 feet,** through said Lot 10 to a point in said division line between Lots 8 and 10, Block 21901; thence-

Running through said Lot 8, Block 21901 the following two (2) courses, as shown on aforementioned exhibit map:

3. **S 45°51'07" W, 569.68 feet**; thence-

4. **S 45°54'51" W, 4.10 feet,** to the division line between Lot 1, Block 24601 and Lot 8, Block 21901; thence-

5. **N 53° 42' 45" W, 40.04 feet,** along said division line; thence –

Running through said Lot 8, Block 21901 the following three (3) courses, as shown on aforementioned exhibit map:

6. **N 45° 37' 13" E, 5.46 feet**; thence –

7. **N 45° 57' 38" E, 511.35 feet**; thence-

8. **N 44° 21' 38" E, 52.57 feet,** to the point and place of **BEGINNING**.

**CONTAINING:** 22,457 S.F. of land more or less or 0.516 acres of land more or less.

**TRACT II:**

**COMMENCING** at the intersection of the division line between Lot 1, Block 24601 and Lot 8, Block 21901, with the northwesterly line of said Lot 8; thence-

A. **S 53° 42' 45" E, 23.85 feet**, along said division line to the **True** point of **BEGINNING**, and running; thence-

1. **S 53° 42' 45" E, 40.04 feet,** along said division line; thence-

Running through said Lot 1, Block 24601 the following ten (10) courses, as shown on aforementioned exhibit map:

2. **S 45°54'51" W, 153.16 feet,** thence –
3. **S 53° 41' 21" E, 12.04 feet**; thence-
4. **S 36° 26' 04" W, 6.50 feet,** thence –
5. **S 38° 36' 29" W, 41.58 feet,** thence –
6. **S 40° 39' 53" W, 9.05 feet,** thence-
7. **N 88° 57' 37" W, 27.39 feet,** thence -
8. **S 26° 56' 10" W, 17.04 feet,** thence -
9. **S 54° 23' 40" W, 30.23 feet,** thence –
10. **N 46° 36' 39" W, 38.87 feet,** thence –
11. **N 45° 37' 13" E, 268.17 feet,** to the point and place of **BEGINNING**.

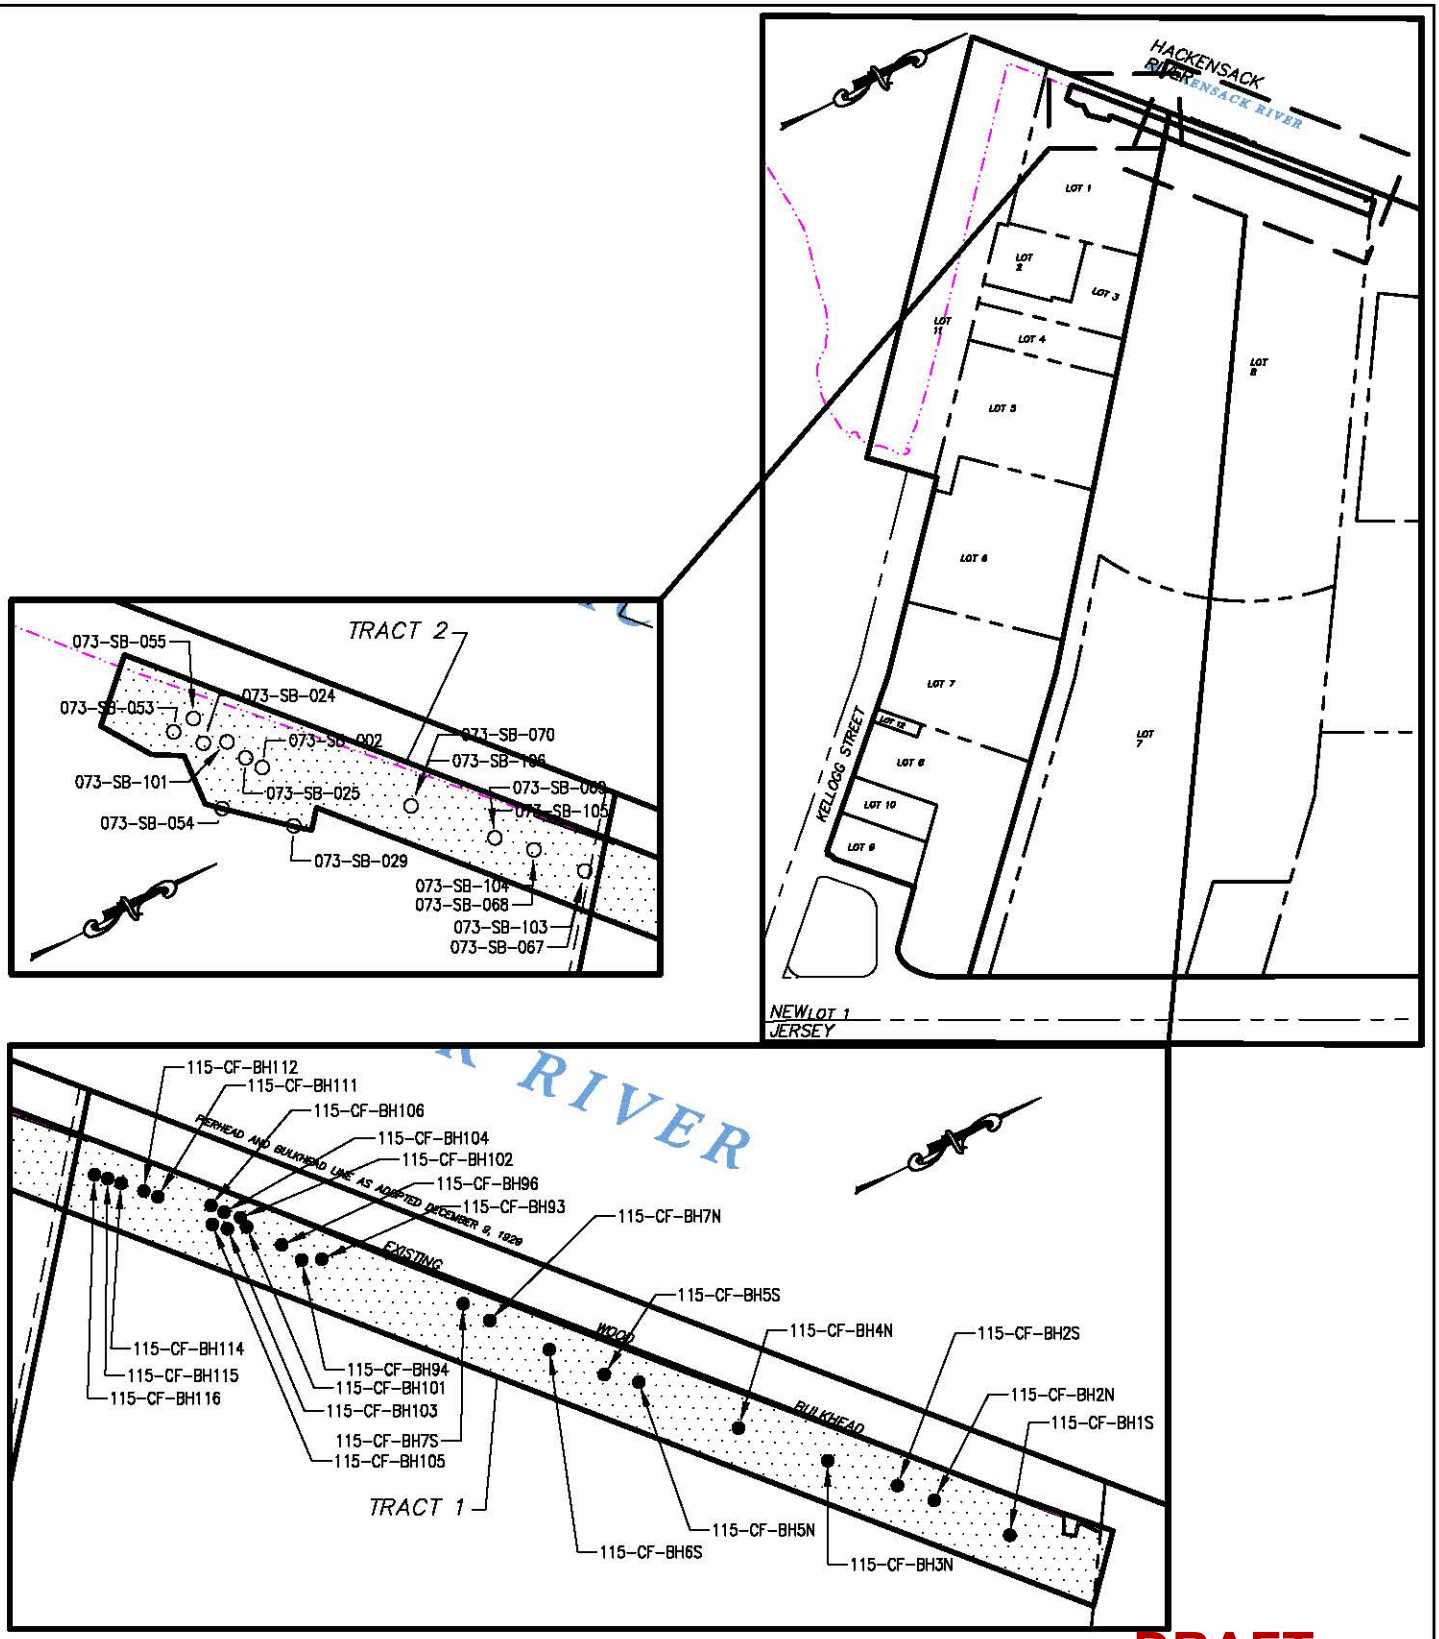
**B-2 Restricted Area Data Table**
**Block 24601, Lot 1 and Block 21901 Lots 8 and 10**
**City of Jersey City, New Jersey**

Exhibit B-1 Restricted Area Maps include Exhibit B-1A (Restricted Area and Soil Sample Locations), Exhibit B-1B (Cap System Details), and Exhibit B-1C (As-Built Restoration Plan).

Exhibit B-2 is a Restricted Area Data Table indicating soil sample locations with concentrations of hexavalent chromium remaining above the level established in the New Jersey Department of Environmental Protection (NJDEP) Chromium Policy of 20 milligrams per kilogram (mg/kg).



**Restricted Area Map Notes:**

Exhibit B-1 indicates the engineering controls for the chromium remedy components. For soils with hexavalent chromium concentrations above 20 mg/kg, the engineering controls include a minimum of 7 to 14 feet of clean soil cover/crushed stone in the Tract 1 area and a minimum 1 foot of clean soil cover plus asphalt in the Tract 2 area.

TYPICAL VEGETATED SLOPE
NTS

NOTE:

1. REFER TO FIGURE 2 FOR CONSTRUCTION CONTROL GRID AND ATTACHED TABLES FOR SURVEY DOCUMENTATION OF 6 INCH GRAVEL HISTORIC FILL CAP INSTALLATION.
2. OPEN SPACE CAP AREA WITHIN LIMITS OF THE BARRIER WALLS IS COVERED WITH CLEAN IMPORTED SOILS TO THE DEPTHS IDENTIFIED IN THE DESIGN. THE VEGETATED SLOPE ON THE DEVELOPMENT AREA IS COVERED WITH A MINIMUM OF 12 INCHES OF CLEAN IMPORTED FILL AS SHOWN ON THE TYPICAL VEGETATED SLOPE DETAIL. THE VEGETATED SLOPE ALONG SA–7 WAS CONSTRUCTED ENTIRELY FROM CLEAN IMPORTED FILL.
3. EXISTING PAVEMENT WAS FIELD INSPECTED BY LSRP AND SUBJECT TO MINOR CRACK FILLING TO SATISFY HISTORIC FILL CAP REQUIREMENTS.
4. STEEL SHEETPILE WALL WAS INSTALLED AS EXCAVATION SUPPORT ALONG THIS AREA AND THEN CUT BELOW CURRENT GRADE AND LEFT IN PLACE. THE TOP OF SHEETPILE IS GENERALLY 0.5 TO 2.0 FT BELOW CURRENT GRADES.

## C-1 Institutional Controls

C-1 Deed Notice, Consent Decree (attached), as Institutional Controls: Exhibit C-1 (A and B) for those portions of Block 24601, Lot 1 and of Block 21901 Lots 8 and 10, City of Jersey City, New Jersey known as Tracts 1 and 2.

Exhibits C-1A and C-1B. Exhibit C-1A: Deed Notice as Institutional Control; Exhibit C-1B: Consent Decree as Institutional Control; Exhibits C-1A and C-1B include a narrative description of the restrictions and obligations of this Deed Notice and the other Institutional Controls that are in addition to those described above, as follows:

(A) General Description of the Institutional Control:
**The Property is comprised of two tracts of land; Tract 1 is on a portion of SA-7 and Tract 2 is on a portion of Site 073 on SA-6 South. Tract 1 is an approximately 22,323 square foot area on SA-7 between the bulkhead and the western hydraulic barrier installed at SA-7. Tract 1 includes the western hydraulic barrier wall of SA-7. Tract 1 is the "Technically Impracticable Area or TI Area" identified in the SA-7 RAR. NJDEP issued a conditional No Further Action letter for SA-7 soils on December 23, 2010, that excludes the TI Area. Soils within Tract 1 do not meet the 20 mg/kg objective in the NJDEP Chromium Policy. Tract 1 soils exceeding 20 mg/kg hexavalent chromium are covered by at least 7 feet of clean soils. Tract 1 will not be remediated by Honeywell; instead the 7-foot thick clean soil cap will remain in place and Tract 1 will be subject to this Deed Notice. Tract 1 also includes two steel sheetpile "wing walls" that project toward the bulkhead from the northern and southern corners of the hydraulic barrier intersections. These wing walls are part of the SA-7 Remedy in that they act to minimize re-contamination of the clean backfill material placed in the TI area from either the north or south. The Riverwalk feature including bulkhead improvements, additional fill soils and hardscape features will be constructed over top of the Tract 1 Deed Notice Area. The provisions of the LTMP, developed pursuant to the Consent Decree, will apply to Tract 1 of the Property.**

**Tract 2 is an approximately 11,689 square foot area adjacent to the bulkhead partially between the western boundary of the SA 6 South western hydraulic barrier wall and the bulkhead and partially south. The 100% Design plan for the Tract 2 area was to excavate the top 4 feet of soils within the area and defer additional excavation below a depth of 4 feet until implementation of the Bayfront Redevelopment Plan when the bulkhead will either be repaired or replaced. Because an approximately 5-foot thick concrete slab was unexpectedly encountered while excavating in this area and because**

**removal of this concrete would jeopardize the integrity of the bulkhead, excavation of residual chromium-impacted soil at any depth in Tract 2 will be coordinated with bulkhead improvement work to be implemented during the Bayfront Redevelopment Project. Tract 2 soils exceeding 20 mg/kg hexavalent chromium are covered by at least 1 foot of clean soils. In the meantime, Honeywell will institute this deed notice on this area which will include both Tracts 1 and 2. Once the remediation of the Tract 2 area is complete and soils in Tract 2 have a hexavalent chromium concentration of less than 20 mg/kg to a depth of 20 feet below ground surface, Honeywell will terminate the deed notice for Tract 2 with approval of the Court and the Department pursuant to Paragraph 13 above. In the meantime, the LTMP, developed pursuant to the Consent Decree, will apply to Tract II of the Property.**

(1) Description and estimated size of the Restricted Areas as described above;

***The Property constitutes a portion of Block 24601, Lot 1 and a portion of Block 21901 Lots 8 and 10. The estimated size of the Area containing chromium-impacted soils (hexavalent chromium above 20 mg/kg) as identified on Exhibit B-1 is estimated at approximately 34,000 square feet or approximately 0.781 acres.***

(2) Description of the restrictions on the Property by operation of the Institutional Control;

***The Property shall only be used for activities consistent with this Deed Notice, the Consent Decree, and the applicable zoning standards. Intrusive activities (i.e., excavation or digging) that breach the engineering controls (as described in Exhibit C-2) will not be permitted on the Property except in compliance with the terms of the Consent Decree and the applicable portions of the LTMP developed thereunder, and this Deed Notice. See subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information. A copy of the LTMP is maintained by Honeywell at 115 Tabor Road, Morris Plains, NJ 07950.***

(3) The objective of the restrictions;

***The restrictions will prohibit contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy Criteria of 20 mg/kg.***

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas resulted in the unacceptable exposure to the soil contamination;

***Visual inspections of the Property and other monitoring as set forth in the Consent Decree and the applicable portions of the LTMP developed thereunder.***

(2) There have been any land use changes subsequent to the filing of this Deed Notice or the most recent biennial certification, whichever is more recent;

***Same as (B)(1*).**

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice;

***Same as (B)(1).***

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the site; and

***Review of newly promulgated or modified requirements of applicable regulations or laws that potentially may apply to the site.***

(5) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***Same as (B)(4)*.**

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) Land use at the Property is consistent with the restrictions in the Consent Decree, this Deed Notice, and the applicable zoning standards; and

(3) The remedial action that includes this Deed Notice continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including evaluation of any available documents as a result of changes in land use or incidents.***
- ***A report that determines whether or not the land use at the Property has remained consistent with the restrictions in the Consent Decree, this Deed Notice*, and *the applicable zoning standards.***
- ***A report that determines whether or not the Deed Notice continues to be protective of the public health and safety and the environment.***

**C-2 Engineering Controls**
**Deed Notice #4 Site 073 and SA-7**
**Portion of Block 24601, Lot 1 and Portion of Block 21901 Lots 8 and 10**
**City of Jersey City, New Jersey**

Exhibits C-2: Narrative description of the Engineering Controls including Clean Fill as follows:

(A) General Description of the engineering controls:

(1) Description of the engineering controls;

***The Engineering Controls consist of the following: The engineering controls for Tract 1 Study Area 7 (Site 115) include a minimum 7 to 14 feet of clean soil cover (crushed stone) and for Tract 2 Study Area 6 South (Site 073) a minimum of 1 foot of clean soil cover plus asphalt pavement as shown on Exhibit B-1.***

(2) The objective of the engineering controls; and

***The objective of the controls is to prevent contact with soils containing hexavalent chromium above the level established in the NJDEP Chromium Policy of 20 mg/kg.***

(3) How the engineering controls are intended to function.

***The soil engineering controls are intended to function as a barrier to underlying and adjacent soils containing hexavalent chromium above 20 mg/kg within the Property. Monitoring requirements for the engineering controls are set forth in the applicable portions of the LTMP.***

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

***Honeywell will perform monitoring by visual inspection of the Property pursuant to the Consent Decree for the portion of the Property that lies within SA-6 South. Other monitoring activities shall be performed as set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

***Same as (B)(1) above.***

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering controls;

***Same as (B)(1) above. Also, see the Consent Decree and subsections 7A Alterations, Improvements, Disturbances, and 7B Emergencies for additional information.***

(4) The engineering controls are being inspected and maintained and their integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

***Same as (B)(1) above.***

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of the engineering controls. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/performance of the engineering controls; and

***Records of the inspections are to be maintained as listed in (5). Other monitoring activities shall be performed as set forth in the applicable portions of the LTMP developed pursuant to the Consent Decree.***

(6) Any new standards, regulations, or laws apply to the Property that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling; and

***A review of any new standards, regulations, or laws will be conducted. Should the review indicate that other activities are necessary, those activities will be listed and executed.***

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continues to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

***The monitoring report will be included in the biennial certification. Components of the monitoring report will include the following:***

- ***A report of all conditions set forth in sections (A) and (B) above to assure that they have been adhered to, including an evaluation to determine whether or not the engineering controls are continuing to meet the original objective and intended function.***
- ***A report to determine whether or not the engineering controls continue to operate as designed.***
  ***A report to determine whether or not the engineering controls continue to be protective of the public health and safety and of the environment.***

91. Chromium Remedy Letter of Credit ..... 55
92. Procedures for Review of the Proposed Chromium Remedy Letter of Credit ..... 56
93. Automatic Renewal. ..... 56
94. Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit ..... 57
95. Bankruptcy Protection. ..... 58
96. Exclusive Court Jurisdiction. ..... 58
97. Application of New York Law. ..... 59
98. Procedures upon Honeywell's Material Default of Its Obligations ..... 59
99. Placement of Proceeds in Court Registry Investment System Account. ..... 60
100. Termination of Chromium Remedy Letter of Credit ..... 61
K. LONG-TERM FINANCIAL ASSURANCES ..... 61
101. Long-Term Financial Assurances. ..... 61
102. Costs Subject to Long-Term Financial Assurances. ..... 61
103. Long-Term Financial Assurance Mechanisms ..... 62
104. Procedures for Review of the Proposed Long-Term Financial Assurances ..... 66
105. Temporary Maintenance of Chromium Remedy Letter of Credit. ..... 66
106. Adjustment of Amount Held in Long-Term Financial Assurances. ..... 67
107. Exclusive Court Jurisdiction. ..... 68
108. Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired: ..... 68
109. Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default ..... 69
110. Use of the Trust Fund in the Event of Honeywell's Default. ..... 70
111. Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109. ..... 70
112. Termination of the Long-Term Financial Assurances. ..... 70

**ARTICLE IV: TERMINATION** ..... 71

113. Termination of this Consent Decree ..... 71
114. Procedures for Withdrawal and Termination. ..... 72
115. Good-Faith Obligation to Avoid Termination ..... 72
116. Effect of Termination. ..... 72

**ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC** ..... 72

117. Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC. ..... 72

**ARTICLE VI: NOTICE** ..... 73

118. Notice ..... 73
119. Payment of Past Fees and Expenses ..... 74
120. Future Fees and Expenses. ..... 75

**ARTICLE VIII: MISCELLANEOUS PROVISIONS** ..... 76

121. Force Majeure. ..... 76
122. Bayfront Redevelopment LLC as a Party. ..... 76
123. Successors and Assigns. ..... 77
124. Successors to Hackensack Riverkeeper, Inc.. ..... 77
125. Reservation of Rights and Claims. ..... 77
126. Governing Law and Continuing Jurisdiction. ..... 77
127. Construction. ..... 78
128. Authority to Enter into Agreement. ..... 78
129. Measures to Effectuate This Consent Decree ..... 78
130. Modifications. ..... 78
131. Severability. ..... 78
132. Signatures. ..... 79

## RECITALS

**Whereas,** on June 30, 2003, the district court for the District of New Jersey (hereafter "the Court") issued a Final Judgment in *Interfaith Community Organization v. Honeywell International Inc.*, Civ. No. 95-2097 (DMC) (*"ICO v. Honeywell"*), ordering the remediation of an area designated by the New Jersey Department of Environmental Protection ("NJDEP") as Study Area 7 by excavation of all chromium contamination on the property, under the oversight of a court-appointed Special Master;

**Whereas**, on or about December 23, 2005, the Jersey City Municipal Utilities Authority ("JCMUA") filed litigation styled *Jersey City Municipal Utilities Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5955 (DMC), bringing claims against Honeywell International Inc. ("Honeywell") under, *inter alia*, Section 6972 of the Resource Conservation and Recovery Act ("RCRA"), and seeking remediation of chromium contamination on property then-owned by JCMUA and other relief;

**Whereas**, on or about December 28, 2005, the Jersey City Incinerator Authority ("JCIA") filed litigation styled *Jersey City Incinerator Authority v. Honeywell International Inc.,* D.N.J., Civ. No. 05-5993 (DMC), bringing claims against Honeywell under, *inter alia*, Section 6972 of RCRA, and seeking remediation of chromium contamination on property then-owned by JCIA and other relief;

**Whereas**, on or about January 4, 2006, the Hackensack Riverkeeper, Inc., Captain William Sheehan, Reverend Winston Clarke, and Lawrence Baker ("Riverkeeper") filed litigation styled *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.,* D.N.J., Civ. No. 06-022 (DMC), bringing a claim against Honeywell under RCRA and seeking remediation of chromium contamination to soils, groundwater, surface waters, and sediments associated with

various properties collectively designated by NJDEP as Study Areas 5, 6 North, which includes the properties formerly owned by JCMUA and JCIA, and 6 South;

**Whereas,** Study Areas 6 North and South are directly adjacent to Study Area 7 on the north and south sides, respectively;

**Whereas,** Study Area 5 is comprised of properties to the east of Study Areas 6 North, 6 South, and 7 across Route 440;

**Whereas,** Riverkeeper also named as defendants in *Riverkeeper v. Honeywell* owners of the properties comprising Study Areas 5, 6 South, and 6 North;

**Whereas,** *JCMUA v. Honeywell*, *JCIA v. Honeywell,* and *Riverkeeper v. Honeywell* were consolidated by the Court (hereinafter the "Consolidated Litigation");

**Whereas,** in the Consolidated Litigation, Riverkeeper has alleged that Honeywell bears responsibility for the presence and remediation of chromite ore processing residue ("COPR") and chromium in soils and groundwater on the Study Area 6 South property;

**Whereas,** on April 21, 2008, the Court entered the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North (hereafter "the Study Area 6 North Consent Decree") resolving issues between Honeywell, Riverkeeper, and the Jersey City Entities related to chromium contamination at Study Area 6 North;

**Whereas**, on April 21, 2008, the district court for the District of New Jersey entered the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. (hereafter "Jersey City/Honeywell Consent Order"), filed in the Consolidated Litigation simultaneously with the Study Area 6 North Decree, which resolved claims and cross-claims between Honeywell and the Jersey City Entities;

**Whereas**, on May 28, 2008, the Court entered the Consent Order on Sediment Remediation and Financial Assurances ("Sediment Consent Order"), resolving issues related to the remediation of chromium contaminated sediments in the Hackensack River in the vicinity of Study Areas 5, 6, and 7;

**Whereas**, on September 3, 2008, the Court entered the Deep Overburden and Bedrock Groundwater Remedies Consent Order (hereafter "the Deep Groundwater Consent Order") resolving all issues related to the remediation of deep overburden and bedrock groundwater in both *ICO v. Honeywell* and the Consolidated Litigation;

**Whereas,** on May 13, 2011, Plaintiffs sent Honeywell a RCRA citizen action suit notice letter with respect to Site 163, and the Parties agree that the incorporation of Site 163 into this Consent Decree resolves any claims asserted, or that could have been asserted, in the RCRA notice letter or in any RCRA citizen suit with respect to Site 163;

**Whereas**, the Parties to this Consent Decree each believe that it is in their mutual interest to move forward productively to resolve their differences so that they can implement environmental remediation at Study Area 6 South that ensures the continued protection of human health and the environment and so that Study Area 6 and Study Area 7 can be redeveloped in keeping with Jersey City's vision for a revitalized West Side;

**Whereas,** the Local Redevelopment and Housing Law, N.J.S.A. 40A:12A-1, *et seq.*, as amended and supplemented (the "Redevelopment Law") provides for municipalities to participate in the redevelopment and improvement of areas in need of redevelopment;

**Whereas**, Study Area 6 and Study Area 7 consist of parcels which by ordinance adopted by the City Council of Jersey City on February 27, 2008, have been determined to be "areas in

need of redevelopment" under the criteria of the Redevelopment Law because of conditions prevalent on those parcels;

**Whereas**, the settlement which is the subject matter of this Consent Decree contemplates the environmental remediation of Study Area 6 South and redevelopment of the parcels that comprise Study Areas 6 and 7 to create a major mixed use project in an important section of Jersey City; and

**Whereas**, each of the actions to implement this Consent Decree have been fully considered by the Honeywell, the Riverkeeper, and Jersey City as a means to accomplish the aforesaid purposes of this settlement:

NOW, THEREFORE, IT IS HEREBY ORDERED AND DECREED AS FOLLOWS:

## ARTICLE I: DEFINITIONS

For purposes of this Consent Decree, the following terms shall have the meanings set forth in this Article:

1. **"20 to 1000 Soils"** shall mean those soils containing less than 1000 mg/kg of hexavalent chromium, but greater than 20 mg/kg. **"20 to 240 Soils"** shall mean those soils containing less than 240 mg/kg of hexavalent chromium, but greater than 20 mg/kg.

2. **Bayfront Redevelopment LLC** shall have the meaning set forth in paragraph 4.1 of the Jersey City/Honeywell Consent Order.

3. **COPR** shall mean Chromite Ore Processing Residue.

4. **Chromium Remedy or Chromium Remediation** shall mean the remedy set forth in Article III.

5. **Consolidated Litigation** shall mean *Jersey City Municipal Utility Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5955 (DMC), *Jersey City Incinerator*

*Authority v. Honeywell International Inc.*, D.N.J., Civ. No. 05-5993 (DMC), and *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-022 (DMC).

6. The **Court** shall mean the United States District Court of the District of New Jersey, which has jurisdiction over the Consolidated Litigation.

7. **Deep Groundwater Consent Order** shall mean the Deep Overburden and Bedrock Groundwater Remedies Consent Order entered by the Court on September 3, 2008, in both *ICO v. Honeywell* and the Consolidated Litigation.

8. **Deep Groundwater Remedy** shall mean the deep overburden and bedrock groundwater pump and treat remedy as required by the Order Approving the Deep Overburden Groundwater Remediation, entered on October 6, 2006, the Stipulation on Consent Regarding the Schedule for Implementation of Deep Groundwater Remedial Actions, entered on August 15, 2008, in *ICO v. Honeywell,* and the remedies required under the Deep Groundwater Consent Order.

9. **Development Area of Concern** ("AOC") shall mean those portions of Study Area 6 South in which the hexavalent chromium concentration in the top 20 feet of soil below ground surfaces exceeds a concentration of 20 mg/kg, and for which future uses of the property may include commercial or residential development. The Open Space AOC shall not be part of the Development AOC and vice versa. The Development AOC consists of two parts: the Kellogg Street Development AOC and the Site 163 Development AOC. Collectively, the two parts shall be referred to as the "Development AOC." The approximate boundaries of the Development AOC as a whole and its two parts are shown on Exhibit A, but the boundaries may be further defined in the implementation of the Chromium Remedy. For the Kellogg Street Development AOC, remedial measures shall assume only a residential use. For the Site 163 Development AOC, remedial measures shall be implemented with the goal of unrestricted use, but limitations

on future uses (including prohibiting residential use) in some or all of the Site 163 Development AOC may be part of the remedy as set forth in paragraph 61.

10. **Hackensack River Watershed Land Trust** shall mean the dedicated fund of the Hackensack Riverkeeper, Inc., established under Section 501(c) of the Internal Revenue Code for the purpose of acquiring and preserving open space within the Hackensack River watershed and administered by the Board of Trustees of the Hackensack Riverkeeper, Inc.

11. **Honeywell** shall mean Honeywell International Inc. and its affiliates, including 425-445 Route 440 Property LLC, Kellogg Street 80 Property LLC, Kellogg Street 60 Property LLC, and Kellogg Street/440 Property LLC.

12. **Honeywell's Treatment Plant** shall mean the treatment plant currently located at 80 Kellogg Street that is used to treat, *inter alia*, chromium contaminated groundwater.

13. ***ICO v. Honeywell*** shall mean *Interfaith Community Organization v. Honeywell International Inc.*, D.N.J., Civ. No. 95-2097 (DMC).

14. **Including** shall mean including, but not limited to.

15. **JCIA** shall mean the Jersey City Incinerator Authority.

16. **JCMUA** shall mean the Jersey City Municipal Utilities Authority.

17. **Jersey City Entities** shall mean the City of Jersey City, including the Department of Public Works ("DPW") and other agencies and branches thereof, the JCIA, and the JCMUA.

18. **Jersey City/Honeywell Consent Order** shall mean the Settlement Consent Order by and between the Jersey City Entities and Honeywell International Inc. entered in the Consolidated Litigation on April 21, 2008.

19. **"L-Well Groundwater"** shall mean the groundwater found at the depth of the "L" wells on and near the former bowling alley property, NJDEP Site 124, located at 427 Route 440. The L-Well Groundwater is located within what has been referred to as the plume diversion area.

20. **NJDEP** shall mean the New Jersey Department of Environmental Protection.

21. **NJDEP Chromium Directive** shall mean the Chromium Directive issued by NJDEP on February 8, 2007, and attached as Exhibit B.

22. **Open Space AOC** shall mean the portion of Study Area 6 South that is identified as The Promenade park and Grand Boulevard extending from Route 440 to the Hackensack River on page 39 of the Redevelopment Plan and for which the future uses of the property shall be restricted pursuant to paragraph 74, following remediation pursuant to paragraph 65. The Development AOC shall not be part of the Open Space AOC and vice versa. The approximate boundaries of the Open Space AOC are shown on Exhibit A, and the boundaries may be further defined in the implementation of the Chromium Remedy.

23. **Party or Parties** shall mean any one or all of the signatories to this Consent Decree.

24. **RCRA** shall mean the Resource Conservation and Recovery Act, 42 U.S.C. § 6901, *et seq.*, as amended.

25. **Redevelopment Area** shall mean Study Area 6 North, Study Area 6 South, and Study Area 7, collectively.

26. **Redevelopment Law** shall mean the New Jersey Local Redevelopment and Housing Law, N.J.S.A. § 40A:12A1, *et seq.*, as amended and supplemented.

27. **Redevelopment Plan** shall mean the Bayfront I Redevelopment Plan as adopted by Jersey City on March 12, 2008.

28. **Remedial Investigation Work Plan Addendum or RIWP Addendum** shall mean the "Remedial Investigation Work Plan Addendum Study Area 6 South" submitted to NJDEP on June 27, 2008.

29. **Riverkeeper** shall mean the plaintiffs in *Hackensack Riverkeeper, Inc. v. Honeywell International Inc.*, D.N.J., Civ. No. 06-22 (DMC), and includes the Hackensack Riverkeeper, Inc., William Sheehan, Reverend Winston Clarke, and Lawrence Baker.

30. **Sediment Consent Order** shall mean the Consent Order on Sediment Remediation and Financial Assurances, entered by the Court in *ICO v. Honeywell* and this Consolidated Litigation on May 28, 2008.

31. **Shallow Groundwater** or **Shallow Level of Groundwater** shall mean groundwater above the meadow mat, groundwater at stratigraphically equivalent depths in locations where there is no meadow mat, and groundwater that is contaminated by recent contact with COPR or other chromium soil contamination above the meadow mat and subsequently flows downward through or past the meadow mat into the upper portion of the lacustrine sediments. This does not include groundwater found in the bedrock, the deep zone, or any plume of contamination that is in both the intermediate and deep zones, as those zones are defined in the Final Groundwater Investigation Report, prepared in *ICO v. Honeywell*, dated February 2007, p. 1-2.

32. **Site** shall mean Study Area 6 South.

33. **Site Preparation Activities** shall mean those activities necessary to begin implementation of the Chromium Remedy in Article III of this Consent Decree, including, if appropriate, the temporary or permanent relocation of current activities and operations conducted on Study Area 6 South.

34. **Soil** shall mean soils, historic fill, and/or COPR.

35. The **Special Master** shall mean Senator Robert G. Torricelli, appointed as the Special Master in *ICO v. Honeywell* and the Consolidated Litigation, and his successors or whomever the Court may appoint as Special Master.

36. **Stratum O** shall mean the layer composed of soft brown silty fine sand interlayered with soft gray silty clay and fine sandy to clayey silt generally located above the meadow mat below the Historic Fill and/or COPR.

37. **Study Area 5** shall mean that property comprising Sites 79, 90, 117, 153, and 184 of the Chromate Chemical Production Waste Sites designated by NJDEP, comprising approximately 42 acres and including (a) all such property owned by Bob Ciasulli consisting of Block 1291, Lot 76, and Block 1292, Lots 1F, 47, 48, 53, and 54PL, located at 540 Route 440, Jersey City, New Jersey, (b) all such property owned by Elisabeth and Rafael Rosario consisting of Block 1292, Lot 49, located at 93 Fisk Street, Jersey City, New Jersey, (c) all such property owned by Michael Vo consisting of Block 1292, Lot 50, located at 95 Fisk Street, Jersey City, New Jersey, (d) all such property owned by NJCU consisting of Block 1286, Lots 5 and 6D and Block 1286.5, Lots 1 and 2, Jersey City, New Jersey, (e) all such property owned by Inland Southeast Jersey City LLC consisting of Lot 1, Block 1285.5 located at 440 Route 440, Jersey City, New Jersey, and (f) all such property owned by 425/445 Route 440 Property LLC, consisting of Block 1289.5, Lot E, Jersey City, New Jersey.

38. **Study Area 6 North** shall mean the property comprising Sites 87 and 88 of the Chromate Chemical Production Waste Sites designated by NJDEP, which is subject to the Study Area 6 North Consent Decree.

39. **Study Area 6 North Consent Decree** shall mean the Consent Decree and Order Regarding Remediation and Redevelopment of Study Area 6 North, entered by the Court on April 21, 2008, in the Consolidated Litigation.

40. **Study Area 6 South** shall mean (a) that property currently owned by Bayfront Redevelopment Property LLC consisting of Site 73, located at 200 Kellogg Street Jersey City, Hudson County, New Jersey; (b) that property currently owned by Bayfront Redevelopment LLC consisting of Site 134, located at 100 Kellogg Street Jersey City, Hudson County, New Jersey; (c) that property currently owned by Bayfront Redevelopment LLC consisting of Site 140 located at 80 Kellogg Street Jersey City, Hudson County, New Jersey; (d) that property currently owned by Bayfront Redevelopment LLC consisting of Site 125, located at 60 Kellogg Street Jersey City, Hudson County, New Jersey; (e) that property currently owned by Bayfront Redevelopment LLC consisting of Site 124, Jersey City, Hudson County, New Jersey; (f) that property currently owned by Kellogg St/Harsimus Cove Realty located at 150 Kellogg Street, Jersey City, Hudson County, New Jersey, (g) that property currently owned by Bayfront Redevelopment LLC located at 38 Kellogg Street, Jersey City, Hudson County, New Jersey; (h) that property currently owned by Bayfront Redevelopment LLC located at 28 Kellogg Street, Jersey City, Hudson County, New Jersey; and (i) that property currently owned by Bayfront Redevelopment LLC, consisting of Site 163, formerly the Colonial Concrete Company, located at 75 Kellogg Street in Jersey City, Hudson County, New Jersey.

41. **Study Area 6** shall mean Study Area 6 North and Study Area 6 South, collectively.

42. **Study Area 7** shall mean (a) that property currently owned by Bayfront Redevelopment LLC located at 425 and 445 Route 440, Jersey City, Hudson County, New Jersey, and (b) that

property currently owned by Bayfront Redevelopment LLC located at 465 Route 440, Jersey City, Hudson County, New Jersey.

43. **Technical Requirements for Site Remediation** shall mean the NJDEP Technical Requirements for Site Remediation, N.J.A.C. Chapter 26E, as duly and properly promulgated and amended.

44. **Unrestricted Use** shall mean that the contaminated medium is restored to a condition or quality suitable for all uses.

## ARTICLE II: SCOPE OF THE CONSENT DECREE, JURISDICTION, AND CLAIMS RESOLVED

45. This Court has jurisdiction over the Parties and subject matter of the Consolidated Litigation pursuant to Section 6972 of RCRA.

46. For purposes of this Consent Decree, the Riverkeeper Complaint in the Consolidated Litigation states claims upon which relief may be granted against Honeywell.

47. In the event that this Decree is not terminated by one or more Parties pursuant to paragraph 113, this Consent Decree resolves, settles, and satisfies all claims by Riverkeeper against Honeywell with respect to soils, shallow groundwater and L-Well groundwater at Study Area 6 South. This Consent Decree does not resolve any claims by Riverkeeper against Honeywell with respect to Study Area 5 or property owned by Regnal Realty consisting of Block 1288.2, lot 1, located at 420 Route 440, Jersey City, New Jersey.

48. Nothing in this Consent Decree shall be construed or interpreted to waive any claim or defense any Party has asserted or may assert against any third party in the Consolidated Litigation except as explicitly stated herein.

49. This Consent Decree does not constitute an admission of liability on the part of any Party with respect to any claims, cross-claims, or counter-claims in the Consolidated Litigation.

## ARTICLE III: CHROMIUM REMEDIATION

### A. General Terms and Requirements

50. **Responsibility for Implementation of Chromium Remediation.** As between the Parties, Honeywell shall be responsible for and shall undertake remediation of COPR and chromium present in Study Area 6 South at Honeywell's sole cost and expense. Remediation of COPR and chromium present in Study Area 6 South shall be undertaken in accordance with the terms of this Consent Decree.

51. **Designation of Chromium Areas of Concern.** For the purposes of remediation, Study Area 6 South shall consist of two AOC's, designated as the Open Space AOC and the Development AOC as shown approximately on Exhibit A. The exact boundaries of the two AOC's shall be subject to further delineation during the design and implementation of the Chromium Remedy.

52. **Consistency of the Chromium Remedy with NJDEP Guidance and Remedial Action Work Plan.** The Chromium Remedy shall be consistent with the NJDEP Technical Requirements for Site Remediation, the Chromium Directive as issued by NJDEP on February 8, 2007 ("the NJDEP Chromium Directive"), and any Remedial Action Work Plan, including any modifications or addenda approved by NJDEP. Prior to submitting any Remedial Action Work Plan, Honeywell shall take all reasonable steps to ensure that the plan is consistent with the Chromium Remedy. However, this Consent Decree shall have precedence over any Remedial Action Work Plan in the event of any inconsistency. The approved Remedial Action Work Plan is a minimum standard, and the Chromium Remedy may be more protective than the remedy NJDEP approves.

53. **General Scope of the Chromium Remedy.** The Chromium Remedy shall address shallow groundwater and L-Well groundwater containing total chromium concentrations of 70 µg/l or greater and soil containing hexavalent chromium at concentrations of 20 mg/kg or greater within the top 20 feet of soil below the ground surface, and shall be consistent with the requirements set forth in this Article. The Chromium Remedy set forth in this Consent Decree addresses only the shallow and L-Well levels of groundwater (see paragraphs 69 - 72). The deep overburden and bedrock groundwater remediation, including source control, is addressed in the Deep Groundwater Consent Order.

54. **Development of a Schedule for the Chromium Remedy.** The Chromium Remedy shall be carried out diligently, and the development and implementation of any remedy required by NJDEP for non-chromium contamination shall not delay satisfaction of the milestones in the Schedule established pursuant to this paragraph. Within 90 days of entry of this Consent Decree, Honeywell shall propose a Master Schedule for the implementation of the Chromium Remedy .

(a) The Master Schedule shall incorporate the following dates:

(i) No later than August 15, 2008, Honeywell shall submit a Chromium Impacted Soils Pilot Test Work Plan to NJDEP and Riverkeeper;

(ii) No later than September 15, 2008, Honeywell shall complete field work in accordance with the RIWP Addendum;

(iii)No later than December 31, 2008, Honeywell shall submit an Initial Treatment Study Report and Remedial Action Work Plan pursuant to paragraph 86(c);

(iv) No later than July 31, 2012, Honeywell shall submit the soil and groundwater data from its 2010 and 2011 supplemental investigation of Site 163, a brief summary report, and

a designation of the boundaries of the Site 163 Development AOC to the Special Master pursuant to paragraph 86(c);

(v) No later than October 1, 2012, Honeywell shall submit an addendum to the Study Area 6 South 100% Design setting forth the 100% Design for the Site 163 Development AOC portion of the Study Area 6 South Chromium Remedy; and

(vi) Honeywell shall undertake, in good faith, to begin implementation of the Chromium Remedy by March 1, 2013.

(b) In addition, the Master Schedule shall propose deadlines for the following milestones:

(i) Submission of all documents subject to submission and review pursuant to paragraph 86(c);

(ii) Completion of those Site Preparation Activities necessary for the implementation of the Chromium Remedy;

(iii)Submission, following implementation of the soil components of the Chromium Remedy for the Development AOC, of the groundwater plans and reports required by paragraphs 70 and 72;

(iv)Completion of additional sampling for shallow groundwater delineation pursuant to paragraph 71 and a proposal for a remedy pursuant to paragraph 71, if needed;

(v) The submission of a 50% Design Report for the Chromium Remedy;

(vi) The submission of a 100% Design Report for the Chromium Remedy;

(vii) The date for completion of the installation of the Chromium Remedy;

(viii)Implementation of the long-term protections of the Open Space AOC established pursuant to paragraph 74; and

(ix) Transfer of the Open Space AOC to Jersey City pursuant to paragraph 74(a)(iii).

### B. Initial Chromium Remedy Steps: Delineation, Treatment Study, and Remedial Action Work Plan

55. **Delineation of Development AOC.** Honeywell shall conduct further soil sampling on Study Area 6 South in accordance with the RIWP Addendum. In addition to the locations set forth in the RIWP Addendum, Honeywell shall conduct further soil sampling pursuant to the provisions of the RIWP Addendum at the boring locations set forth in Exhibit E. Upon completion of the soil sampling required by this paragraph, Honeywell shall submit a Second Supplemental Remedial Investigation Report that sets forth the results of the sampling and Honeywell's proposal as to the delineation of the Development AOC. In conjunction with its proposal, Honeywell shall set forth its rationale as to whether prior sampling data should be included or excluded in the proposed delineation. The soil sampling and submission of a Second Supplemental Remedial Investigation Report shall be completed in accordance with the Schedule set forth in paragraph 54. Honeywell shall submit the Second Supplemental Remedial Investigation Report pursuant to paragraph 86(c). The Site 163 Development AOC shall be exempt from the requirements of paragraphs 55-58.

56. **Conduct of a Treatment Study in the Development AOC.** Honeywell shall conduct a field study of the efficacy of *in situ* treatment of 20 to 1000 Soils in accordance with the Chromium Impacted Soil Pilot Test Work Plan. The purpose of the pilot test shall be to evaluate whether *in situ* chemical treatment of 20 to 1000 Soils with one or more reductants can result in the permanent establishment of hexavalent chromium concentrations below 20 mg/kg under conditions in those areas of the Development AOC that may be subject to treatment as a remedy. Honeywell shall provide the raw data from the pilot test to NJDEP and Riverkeeper in scientifically useable electronic form as soon as the data become available. Honeywell shall

submit an Initial Treatment Study Report setting forth the initial results of the pilot test pursuant to paragraph 86(c) .

57. **Continued Monitoring of the Treatment Study.** As the result of the need to complete Study Area 7 remediation, to maintain Study Area 7 remediation support operations currently located on Study Area 6 South, and to conduct Site Preparation activities including the relocation of operating businesses on Study Area 6 South in advance of implementation of the Chromium Remedy, the Parties do not anticipate that implementation of field work for the Chromium Remedy will begin until March 1, 2013. Honeywell shall continue to monitor the performance of the pilot test and shall submit a Final Treatment Study Monitoring Report assessing the long term effectiveness of treatment for 20 to 1000 Soils in the Development AOC pursuant to paragraph 86(c) no later than December 31, 2011.

58. **Submission of a Remedial Action Work Plan.** On or before December 31, 2008, Honeywell shall submit a Remedial Action Work Plan for the Chromium Remedy pursuant to paragraph 86(c). The Remedial Action Work Plan shall be consistent with the Chromium Remedy set forth in this Consent Decree.

### C. Development AOC Soil Remedy

59. **Remedial Components.** In the Development AOC, soils containing hexavalent chromium at concentrations greater than 20 mg/kg shall be remediated as follows:

(a) Soils with a concentration greater than 1000 mg/kg shall be:

(i) Excavated and disposed of off-site at a waste disposal facility licensed to accept such waste; or

(ii) Treated *ex situ* and consolidated under the cap in the Open Space AOC provided the requirements of paragraphs 60 and 63 are satisfied and provided that such soils do not

require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a).

(b) 20 to 1000 Soils shall be:

(i) Excavated and consolidated within the Open Space AOC provided that such soils do not require venting of gases and do not serve as the basis for gas venting as set forth in paragraph 65(a); or

(ii) Excavated and disposed of off-site pursuant to the requirements of paragraph 59(a); or

(iii) Remediated pursuant to paragraphs 59(c) or 59(d) provided that such soils are also 20 to 240 soils and meet the requirements of paragraphs 59(c) or 59(d).

(c) 20 to 240 Soils may be remediated by excavation and consolidation within the Study Area 6 North AOC 1 Open Space Area, provided that such soils do not require venting of gases and shall not serve as the basis for the inclusion of gas venting as part of the Study Area 6 North AOC 1 Open Space Area remedy.

(d) 20 to 240 Soils within the Site 163 Development AOC may be remediated by *in situ* treatment, provided the requirements of paragraph 61 are satisfied.

60. **Treatment and Consolidation of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** *Ex situ* treatment and consolidation under the Open Space AOC cap may be used as a remedial component for soils containing greater than 1000 mg/kg hexavalent chromium provided that the requirements of this paragraph are satisfied:

(a) Honeywell demonstrates in the Final Treatment Study Monitoring Report that the proposed treatment will likely result in the reduction of the hexavalent chromium concentration of the treated soils such that the post-treatment total chromium concentration shown by Toxicity

Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C);

(b) Following a review of the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d), NJDEP agrees that Honeywell has made the demonstration required by paragraph 60(a).

(c) Plaintiffs have had an opportunity to review and comment on the demonstration required by paragraph 60(a) pursuant to the NJDEP review process set forth in paragraph 86(d)and pursuant to the Special Master review process set forth in paragraphs 86(e)-86(f); and

(d) Following review of the demonstration required by paragraph 60(a) pursuant to the Special Master review process set forth in paragraph 86(f), the Special Master issues a recommendation finding that Honeywell has made the demonstration required by paragraph 60(a) or the Court finds that Honeywell has made the demonstration required by paragraph 60(a) in the event that any Party seeks the Court's review of the Special Master's recommendations under this paragraph.

61. **Treatment as a Remedial Component for 20 to 240 Soils.** *In situ* treatment may be used as a remedial component for the 20 to 240 Soils in the Site 163 Development ACO, provided that such soils are 3 feet or more below ground surface and the requirements of this paragraph are satisfied:

(a) If Honeywell elects to treat *in situ* 20 to 240 Soils in the Site 163 Development AOC, Honeywell shall include in the 100% Design Addendum for Site 163 a plan for such treatment. Such treatment plan shall be comparable in detail and approach to the pipeline treatability plan which is Appendix F to the Study Area 6 North 100% Design. The goal of such *in situ* treatment

shall be to reduce hexavalent chromium soil concentrations to less than 20 mg/kg in soils 20 feet or less below ground surface;

(b) Three years after conducting the treatment set forth in subparagraph (a), Honeywell shall collect additional soil samples in the treated areas to evaluate the success of the treatment. These soil samples shall be analyzed for EH, pH, hexavalent chromium (using EPA/NJDEP Methods 3060A/7199), and sulfides (using EPA Method 9030B). Within 60 days of its receipt of the final data from such sampling, Honeywell shall submit a report with such data to the Special Master pursuant to paragraph 86(c);

(c) In the event that the sampling pursuant to subparagraph (b) shows that soils with greater than 20 mg/kg hexavalent chromium remain or that excess treatment reductant remains present, Honeywell may elect to pursue one or more of the following approaches after providing notice to the Special Master, Riverkeeper and the Jersey City Entities;

(i) In the case of excess treatment reductant remaining in the soil, continue to monitor such areas pursuant to subparagraph (b) until the excess reductant is no longer present;

(ii) In the case of soils with greater than 20 mg/kg hexavalent chromium:

(1) Excavate such soils and consolidate them under the cap in the Open Space AOC, consolidate them under the cap in the Study Area 6 North AOC 1 Open Space Area, and/or dispose of them off-site provided that in each instance the applicable requirements of paragraph 59 are satisfied;

(2) Conduct further *in situ* treatment using additional treatment reductant and submit a monitoring plan pursuant to paragraph 64; or

(3) In the event that the soils are within the areas depicted as River Front Park, Riverfront Drive or Kellogg Street on page 39 of the Redevelopment Plan, cover the affected

soils with a road, walkway, and/or other hardscape and restrict the use of that area through each of the following institutional controls:

(a) Issuance and recording of a conservation restriction comparable to that required under paragraphs 74(b) and 74(d);

(b) Transfer of title to that area to Jersey City pursuant to paragraphs 74(a)(iii) through 74(a)(iv)(2); and

(c) Issuance and recording of a deed notice comparable to that required under paragraphs 74(c) and 74(d).

62. **Submissions Related to Site 163.** Pursuant to the Schedule, Honeywell shall prepare and submit the following with regard to Site 163:

(a) A summary report of all chromium soil and groundwater data collected during site investigations in 2010 and 2011; and

(b) An addendum incorporating Site 163 into the 100% Design.

63. **Post-Treatment Analysis of Soils Containing Greater than 1000 mg/kg Hexavalent Chromium.** In the event that *ex situ* treatment is used as a final remedy for any portion of the soils containing greater than 1000 mg/kg pursuant to paragraph 59(a)(ii), Honeywell shall conduct post-treatment analysis of each treated batch of soil to demonstrate that the treatment has resulted in the reduction of the hexavalent chromium concentration such that the post-treatment total chromium concentration shown by Toxicity Characteristic Leaching Procedure SW-846, Test Method 1311, is less than 5 mg/l and the soils are no longer classified as hazardous waste under 40 C.F.R. 261.24 (Subpart C). Such monitoring and demonstration shall be made prior to consolidation of the treated soils under the Open Space AOC cap pursuant to paragraph 59(a)(ii). In the event that Honeywell fails to make the demonstration required by this paragraph,

Honeywell shall dispose of the soils off-site at a waste disposal facility licensed to accept such waste.

64. **Post-Treatment Monitoring for 20 to 1000 Soils.** In the event that *in situ* treatment is used as a final remedy for any portion of the 20 to 1000 Soils, Honeywell shall conduct post-treatment monitoring to demonstrate that the treatment has resulted in permanent hexavalent chromium concentrations of less than 20 mg/kg in the treated area. Honeywell shall propose a program of post-treatment monitoring in a document that is submitted pursuant to paragraph 86(c). In the event that Honeywell fails to make the demonstration required by this paragraph, Honeywell shall propose further remedial actions pursuant to paragraph 59 in a document that is submitted pursuant to paragraph 86(c).

**D. Open Space AOC Components of the Chromium Remedy**

65. **Open Space AOC Soil Remedy.** In the Open Space AOC, the soil remedy shall consist of an engineered RCRA cap to isolate contaminated soils with gas venting, if necessary, to address the generation of methane and other naturally occurring gases in the Stratum O and/or Stratum D in the Open Space AOC. Soils consolidated under the cap, pursuant to paragraph 59(b)(i), shall not require gas venting and shall not be the basis for the inclusion of gas venting as a component of the cap. The cap shall be designed and constructed so that:

(a) The cap shall consist of a gas collection system, if gas venting is necessary, a base protective layer, an impervious geomembrane liner with a minimum thickness of 40 mil; a geocomposite drainage layer; a filter fabric; and a distinctive colored warning layer with markings in English and Spanish that would deter penetration of the cap in the event that digging occurred in the vicinity of the cap;

(b) All utilities, including those supporting the pump-and-treat system for groundwater remediation, with the exception of any extraction wells or collection trenches, shall be placed above the cap (but may be below the ground surface and/or contained within utility corridors). In the event that above-cap-grade gas collection and treatment is selected or is needed to meet current or future regulatory requirements, such collection and treatment facilities are prohibited in the Open Space AOC, except for piping to connect the sub-liner collection system with the treatment facilities; and

(c) Exclusive of roadways, the cap shall be overlain by layers of clean fill, backfill and/or overburden with an average depth of at least three feet and a minimum depth of at least two feet provided that any layer that incorporates overburden shall be below at least two feet of clean fill. Any clean fill or backfill soil brought to the Site will either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master. One foot of clean fill, covered with bituminous blacktop, shall be sufficient cover where roads, walkways, or other paved surfaces are located within the Open Space AOC. All clean soil fill in areas that will not involve paved roads, walkways, or other paved surfaces shall be vegetated in such a manner as to protect and maintain the required depth of the clean soil fill and to ensure that such vegetation shall not cause any interference with or penetration of the cap.

(d) The existing overburden soils in the Open Space AOC shall first be stripped off and set aside for use. If hexavalent chromium concentrations in the overburden exceed 20 mg/kg, the overburden shall be placed under the cap. If hexavalent chromium concentrations in the overburden do not exceed 20 mg/kg, the overburden may be placed above the cap but below the

two feet of clean fill required by paragraph 65(c). Excavated 20 to 1000 Soils from the Development AOC shall be placed and spread in the Open Space AOC under the cap. Both the chromium impacted soils and the previously stripped overburden shall be suitably compacted according to design specifications. Debris, to the extent it would interfere with the compaction specification requirements of the 100% Design, shall not be placed under the cap. The engineered cap shall be installed over the chromium-impacted soils exceeding 20 mg/kg hexavalent chromium.

**E. Demolition, Grading, and Backfill Requirements**

66. **Demolition and Grading Activities.** During demolition and grading activities, adequate protective measures shall be taken to protect site workers and the community from airborne dusts and exposures to contaminated soils.

67. **Backfill Requirements.** Soils excavated from the Development AOC shall be replaced with backfill soil. Any backfill soil brought to the Site shall either meet all applicable federal and NJDEP criteria, including NJDEP residential soil criteria, or comply with a beneficial soil reuse plan that is approved by NJDEP and subject to review and comment by the Parties and approval by the Special Master.

68. **Vegetation of Clean Fill.** All clean soil fill in areas that will not involve paved roads, sidewalks, paths, walkways, or building structures shall be vegetated in such a manner to protect and maintain the required depth of clean soil fill.

**F. Groundwater Components of the Chromium Remedy**

69. **Shallow Groundwater Remedy for the Open Space AOC.** The Open Space AOC shallow groundwater remedy shall consist of hydraulic barriers with a pump-and-treat system designed to isolate shallow groundwater and to intercept and treat shallow groundwater flowing

above the meadow mat in the Open Space AOC to the extent that such groundwater contains total chromium in concentrations in excess of 70 µg/l. The shallow groundwater remedy shall consist of the following:

(a) The existing soil/cement/bentonite wall on the boundary of Study Area 6 South and Study Area 7 shall be incorporated into the other engineering controls;

(b) Subterranean slurry walls or other hydraulic barriers shall be installed along the southern, eastern and western sides of the Open Space AOC and keyed into the meadow mat or Stratum O or to comparable depths below ground surface;

(c) A groundwater extraction system shall be established that shall consist of (i) one or more shallow extraction wells, sumps, or french drains within the Open Space AOC; (ii) pumps; and (iii) underground piping to convey any extracted water to Honeywell's Treatment Plant;

(d) The capture zone for the shallow groundwater remedy shall include at least the entire area of contaminated shallow groundwater within the Open Space AOC;

(e) A plan for control of water levels shall be developed;

(f) In the event that underground structures are demolished, the plans shall address the need for special attention for structures that extend below the meadow mat in order to control needed water levels; and

(g) Honeywell shall submit such information as is required to allow NJDEP to establish a classification exception area for groundwater at the Site, in accordance with NJDEP regulations.

70. **The Shallow Groundwater Remedy for the Development AOC.** Following implementation of the Development AOC soil components of the Chromium Remedy, Honeywell shall submit a report to (a) determine whether shallow groundwater remaining in the

Development AOC exceeds 70 µg/l total chromium and, (b) if so, evaluate the need for further remedial measures to address any such shallow groundwater remaining in the Development AOC with total chromium concentrations in excess of 70 µg/l. This evaluation shall be subject to review and comment by the Parties and approval by the Special Master.

(a) In the event that the evaluation demonstrates that further remedial measures are necessary, Honeywell shall propose such measures subject to review and comment by the Parties and approval by the Special Master;

(b) The capture zone of any remedy shall include at least the entire area of contaminated shallow groundwater except for shallow groundwater that is captured and subject to the shallow groundwater remedy for the Open Space AOC pursuant to paragraph 69;

(c) In the event that a pump-and-treat system is selected as a contingency measure for shallow groundwater in the Development AOC, all infrastructure for the pump-and-treat contingency system that is needed to ensure that the contingency system is fully operational, as required by paragraph 70(d), shall be installed prior to or in conjunction to any development of the Site. This includes at least one shallow extraction well, sump, or french drain, and the piping to convey any extracted groundwater to Honeywell's water treatment plant;

(d) If it is determined that the pump-and-treat contingency system must be activated, the pump-and-treat system shall be operational no later than six months after the date of the determination.

71. **Off-Site Shallow Groundwater Remedy.** Honeywell shall propose additional sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site. Honeywell shall submit a report of the results of such sampling and, in the event that contaminated shallow groundwater is found to extend off-site, a proposal for a remedy based on

such results. The report and the proposal for a remedy shall be subject to review and comment by the Parties and approval by the Special Master.

72. **L-Well Groundwater Remedy.** At the time this Decree is entered, the L-Well Groundwater is contained and not contributing to further contamination of surrounding waters and/or soils. However, in order to verify that this status continues following implementation of the Chromium Remedy, including any groundwater remedial measures pursuant to paragraphs 70 and 71, Honeywell shall propose a plan for one round of monitoring designed to evaluate whether the L-Well Groundwater remains contained. The plan shall include monitoring for total and hexavalent chromium and major ion chemistry to determine whether there has been movement in the L-Well Groundwater.

(a) In the event that no substantial change is detected in the major ion chemistry, no further action is required unless paragraph 72(c) is applicable.

(b) In the event that substantial changes are detected in the major ion chemistry, Honeywell shall propose a plan for further monitoring of the L-Well Groundwater. Such a plan shall be subject to review and comment by the Parties and approval by the Special Master.

(c) In the event that the initial monitoring or monitoring conducted pursuant to paragraph 72(b) demonstrates that proximate waters have total chromium concentrations in excess of 70 µg/l, regardless of whether there is a change in the major ion chemistry, Honeywell shall propose a remediation plan for the L-Well Groundwater. Such remediation plan shall be subject to review and comment by the Parties and approval by the Special Master.

### G. Permits and Authorizations

73. **Permits and Authorizations.** Honeywell shall obtain all necessary federal, state, and local permits and authorizations to carry out the Chromium Remedy as set forth in this Article.

## H. Long-Term Monitoring, Maintenance, and Protection of Engineering and Institutional Controls

74. **Protection of the Open Space AOC.** Except as provided in paragraphs 74(j) and 74(k), development in the Open Space AOC shall be prohibited. The Open Space AOC shall be protected against activities that may jeopardize the integrity of the cap and/or the groundwater remedial measures that shall be installed in the Open Space AOC pursuant to the Chromium Remedy or that may impede the long-term monitoring and maintenance of the cap and/or groundwater remedial measures. It is the intention of the Parties to implement different layers of protection, which alone or in concert, impose restrictions on development, run with the land, and survive all parties. Accordingly, the following actions shall be taken pursuant to the Schedule provided in paragraph 54:

(a) **Ownership of and Access to the Open Space AOC.** Ownership of and access to the Open Space AOC shall be in accordance with the following:

(i) Bayfront Redevelopment LLC, as the current owner in fee simple absolute of all property that comprises the Open Space AOC, shall not convey any rights or interests in any parcel that comprises the Open Space AOC property except as provided in this Decree. Within 90 days of entry of this decree, Bayfront Redevelopment LLC shall give Jersey City an option to buy all of the Open Space AOC property prior to the planned transfer pursuant to paragraph 74(a)(iii). Such option to buy shall be subject to the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall exercise the option to buy the Open Space AOC in the event that the conditions allowing for withdrawal of funds from the financial assurance mechanisms under paragraphs 98(c) or 98(d) are met;

(ii) Within 90 days of the entry of this Consent Decree, Bayfront Redevelopment LLC shall grant a conservation restriction for the Open Space AOC pursuant to the requirements of paragraph 74(b);

(iii) Upon the final construction of all roads and utility corridors within the Open Space AOC, Bayfront Development LLC shall donate good and marketable title to all the land comprising the Open Space AOC to Jersey City. In conjunction with such donation, Bayfront Redevelopment LLC shall petition to subdivide the properties within Study Area 6 South to create a new parcel(s) comprising the Open Space AOC. At the time of the donation, Jersey City shall grant Honeywell an easement for the purpose of monitoring and maintaining the Chromium Remedy. Jersey City shall also grant Honeywell all necessary access to the Open Space AOC by license or such other mechanisms as may be appropriate for purposes of monitoring and maintaining the Chromium Remedy. After it acquires title pursuant to this paragraph, Jersey City shall retain ownership of the Open Space AOC unless and until it shall have complied with the requirements of paragraph 74(a)(iv);

(iv)After it acquires title pursuant to this paragraph, Jersey City shall not convey or enter into any lease of the Open Space AOC to any other person or entity unless it has first satisfied either of the following conditions:

(1) Jersey City has obtained the Special Master's (or if the Special Master's appointment has expired, the Court's) approval to convey the Open Space AOC to a government entity that has the capacity and willingness to fulfill Jersey City's obligations under the Consent Decree with respect to the Open Space AOC and such entity agrees to submit to the Court's jurisdiction and to be bound by the requirements of the Consent Decree that Jersey City has committed to fulfill with respect to protection of the Open Space AOC pursuant to this paragraph

and routine maintenance of the permissible development in the Open Space AOC pursuant to paragraph 78(d); or

(2) The Open Space AOC has been remediated such that no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive, and Jersey City has demonstrated to the Special Master and/or the Court, as appropriate, that such remediation has been completed in accordance with all applicable requirements.

(b) **Conservation Restriction.** Prior to the grant of the option to buy pursuant to paragraph 74(a)(i), Bayfront Redevelopment LLC shall grant an open space conservation restriction, pursuant to N.J.S.A. 13:8-B-1, *et seq.*, over the Open Space AOC substantially in the form set forth in Exhibit C. Exhibit C is a conservation restriction that is consistent with the terms of this paragraph and this Consent Decree. The conservation restriction shall allow for the implementation, maintenance, monitoring, repair and replacement of the Chromium Remedy and development consistent with paragraphs 74(j) and 74(k), including the construction and placement of roads and utilities. The Conservation Restriction shall also allow for current uses of the Open Space AOC to continue until such time as construction of the Chromium Remedy begins. The Hackensack River Watershed Land Trust shall be the primary holder of the conservation restriction, with all rights of monitoring and enforcement. Riverkeeper shall propose an entity to serve as the secondary holder of the conservation restriction subject to comment by the Parties and review by the Special Master. The secondary holder shall have secondary rights of monitoring and enforcement.

(i) The conservation restriction shall be incorporated into this Consent Decree and made part of this Consent Decree. The final, executed conservation restriction shall be lodged with the Court and entered as an order of the Court. The conservation restriction shall be enforceable in this Court, in the same manner as this Consent Decree.

(ii) The conservation restrictions provided under this Consent Decree shall be consistent with the prohibited and permitted development of the Open Space AOC as set forth in paragraphs 74(j) and 74(k) below.

(iii) Jersey City shall not take any action, whether through exercise of any power of eminent domain, application to the State of New Jersey for approval of a diversion of public park or recreation land, legal challenge to the validity or enforceability of the conservation restriction, or otherwise, the effect of which would be to in any way terminate, abrogate, or diminish the terms, conditions, or purposes of the conservation restriction. If, notwithstanding the preceding sentence, Jersey City proceeds with a condemnation or other action, the result of which would be to terminate, abrogate, or otherwise diminish the terms, conditions, or purposes of the conservation restriction, Jersey City shall, before taking any such action satisfy all of the conditions set forth in paragraph 74(a)(iv)(2).

(iv) Notwithstanding the foregoing, the conservation restriction may be terminated upon application of any Party when no hexavalent or total chromium contamination remains in the Open Space AOC, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive standards for Unrestricted Use in place at the time, whichever is more restrictive.

(c) **Deed Notice.** Upon completion of the Chromium Remedy, the Open Space AOC shall be subjected to the deed notice substantially in the form set forth in Exhibit D that restricts

future activities on the Open Space AOC. Nothing in the deed notice shall be construed as preventing the imposition of more stringent restrictions on the development allowed in the Open Space AOC pursuant to this paragraph and, in particular, the conservation restriction provided for in paragraph 74(b).

(d) **Recording of the Consent Decree, Conservation Restriction, and Deed Notice.** This Consent Decree, the conservation restriction imposed pursuant to paragraph 74(b), and the deed notice imposed pursuant to paragraph 74(c) shall be recorded, pursuant to N.J.S.A. §§ 46:15-1.1, 46:16-1.1, and 46:16-2, in the office of the Hudson County Register and a conspicuous reference to the Consent Decree, conservation restriction, and deed notice shall be included in all instruments concerning title to the Open Space AOC. Any Party shall have the right, periodically, but no more than once every 25 years, to record memoranda or other instruments that reference, incorporate, or attach this Consent Decree, the conservation restriction, the deed notice, and/or any further orders of the Court related to the Open Space AOC in the real estate records related to the Open Space AOC.

(e) **Zoning.** Pursuant to the Redevelopment Plan, the Open Space AOC is designated for open space and park. Jersey City shall not amend or change this designation unless it first satisfies the requirements of paragraph 74(a)(iv)(2).

(f) **Recreation and Open Space Inventory.** Upon acquiring fee simple absolute title to the Open Space AOC, Jersey City shall add those portions of the Open Space AOC not covered by roads, the pedestrian thoroughfare, and utility corridors adjacent to roads onto its Green Acres Program Recreation and Open Space Inventory ("ROSI") pursuant to N.J.A.C. § 7:36 and shall specify in such listing that it is subject to (i) Honeywell's prior easement to monitor, maintain, repair, and replace the Chromium Remedy; (ii) the actions necessary to implement, monitor,

maintain, repair, and replace the Chromium Remedy; (iii) the actions necessary to install any development permissible under paragraphs 74(j) and 74(k); and (iv) the conservation restriction imposed pursuant to paragraph 74(b). Jersey City shall also take all steps necessary or appropriate to notify the New Jersey Green Acres Program that such portions of the Open Space AOC have been added to its ROSI, such that those portions of the Open Space AOC shall thereafter be subject to all procedural and regulatory requirements applicable under the Green Acres Program, including prohibitions against diversion.

(g) **Eminent Domain.** If all or part of the Open Space AOC is taken in exercise of the power of eminent domain, or acquired by purchase in lieu of condemnation, by any public, corporate, or other authority so as to terminate, abrogate, or limit the restrictions created by this Consent Decree or the conservation restriction imposed pursuant to paragraph 74(b), in whole or in part, any Party may take appropriate actions to challenge such taking if there is a reasonable legal basis for doing so. In the event that the Parties are unable to prevent a taking notwithstanding their reasonable and appropriate efforts, any Party may take appropriate actions to recover the full value of the interests in the Open Space AOC subject to the taking or in lieu purchase, and all direct and incidental damages, costs, and fees occasioned thereby.

(h) **Environmental Covenant.** In the event that New Jersey enacts the Uniform Environmental Covenants Act or its substantial equivalent, the Parties shall address the issue of whether an environmental covenant shall be established for the Open Space AOC under the statute. If the Parties are unable to reach agreement on establishment of an environmental covenant, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of an environmental covenant if it would provide substantial additional protection for the Open Space AOC without

unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(i) **Future Protections.** Any Party shall have the right to propose consideration of additional or substitute protections for the Open Space AOC. If the Parties are unable to reach agreement with regard to the proposal, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. The Special Master shall recommend adoption of additional or substitute protections for the Open Space AOC if they would provide substantial additional protection for the Open Space AOC without unreasonably harming the interests of any Party. Any Party shall have the right to seek review by the Court of the Special Master's recommendation or consideration by the Court of the dispute in the event that the Special Master's appointment has expired.

(j) **Prohibited Development in Open Space AOC.** Only development satisfying the requirements of this paragraph and paragraph 74(k) shall be permitted in the Open Space AOC. All other development in the Open Space AOC shall be prohibited.

(i) Honeywell shall establish Open Space Design Standards that shall govern all development in the Open Space AOC regardless of when the construction or installation of permissible development occurs. The Open Space Design Standards shall satisfy each of the requirements set forth in paragraph 74(j)(v) and shall set forth the requirements for development that are necessary for the protection of the integrity of the Chromium Remedy.

(ii) The Initial Development in the Open Space AOC shall be the development undertaken following the completion of the Chromium Remedy in the Open Space AOC. The Initial Development may occur in one or more phases. Honeywell and Bayfront

Redevelopment LLC shall prepare a Development Plan before the initiation of each phase of the Initial Development. The Initial Development Period for each phase shall consist of the period covered by the Initial Development, plus a period of 10 years following the submission of the as-built documentation for the phase pursuant to paragraph 74(j)(viii).

(iii) The Special Master shall have jurisdiction to review the Open Space Design Standards and the Development Plan(s) solely for the purpose of ensuring that any development undertaken during the Initial Development Period is consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy. The Special Master's jurisdiction with regard to development in the Open Space AOC shall run through the Initial Development Period for each phase.

(iv) Honeywell shall ensure that the requirements of this paragraph and paragraph 74(k) are satisfied with regard to any development undertaken within the Initial Development Period. Honeywell shall also ensure that any development undertaken within the Initial Development Period is designed and installed in a manner consistent with this Consent Decree and with protection of the integrity of the Chromium Remedy.

(v) Any development undertaken in the Open Space AOC, regardless of when undertaken, shall satisfy each of the following requirements:

(1) It shall not jeopardize the integrity of the Chromium Remedy;

(2) It shall be limited to the types of development permitted under paragraph 74(k);

(3) It shall be consistent with this Consent Decree, including the conservation restriction imposed pursuant to paragraph 74(b), and the Redevelopment Plan; however, in the

event of any conflict or inconsistency between this Decree and the Redevelopment Plan, this Decree shall govern;

(4) In total, at least 75% of the Open Space AOC, exclusive of the acreage used for roads and the pedestrian thoroughfare, shall be comprised of landscaping, as defined by paragraph 74(k)(xi);

(5) The portion of the Open Space Design Standards necessary for protection of the Chromium Remedy as related to all roads, the pedestrian thoroughfare and associated utility corridors as well as the general location of such items shall be included in the 100% Design of the Chromium Remedy;

(6) If the lowest elevation for the bedding for any utility line, including irrigation or sprinkler lines, is two feet from the top of the warning layer of the cap, the utility line shall be placed in a utility corridor;

(7) In any event, there shall be two feet of soil or more between the warning layer of the cap and the lowest elevation of the bedding for any irrigation or sprinkler lines; and

(8) No permanent concession facilities shall be permitted.

(vi) Honeywell shall submit the Open Space Design Standards and the Development Plan(s) for any development undertaken during the Initial Development Period pursuant to the requirements of paragraph 86(c), except that such documents need not be submitted to NJDEP. Following Honeywell's submission of such documents, the procedures of paragraphs 86(e) and 86(f) shall apply, except that the Special Master need not provide notice to NJDEP.

(vii) During the Initial Development Period, any development in the Open Space AOC shall require the preparation and submission of a Development Plan pursuant to

paragraph 74(j)(vi) and such Development Plan shall be subject to review by the Special Master pursuant to paragraph 74(j)(iii).

(viii) Upon completion of each phase of the Initial Development, Honeywell shall provide as-built documentation for the Initial Development to the Special Master, Riverkeeper, and Jersey City. Upon completion of any further development during the Initial Development Period for the phase, Honeywell shall also provide as-built documentation to the Special Master, Riverkeeper, and Jersey City for the additional development. Such additional as-built documentation for a phase shall not affect the running of the Initial Development Period for the phase.

(ix)During the Initial Development Period, replacement in-kind of development features or facilities included in the Initial Development or minor modifications to the development features or facilities included in the Initial Development shall not require the preparation of a Development Plan or be subject to review by the Special Master, provided that such replacement or modification satisfies the requirements of the Open Space Design Standards, the applicable Development Plan, and paragraphs 74(j)(v) and 74(j)(x)(3)(notice requirement).

(x) After the Initial Development Period, all development is prohibited unless one of the following conditions is met:

(1) Jersey City satisfies the conditions set forth in paragraph 74(a)(iv)(2);

(2) The development is a replacement in-kind and such replacement is made in conformance with the specifications of the Open Space Design Standards, the applicable Development Plan, and paragraph 74(j)(v); or

(3) The development meets the requirements of paragraphs 74(j)(v) and 74(j)(xi), and Jersey City provides notice of its intention to alter or add to the development undertaken in the Initial Development Period. Such notice shall be provided in writing to Honeywell, Riverkeeper, and the holders of the conservation restriction established pursuant to paragraph 74(b) at least 30 days prior to Jersey City's alteration or addition to development undertaken in the Initial Development Period. Honeywell, Riverkeeper, or any holder of the conservation restriction shall have the right to move the Court to prohibit such alteration or addition.

(xi) If any of the development features or facilities that Jersey City seeks to add pursuant to paragraph 74(j)(x) require utilities that would require utility corridors other than the utility corridors installed during the Initial Development Period, Jersey City shall obtain approval from the Court before installing such new utility corridors.

(xii) Jersey City shall provide Honeywell, Riverkeeper, and the holder(s) of the conservation restriction established pursuant to paragraph 74(b) with an annual report that describes any alterations or additions, including those activities under paragraph 74(j)(x)(2), to the development undertaken during the Initial Development Period.

(xiii) All development features or facilities, whether included in the Initial Development or added subsequent thereto, are subject to demolition and/or removal to the extent necessary to maintain, replace, or repair the Chromium Remedy.

(k) **Permissible Development in the Open Space AOC.** The Initial Development or any subsequent addition or alteration thereto may include any or all of the following types of development features or facilities, provided that such development features or facilities satisfy the conditions set forth in paragraph 74(j)(v):

(i) Roads and the pedestrian thoroughfare -- both crossing and running along the Open Space AOC, but no more extensive than provided for in the diagram on page 39 of the Redevelopment Plan;

(ii) Curbing and fences;

(iii) Sidewalks, paths, walkways, and nature trails;

(iv) Utilities and utility corridors, lighting, and restrooms;

(v) Irrigation or sprinkler components or systems;

(vi) Water features;

(vii) Above-ground storm water cisterns;

(viii) Signs, including the signs or display required by paragraph 74(l);

(ix) Benches, trash receptacles, and bicycle racks;

(x) Recreational facilities, such as playground equipment, bocce ball courts, tennis courts, basketball courts, and athletic fields; and

(xi) Landscaping, including natural grasses, small trees, shrubbery, flowers, and potted plants, provided that such landscaping and the anticipated root structure of each landscaping component do not and will not jeopardize the integrity of the Chromium Remedy. Any portion of an athletic field that is covered in natural grass shall be considered landscaping for purposes of the percentage set forth in paragraph 74(j)(v)(4).

(l) **Signs or Displays.** Honeywell shall develop a permanent plan for informing visitors to the Open Space AOC of the history of the chromium production, contamination, and its remediation. Such plan shall provide for appropriate signs or displays that communicate this information. Such plan shall be subject to review and comment by the Parties and approval by the Special Master.

75. **Honeywell's Ongoing Responsibility.** Honeywell shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy in perpetuity. Honeywell shall satisfy this responsibility through establishment and implementation of a Long-Term Monitoring Plan. In the event that Honeywell ceases to exist without a successor-in-interest or its obligations under this Consent Decree are stayed or limited due to a bankruptcy petition, the Court shall appoint an independent third-party fiduciary who shall be responsible for implementing, monitoring, maintaining, repairing and replacing the Chromium Remedy pursuant to the requirements of this Consent Decree and the Long-Term Monitoring Plan, unless Jersey City volunteers to assume these responsibilities for the Chromium Remedy.

76. **Long-Term Monitoring Plan.** In consultation with the Parties, and subject to approval by the Special Master and NJDEP, Honeywell shall develop a Long-Term Monitoring Plan to ensure the ongoing effectiveness of the Chromium Remedy to meet the objectives set forth in paragraphs 65, 69, 68, 69, 72, and 77. The Long-Term Monitoring Plan shall be consistent with the applicable EPA policies and guidance, including, among others, EPA's Comprehensive Five Year Review Guidance (2001) (or any subsequent revision) and with NJDEP's Technical Requirements for Site Remediation (or any subsequent revision).

77. **Long-Term Monitoring Plan Objectives.** Honeywell shall design the Long-Term Monitoring Plan to satisfy each of the following objectives:

(a) Provide monitoring to ensure that the integrity and effectiveness of the Chromium Remedy are maintained; and

(b) Provide monitoring to ensure that the restrictions of the institutional controls are being satisfied, including the prohibition on development in the Open Space AOC.

78. **Monitoring and Remediation Under the Long-Term Monitoring Plan.** The Long-Term Monitoring Plan shall include the monitoring and remediation activities set forth in this paragraph and other monitoring and remediation activities, if necessary, to meet the objectives of paragraph 77. Honeywell shall provide Riverkeeper, the Special Master, and NJDEP with annual reports on activities conducted under the Long-Term Monitoring Plan.

(a) **Monitoring Activities in the Long-Term Monitoring Plan.** Honeywell shall undertake the following monitoring activities at intervals to be specified in the Long-Term Monitoring Plan, but no less frequently than set forth below, and, if the monitoring shows it is necessary, Honeywell shall also undertake the remediation activities as set forth below:

(i) Quarterly visual inspection monitoring of the Open Space AOC to ensure that it is not being put to any use that is inconsistent with paragraphs 74(j) and 74(k) or any use that may compromise the integrity of the Chromium Remedy. The Long-Term Monitoring Plan shall include an inventory of the prohibited and permissible uses pursuant to paragraph 74 and a corresponding checklist to be used by the individuals conducting the monitoring. If Honeywell determines that the Open Space AOC is being used in a manner inconsistent with the protections or the integrity and effectiveness of the Chromium Remedy, Honeywell shall act as soon as possible to cause such use to cease and, if there has been damage to the Chromium Remedy, to repair or replace it to original specifications or to a level of protection equivalent to the original Chromium Remedy;

(ii) Quarterly visual inspection monitoring of the Open Space AOC grade and slope to identify whether erosion has occurred or is occurring. Honeywell shall remediate any significant erosion.

(iii)Quarterly visual inspection monitoring to determine whether noticeable differential settlement or subsidence has occurred or is occurring in the Open Space AOC such that the integrity of the Chromium Remedy may be materially impaired. If evidence of differential settlement or subsidence is found, Honeywell shall propose further investigative measures. Honeywell shall remediate any differential settlement or subsidence that is beyond the degree of differential settlement/subsidence allowed for in the 100% Design and repair the cap and/or the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(iv)A baseline topographic survey at the completion of the Chromium Remedy and three additional surveys conducted at five-year intervals beginning five years after the conduct of the baseline survey. The topographic survey shall be of sufficient precision and accuracy to present the results as one-foot contours;

(v) Quarterly visual inspection monitoring to determine whether the Chromium Remedy in the Open Space AOC has been disturbed. Any evidence of the distinctive warning layer materials or any other cap materials as described in paragraph 65(a) at the surface is an indication that the cap has been disturbed. In such an event, Honeywell shall propose further investigative measures to evaluate whether the integrity of the cap has been compromised. In the event that the investigative measures show that the cap integrity has been compromised, Honeywell shall repair or replace the cap and the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vi) Quarterly visual inspection monitoring to ensure that burrowing animals are not materially impairing the integrity of the Chromium Remedy. If evidence of burrowing animals is found, Honeywell shall follow humane removal procedures and repair or replace the cap and

the overlying layers to original 100% Design specifications or to a level of protection at least equivalent to the original Chromium Remedy;

(vii) Quarterly visual inspection monitoring of the vegetative cover in the Open Space AOC to ensure that vegetative cover is in conformance with the landscaping provisions of the 100% Design and the Redevelopment Plan and will not materially impair the integrity of the Chromium Remedy. Maintenance of the vegetative cover shall include, at a minimum, mowing to ensure that tree species cannot become established and removal of any other vegetation with the potential to damage the Chromium Remedy;

(viii)Quarterly groundwater monitoring to ensure that groundwater levels are maintained in accordance with the requirement to maintain an outward gradient from Study Area 7 and in accordance with the water level control plan developed pursuant to paragraph 69(e);

(ix) Monitoring of vented gases and the gas venting system to ensure proper operation of the system, to evaluate any degradation of the system, to assess the need for treatment of vented gases, either initial, subsequent, or further depending on whether treatment has been previously provided, and to detect any condition that might endanger public health or safety. Such monitoring shall be conducted on a monthly basis for at least one year and, if the readings are stable, such monitoring may be conducted thereafter on a quarterly basis; and

(x) Any additional monitoring as required by specific details added in the design phase of the Open Space AOC.

(b) **Procedures for Proposing Changes to the Long-Term Monitoring Plan.** Any Party may, from time to time, propose changes to the scope of the monitoring activities under the Long-Term Monitoring Plan. If the Parties agree, the Long-Monitoring Plan shall be so changed

subject to approval by NJDEP and by the Special Master, if his appointment has not terminated, or otherwise, by the Court. If the Parties are unable to reach agreement over alterations to the monitoring and the Special Master's appointment has not terminated under this Consent Decree, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation. In the event that the dispute arises after the Special Master's appointment has terminated, any Party may file a motion seeking a resolution of the dispute by the Court.

(c) **Contingency Plan**. As part of the Long-Term Monitoring Plan, Honeywell shall develop a contingency plan to ensure the integrity of the remediation in the event of any planned penetration of the cap or otherwise planned activity that compromises the cap or any unplanned event or accident that penetrates the cap or otherwise compromises the integrity of the Chromium Remedy. The contingency plan shall include, at a minimum, an annually updated plan to notify the relevant persons, including the Special Master, NJDEP, and the Parties, of (i) the event penetrating the cap, compromising the cap, or compromising the integrity of the Chromium Remedy; (ii) the general steps to be taken to identify the extent of the problem; and (iii) the standards for remedying the problem.

(d) **Routine Maintenance**. The title owner of the Open Space AOC shall conduct maintenance of the Open Space AOC features or facilities that are permissible under paragraphs 74(j) and 74(k). The maintenance workers shall be trained in maintenance procedures that do not jeopardize the integrity of the Chromium Remedy. The training shall include the identification and reporting of any uses or features that are not permissible in the Open Space AOC or that may jeopardize the integrity of the Chromium Remedy. Honeywell shall provide all training materials. The title owner of Open Space AOC shall annually provide to the other Parties and

the Special Master a report describing the training which has been provided to its maintenance workers. The title owner of the Open Space AOC shall also provide to the Parties and the Special Master notice of any violations of the restrictions relating to the Open Space AOC identified by its workers during routine maintenance.

(e) **Recordkeeping**. Honeywell shall maintain written logs or other records of those monitoring and remediation activities undertaken pursuant to the Long-Term Monitoring Plan. Such logs shall be provided to Riverkeeper on a quarterly basis.

79. **Monitoring and Reporting to Riverkeeper.** Riverkeeper shall be provided with all documents submitted to NJDEP and/or the Special Master with respect to the Chromium Remedy, including the documents identified in paragraph 86(c).

80. **Notice to Stakeholders.** All residents, regardless of whether they are owners or lessees, and all commercial tenants on Study Areas 6 and 7 are hereby deemed stakeholders. Honeywell shall ensure that all stakeholders shall be provided at the time of their purchase or lease with notice of the contamination, the remedial actions that have been undertaken or are planned, and the importance of reporting activities that may appear to jeopardize the integrity of the engineering controls. Notice shall be accomplished in the following manner:

(a) Bold or otherwise conspicuous language on the first page of the deed provided to all purchasers in the Residential Area;

(b) A summary notice of the Chromium Remedy which:

(i) Has been subject to review and comment by the Parties and approval by the Special Master; and

(ii) Provides a reference to public websites and libraries and/or the future equivalents thereof, where the following can be found:

(1) Zoning and other Jersey City maps showing the Open Space AOC; and

(2) Documents describing the contamination and the remediation, including:

(a) This Consent Decree;

(b) The Remedial Investigation Report and the Final Remedial Action Report,

(c) The annual reports on long-term monitoring and maintenance and repair activities as required by paragraph 78 and annual reports on changes to the Initial Development as required by paragraph 74(j)(xii); and

(d) The Long-Term Monitoring Plan.

(c) The public provision of the maps and documents referred to in paragraph 80(b)(ii) via websites and libraries and/or the future equivalents thereof; and

(d) Notices to lessees and commercial tenants in all lease documents.

81. **Annual Letter to Riverkeeper on Notice to Stakeholders.** Each year beginning one year after the issuance of the first notice in a deed or lease pursuant to paragraph 80, Honeywell shall provide a letter to the Riverkeeper documenting its compliance with paragraph 80.

82. **Future Notice to Stakeholders.** Honeywell shall ensure that all stakeholders are provided with notice, at least annually, of long-term monitoring activities and any additional remediation activities undertaken with respect to the Chromium Remedy. Such notice shall be accomplished by notices on websites or future equivalents thereof, including Jersey City websites, any websites created to provide information about the Chromium Remediation or redevelopment of the Redevelopment Area, and one or more of the following:

(a) Any community message board or other similar site used and/or maintained by stakeholders or the manager(s) of the Redevelopment Area;

(b) Mailings to all stakeholders; and

(c) Posters and flyers throughout the Redevelopment Area.

83. **Stakeholder Enforcement.** Any stakeholder shall have the right to enforce the remedial obligations of this Consent Decree in the Court, including post-implementation monitoring and maintenance obligations, and the terms of any deed notice or use restriction.

**I. Oversight and Enforcement by the Special Master and NJDEP**

84. **Federal Court Jurisdiction.** The Court shall retain jurisdiction for the purpose of overseeing and enforcing this Consent Decree and to review any issue or dispute which is not resolved through the oversight process described in Article III.I.

85. **Appointment and Jurisdiction of the Special Master.** The Chromium Remedy provided for in this Consent Decree is hereby referred to a Special Master pursuant to Rule 53 of the Federal Rules of Civil Procedure. The Special Master is appointed in the Consolidated Litigation for the purpose of overseeing and enforcing the Chromium Remedy, the first five years of long-term monitoring of the Chromium Remedy, financial assurances for the Chromium Remedy, and the Initial Development Period for each phase of development in the Open Space AOC. The Special Master is also appointed in the Consolidated Litigation for the limited purpose of ensuring that the scheduling and implementation of any non-chromium related remedy, any site preparation activities, and any site redevelopment activities do not undermine the integrity of, unreasonably interfere with, or unnecessarily delay the effectuation of the Chromium Remedy, the Study Area 7 remedies, and other remedies within his jurisdiction as of the date of entry of this Consent Decree. The Special Master shall have jurisdiction over all matters for which he is appointed.

86. **Oversight of the Chromium Remedy.**

(a) **NJDEP Authority**. Nothing in or pursuant to this Consent Decree shall limit NJDEP's full statutory and regulatory authority with respect to the Study Area 6 South site, including (i) permitting authority; (ii) authority to review and approve the Treatment Study reports, the Remedial Action Work Plan, the 100% Design, and final Remedial Action Report for the Chromium Remedy; and (iii) authority to issue a no further action letter.

(b) **Special Master Responsibilities**. The Special Master shall have the following responsibilities:

(i) Ensuring that Honeywell's implementation of the Chromium Remedy satisfies the requirements of this Consent Decree;

(ii) Ensuring that Honeywell's implementation of the Chromium Remedy conforms with federal, state, and local permit requirements;

(iii) Establishing a reasonable schedule for the implementation of the Chromium Remedy and monitoring conformance with it;

(iv) Reviewing monthly progress reports and conducting periodic meetings with the Parties to review the progress of the implementation of the Chromium Remedy. NJDEP shall be invited, but not required, to participate in these meetings and the decision as to whether to participate shall be left to NJDEP's sole discretion;

(v) Submitting bi-monthly progress reports to the Court pursuant to the schedule for the submission of such reports established in *ICO v. Honeywell*;

(vi) Overseeing the financial assurances established pursuant to paragraphs 91 through 100, and, until the expiration of his term pursuant to paragraph 90, overseeing the financial assurances established pursuant to paragraphs 101 through 112;

(vii) Coordinating review of the documents as provided in paragraphs 86(c) through 86(g);

(viii) Overseeing all development undertaken in the Open Space AOC during the Initial Development Period pursuant to paragraph 74(j)(iii); and

(ix) To the extent that, in matters within the jurisdiction of the Special Master as set forth herein, a dispute arises between the Parties with respect to implementation of the Chromium Remedy, issuing a recommendation to the Court with respect to the dispute.

(c) **Submission of Documents by Honeywell.** Honeywell shall submit the following documents to Riverkeeper, Jersey City, the Special Master, and NJDEP:

(i) An overall schedule with milestones for the design and implementation of the remedy ("Schedule") consistent with paragraph 54 above;

(ii) A Second Supplemental Remedial Investigation Report reporting the results of the field work conducted pursuant to paragraph 55;

(iii)A Chromium Impacted Soils Pilot Test Work Plan and Analytical Protocol for conduct of the treatment study pursuant to paragraph 56, unless such documents are agreed to by NJDEP and Riverkeeper before the entry of this Consent Decree;

(iv)An Initial Treatment Study Report for the Development AOC;

(v) A Final Treatment Study Monitoring Report;

(vi) The documents for Site 163 submitted pursuant to paragraphs 54(a)(iv), 54(a)(v), 61, and 62;

(vii) A report to evaluate the need for remediation of any potentially remaining contaminated shallow groundwater in the Development AOC after implementation of the Development AOC Soils Remedy and, based on such an evaluation, a proposal;

(viii) A report of the results of the sampling to complete delineation of contaminated shallow groundwater in the area to the southeast of the Site pursuant to paragraph 71 and, based on the results, a proposal for a remedy;

(ix) A plan for one round of monitoring to evaluate whether the L-Well Groundwater remains contained pursuant to paragraph 72;

(x) A proposal for a remedy of the L-Well Groundwater, in the event L-Well Groundwater monitoring indicates the contaminated groundwater is no longer contained, pursuant to paragraph 72;

(xi) A Remedial Action Work Plan;

(xii) A 50% Design Report (which may include the Development AOC Conceptual Design Plan as a component) as well as design drawings and specifications at the 50% level for other components of the Chromium Remedy (hereinafter the 50% Design);

(xiii) Design drawings and specifications at the 100% level (after selection of the contractor) (hereafter "100% Design");

(xiv) The data validation plan, including quality control and quality assurance protocols;

(xv) The site-wide master health and safety plan;

(xvi) The Long-Term Monitoring Plan;

(xvii) The final Remedial Action Report or final construction report (including as-built drawings and such other reports as may be prepared of the remedy as implemented);

(xviii) A program for post-treatment monitoring pursuant to paragraph 63, and, depending on such results, a proposal for further remedial actions;

(xix) A report reviewing measured groundwater levels for the groundwater remedy;

(xx) Documents required during the Initial Development Period pursuant to paragraphs 74(j)(vi), 74(j)(vii), and 74(j)(viii); and

(xxi) Other post-implementation monitoring reports as required by the Long-Term Monitoring Plan.

(d) **Initial Review of Documents by NJDEP.** The Parties and Special Master shall allow the period of time set forth below for NJDEP to conduct its review of a submission (hereinafter "NJDEP Review Period") before the document is subject to the Special Master review and approval process. During the NJDEP Review Period, any Party may submit comments to NJDEP. For the Second Supplemental Remedial Investigation Report, the Remedial Action Work Plan, the Initial Treatment Study, and the Final Treatment Study Monitoring Report, the NJDEP Review Period shall be 90 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. For any other documents identified in paragraph 86(c), the NJDEP Review Period shall be 30 days from the date of submission of the document to NJDEP, the Special Master, and the Parties. The NJDEP review period shall be extended an additional 30 days for any document for which NJDEP provides the Parties and the Special Master with notice that its review will require an additional 30 days. At the conclusion of the NJDEP Review Period, the comment and review process provided for in paragraphs 86(e) and 86(f) shall commence. In the event that any document has been revised during the NJDEP Review Period, Honeywell shall resubmit the applicable document for purposes of the comment and review provided for in paragraphs 86(e) and 86(f).

(e) **Comment on Submitted Documents**. For each of the documents submitted by Honeywell pursuant to paragraph 86(c), and following conclusion of the NJDEP Review Period as described in paragraph 86(d), the Special Master shall establish a schedule for the submission

of comments and responses to comments. For each of the documents submitted, Riverkeeper, Jersey City, the Special Master, and NJDEP shall have the right to submit comments to Honeywell. Honeywell shall address all comments received and submit a revised document. The revised document shall be submitted by Honeywell to Riverkeeper, Jersey City, the Special Master, and NJDEP. The revised document shall be subject to review and approval pursuant to paragraph 86(f), unless the Parties agree both on the revised document and that further review and approval pursuant to paragraph 86(f) is unnecessary. In that event, the Parties shall inform the Special Master that review under paragraph 82(f) is unnecessary and Honeywell shall proceed to implement the revised document.

(f) **Review and Approval of the Submitted/Revised Document**

(i) **Scope of Review**. Subject to the limitations in paragraph 82(e), all documents submitted by Honeywell, pursuant to paragraph 86(c) and 86(e), shall be subject to review and approval by the Special Master in accordance with the following procedure. All such documents, except the Schedule and the 100% Design, shall be subject to the review and approval process and shall not require an order of the Court. The Schedule and 100% Design documents shall be subject to the review and approval process, but shall also require an order of the Court as provided in paragraph 86(g). A document shall be approved if the document (1) complies with this Consent Decree; (2) complies with the Remedial Action Work Plan for the Chromium Remedy; and (3) complies with the Schedule and 100% Design.

(ii) **Procedure**. Prior to making a decision on a document, the Special Master shall notify NJDEP of his intention to rule on the document or make a recommendation to the Court on the document. Such notice shall notify NJDEP that the Special Master will consider any comments NJDEP wishes to submit on the document if such comments are submitted within

the timeframe established by the Special Master in the schedule for comments pursuant to paragraph 86(e). NJDEP shall in its sole discretion determine whether to submit comments to the Special Master.

(iii) **Court Review**. If any Party objects to the Special Master's recommendation to the Court or approval of any document pursuant to this paragraph, that Party may seek further relief from the Court with respect to the document.

(g) **Schedule and 100% Design Documents**. As to the Schedule and the 100% Design documents, Honeywell shall have the responsibility, within 30 days of the Special Master's approval of each document, of (i) moving for entry of an order by the Court approving the document as approved by the Special Master; or (ii) filing objections with the Court to the Special Master's approval (and any recommendations contained therein) and moving for entry of the Schedule or 100% Design (including any such recommendations of the Special Master to which Honeywell agrees). Riverkeeper shall have the right in these proceedings to raise any objections they might have to the Schedule or 100% Design as approved by the Special Master or to the submission by Honeywell to the Court. NJDEP shall receive notice of any motion filed with respect to the Schedule or the 100% Design.

(h) **Flexibility in 50% and 100% Design Documents**. The Parties recognize that work conducted to implement the Chromium Remedy may be conducted by Honeywell contractors and that Honeywell may establish performance-based criteria or specifications for its contractors. As a result, the Parties recognize that the 50% Design and 100% Design documents for the Chromium Remedy may include performance-based standards, criteria, and specifications. These documents shall be sufficiently prescriptive to enable the Parties and the Special Master to evaluate their conformance with the Remedial Action Work Plan and this Consent Decree. The

Parties also recognize that the 100% Design will be completed after Honeywell has selected a contractor. The Parties further recognize that completing the 100% Design after the selection of the contractor(s) shall not make the 100% Design subject to any less stringent or more deferential review. Honeywell's commitment to the contractor(s) shall not be cause to limit review by the Parties and the Special Master.

(i) **Changes to the Schedule.** The Parties recognize that changes to individual line items in the Schedule will occur. To the extent that (i) the Parties and the Special Master agree that such changes do not have a material impact on satisfaction of the Schedule milestones established for items set forth in paragraph 54; and (ii) such changes do not require modifications to any necessary permits or authorizations for the Chromium Remedy, such changes may be made upon agreement of the Parties and the Special Master without further order of the Court.

87. **Retention of Professionals.** The Special Master may retain the services of professionals and/or other technical personnel, as reasonably needed, to fulfill his obligations under this Consent Decree, and for which he will be reimbursed pursuant to paragraph 89.

88. **Insurance for the Special Master.** The Special Master shall obtain insurance coverage relating to the performance of the Special Master's duties and responsibilities under this Consent Decree. Such coverage shall be similar to the Special Master's existing coverage in *ICO v. Honeywell*, procured pursuant to the Court's November 11, 2005 Stipulation and Order Regarding Special Master's Application to Procure Insurance Coverage, and as extended to the Consolidated Litigation by the Sediment Consent Order. The insurance coverage shall be sufficiently extended in duration and scope to cover all additional duties and responsibilities as set forth hereunder. Honeywell shall pay the premiums and other administrative costs of the Special Master's insurance.

89. **Reimbursement of Special Master Fees and Expenses.** The Special Master shall submit fee applications to the Court for approval of reasonable fees and expenses incurred in the oversight of matters referred to him pursuant to this Consent Decree. Any Party may raise with the Court objections to such fee applications. Upon approval of a fee application by the Court, the reimbursement of the Special Master's fees and expenses shall be made from the escrow fund previously established by Honeywell for the purpose of paying the Special Master's fees and expenses in *ICO v. Honeywell* pursuant to this Court's September 15, 2003 Order Setting Financial Assurances and extended to the Consolidated Litigation by the Sediment Consent Order.

90. **Expiration of Special Master's Appointment.** The Special Master's appointment under this Consent Decree shall expire after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy and the Initial Development Period for each phase of development has been concluded as provided in paragraph 74(j)(ii). However, solely to the extent that the Special Master is still supervising other portions of the Consolidated Litigation or *ICO v. Honeywell* after Honeywell has completed the first five years of long-term monitoring of the Chromium Remedy or the Initial Development Period for each phase of development as provided in paragraph 74(j)(ii), whichever is later, the Special Master shall continue to have jurisdiction under this Consent Decree until he has completed his specifically enumerated responsibilities under the Final Judgment in *ICO v. Honeywell*, the Sediment Consent Order, the Deep Groundwater Consent Order, the Study Area 6 North Consent Decree, and any other future orders, decrees, or judgments in *ICO v. Honeywell* and the Consolidated Litigation. Enumerated responsibilities under any order, decree, or judgment shall include only those tasks specifically assigned to the Special Master in the order, decree, or judgment. Enumerated responsibilities

shall not include any continued jurisdiction exercised over long-term monitoring beyond the initial period specified in the order, decree, or judgment. For example, the Special Master has jurisdiction over the first five years of long-term monitoring under the Sediment Consent Order. Oversight during these five years shall be an enumerated responsibility, but any continued oversight of long-term monitoring, pursuant to the extension of the Special Master's jurisdiction beyond the first five years, as provided in paragraph 60 of the Sediment Consent Order, shall not be an enumerated responsibility. Such extensions of jurisdiction shall be effective only so long as specific enumerated responsibilities in any order, decree, or judgment have not been fulfilled.

**J. Initial Financial Assurances**

91. **Chromium Remedy Letter of Credit.** Honeywell shall obtain a one-year, irrevocable letter of credit (the "Chromium Remedy Letter of Credit") to be automatically renewed annually in an amount equal to the "Remedial Costs Subject to Financial Assurance."

(a) Remedial Costs Subject to Financial Assurance shall mean:

(i) The costs of implementing the Chromium Remedy calculated using factors, including inflation and discount rates, determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process;

(ii) The costs of monitoring and maintenance activities for five years, as required by the Long-Term Monitoring Plan, calculated using factors including inflation and discount rates determined to be appropriate in the Study Area 6 North Consent Decree financial assurance comment and approval process; and

(iii) A contingency of 25% with respect to those costs listed in paragraphs 91(a)(i) and 91(a)(ii).

(b) The Chromium Remedy Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution, provided that in either case, the financial institution shall be acceptable to the Special Master.

92. **Procedures for Review of the Proposed Chromium Remedy Letter of Credit.** No later than December 31, 2008, Honeywell shall submit to Riverkeeper and the Special Master for their review the proposed (a) amount of the Chromium Remedy Letter of Credit; (b) form of the Chromium Remedy Letter of Credit; and (c) name of the institution that will issue the Chromium Remedy Letter of Credit. If Riverkeeper does not agree to the terms of the Chromium Remedy Letter of Credit, the Parties shall meet and confer in an effort to resolve their differences. If the Parties are unable to reach agreement over the terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the Chromium Remedy Letter of Credit.

93. **Automatic Renewal.** The Chromium Remedy Letter of Credit shall be automatically renewed annually unless (a) no later than 120 days prior to the anniversary of the Chromium Remedy Letter of Credit issue date, the issuer provides notice of nonrenewal or (b) Honeywell seeks a reduction in the Chromium Remedy Letter of Credit, pursuant to paragraph 94, to correspond to the reduced estimate of Remedial Costs Subject to Financial Assurances. If the issuer provides notice of nonrenewal, Honeywell shall obtain a replacement irrevocable Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit. If Honeywell is not otherwise in default as provided in Article III.J, the Special Master shall direct the cancellation of the prior Chromium Remedy

Letter of Credit within 91 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit. In the event that the Special Master is entitled to draw upon a Chromium Remedy Letter of Credit because there are two Chromium Remedy Letters of Credit currently in place, the Special Master shall not draw an aggregate amount in excess of the highest valued Chromium Remedy Letter of Credit. Upon Honeywell's request, the Special Master may, at his option, decide not to require overlapping letters of credit in any year based on Honeywell's financial strength in that year, provided that Honeywell has submitted all necessary information so that the Special Master can make his determination at least 150 days prior to the expiration of the Chromium Remedy Letter of Credit.

94. **Annual Right to Seek Reduction in Amount of Chromium Remedy Letter of Credit.** Honeywell shall have the right annually to seek a reduction in the Chromium Remedy Letter of Credit. At the time of seeking such reduction, Honeywell shall submit to the Riverkeeper and the Special Master an estimate of the remaining Remedial Costs Subject to Financial Assurance, including the contingency as described in paragraph 91(a)(iii), and shall seek adjustment of the Chromium Remedy Letter of Credit so that the total estimated amount of remaining Remedial Costs Subject to Financial Assurance are covered by the Chromium Remedy Letter of Credit. However, the adjustment shall not result in reducing the Chromium Remedy Letter of Credit to an amount below the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), plus a contingency of 25% of the remaining estimated costs under paragraphs 91(a)(i) and 91(a)(ii), and shall not result in reducing the Chromium Remedy Letter of Credit to an amount less than $20,000,000 as expressed in 2008 dollars unless long-term financial assurances are in place pursuant to Article III.K. Before making any request to reduce the amount or modify the terms of the Chromium Remedy Letter of Credit, Honeywell shall first confer with the Riverkeeper and

in an effort to reach agreement on the modified amount or terms of the Chromium Remedy Letter of Credit. If the Parties are unable to reach agreement over the modified amount or terms of the Chromium Remedy Letter of Credit, the Parties shall submit the dispute to the Special Master, who shall resolve the dispute. Any Party shall have the right to seek review by the Court of the Special Master's decision regarding the modified amount or terms of the Chromium Remedy Letter of Credit. Upon agreement on the amount of the reduction or modified terms of the Chromium Remedy Letter of Credit (or upon order of the Court directing that the Chromium Remedy Letter of Credit be reduced to an identified amount or otherwise modified), Honeywell shall obtain a replacement Chromium Remedy Letter of Credit in such amount and with such terms. If Honeywell is not otherwise in default as provided in Article III.J and the issuer of the primary Chromium Remedy Letter of Credit has not provided notice of non-renewal, within 30 days after delivery to the Special Master of any replacement of a Chromium Remedy Letter of Credit, the Special Master shall direct the cancellation of the prior Chromium Remedy Letter of Credit.

95. **Bankruptcy Protection**. Neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy. The Chromium Remedy Letter of Credit shall contain the language necessary to assure that neither the Chromium Remedy Letter of Credit nor the proceeds of the Chromium Remedy Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

96. **Exclusive Court Jurisdiction**. The Chromium Remedy Letter of Credit shall recite that the issuer submits to the exclusive jurisdiction of this Court for any and all disputes arising under the Letter of Credit.

97. **Application of New York Law.** The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Chromium Remedy Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

98. **Procedures upon Honeywell's Material Default of Its Obligations.** During the period in which the Special Master has jurisdiction pursuant to paragraph 85, the Chromium Remedy Letter of Credit shall be payable to the Special Master and shall not, prior to its expiration date, be revoked or terminated except consistent with this Consent Decree and with the consent of the Special Master and approval by the Court. The Special Master's ability to draw upon the Chromium Remedy Letter of Credit shall not be limited by any agreement between Honeywell and the issuer. The Special Master may, without further order or notice to this Court, draw upon the Chromium Remedy Letter of Credit upon the occurrence of default by Honeywell, which shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 93 to deliver a replacement Chromium Remedy Letter of Credit at least 95 days prior to the expiration date of the existing Chromium Remedy Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 15 days after written notice to Honeywell thereof and either (i) Honeywell, in the opinion of the Special Master without further input from the Parties, shall have failed to cure the breach; (ii) during the 15-day period, the Court has not entered an order to prevent the Special Master from

drawing on the Chromium Remedy Letter of Credit; or (iii) the Court or the Special Master has not granted Honeywell additional time to cure the breach;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if involuntary filing has not been dismissed within 60 days; the appointment of a custodian, receiver, liquidator, or trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 98(c), and the failure of Honeywell to provide assurance to the Special Master, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

99. **Placement of Proceeds in Court Registry Investment System Account**. In the event that the Special Master draws upon the Chromium Remedy Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Chromium Remedy Letter of Credit which represent the remaining estimated Chromium Remedy costs under paragraphs 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), in an account with the Court Registry Investment System in accordance with Local Civil Rule 67.1 and not expend the proceeds of the Letter of Credit without further order of this Court. The

Special Master shall place all additional proceeds of the Chromium Remedy Letter of Credit in a trust fund pursuant to paragraph 103(b)(v).

100. **Termination of Chromium Remedy Letter of Credit**. The Chromium Remedy Letter of Credit may be withdrawn in its entirety upon the satisfaction of all of the following:

(a) The implementation of the Chromium Remedy; and

(b) Establishment of long-term financial assurance pursuant to Article III.K.

**K. Long-Term Financial Assurances**

101. **Long-Term Financial Assurances.** Honeywell shall fund long-term financial assurances to ensure that the activities set forth in paragraph 102(a) are carried out regardless of whether Honeywell is financially able to carry out such activities in perpetuity.

102. **Costs Subject to Long-Term Financial Assurances.**

(a) Long-term financial assurances shall provide enough funds to cover the costs of the following activities:

(i) Perpetual monitoring and maintenance of the Chromium Remedy, including installation, operation and monitoring of any above-cap-grade gas collection and/or treatment system as may be necessary, but such system is not part of the 100% Design;

(ii) Perpetual operation of the shallow groundwater remedies pursuant to paragraphs 69, 70, and 71;

(iii) Perpetual repair of the cap;

(iv) Perpetual replacement of the cap on a 75-year replacement interval; and

(v) The perpetual administration of the trust fund regardless of whether such trust fund is selected by Honeywell pursuant to paragraph 103(a) or is established from the Long-Term Letter of Credit pursuant to paragraphs 103(b)(ii), 103(b)(v), or 109.

(b) The costs that shall be subject to financial assurances is an amount that will provide the full payment for each of the activities set forth in paragraphs 102(a)(i) through 102(a)(v) plus a 25% contingency when the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to be performed. The costs subject to financial assurances are forward looking because they state an amount valued at the time the funds are needed. As such, they shall be stated in contemporary time as the present value (calculated on the basis of a discount rate of 4.75%) of the estimated future costs of the activities specified in paragraphs 102(a)(i) through 102(a)(v), plus a 25% contingency on those costs.

103. **Long-Term Financial Assurance Mechanisms.** Honeywell shall provide long-term financial assurances in the amount of the costs subject to long-term financial assurances in the form of a trust fund, a letter of credit, or some combination of the two. The selected mechanism(s) shall satisfy the following requirements:

(a) **Trust Fund.** In the event that Honeywell selects a trust fund, Honeywell shall create a trust fund such that it can provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(i) The trust fund shall be at arm's length from Honeywell and shall not be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The trust fund agreement shall contain the language necessary to assure that neither the trust fund nor the earnings of the trust fund shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The trust fund shall be managed by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution managing the

trust fund declares bankruptcy, the Court shall withdraw the funds and appoint another financial institution meeting the requirements of this paragraph to manage the trust.

(iii) No more frequently than once per year, Honeywell may apply to the Court for an order directing the trust manager to reimburse Honeywell for any costs that it has incurred to carry out the activities set forth in paragraphs 102(a)(i) through 102(a)(iv).

(b) **Long-Term Letter of Credit**. In the event that Honeywell selects a letter of credit, Honeywell shall obtain a one-year irrevocable letter of credit (the "Long-Term Letter of Credit") to be automatically renewed annually in an amount that provides sufficient funds such that a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a), could be created. The Long-Term Letter of Credit-funded trust, plus any trust fund established under paragraph 103(a), shall provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The amount of any Long-Term Letter of Credit shall therefore be adjusted periodically as the cap replacement interval is approached because, for example, the money needed in the 10th year to fund a trust that can provide for replacement of the cap in the 75th year is much less than the money that would be needed in the 40th year. Such periodic adjustments shall be proposed and approved by the Court in conjunction with the adjustments under paragraph 106.

(i) Neither the Long-Term Letter of Credit nor the proceeds of the Long-Term Letter of Credit shall be considered the property of Honeywell or property of the estate in the event of Honeywell's bankruptcy, dissolution, privatization, or sale. The Long-Term Letter of Credit shall contain the language necessary to assure that neither the Long-Term Letter of

Credit nor the proceeds of the Long-Term Letter of Credit shall be affected or restricted in any way by operation of the automatic stay in 11 U.S.C. § 362.

(ii) The Long-Term Letter of Credit shall be issued by a financial institution domiciled in the United States or by a United States subsidiary of a non-U.S. financial institution acceptable to Riverkeeper or approved by the Court. In the event that the financial institution issuing the Long-Term Letter of Credit declares bankruptcy, the Court shall authorize the drawing of funds from the Long-Term Letter of Credit and shall deposit those funds in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(iii) The then-current provisions of the Uniform Customs and Practice ("UCP") for Documentary Credits) as published by the International Chamber of Commerce or such successor organization and New York law shall apply to the Long-Term Letter of Credit at the time that Honeywell obtains such letter of credit or any replacements thereafter.

(iv) The Long-Term Letter of Credit shall be automatically renewed annually, unless, no later than 120 days prior to the anniversary of the Long-Term Letter of Credit issue date, the issuer provides notice of non-renewal. If the issuer provides notice of non-renewal, Honeywell shall obtain a replacement irrevocable Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit. If Honeywell is not otherwise in default as provided in this Article, the Court shall direct the cancellation of the prior Long-Term Letter of Credit within 91 days after delivery to the Court of any replacement of a Long-Term Letter of Credit. In the event that the Court is entitled to draw upon a Long-Term Letter of Credit when there are two Letters of Credit currently in place, the Court shall not draw an aggregate amount in excess of the highest valued Long-Term Letter of Credit.

(v) Prior to the expiration of the Special Master's appointment pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Special Master. During the time the Long-Term Letter of Credit is payable to the Special Master, the Special Master may draw on the Long-Term Letter of Credit as provided in paragraph 98. In the event that the Special Master draws upon the Long-Term Letter of Credit due to an event of default, the Special Master shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a). After the Special Master's appointment expires pursuant to paragraph 90, the Long-Term Letter of Credit shall be payable to the Court and, in the event that the Court draws on the Long-Term Letter of Credit, the Court shall place the proceeds of the Long-Term Letter of Credit in a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

(vi) Whether the Long-Term Letter of Credit is payable to the Special Master or the Court, it shall not, prior to its expiration date, be revoked or terminated by Honeywell except consistent with this Consent Decree and with the approval of the Court. The ability of the Special Master or the Court to draw upon the Long-Term Letter of Credit shall not be limited by any agreement between Honeywell and the issuer.

(vii) In the event that the Long-Term Letter of Credit is drawn upon and invested pursuant to paragraph 103(b)(ii), 103(b)(v), or 109 and Honeywell has also selected a trust fund pursuant to paragraph 103(a), resulting in the existence of two trust funds, the two trust funds shall be managed so as to ensure that the combined amount of the trust funds is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary.

(c) **Combination**. Honeywell may use some combination of a trust fund and a letter of credit to achieve the requirements of this paragraph. However, if a combination is used, Honeywell shall ensure that the combined amount of financial assurances is sufficient to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. The trust fund and the letter of credit shall otherwise satisfy all the requirements of paragraphs 103(a) and 103(b).

104. **Procedures for Review of the Proposed Long-Term Financial Assurances**. No later than June 1, 2009, Honeywell shall submit to Riverkeeper and the Special Master, for their review (a) the amount of the proposed long-term financial assurances; (b) the form(s) of the proposed long-term financial assurance mechanisms; and (c) the name(s) of the institution proposed to manage or issue the long-term financial assurances. If Riverkeeper agrees to the terms of the proposed long-term financial assurances, within 60 days of such agreement, Honeywell shall create a trust fund and/or secure a Long-Term Letter of Credit on those terms. If the Parties are unable to reach agreement over the terms of the long-term financial assurances, the Parties shall submit the dispute to the Special Master, who shall recommend a resolution of the dispute. Any Party shall have the right to seek review by the Court of the Special Master's recommendation regarding the terms of the financial assurances.

105. **Temporary Maintenance of Chromium Remedy Letter of Credit**. Until the long-term financial assurances have been put into place, Honeywell shall maintain the Chromium Remedy Letter of Credit required by paragraph 91 in an amount equal to at least $20,000,000 in 2008 dollars. In the event of any default by Honeywell pursuant to paragraph 98 while the Chromium Remedy Letter of Credit is in place, the provisions of paragraph 103(b)(v) for the placement of the proceeds that exceed the remaining estimated Chromium Remedy costs under

paragraph 91(a)(i), plus a contingency of 25% of the remaining estimated costs under paragraph 91(a)(i), shall apply.

106. **Adjustment of Amount Held in Long-Term Financial Assurances**. Every five years as marked from the establishment of the first long-term financial assurances pursuant to paragraph 103, the Parties shall report to the Court whether the long-term financial assurances are adequately funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. At such time as the Parties report to the Court, any Party may seek an adjustment in the amount of the long-term financial assurances. The Party seeking an adjustment must demonstrate that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Such demonstration shall reflect the actual costs of implementing the remedy and/or any replacement of the remedy, once such actual costs are available. The demonstration shall also reflect the costs of work completed to date and the actual lifetime of the cap, once the cap has been replaced or has passed a replacement interval without requiring replacement. The demonstration shall further reflect the actual performance of the fund and its ability to provide the full amount of the costs subject to long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary. Any demonstration shall be forward looking and shall be based upon estimates of what the activities in paragraphs 102(a)(i) through 102(a)(v) are expected to cost at the time they must be performed and the amount of funding projected to be available to undertake such activities at the time they must be performed. If, after reviewing the submission(s) received from the Parties, the Court determines that the long-term financial assurances are under-funded or over-funded to provide the full amount of the costs subject to

long-term financial assurances, as set forth in paragraph 102(b), at the time those funds are necessary, the Court shall order an adjustment in the amount held in the long-term financial assurances to overcome the shortage or overage. In the event that the Court determines that the long-term financial assurances are under-funded, it shall order Honeywell to increase the amount held in the long-term financial assurances. In the event that the Court determines that any trust fund established pursuant to paragraph 103(a) is over-funded, the Court shall issue an order directing the trust manager to pay the overage to Honeywell. In the event that the Court determines that the Long-Term Letter of Credit is over-funded, the Court shall issue an order permitting Honeywell to reduce the amount covered during the next annual renewal of the Long-Term Letter of Credit pursuant to paragraph 103(b)(iv). Any adjustment to the amount of the Long-Term Letter of Credit pursuant to this paragraph shall be in addition to any adjustment of the amount of the Long-Term Letter of Credit required pursuant to paragraph 103(b).

107. **Exclusive Court Jurisdiction**. The trust fund agreement and/or the Long-Term Letter of Credit shall recite that the trust fund manager and/or issuer of the Long-Term Letter of Credit submit to the exclusive jurisdiction of this Court for any and all disputes arising under the trust fund or the Long-Term Letter of Credit. The requirements of this paragraph shall apply whether the trust fund is established pursuant to paragraph 103(a), 103(b)(ii), 103(b)(v), or 109.

108. **Procedures upon Honeywell's Material Default of Its Obligations after the Special Master's Appointment Has Expired.** Upon the occurrence of default by Honeywell, after the Special Master's appointment has expired, Riverkeeper may move the Court on an expedited basis for an order to withdraw funds from the trust fund or to draw on the Long-Term Letter of Credit. Default shall include:

(a) The failure of Honeywell, in the event that notice is given pursuant to paragraph 103(b)(iv) to deliver a replacement Long-Term Letter of Credit at least 95 days prior to the expiration date of the existing Long-Term Letter of Credit;

(b) The material failure of Honeywell to proceed with diligence and in good faith to carry out the terms of this Consent Decree and the continuance of such a material breach for a period of 30 days after written notice by Riverkeeper to Honeywell of the alleged material failure, unless Honeywell cures the alleged breach within the 30-day notice period or such longer period as the Parties may agree to or the Court may order;

(c) The filing by Honeywell of a petition seeking relief, or the granting of relief, under the Federal Bankruptcy Code or any similar federal or state statute; any assignment for the benefit of creditors made by Honeywell; the involuntary filing of any of the foregoing against Honeywell if the involuntary filing is not dismissed within 60 days; the appointment of a custodian, receiver, liquidator, trustee, or other similar official for Honeywell or for a substantial part of Honeywell's property; any action by Honeywell to effect any of the foregoing; or if Honeywell becomes insolvent as defined in Section 101(32) of the Federal Bankruptcy Code; or

(d) The dissolution, liquidation, merger, consolidation, or reorganization of Honeywell or the institution of any proceeding to effect any of the foregoing, other than under paragraph 108(c), if Honeywell fails to provide assurance to Riverkeeper, and the Court, within 15 days after written notice, that such an event will not impair Honeywell's ability to carry out the terms of this Consent Decree.

109. **Drawing on the Long-Term Letter of Credit in the Event of Honeywell's Default.** If the Court grants any motion by Riverkeeper or pursuant to paragraph 108 to draw on the Long-Term Letter of Credit, the sum approved by the Court's order granting the motion shall be

paid from the Long-Term Letter of Credit into a trust fund, separate from any trust fund created under paragraph 103(a) but satisfying the requirements of paragraph 103(a).

110. **Use of the Trust Fund in the Event of Honeywell's Default.** In the event of Honeywell's default, as defined in paragraphs 108(a) through 108(d), the money in the trust fund established pursuant to paragraph 103(a) shall be available to meet the obligations of paragraph 102(a), as well as for payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

111. **Use of a Trust Fund Established Pursuant to Paragraph 99, 103(b)(ii), 103(b)(v), or 109.** In the event that a trust fund is established pursuant to paragraph 99, 103(b)(ii), 103(b)(v), or 109, the money in the trust fund shall be available to meet the obligations of paragraph 102(a), as well as for the payment of future attorneys' fees and expenses pursuant to paragraph 120. Riverkeeper shall file motions with the Court seeking orders directing how the money in the trust fund shall be used. The Court shall consider motions on an expedited basis and shall enter appropriate orders. The Court may enter an order allowing for automatic withdrawal of regular expenses without separate motion to the Court by Riverkeeper.

112. **Termination of the Long-Term Financial Assurances.** Honeywell's obligations under Article III.K shall be terminated and the long-term financial assurance mechanisms shall be terminated when the Court finds that no hexavalent or total chromium contamination remains in the Open Space AOC or on the Site, whether in soils or in groundwater, in excess of the levels specified for Unrestricted Use in the NJDEP Chromium Directive or any more restrictive

standards for Unrestricted Use in place at the time, whichever is more restrictive. Upon determining that long-term financial assurances may be terminated, the Court shall order that any Long-Term Letter of Credit may be withdrawn in its entirety and any trust fund may be terminated. In conjunction with its order terminating any trust fund, the Court in its discretion shall designate a recipient(s) of any remaining trust funds.

## ARTICLE IV: TERMINATION

113. **Termination of this Consent Decree**. This Consent Decree shall terminate upon the withdrawal of any Party as provided for in this paragraph. Any Party may elect to withdraw from this Consent Decree due to the occurrence of one or more of the following events, provided that such Party provides written notice of withdrawal to the other Parties pursuant to paragraph 118:

(a) The Court fails to enter this Consent Decree or this Consent Decree is determined to be invalid on appeal; or

(b) NJDEP takes one of the following actions with respect to the Remedial Action Work Plan:

(i) Rejects or fails to approve the Remedial Action Work Plan for the Chromium Remedy within 180 days of submission of the plan;

(ii) Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in more than a 50% increase in the estimated costs of the Chromium Remedy as set forth in Article III; or

(iii)Approves the Remedial Action Work Plan for the Chromium Remedy, but conditions such approval on changes in the Work Plan that result in a substantial reduction of the protection of human health and/or the environment.

114. **Procedures for Withdrawal and Termination.** Any Party electing to withdraw pursuant to paragraph 113 and thereby terminate this Consent Decree shall provide written notice of such withdrawal and termination to all other Parties within 30 days of the occurrence giving rise to the decision to withdraw. If any Party objects to termination of the Consent Decree, or believes that the conditions set forth in paragraph 113 have not been met, such objecting Party may move the Court for an expedited hearing on the issue of whether the conditions for termination have been effectuated.

115. **Good-Faith Obligation to Avoid Termination.** The Parties agree that they will each endeavor to fulfill the terms of this Consent Decree, that they will work diligently and in good faith to meet their obligations hereunder, and that they will promptly and timely take all reasonable steps to give effect to this Consent Decree and to avoid termination under paragraph 113.

116. **Effect of Termination.** If this Consent Decree is terminated pursuant to paragraph 113, the Consent Decree shall no longer be binding on the Parties and shall be of no further effect. In the event that this Consent Decree is terminated by one or more Parties pursuant to paragraph 113, each Party to this Consent Decree reserves all of its rights, claims, and defenses (both legal and factual) against the other Parties with respect to the matters at issue in the Consolidated Litigation and each Party remains free to pursue such rights, claims, and defenses.

## ARTICLE V: TRANSFER OF TITLE TO BAYFRONT REDEVELOPMENT LLC

117. **Transfer of Title of Study Areas 6 South and 7 to and from Bayfront Redevelopment LLC.** The transfer of title of Study Area 6 South and Study Area 7 properties to Bayfront Redevelopment LLC pursuant to the Jersey City/Honeywell Consent Order and any subsequent transfers shall not impede Honeywell's obligations to (a) complete the remediation of

Study Area 7 and implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or (b) complete the Chromium Remedy and conduct long-term monitoring and fulfill its other obligations set forth in this Consent Decree. Such transfers of Study Areas 6 South and Study Area 7 shall not include a transfer of Honeywell's obligations to implement the Final Judgment and subsequent orders in *ICO v. Honeywell* or a transfer of Honeywell's obligations under this Consent Decree, but shall include a right of access or any other right required by Honeywell to complete the remediation. Any subsequent transfer of Study Area 6 South or Study Area 7 from Bayfront Redevelopment LLC to a redeveloper or other party shall provide all necessary agreements to allow Honeywell all necessary access to Study Area 6 South and Study Area 7 for purposes of completing Honeywell's obligations with respect to Study Area 6 South under this Consent Decree and completing the Study Area 7 remediation and implementing the Final Judgment and subsequent orders in *ICO v. Honeywell*.

## ARTICLE VI: NOTICE

118. **Notice**. Any and all notices given in connection with this Consent Decree shall be deemed adequately given only if in writing and addressed to the Party for whom such notices are intended at the addresses set forth in this paragraph. All notices shall be sent by Federal Express or other nationally recognized overnight messenger service or by first-class registered or certified mail, postage prepaid, return receipt requested. A written notice shall be deemed to have been given to the recipient party on the earlier of (a) the date it shall be delivered to the address set forth in this paragraph; (b) the date delivery shall have been refused at the address set forth in this paragraph; or (c) with respect to notices sent by mail, the date as of which the postal service shall have indicated such notice to be undeliverable at the address set forth in this paragraph.

Any and all notices referred to in this Consent Decree, or which any Party desires to give to the other, shall be addressed as follows:

If to Honeywell and/or
Bayfront Redevelopment LLC :

Tom Byrne, Esq.
Honeywell International Inc.
101 Columbia Road
Morristown, NJ 07962
(973) 455-2775

Any party may change its designated recipients or addresses for notice in this paragraph by providing written notice of such change to all other Parties.

## ARTICLE VII: RIVERKEEPER'S ATTORNEYS' FEES

119. **Payment of Past Fees and Expenses.** Within 30 days of the entry of this Consent Decree, Honeywell shall pay Terris, Pravlik & Millian, LLP the sum of $813,000.00 which represents the following:

(a) A compromise of the attorneys' fees incurred by Riverkeeper in the litigation of Study Area 6 South portion of *Riverkeeper v. Honeywell* through August 31, 2008; and

(b) $353,746.67 in out-of-pocket expenses representing a portion of the expenses incurred by Riverkeeper in *Riverkeeper v. Honeywell* from the inception of the litigation after deducting the expenses paid pursuant to the Sediment Consent Order, the Deep Groundwater Consent Order, and the Study Area 6 North Consent Decree.

(c) Payment of the sum of $813,000.00 shall be in full satisfaction of all obligations, duties, and responsibilities of Honeywell with respect to the $879,317.92 in fees and expenses that Riverkeeper claimed with regard to the above described fees and expenses.

120. **Future Fees and Expenses.** Honeywell shall reimburse Riverkeeper's attorneys for reasonable fees and expenses incurred: (a) in negotiating this Consent Decree after August 31, 2008; (b) in the monitoring and enforcement of this Consent Decree; and (c) in participation in the Special Master process established pursuant to this Consent Decree. Honeywell shall also reimburse Riverkeeper for reasonable attorneys' fees and expenses for Riverkeeper's review of and participation in the Long-Term Monitoring Plan and monitoring and enforcement of this Consent Decree following the term of the Special Master. In the event that any dispute arises between the Parties under this Consent Decree that must be resolved by the Court, Riverkeeper shall be entitled to recover its attorneys' fees and expenses for litigation of the dispute to the extent allowed by federal law. Riverkeeper and Honeywell shall use the same informal procedure for attempting to settle fees issues as has been used for post-judgment monitoring fees in *ICO v. Honeywell*. In the event that Riverkeeper and Honeywell are unable to reach a settlement on fees, Riverkeeper shall apply to the Court for an award of attorneys' fees and expenses. If Honeywell objects to only a portion of the Riverkeeper's statement of attorneys' fees and expenses, Honeywell shall pay the undisputed portion within 60 days of Riverkeeper's submittal of the statement to Honeywell. The Court shall resolve any objections to

Riverkeeper's statement of attorneys' fees and expenses and shall enter an appropriate Order. In the event of Honeywell's default, Riverkeeper may seek attorneys' fees from any trust fund or court registry funds established pursuant to the financial assurances provisions of this Consent Decree.

## ARTICLE VIII: MISCELLANEOUS PROVISIONS

121. **Force Majeure.** Force Majeure, for the purposes of this Consent Decree, is defined as an event arising from causes beyond the control of any Party or Parties (or their agents, contractors, subcontractors, representatives, or assigns) which could not have been overcome by reasonable diligence and which delays or prevents the performance of any obligation under this Consent Decree. Examples of events which may constitute force majeure include the refusal of any federal or state governmental authority to grant a permit or authorization necessary for the completion of actions required by this Consent Decree, floods, hurricanes, tornadoes, and other extraordinary weather events, earthquakes and other natural disasters, terrorist attacks, war, and other national emergencies. Examples of events that are not force majeure events include normal inclement weather, increased costs or expense, the failure to timely and fully apply for a permit or authorization necessary for the completion of actions required by this Consent Decree, or financial difficulty of any Party. The Party claiming force majeure shall bear the burden of showing an event was a force majeure event.

122. **Bayfront Redevelopment LLC as a Party.** As a signatory to this Consent Decree, Bayfront Redevelopment LLC subjects itself to the Court's jurisdiction for the purpose of enforcing this Consent Decree and agrees to be bound by this Consent Decree. This Consent Decree shall be fully enforceable against Bayfront Redevelopment LLC.

123. **Successors and Assigns.** This Consent Decree shall be binding upon and shall inure to the benefit of the successors, assigns, heirs, corporate parents, subsidiaries, and affiliates of each Party. No assignment or delegation of the obligations hereunder shall release the assigning Party from its obligations under this Consent Decree.

124. **Successors to Hackensack Riverkeeper, Inc.** In the event that Hackensack Riverkeeper, Inc. disbands or otherwise ceases operations, it shall assign its rights under this Consent Decree to another qualified nonprofit organization. A nonprofit organization shall be qualified for assignment under this Consent Decree if it is a charitable organization under Section 501(c)(3) of the Internal Revenue Code or its substantial equivalent and has an established record of working to enhance or preserve the ecology, natural habitat, or environment. Any such assignment shall be subject to approval by the Court and Honeywell shall have the right to object to any proposed assignment. Any successor organization shall have the duty to assign its rights under this Consent Decree to another qualified nonprofit organization in the event that the successor disbands or otherwise ceases operations. In the event that a successor is not appointed at any given time, the New Jersey Attorney General or equivalent officer shall appoint a successor subject to approval by the Court and objection by Honeywell.

125. **Reservation of Rights and Claims.** Except as set forth expressly herein, this Consent Decree does not affect in any way any of the Parties' claims or defenses against third parties who have not signed the Consent Decree.

126. **Governing Law and Continuing Jurisdiction.** The Court shall retain jurisdiction over the matters addressed in this Consent Decree for purposes of enabling the Parties to apply to the Court for any further order as may be necessary to construe, carry out, or enforce the terms of this Consent Decree. This Consent Decree shall be interpreted and enforced under the laws of

the United States and the State of New Jersey by the United States District Court for the District of New Jersey.

127. **Construction.** Questions regarding the interpretation of this Consent Decree shall not be resolved against any Party on the ground that this Consent Decree has been drafted by that Party. This Consent Decree is the result of review, negotiation, and compromise by each Party.

128. **Authority to Enter into Agreement.** The undersigned representative for each Party represents, certifies, and warrants that he or she is duly authorized by the Party whom he or she represents to enter into the terms of this Consent Decree and bind such Party legally to this Consent Decree.

129. **Measures to Effectuate This Consent Decree.** Jersey City shall take all appropriate steps to ensure that commitments it has agreed to with regard to the Open Space AOC have been duly considered, ratified, and approved. Such steps include consideration of such commitments and an effectuating ordinance at a meeting of the City Council, open to the public, at which members of the public have the opportunity to comment on all aspects of the commitments made by Jersey City..

130. **Modifications.** This Consent Decree may be modified by mutual agreement of the Parties but such agreement must be in writing, duly and properly signed by all Parties, and shall be submitted to the Court for approval.

131. **Severability.** Each of the provisions in paragraph 74 of this Consent Decree shall be deemed severable and, in the event that one or more of such provisions is deemed invalid or unenforceable, it shall not affect the validity or enforceability of the other provisions of the Consent Decree.

132. **Signatures.** This Consent Decree may be signed simultaneously or in counterparts by the respective signatories, which shall be as fully valid and binding as if a single document was signed by all of the signatories. This Consent Decree may be signed electronically by any or all signatories, and such electronic signature shall be as fully valid and binding as a hand-written signature.

Consented to and approved for entry:

The Honorable Robert G. Torricelli
Office of the Special Master
*RGTSpecialMaster@aol.com*

**Re: Initiation of Long Term Groundwater Monitoring**
**Study Area 6 (SA-6) South**
**Jersey City, New Jersey**

Dear Senator Torricelli:

In accordance with the September 1, 2016 Revised Draft SA-6 Long Term Monitoring Plan (LTMP) and the Groundwater Level Monitoring Plan (GWLMP) which was Appendix J of the SA-6 North Chromium Remedy 100% Design Report, Honeywell is hereby providing notice to the Parties that we will initiate long-term groundwater monitoring activities at SA-6 South the week of November 14, 2016. While Honeywell acknowledges the LTMP has not been approved as final by the parties, Honeywell will act to meet the requirements of the current draft to move site activities forward. Since the Chromium Remedy at SA-6 South was substantially complete when the geomembrane liner was installed in October 2015, the 12-month "transition period" for groundwater specified in the LTMP and GWLMP ended in October 2016. We have authorized our environmental consultants, Amec Foster Wheeler and Cornerstone, to implement the following general activities at SA-6 South:

- Install data loggers in piezometers,
- Conduct manual water level gauging, and
- Implement quarterly groundwater sampling of the twelve specified monitoring wells in the Development AOC.

Similarly for SA-6 North, we are monitoring the groundwater level recovery following completion of excavation and geomembrane liner installation, and anticipate that the "transition period" will be complete in Spring 2017. At that time, we will initiate long-term monitoring at SA-6 North. The Spring 2017 monitoring will include the inspections associated with the cap vegetation.

In response to Plaintiffs' request to establish baseline groundwater quality conditions inside the Open Space Areas, Amec Foster Wheeler collected filtered and unfiltered groundwater samples from each piezometer on the interior of both Sites. The samples were analyzed for total and hexavalent chromium. A summary of this data is provided in the attached Table 1. The location of the piezometers is shown on the attached Figure 1.

Should the Parties wish to discuss this further, we will be prepared to discuss at the next All Parties meeting on November 15th. Should you have any questions in the meantime, please contact the undersigned at (973) 455-2175.

Sincerely,

William J. Hague
Global Director, Remediation
Design and Construction

## Key Activities – Last Month (March 2013)

**Study Area 6 North Sites 087 and 088**

- Honeywell and Amec continued finalization of the Issued for Construction Design Packages for both SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.
    - Honeywell and Amec met with the Jersey City Entities to continue to advance the Site Preparation Activities including clearing of vehicles and materials from the surcharge area.
    - On March 27, 2013, Arcadis submitted the draft Construction Completion Report documenting the activities related to removal of residual oil materials from the Sedimentation Basin.
    - On February 21, 2013, Amec collected groundwater samples from three (3) monitoring wells in the vicinity of the Sedimentation Basin for analysis of total petroleum hydrocarbons – diesel range organics (TPH-DRO).
- Honeywell continued to work with Plaintiffs to resolve the outstanding comments on the Open Space Design Standards.
- Honeywell continued efforts to develop an access agreement for the Trenk property.
- Honeywell and Amec continued to meet with the Chromium Remedy contractor on a weekly basis to implement action items developed during the Constructability Review meetings.

The following activities are noted as part of the Non-Chromium PDI:

- On March 12, 2013, Amec met with representatives of the manufacturer of the SVE/GWE System at the JCMUA UST area to perform a root-cause analysis following the software malfunction on February 20, 2013. Based on successfully testing all system fault shut-down procedures, Amec restarted the SVE/GWE System on March 15, 2013.
- On March 25, 2013, NJDEP issued a Discharge to Groundwater (DWG) Permit by Rule Authorization for continued Phase II EAB implementation at the JCIA and JCDPW UST areas in 2013.
- Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
- Honeywell continued to work with offsite property owners to advance discussions on Access Agreement finalization.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
    - The site utility contractor, Creamer, mobilized to the site on March 28, 2013.
    - Submittal and request for information (RFI) phase are in process with the Site Utility Relocation Contractor and the Building Contractor.
    - Footings and Foundation Permit was obtained from Jersey City.
- On March 14, 2013, Amec and Honeywell hosted a pre-bid meeting at SA-6 South for the In-Situ Chemical Reduction Treatment Program at Site 163.
- The following activities are noted as part of the Non-Chromium PDI:
    - Amec continues to evaluate data from additional soil samples collected in February as part of pre-design investigation activities at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium.

## Key Activities Planned for This Month (April 2013)

**Study Area 6 North Sites 087 and 088**

- On April 16, 2013, Honeywell and Amec will submit the Issued for Construction Design Packages for both SA-6 North and SA-6 South Chromium Remedy projects to NJDEP, the Special Master, Plaintiffs, and stakeholders.
- Honeywell and Amec will continue to work with Plaintiffs to finalize the Open Space Design Standards with anticipated submittal as part of the Issued for Construction Design Packages on April 16, 2013.
- Amec will continue preparation of construction-related permit applications for submittal to governing agencies for the SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell will continue efforts to develop an access agreement for the Trenk property.
- Honeywell and its consultants will continue the Non-Chromium activities including:
    - Amec will continue to operate and maintain the SVE/GWE system.
    - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec will continue to evaluate contractor bids for implementing the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South).
- Honeywell and Amec will continue to advance the new GWTP construction project.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:

- Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property including removal and disposal of the remaining boats.
- Continue to evaluate additional pre-design investigation step-out boring analytical data in recently collected soil samples from Site 163.

## Key Activities – Last Month (April 2013)

**Study Area 6 North Sites 087 and 088**

- On April 16, 2013, Honeywell and Amec finalized and submitted the Issued for Construction (Special Master Review) Design Packages for both SA-6 North and SA-6 South Chromium Remedy projects.
- On May 1, 2013, Honeywell issued an Errata letter regarding a correction to the Legend on select drawings associated with SA-6 South.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.
    - Honeywell and Amec continued to coordinate with the Jersey City Entities regarding clearing of vehicles and materials from the surcharge area.
    - On May 1, 2013, Arcadis submitted the revised draft Construction Completion Report documenting the activities related to removal of residual oil materials from the Sedimentation Basin.
- Honeywell and Plaintiffs resolved the outstanding comments on the Open Space Design Standards (OSDS). The OSDS was provided as Appendix L in the Issued for Construction (Special Master Review) Design Packages submitted on April 16, 2013.
- Honeywell continued efforts to develop an access agreement for the Trenk property.
- Honeywell and Amec continued to coordinate with PVSC regarding the condition assessment of the 72-inch Force Main. While technical details have been addressed between PVSC and Honeywell it appears additional reviews at NJDEP may impact overall remedy schedule.
- Honeywell and Amec continued to meet with the Chromium Remedy contractor on a weekly basis to implement action items developed during the Constructability Review meetings.

The following activities are noted as part of the Non-Chromium PDI:

- The SVE/GWE System has been operating continuously since being re-started on March 15, 2013.
- Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
- Honeywell continued to work with offsite property owners to advance discussions on Access Agreement finalization.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
  - The site utility contractor, Creamer, continued their construction activities, including installation of the storm sewer lines and relocation of an existing water line.
  - Amec is continuing to work with PVSC to obtain an indirect discharge permit and NJDEP to modify the existing air permit for the existing GWTP.
  - Amec and the building erection contractor, Oradel, continue to work through administrative submittals in advance of mobilization for the building foundation work.
- On April 12, 2013, Honeywell and Amec obtained best and final bids for SA-6 South for the In-Situ Chemical Reduction Treatment Program at Site 163.
- On April 26, 2013, Honeywell and Amec obtained best and final bids for the above-grade demolition of 60 Kellogg Warehouse and 80 Kellogg structures.
- On April 26, 2013, Arecon Ltd., mobilized to the site to begin removal of the boats on the Harsimus Property.
- The following activities are noted as part of the Non-Chromium PDI:
  - Amec continues to evaluate data from additional soil samples collected in February as part of pre-design investigation activities at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium.

## Key Activities Planned for This Month (May 2013)

**Study Area 6 North Sites 087 and 088**

- On May 3, 2013, Amec submitted the Soil Erosion and Sedimentation Control Permit to Hudson-Essex-Passaic Soil Conservation District.
- Amec will continue preparation of construction-related permit applications for submittal to governing agencies for the SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell and Amec will continue to coordinate with PVSC regarding the condition assessment of the 72-inch Force Main.
- Honeywell will continue efforts to develop an access agreement for the Trenk property.

- Amec will coordinate with ISOTEC and Jersey City Entities on the mobilization and implementation schedule for the in-situ treatment of the three designated areas.
- Honeywell and its consultants will continue the Non-Chromium activities including:
    - Amec will continue to operate and maintain the SVE/GWE system.
    - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.
    - Arcadis will perform additional groundwater monitoring to evaluate the progress of the Enhanced Anerobic Bioremediation work on JCIA-1A and JCDPW-1A.
    - Honeywell will continue to work with offsite property owners to advance discussions on Access Agreement finalization.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec will complete evaluation of contractor bids for implementing the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South) and execute a contract with the successful bidder.
- Honeywell and Amec will continue to advance the new GWTP construction project.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:
    - Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property and complete removal and disposal of the remaining boats.
    - Continue to evaluate additional pre-design investigation step-out soil boring analytical data from Site 163.

## Key Activities – Last Month (May 2013)

### Study Area 6 North Sites 087 and 088

- On May 14, 2013, Honeywell received comments from the Plaintiffs on the Issued for Construction (Special Master Review) Design Packages for both SA-6 North and SA-6 South Chromium Remedy projects submitted in April 2013.
- On May 20, 2013, Honeywell received comments from the Special Master on the Issued for Construction (Special Master Review) Design Packages for both SA-6 North and SA-6 South Chromium Remedy projects submitted in April 2013.
- On May 20, 2013, Honeywell received Soil Erosion and Sedimentation Control Permit from Hudson-Essex-Passaic Soil Conservation District for both SA-6 North and SA-6 South Chromium Remedy projects.
- On May 29, 2013, Honeywell received the Authorization to Discharge – 5G3 Construction Activity Stormwater (GP) from NJDEP for both SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.
    - Honeywell and Amec continued to coordinate with the Jersey City Entities regarding clearing of vehicles and materials from the surcharge area.
    - On June 7, 2013, Arcadis submitted the final revised draft Construction Completion Report documenting the activities related to removal of residual oil materials from the Sedimentation Basin.
- Honeywell continued efforts to develop an access agreement for the Trenk property.
- Honeywell and Amec continued to coordinate with PVSC regarding the condition assessment of the 72-inch Force Main. While technical details have been addressed between PVSC and Honeywell it appears additional reviews scheduled for June 11, 2013 with NJDEP may impact overall remedy schedule.
- Honeywell and Amec continued to meet with the Chromium Remedy contractor on a weekly basis to implement action items developed during the Constructability Review meetings.

- On May 13, 2013, Amec conducted a kick-off meeting with Amec's in-situ injection subcontractor, ISOTEC, and Jersey City Entities to discuss the mobilization and implementation schedule for the in-situ treatment of the three designated areas.

The following activities are noted as part of the Non-Chromium PDI:

  - The SVE/GWE System has been operating continuously since being re-started on March 15, 2013.
  - Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
  - On May 19 and 20, 2013, Arcadis collected groundwater samples from the two (2) underground storage tank (UST) areas of concern (AOCs) in which Arcadis previously conducted enhanced anaerobic in-situ bioremediation (EAISB) injections to update groundwater contaminant concentrations.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
  - The site utility contractor, Creamer, completed installation of the storm sewer lines and relocation of an existing water line. Also, installation of new 6-inch water service and two new fire hydrants was completed.
  - Amec is continuing to work with PVSC to obtain an indirect discharge permit and NJDEP to modify the existing air permit for the existing GWTP.
  - The building contractor, Oradel, commenced construction of the building foundations.
- Honeywell and Amec completed evaluation of contractor bids for implementing the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South) and issued notice to proceed with ERFS.
- The following activities are noted as part of the Non-Chromium PDI:
  - Amec continues to evaluate data from additional soil samples as part of pre-design investigation activities at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium.

## Key Activities Planned for This Month (June 2013)

**Study Area 6 North Sites 087 and 088**

- Amec will continue preparation of construction-related permit applications for submittal to governing agencies for the SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell and Amec will continue to coordinate with PVSC regarding the condition assessment of the 72-inch Force Main. On June 11, 2013, Honeywell and Amec will meet with PVSC, all Parties, and NJDEP on this matter.

- Amec and ISOTEC will continue to prepare for the commencement of in-situ treatment of the three designated areas and coordinate with Jersey City Entities on the mobilization and implementation schedule.
- Honeywell and its consultants will continue the Non-Chromium activities including:
    - Amec will continue to operate and maintain the SVE/GWE system.
    - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.
    - Arcadis and Amec will evaluate the additional groundwater results to evaluate the progress of the Enhanced Anaerobic Bioremediation work on JCIA-1A and JCDPW-1A AOCs.
    - Honeywell will meet with offsite property owners to coordinate the remaining offsite investigation field work for delineating the JCDPW UST area.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Amec and ERFS will prepare the Contractor Work Plan for the In-Situ Chemical Reduction Treatment Program at Site 163.
- Honeywell and Amec will continue to advance the new GWTP construction project.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:
    - Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property.

## Key Activities – Last Month (June 2013)

**Study Area 6 North Sites 087 and 088**

- In June 2013, Amec completed measurement of groundwater pH at selected locations along the hydraulic barrier alignment at both the SA-6 North and South Sites.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.
    - Honeywell and Amec advanced the engineering cost estimate for the above-grade demolition of the JCIA structures.
- On June 11, 2013, Honeywell and Amec met with PVSC, Hatch Mott MacDonald (HMM), NJDEP, and all Parties to discuss the existing condition assessment of the 72-inch Force Main and the potential relocation of the hydraulic barrier wall. Honeywell and Amec will continue to work through technical details and will submit proposed remedial design revisions to all Parties once finalized.
- Honeywell and Amec continued to import Novartis surcharge materials to the site. The additional 30,000 cubic yards of material is expected to be onsite in early July 2013.
- On June 17, 2013, Entact, the chromium remedy excavation contractor, initiated mobilization activities at the site.
- On June 17, 2013, Amec and the in-situ injection subcontractor, ISOTEC, mobilized and initiated the in-situ treatment of two of the three designated treatment areas (Treatment Area 7 and 8). The third area (Treatment Area 10) is on hold until the potential relocation of the hydraulic barrier wall proximate to the 72-inch Force Main is finalized.
- On June 26, 2013, Honeywell held separate project update meetings with the Mayor-elect and the general public which were attended by all Parties.
- Honeywell continued efforts to develop an access agreement for the Trenk property.

The following activities are noted as part of the Non-Chromium PDI:

- The SVE/GWE System appears to be reaching asymptotic levels and Amec is collecting performance data to determine future operation.
- Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
- Arcadis received and started evaluating analytical data from groundwater samples collected from the two (2) underground storage tank (UST) areas of concern (AOCs) in which Arcadis previously conducted enhanced anaerobic in-situ bioremediation (EAISB) injections to update groundwater contaminant concentrations.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
  - The site utility contractor, Creamer, completed initial activities and demobilized.
  - The building contractor, Oradell, continued construction of the building foundations.
  - We continued to advance remaining permits pending with NJDEP for the air permit and Jersey City Building Department for the GWTP Building permit.
- The in-situ injection subcontractor for the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South), ERFS, continued to prepare the Implementation Work Plan.
- The following activities are noted as part of the Non-Chromium PDI:
  - Amec continues to evaluate data from additional soil samples as part of pre-design investigation activities at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium.

## Key Activities Planned for This Month (July 2013)

**Study Area 6 North Sites 087 and 088**

- Honeywell will enter the 100% Designs for SA-6 North and South with the Court.
- Amec will continue preparation of construction-related permit applications for submittal to governing agencies for the SA-6 North and SA-6 South Chromium Remedy projects.
- Honeywell and Amec will continue to coordinate with PVSC regarding resolution of the barrier wall location relative to the 72-inch Force Main.
- Amec and Entact will continue mobilization activities including placement of trailers, construction of erosion controls and processing of historic fill stockpiles for surcharge.
- Honeywell and its consultants will continue the Non-Chromium activities including:
  - Amec will evaluate the need for additional operation of the SVE/GWE system.
  - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.

  - Arcadis and Amec will continue to evaluate the additional groundwater results to evaluate additional full-scale implementation of the Enhanced Anaerobic Bioremediation work on JCIA-1A and JCDPW-1A AOCs.
  - Honeywell will meet with offsite property owners to coordinate the remaining offsite investigation field work for delineating the JCDPW UST area.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Amec and ERFS will prepare the Contractor Work Plan for the In-Situ Chemical Reduction Treatment Program at Site 163.
- Honeywell and Amec will continue to advance the new GWTP construction project.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:
  - Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property.
  - Implement additional delineation soil samples as part of pre-design investigation activities at Site 163.

## Key Activities – Last Month (July 2013)

### Study Area 6 North Sites 087 and 088

- On July 10, 2013, Honeywell entered the Final 100% Design Reports for SA-6 North and South with the Court.
- Amec and Entact continued Chromium Remedy activities:
  - Completed mobilization activities including placement of trailers and perimeter fencing;
  - Continued construction of erosion controls, and
  - Initiated processing of historic fill stockpiles for use as surcharge.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.

  - Honeywell submitted the engineering cost estimate for the above-grade demolition of the JCIA structures.

- Honeywell and Amec continued technical discussions with PVSC, Hatch Mott MacDonald (HMM), NJDEP, and all Parties regarding the existing condition assessment of the 72-inch Force Main and the planned relocation of the hydraulic barrier wall.
- On August 1, 2013, Honeywell submitted technical memorandums to Special Master independently prepared by Amec and HMM indicating that the structural integrity of the 72-inch Force Main can be protected by relocating the hydraulic barrier wall 15 feet to the south of the position depicted in the 100% Design.
- Honeywell and Amec completed importation of Novartis surcharge materials to the site.
- Honeywell and Amec will prepare an amendment to the NJDEP-Discharge to Groundwater (DGW) Work Plan to address the in-situ approach for the new area resulting from the planned 15-foot relocation of the hydraulic barrier wall proximate to the 72-inch Force Main.
- Honeywell continued efforts to develop an access agreement for the Trenk property.

The following activities are noted as part of the Non-Chromium PDI:

  - The SVE/GWE System appears to be reaching asymptotic levels and Amec collected the final performance data to determine future operation.
  - Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
  - Arcadis completed evaluating analytical data from groundwater samples collected from the two (2) underground storage tank (UST) areas of concern (AOCs) in which Arcadis previously conducted enhanced anaerobic in-situ bioremediation (EAISB) injections to update groundwater contaminant concentrations. Arcadis is currently finalizing their recommendations to Honeywell for further actions in these AOCs.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Amec and Entact continued Chromium Remedy activities.
  - Initiated collection of waste characterization soil samples from areas on SA-6 South where soil is designated for offsite disposal;
  - Initiated pre-trenching activities of the hydraulic barrier alignment and temporary excavation support sheet pile alignments; and
  - Initiated drilling and installation of shallow construction dewatering wells at Site 124.
- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
  - All Jersey City Building Department permits for the GWTP were obtained.
  - The building contractor, Oradell, substantially completed construction of the building foundations, roughed in all sub-slab utilities, and the building floor slab.

  - The groundwater extraction piping system modification contractor, ENR, started the submittal process for extraction piping power and control modifications.
  - The building steel erection contractor, BCA, began mobilization activities.
  - On July 19, 2013, we submitted the application for the NJDEP air permit for the GWTP system.
- The in-situ injection subcontractor for the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South), ERFS, continued to prepare the Implementation Work Plan.
- The following activities are noted as part of the Non-Chromium PDI:
  - On July 24, 2013, Amec collected additional step-out soil samples as part of pre-design investigation activities at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium.

## Key Activities Planned for This Month (August 2013)

### Study Area 6 North Sites 087 and 088

- Honeywell and Amec will submit design revisions to accommodate the barrier wall relocation relative to the 72-inch Force Main.
- Amec and Entact will continue Chromium Remedy activities:
  - Processing of historic fill stockpiles for surcharge; and
  - Initiate utility abandonment.
- Honeywell and its consultants will continue the Non-Chromium activities including:
  - Amec will terminate operation of the SVE/GWE system and demobilize the system.
  - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.
  - Arcadis will finalize recommendations to Honeywell concerning additional full-scale implementation of the Enhanced Anaerobic Bioremediation work on JCIA-1A and JCDPW-1A AOCs.
  - On August 7, 2013, Amec collected groundwater samples from temporary well points installed on the offsite property to complete delineation of the JCDPW UST area.

### Study Area 6 South Sites 073, 124, 125, 134, 140, and 163

- Amec and Entact will continue Chromium Remedy activities:
  - Drilling and installing dewatering wells;
  - Initiate hydraulic barrier wall installation; and
  - Evaluate waste characterization soil sample results and initiate the waste profiling process.
- Amec and ERFS will complete the draft Contractor Work Plan for the In-Situ Chemical Reduction Treatment Program at Site 163.

- Honeywell and Amec will continue to advance the new GWTP construction project:
    - Pouring of remaining concrete building floor slabs;
    - Substantially complete the building shell erection; and
    - Complete the sanitary lift station.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:
    - Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property.
    - Evaluate the data from the additional delineation soil samples as part of pre-design investigation activities at Site 163.

## Key Activities – Last Month (August 2013)

### Study Area 6 North Sites 087 and 088

- Amec and Entact continued Chromium Remedy activities as follow:
  - Completed construction of erosion controls;
  - Continued processing of historic fill stockpiles for use as surcharge;
  - Initiated utility abandonment; and
  - Completed the construction access road across SA-7 and the ramp and new gate between SA-6 North and SA-7.
- Honeywell and Amec continued to coordinate implementation of the Site Preparation Plan activities for facility demolition and planned relocation of the Jersey City (JC) Entities.

- Honeywell and Amec continued technical discussions with PVSC, Hatch Mott MacDonald (HMM), NJDEP, and all Parties regarding the existing condition assessment of the 72-inch Force Main and the planned relocation of the hydraulic barrier wall.
- Honeywell and Amec continued to amend the NJDEP-Discharge to Groundwater (DGW) Work Plan to address the in-situ approach for the new area resulting from the planned 15-foot relocation of the hydraulic barrier wall proximate to the 72-inch Force Main.
- Honeywell continued efforts to develop an access agreement for the Trenk property.

The following activities are noted as part of the Non-Chromium PDI:

  - Operation of the SVE/GWE System was terminated and the System trailer was decontaminated and demobilized from the Site and the electrical service drop was removed.
  - Amec continued monthly inspections of the select monitoring wells installed within the UST areas where separate phase product has been observed.
  - Amec evaluated groundwater sample results from temporary well points installed on the offsite property to complete delineation of the JCDPW UST area. Results indicate delineation is complete.
  - Arcadis is finalizing proposals for remaining enhanced anaerobic in-situ bioremediation (EAISB) injections.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Amec and Entact continued Chromium Remedy activities as follow:
  - Continued collection of waste characterization soil samples from areas where soil is designated for offsite disposal (including soils with hexavalent chromium >1,000 mg/kg and non-chromium soils areas which are being remediated concurrently);
  - Initiated vibration monitoring at the diner located on the Kellogg Street jughandle;
  - Continued pre-trenching activities and initiated installation of sheeting within the hydraulic barrier alignment on Sites 073, 124, 125, and 134 and temporary excavation support sheet pile alignments;
  - Continued drilling and installation of shallow construction dewatering wells at Site 124 and initiated installation of the construction groundwater extraction system; and
  - Completed coordination with PSE&G Electrical group for temporary rerouting of overhead electric for installation of the 150 linear foot of hydraulic barrier wall running along the NJDOT right of way; and,
  - Continued reviews with NJDOT regarding a temporary use permit for temporary sheeting, excavating and grading proximate to the Kellogg Street jughandle.
- Amec and Ontario Specialty Contracting completed permitting, asbestos abatement, and initiated demolition of the warehouse portion of the 60 Kellogg Street building.
- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).

  - The building contractor, Oradell, substantially completed installation of the sanitary sewer lift station and substantially completed the exterior truck loading pad, and continued working on process control equipment submittals.
  - The groundwater extraction piping system modification contractor, ENR, continued the submittal process for extraction piping power and control modifications.
  - BCA/Clinton Steel, began steel erection activities of the building shell.
  - On September 9, 2013, we submitted responses to NJDEP technical review comments received in August regarding the NJDEP air permit for the GWTP system.
- On September 6, 2013, Honeywell submitted the contractor work plan for the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South).
- The following activities are noted as part of the Non-Chromium PDI:
  - Amec evaluated the analytical results from the additional at Site 163 in accordance with the NJDEP-approved combined RIR/RASR/RAWP for Non-Chromium and concluded that delineation is complete.

## Key Activities Planned for This Month (September 2013)

**Study Area 6 North Sites 087 and 088**

- Honeywell and Amec will submit revised design drawings to depict the agreed upon barrier wall relocation of 25 feet from the 72-inch Force Main centerline.
- Amec and Entact will continue Chromium Remedy activities:
  - Processing of historic fill stockpiles for surcharge;
  - Initiate construction of the construction water treatment system; and,
  - Installation of surcharge monitoring and acoustical monitoring equipment.
- Honeywell and its consultants will continue the Non-Chromium activities including:
  - Amec will perform ongoing monthly inspections of the JCMUA-1A monitoring wells and product recovery as needed from the JCIA-1B and JCDPW UST Areas.
  - Arcadis will continue to modify the Discharge to Groundwater-Permit By Rule Authorization, and plan for mobilization by the end of October.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

- Amec and Entact will continue Chromium Remedy activities:
  - Drilling and installing dewatering wells and installation of the groundwater extraction system;
  - Complete pre-trenching for the hydraulic barrier at Sites 125 and 134;
  - Continue hydraulic barrier wall installation, including grouting the joints between the sheets in the hydraulic barrier;
  - Continue installation of sheeting for temporary excavation support; and

  - Continue to evaluate waste characterization soil sample results and initiate the waste profiling process.

- Honeywell and Amec will continue to advance the new GWTP construction project:
  - Initiate installation of groundwater extraction treatment system modifications;
  - Substantially complete the building shell erection; and
  - Initiate installation of process control equipment.
- As part of the Non-Chromium remedial design process, Honeywell and Amec will:
  - Continue to support the JCRA in the Eminent Domain process at the former Harsimus Property.
  - Finalize the design of the excavation based on the additional soil delineation data collected at Site 163.

## Key Activities –September 2013

### Study Area 6 North Sites 087 and 088

Amec and Entact continued Chromium Remedy activities as follow:

- Completed construction of the temporary construction water treatment plant (CWTP).
- Completed construction of the double-walled piping for transfer of construction water from SA-6 South across SA-7 to the CWTP on SA-6 North.
- Installed settlement plates in the Sedimentation Basin and surrounding area for monitoring consolidation of subsurface strata during surcharging.

The following activities are noted as part of the Non-Chromium PDI:

- On behalf of Honeywell, Amec submitted requests to terminate permits obtained from NJDEP and PVSC for operation of the SVE/GWE System.
- Arcadis finalized their proposal for remaining enhanced anaerobic in-situ bioremediation (EAISB) injections.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

Amec and Entact continued Chromium Remedy activities as follows:

- Continued vibration monitoring at the diner located on the Kellogg Street jughandle.
- Completed installation of sheeting within the hydraulic barrier alignment on Sites 073, 124, 125, and most of Site 134, and temporary excavation support sheet pile alignments.
- Completed grouting of sheet pile interlocks on the installed hydraulic barrier alignment.
- Completed pre-trenching of temporary excavation support sheet pile alignments along the northern boundary of Site 163.
- Completed drilling and installation of shallow and deep construction dewatering wells at Site 124 and completed the installation of the construction groundwater extraction system.
- Completed coordination with PSE&G Electrical group for temporary rerouting of overhead electric for installation of the 150 linear foot of hydraulic barrier wall running along the NJDOT right of way.
- Completed reviews with NJDOT and obtained a temporary use permit for temporary sheeting, excavating and grading proximate to the Kellogg Street jughandle.

Activities by others:

- Amec and Ontario Specialty Contracting completed demolition of the warehouse portion of the 60 Kellogg Street building.
- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP).
- On September 25, 2013, Honeywell received comments from the Plaintiffs on the contractor work plan for the In-Situ Chemical Reduction Treatment Program at Site 163 (SA-6 South). Honeywell is currently preparing a response.

## Key Activities Planned for This Month (October 2013)

**Study Area 6 North Sites 087 and 088**

Amec and Entact will continue Chromium Remedy activities:

- Processing of historic fill stockpiles for surcharge.
- Coordinate PVSC and JCMUA inspections on the construction water treatment system.
- Installation of surcharge monitoring and acoustical monitoring equipment.

Activities by others:

- Honeywell and Amec will submit revised design drawings to depict the agreed upon barrier wall relocation relative to the 72-inch Force Main centerline.
- Arcadis will submit a modification to the NJDEP Discharge to Groundwater-Permit By Rule Authorization.
- Arcadis will finalize their report summarizing the results of their Phase I EAISB in the JCIA UST AOC. Honeywell will submit this report to NJDEP and ask for closure of the UST Case Number.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

Amec and Entact will continue Chromium Remedy activities:

- Initiate dewatering and excavation at Site 124.
- Continue hydraulic barrier wall installation, including grouting the joints between the sheets in the hydraulic barrier at Site 134.
- Continue installation of sheeting for temporary excavation support.
- Continue the waste profiling process.
- Continue to advance the new GWTP construction project.

As part of the Non-Chromium remedial design process, Honeywell and Amec will:

- Finalize the design of the excavation based on the additional soil delineation data collected at Site 163.

## Key Activities –October 2013

### Study Area 6 North Sites 087 and 088

Amec and Entact continued Chromium Remedy activities as follow:

- On October 8, 2013, Passaic Valley Sewerage Commission (PVSC) inspected the discharge piping and flow meter calibration prior to startup of the temporary construction water treatment system (CWTS).
- Continued processing historic fill stockpiles for use as surcharge.

The following activities are noted as part of the Non-Chromium PDI:

- Amec initiated an evaluation of debris disposal options, which is being screened from the historic fill soil piles located at SA-6 North and is unsuitable for surcharge.
- Arcadis initiated modifications to the existing NJDEP-approved EAISB Work Plan/Discharge to Groundwater-Permit by Rule, dated March 25, 2013 and is preparing to implement the remaining enhanced anaerobic in-situ bioremediation (EAISB) injections.

### Study Area 6 South Sites 073, 124, 125, 134, 140, and 163

Amec and Entact continued Chromium Remedy activities as follows:

- Continued hydraulic barrier wall installation, including the eastern edge of the open space area along Route 440, and continued grouting the joints between the sheets in the hydraulic barrier at Site 134.
- Initiated drilling and installation of surcharge monitoring instrumentation in the cap areas at Site 124 and Site 125.
- Initiated dewatering and excavation at Site 124 and offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 milligrams per kilogram (mg/kg).
- Initiated sampling of less than 20 mg/kg soils in accordance with approved plans.

Activities by others:

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP). The building is complete and the major treatment components are in-place with piping and process control wiring installation continuing.

## Key Activities Planned for This Month (November 2013)

### Study Area 6 North Sites 087 and 088

Amec and Entact will continue Chromium Remedy activities:

- Processing of historic fill stockpiles for surcharge.
- Installing the surcharge monitoring instrumentation proximate to the 72-inch forcemain.

Activities by others:

- Arcadis will prepare a modification to the NJDEP Discharge to Groundwater-Permit By Rule Authorization.
- Honeywell and Amec will coordinate with PVSC and Hatch Mott McDonald to install acoustical monitoring equipment proximate to the 72-inch forcemain.
- Honeywell and Amec will continue to develop the in-situ approach for Treatment Area 10 proximate to the 72-inch forcemain.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

Amec and Entact will continue Chromium Remedy activities:

- Continue dewatering and excavation at Site 124, including offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 mg/kg.
- Complete hydraulic barrier wall installation except proximate to 80 Kellogg Street which is inaccessible until demolition.
- Continue installation of sheeting for temporary excavation support.
- Continue the waste profiling process.
- Continue to advance the new GWTP construction project.

Activity by others:

- Honeywell and Amec will coordinate potential mobilization dates with ERFS to begin in-situ treatment of soils at Site 163.

As part of the Non-Chromium remedial design process, Honeywell and Amec will:

- Finalize the disposal selection for non-chromium impacted materials on Site 163.

Dear Senator Torricelli:

Attached is the Chromium Remedy Monthly Progress Report for Study Areas 6 North and South for activities conducted by Honeywell during the period from November 1 – November 30, 2013.

We are in the process of evaluating the SA-6 North and South, and SA-7 Progress Reports, with plans of combining and expanding the content with regards to operation data in 2014 (February 2014 report focusing on January 2014 activities). We anticipate having a draft outline prepared in January which we will share with the Parties.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

## Key Activities –November 2013

### Study Area 6 North Sites 087 and 088

Amec and Entact continued Chromium Remedy activities as follow:

- Used soft dig approach to uncover the crown of the 72-inch force main for installation of surcharge monitoring instrumentation on the pipeline. Passaic Valley Sewerage Commission (PVSC) and their subcontractors Hatch Mott MacDonald and Pure Technologies concurrently installed the acoustical monitoring equipment.
- Continued processing historic fill stockpiles for use as surcharge.

- Honeywell and Amec continued to develop the revised in-situ work plan to address the expanded Treatment Area 10 footprint proximate to the 72-inch force main.

The following activities are noted as part of the Non-Chromium PDI:

- Arcadis continued modifications to the existing NJDEP-approved EAISB Work Plan/Discharge to Groundwater-Permit by Rule, dated March 25, 2013 and is preparing to implement the remaining enhanced anaerobic in-situ bioremediation (EAISB) injections.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

Amec and Entact continued Chromium Remedy activities as follows:

- Completed hydraulic barrier wall installation, except proximate to 60 Kellogg Street and 80 Kellogg Street which is inaccessible until demolition. Completed installation locations include the western edge of the Open Space Area near the Hackensack River, and grouting the joints between the installed sheets in the hydraulic barrier at Site 134.
- Continued dewatering and excavation at Site 124 and offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 milligrams per kilogram (mg/kg).
- Initiated backfilling of completed excavation areas in the eastern part of Site 124.
- Continued drilling and installation of surcharge monitoring instrumentation in the cap areas at Site 124 and Site 125.
- Continued sampling of less than 20 mg/kg soils in accordance with approved plans. Data was obtained from the first pile sampled in October and approved to be reused.

Activities by others:

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP). The primary activities include continuing installation of process piping and process control wiring.

## Key Activities Planned for This Month (December 2013)

**Study Area 6 North Sites 087 and 088**

Amec and Entact will continue Chromium Remedy activities:

- Processing of historic fill stockpiles for surcharge.
- Continue to install surcharge monitoring instrumentation.

Activities by others:

- Arcadis will continue to prepare the modification to the NJDEP Discharge to Groundwater-Permit By Rule Authorization.
- Honeywell and Amec will continue to coordinate with PVSC and Hatch Mott MacDonald on the acoustical monitoring instrumentation installed on the 72-inch force main.
- Honeywell and Amec will complete the revisions to the in-situ work plan for the expanded Treatment Area 10 footprint proximate to the 72-inch force main.

**Study Area 6 South Sites 073, 124, 125, 134, 140, and 163**

Amec and Entact will continue Chromium Remedy activities:

- Continue dewatering and excavation at Site 124, including offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 mg/kg.
- Continue installation of sheeting for temporary excavation support.
- Continue the waste profiling process.
- Continue to advance the new GWTP construction project.

Activity by others:

- Honeywell and Amec will schedule a technical meeting or conference call with all Parties to as requested by Plaintiffs in their letter dated November 18, 2013 on the Site 163 Contractor In-situ Work Plan.

As part of the Non-Chromium remedial design process, Honeywell and Amec will:

- Finalize the disposal selection for non-chromium impacted materials on Site 163.

## Key Activities –December 2013

### Study Area 6 North Sites 087 and 088

Amec and Entact continued Chromium Remedy activities as follow:

- Completed installation of surcharge monitoring instrumentation on the 72-inch force main. Passaic Valley Sewerage Commission (PVSC) and their subcontractors Hatch Mott MacDonald and Pure Technologies initiated baseline acoustical monitoring.
- Completed processing historic fill stockpiles for use as surcharge and demobilized the screening equipment.
- Honeywell and Amec continued to develop the revised in-situ work plan to address the expanded Treatment Area 10 footprint proximate to the 72-inch force main.

The following activities are noted as part of the Non-Chromium PDI:

- Arcadis continued modifications to the existing NJDEP-approved EAISB Work Plan/Discharge to Groundwater-Permit by Rule, dated March 25, 2013 and is preparing to implement the remaining enhanced anaerobic in-situ bioremediation (EAISB) injections.

### Study Area 6 South Sites 073, 124, 125, 134, 140, and 163

Amec and Entact continued Chromium Remedy activities as follows:

- Continued to receive shipments of steel sheet pile in preparation for completing 60 Kellogg, 80 Kellogg and the SA-6 North section of barrier wall installation proximate to the 72-inch force main.
- Continued dewatering and excavation at Site 124 and offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 milligrams per kilogram (mg/kg).
- Continued backfilling of completed excavation areas in the eastern and central parts of Site 124.
- Continued drilling and installation of surcharge monitoring instrumentation in the cap areas at Site 134.
- Continued sampling of less than 20 mg/kg soils in accordance with approved plans. Data was obtained from the stockpiles sampled in November and December and approved for reuse.

Activities by others:

- Honeywell and Amec continued to advance activities associated with construction of the new Groundwater Treatment Plant (GWTP). The primary activities include final installation of process piping and process control wiring and completion of punch list items on the building for final Jersey City inspections.

## Key Activities Planned for This Month (January 2014)

### Study Area 6 North Sites 087 and 088

Amec and Entact will continue Chromium Remedy activities:

- Relocation of non-suitable debris (generated from processing historic fill stockpiles) out of active work areas.
- Continue drilling and installation of surcharge monitoring instrumentation in the western portion of the cap area.
- Initiate abandonment of the former 54-inch Sedimentation Basin discharge pipe.

Activities by others:

- Arcadis will finalize the modification to the NJDEP Discharge to Groundwater-Permit By Rule Authorization.
- PVSC, Hatch Mott MacDonald, and Pure Technologies will continue acoustical monitoring as needed.
- Honeywell and Amec will complete the revisions to the in-situ work plan for the expanded Treatment Area 10 footprint proximate to the 72-inch force main.

### Study Area 6 South Sites 073, 124, 125, 134, 140, and 163

Amec and Entact will continue Chromium Remedy activities:

- Continue dewatering and excavation at Site 124, including offsite transportation and disposal of soils impacted with hexavalent chromium >1,000 mg/kg.
- Initiate stockpile sampling of soils with presumed hexavalent chromium >1,000 mg/kg.
- Continue the waste profiling process.
- Continue to advance the new GWTP construction project including initiating commissioning activities.

Activity by others:

- Honeywell and Amec will schedule a technical meeting or conference call with all Parties as requested by Plaintiffs in their letter dated November 18, 2013 on the Site 163 Contractor In-situ Work Plan.

As part of the Non-Chromium remedial design process, Honeywell and Amec will:

- Finalize the disposal selection for non-chromium impacted materials on Site 163.

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued new Ground Water Treatment Plant (GWTP) construction activities to include completion of operational commissioning, and PW-1 and PW-2 piping connections into new GWTP.
- Passed final Jersey City Inspections for GWTP Building Electrical, Plumbing, Fire & Life Safety and placed initial order for GWTP chemical deliveries.
- Initiated decommissioning activities for exterior ModuTanks at 80 Kellogg Street WWTP.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Completed numerous snow removal events on SA-6N and SA-6S.
- Collected PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Non-chromium activities, ARCADIS continues to work with NJDEP on the modification to the existing NJDEP-Discharge to Groundwater Permit by Rule for additional Enhanced Anaerobic in-situ bioremediation (EAISB) injections planned for JCMUA and JCDPW UST Areas.

## C. 80 KELLOGG GROUND WATER TREATMENT PLANT

- Hydrochloric acid cleaning was performed for three micro filter trains (MF-1).
- Filter cake container changed-out (Arecon-FCI) on January 13th.
- January monthly and quarterly effluent DMR samples were collected.
- Began cleaning sludge tanks in treatment plant.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | | |
|---|---|---|---|---|---|
| | 01/05/14 | 01/12/14 | 01/19/14 | 01/26/14 | 02/02/14 |
| Avg. Gallons Treated & Discharged (per day) | 84,034 | 86,312 | 89,299 | 76,112 | 86,558 |
| Average Flow (gpm) for Operating Period | 156 | 140 | 167 | 161 | 171 |
| Avg. Hours of Plant Operation | 9 | 11 | 9 | 8 | 8 |
| GWTP ModuTanks (gal.) | 151,880 | 149,120 | 148,760 | 111,360 | 144,180 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in Cells 25 through 37.
- Petroleum-impacted soils were identified during excavation activities via field observations and PID. These materials were separately stockpiled and sampled for off-site disposal.
- Completed pre-trench activities for Vertical Hydraulic Barrier Wall within the 60 Kellogg employee parking lot.
- Continued storm-water management activities.
- Continued dewatering activities and associated discharge to the construction water treatment facility.
- Continued backfill placement activities and associated compaction testing.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 19.50 | 19.50 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 150 | 21.86 | 3,278.36 |

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Entact/ Venerio** | Tri-axle Dump | Middlesex City Landfill | NA | Hg Impacted material (non–haz) | 3 | 21.50 | 64.50 |
| **Entact/ Tilcon** | Tri-axle Dump | Tilcon | NA | Asphalt for Recycling | 27 | 25.09 | 677.45 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 36, 37 |
| **Excavation Completed** | Cell Number(s) 25 through 35 |
| **Backfill in Progress** | Cell Number(s) 1 through 20 |

### 3. BACKFILL MATERIALS USED

| Source | Pre 12/31/13 Summaries | (Week Ending) | | | | |
|---|---|---|---|---|---|---|
| | | 01/05/14 | 01/12/14 | 01/19/14 | 01/26/14 | 02/02/14 |
| <20ppm re-use, CY | 500 | 0 | 0 | 0 | 0 | 0 |
| Weldon, Import-Tons | 4,769.01 | 1,383.31 | 1743 | 1,035.01 | 1725.36 | 3,344.31 |
| Tilcon, Import-Tons | 4,290.83 | 0 | 0 | 0 | 0 | 0 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~30% complete. No Surcharge Initiated.
- Area 2S: Instrumentation Installation ~75% complete. Completion dependent upon Building Demolition. No Surcharge Initiated.
- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. Surcharge placement not initiated.
- Area 1N: Instrumentation Installation ~60% complete. No Surcharge initiated.
- Area 2N: No instrumentation installed. Settlement platforms have been installed in the sedimentation basin to the north of Area 2 and portion of the Sedimentation Basin has been temporarily filled with screened materials that will be used for Surcharging the designated Surcharge Areas.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

| Tidelands Licenses for Sediment Remedy | SA-7 | Re-Issuance of Final Tidelands License is pending and will be effective 7/21/13 | N/A | 7/21/2014 | 7/19/2012 |
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |

## G. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Complete abandonment in place of the former 54-inch discharge pipe from the Sedimentation Basin.
- Initiate steel sheeting installation of barrier wall proximate to the 72-inch force main (FM), pending delivery of the spare FM section and coordination with PVSC.
- Initiate dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 36 through 46.
- Beginning with Cell 31, stockpile potential >1,000 mg/kg soils for sampling.
- Complete waste characterization and coordinate off-site disposal of petroleum-impacted soils.
- Continue backfill and associated compaction test activities.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Complete new GWTP commissioning.
- Continue decommissioning of 80 Kellogg Ground Water Treatment Plant.
- Continue SWPPP inspections.
- Complete PVSC compliance sampling.

   - Sheet Deflection Along Open Excavation
11: Weekly SWPPP Reports
12: 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (December 2013 Correction and January 2014 DMR)

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 | Fri 2/12/16 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 | Wed 12/30/15 |
| **67** | **Restoration** | **164 days** | **Tue 9/1/15** | **Fri 4/15/16** |
| 67a | Restoration | 164 days | Tue 9/1/15 | Fri 4/15/16 |
| **68** | **Demobilization** | **21 days** | **Mon 4/18/16** | **Mon 5/16/16** |
| 68a | Deferred Remediation of SA-6 South Along Bulkhead | | | |

Project: SA-6 Remediation Schedule
Revision 3
Date: Tue 2/4/14

Task  Milestone  Summary  Critical

## Attachment 2: Site Photographs

**Site Photograph 1:** A worker decons a truck leaving the EZ.

**Site Photograph 2:** Backfill is piled against the sheetpile hydraulic barrier.

**Site Photograph 3:** Backfill lift being installed over crushed concrete.

**Site Photograph 4:** Contractor breaks up the 60 Kellogg warehouse slab.

**Site Photograph 5:** Contractor clears snow from the backfill area.

**Site Photograph 6:** Contractor excavates in Cell No 30.

**Site Photograph 7:** Contractor pushes out a lift of backfill material.

**Site Photograph 8:** Contractor scrapes the Stratum D excavation floor.

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area

* Elevation based on Surveyed Center Point

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

Note: Data shown is for recent months activity

XX = Test number conducted at that test location

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

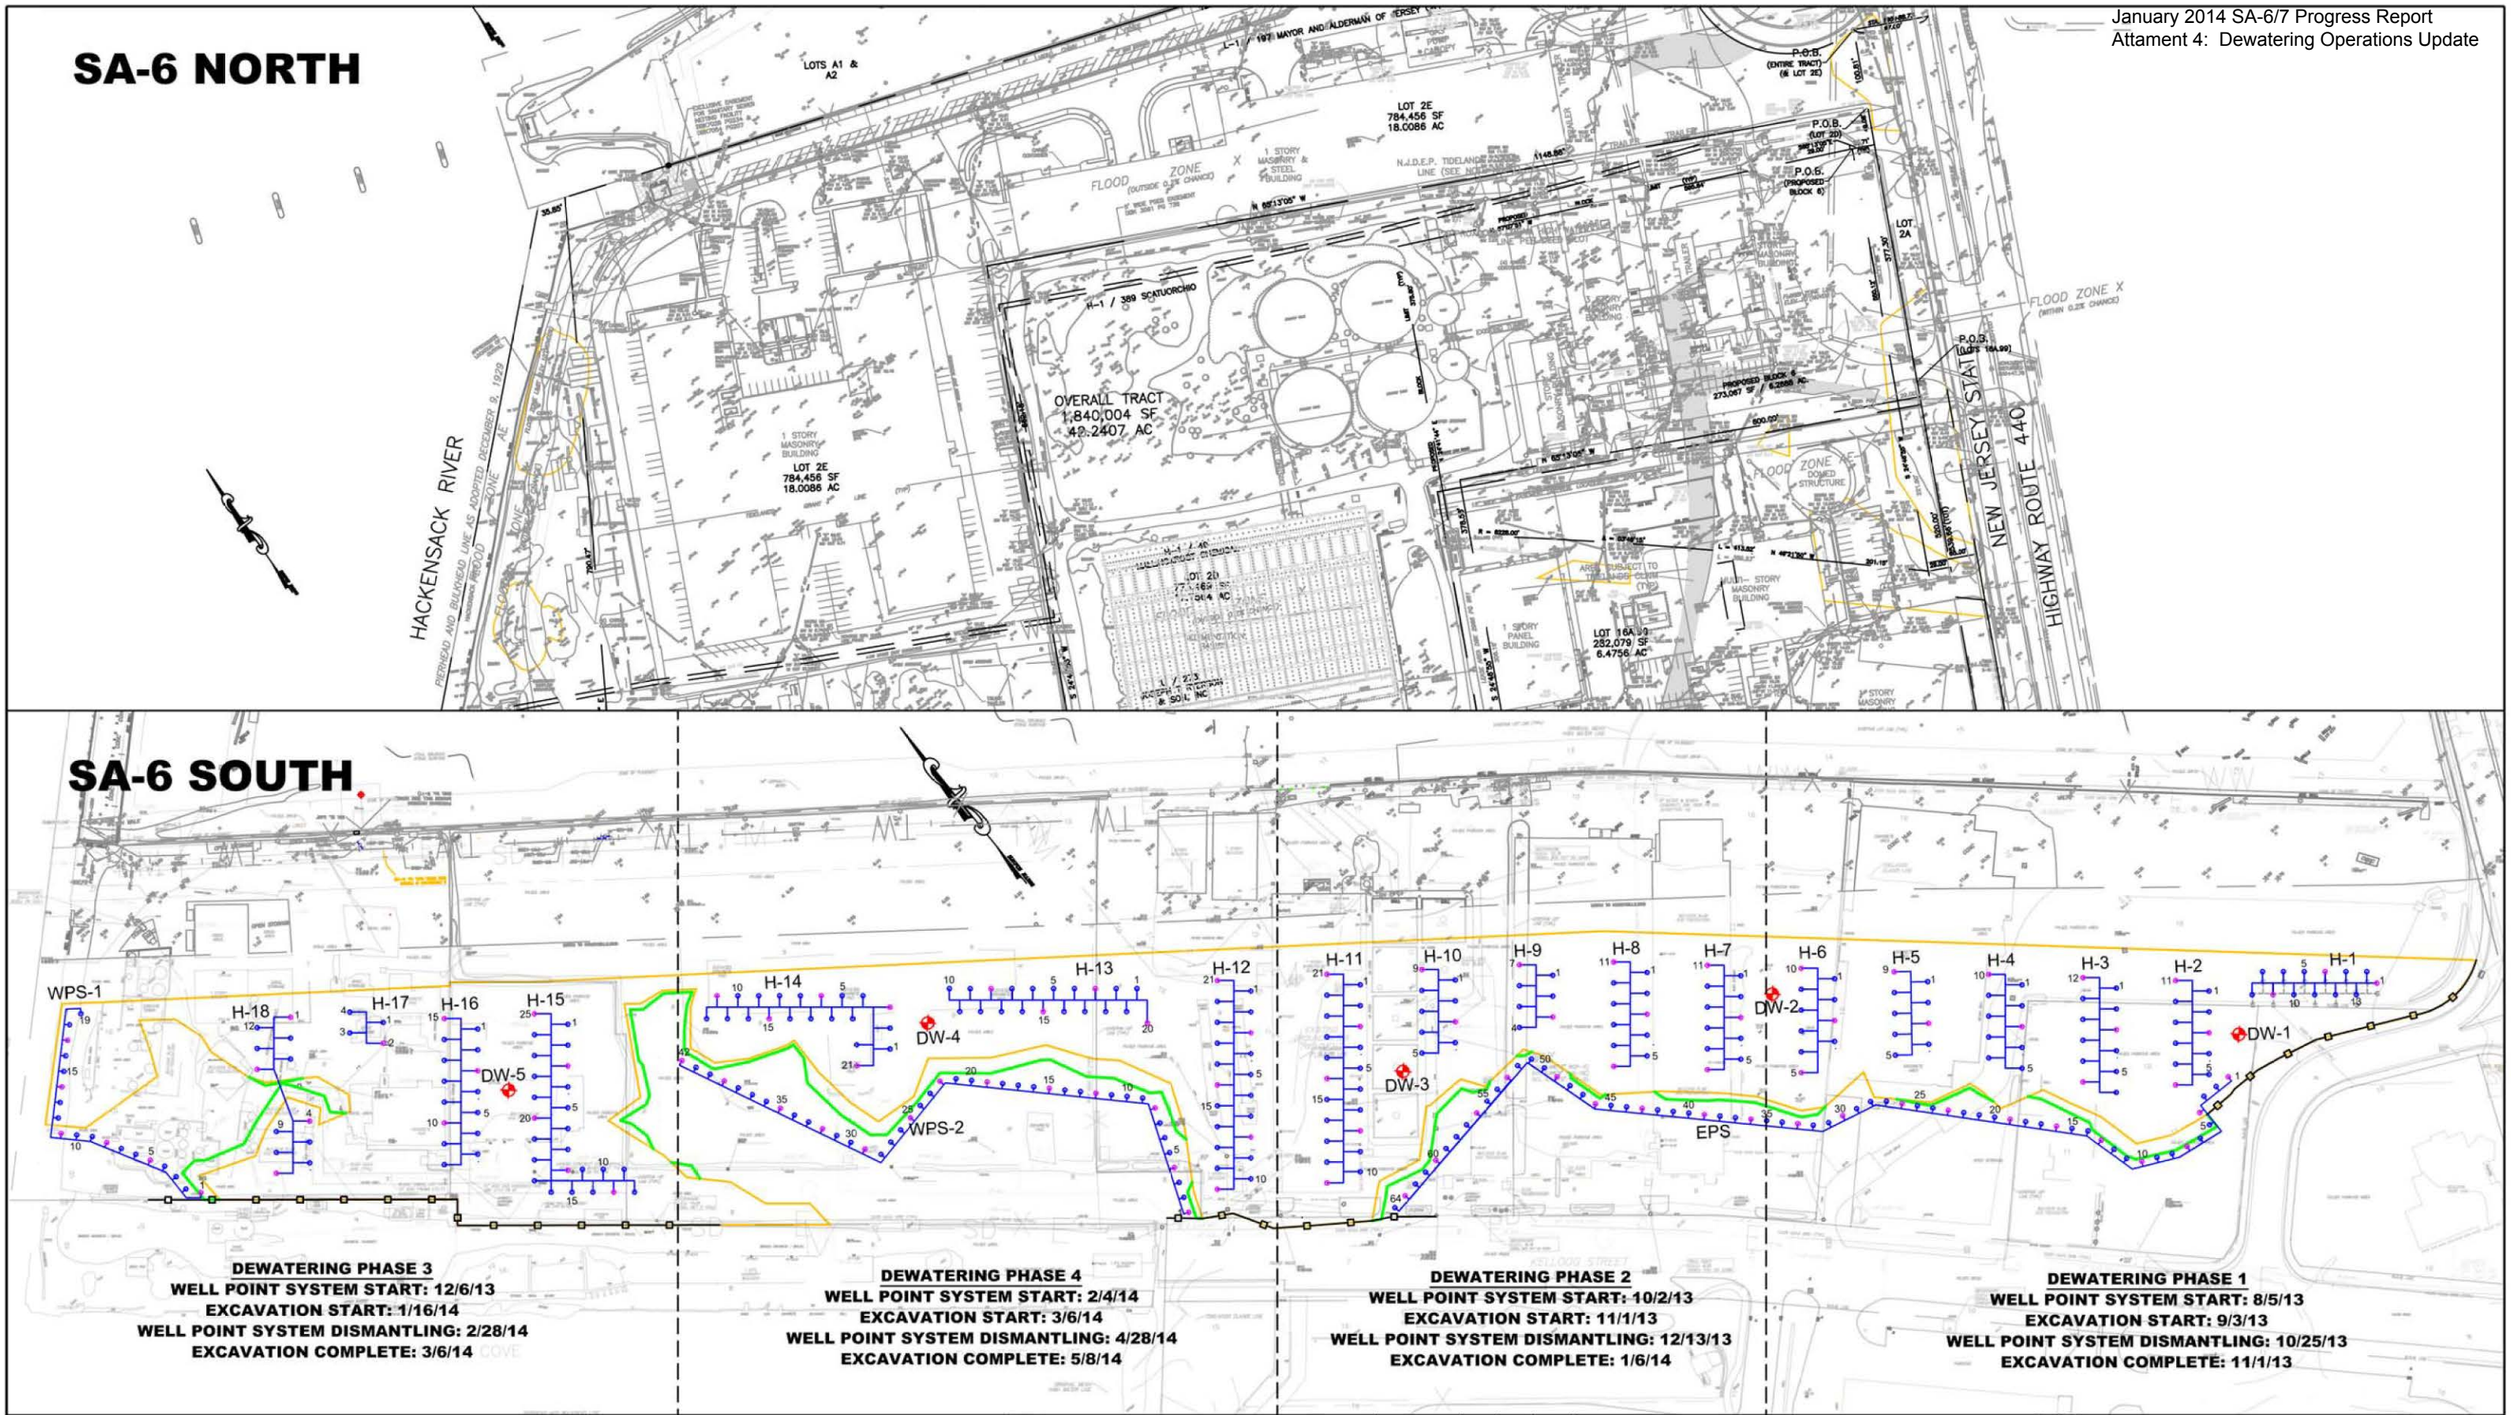
Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill

01 = Test Location (as noted on Backfill Compaction Location Figure)



01 = Number of test performed at that location (sequential)

## Attachment 8:  Quality and Level Data in GWET Wells

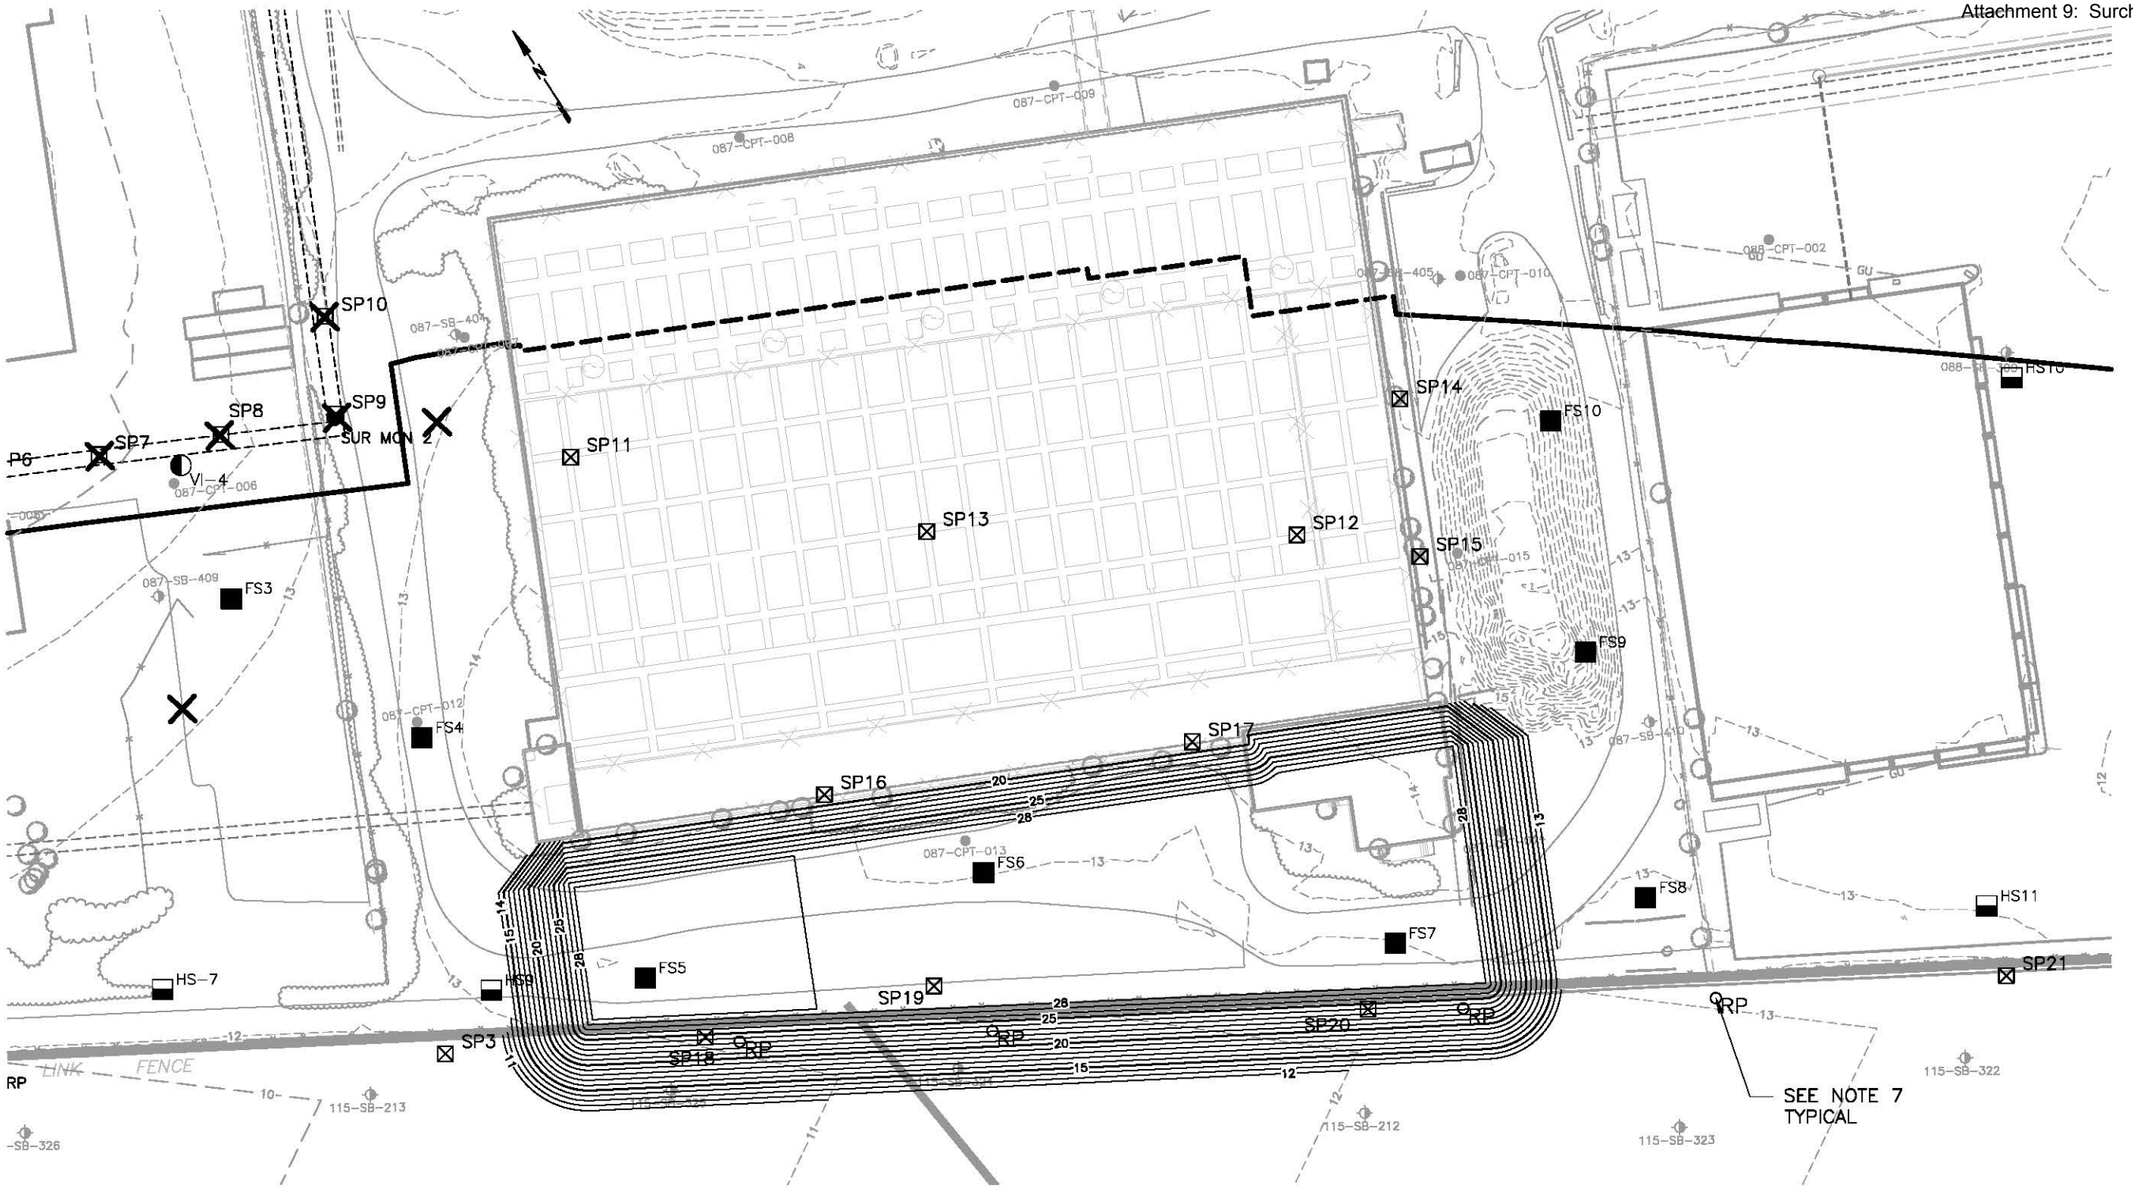
(not provided in this submittal - provided on a quarterly basis)

## Attachment 9: Surcharge Monitoring Update

- Surcharge Monitoring Plan Report Figures *(included in initial submittal only)*

SECTION A-A

NOTES:



1. PRIOR TO SURCHARGING REMOVE SA-7 FENCE AND SA-7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. COMMENCE FILL AT THE SEDIMENTATION BASIN AND WORK TOWARDS THE HACKENSACK RIVER.
5. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
6. LOCATION OF SA-7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.

Note: Data shown is for recent months activity

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

## Attachment 12: 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (December 2013 Correction and January 2014)

The Monitoring Report originally submitted to the NJDEP on January 23, 2014, erroneously contained January 2014 data and was resubmitted with along with the January 2014 Report on February 12, 2014.

**RE: NJPDES Permit NJ0156311: December 2013 correction and January 2014 Surface Water Discharge Monitoring Reports**
**Study Area 7, Jersey City, NJ**

To Whom It May Concern:

On January 23, 2014, I submitted an incorrect December 2013 DMR. I had mistakenly reported the January 2014 sampling results on the December 2013 DMR. Attached please find the corrected December 2013 DMR and the January 2014 DMR. I apologize for this error and have instituted a checking mechanism so that it does not occur again.

Please contact me at 973-455-2989 should you have any questions.

On Behalf of Honeywell
Sincerely,

Helen Fahy
Program Manager

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

**LOCATION OF ACTIVITY:**
HONEYWELL STUDY AREA 7
441 RT 440 S
JERSEY CITY, NJ 07305

**REPORT RECIPIENT:**
Honeywell International Inc
ATT: HELEN FAHY
101 COLUMBIA ROAD
MORRISTOWN, NJ 07962

**REGION / COUNTY: Northern / Hudson County**

**CHECK IF APPLICABLE:** ☐ **No Discharge this Monitoring Period** ☐ **Monitoring Report Comments Attached**

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

John J. Morris, Remediation Director — —

**Subject:** **Riverkeeper et al v. Honeywell International Inc. et al**
**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Progress Report No. 2014-02**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from February 1 – February 28, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

| Security (Securitas) | 3 | 3 | 3 | 3 |
| Entact/Subcontractors | 35 | 27 | 30 | 35 |
| Arecon/US Ecology Subcontractors | 3 | 2 | 6 | 5 |
| Oradell (SA-6N GWTP Building Mech/ Plumbing/HVAC) | 1 | 1 | 0 | 0 |
| ENR (SA-6N GWTP Utilities) | 2 | 1 | 0 | 0 |
| BCA (SA-6N Building Construction) | 0 | 0 | 0 | 0 |
| Siemens | 2 | 2 | 2 | 2 |
| HBS (SA-6N GWTP Security System) | 0 | 0 | 0 | 0 |
| HPS (SA-6N GWTP Process Controls) | 0 | 0 | 0 | 0 |
| Other | 0 | 0 | 0 | 0 |
| **TOTAL** | **59** | **49** | **56** | **59** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued new Ground Water Treatment Plant (GWTP) commissioning activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Continued numerous snow removal events on SA-6N and SA-6S.
- Initiated abandonment of former 54" Sedimentation Basin outfall pipe on SA-6N.
- Terminated operation of the 80 Kellogg St WWTP on February 28, 2014.
- Collected February PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Non-chromium activities, ARCADIS continues to work with NJDEP on the modification to the existing NJDEP-Discharge to Groundwater Permit by Rule for additional Enhanced Anaerobic in-situ bioremediation (EAISB) injections planned for JCMUA and JCDPW UST Areas.

## C. 80 KELLOGG GROUND WATER TREATMENT PLANT

- Hydrochloric acid cleaning was performed for all micro filter trains.
- Filter cake container changed-out (Arecon-FCI) on. February 10th.
- February monthly and quarterly effluent DMR samples were collected.
- Continued decommissioning activities for exterior ModuTanks, sludge tanks, microfilters and performed electrical disconnect and lockout/tagout procedures on pumps and equipment.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 2/9/2014 | 2/16/2014 | 2/23/2014 | 3/2/2014 |
| Avg. Gallons Treated & Discharged (per day) | 86,274 | 25,347 | 24,668 | 30,549 |
| Average Flow (gpm) for Operating Period | 162 | 126 | 94 | 144 |
| Avg. Hours of Plant Operation | 9 | 3 | 4 | 4 |
| GWTP ModuTanks (gal.) | 142,700 | 136,960 | 140,280 | 148,875 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in Cells 38 through 43.
- Completed initial sampling, waste characterization and initiated off-site T&D of petroleum-impacted soils that were identified during excavation activities via field observations and PID readings.
- Began pre-trench activities for Vertical Hydraulic Barrier Wall on SA-6N proximate to the 72-inch force main.
- Continued storm-water management activities.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Compaction tests were not performed due to inclement weather during the month.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 18.0 | 18.0 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 75 | 21.52 | 1,614.16 |

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Entact/ Venerio** | Tri-axle Dump | Middlesex City Landfill | NA | Petroleum Impacted Soils (non–haz) | 20 | 24.63 | 492.78 |
| **Entact/ Montecalvo** | Tri-axle Dump | Bayshore Recycling | NA | Petroleum Impacted Soils (non-haz) | 98 | 24.94 | 2,444.22 |
| **Entact/ Montecalvo** | 30 cubic Yard Roll off | Bayshore Recycling | NA | Creosote Debris (non- haz) | 4 | 11.78 | 47.13 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 42,43 |
| **Excavation Completed** | Cell Number(s) 36 through 41<br>Volume Excavated - Total for Reporting Period: 5,551 CY/ Total to Date:30,879 CY |
| **Backfill in Progress** | Cell Number(s) 1 through 39 |

### 3. BACKFILL MATERIALS USED

| Source | (Week Ending) | | | |
|---|---|---|---|---|
| | 2/9/2014 | 2/16/2014 | 2/23/2014 | 3/2/201 |
| <20ppm re-use, CY | 0 | 0 | 0 | 0 |
| Weldon, Import-Tons | 0 | 426.83 | 0 | 0 |
| Tilcon, Import-Tons | 0 | 0 | 0 | 1,309.23 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~60% complete. Access limitations due to ice and demolition materials. No Surcharge Initiated.
- Area 2S: Instrumentation Installation ~75% complete. Completion of instrument installation deferred pending completion of demolition activities. No Surcharge Initiated.
- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Instrumentation Installation ~80% complete. No Surcharge initiated. The installation of the inclinometers (V1-1 through V1-4), HS1, HS2, FS3 will be installed following completion of the Barrier Wall along the 72-inch force main. SP1, SP2, and SP-3 will be installed prior to fill placement along SA-7.
- Area 2N: No instrumentation installed. Settlement platforms have been installed in the sedimentation basin to the north of Area 2 and portion of the Sedimentation Basin has been temporarily filled with screened materials that will be used for surcharging the designated Surcharge Areas.

- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see Attachment 10)*

- Hydraulic Barrier installation was initiated adjacent to the 72-inch force main. Vibration and acoustical monitoring results show no responses of concern.
- Vibration Monitoring indicated maximum accelerations continue to be within allowable range (0.2 in/sec observed, while the allowable acceleration is 1.0 in/sec).
- Acoustical Monitoring. PVSC/Hatch Mott MacDonald (HMM) report that there were no wire breaks recorded during the current reporting period.

## G. PERMIT STATUS

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |

| NJDEP Air Pollution Control Preconstruction Permit | Existing GWTP | Obtained 9/24/2013 | Not Specified, Est. 3/31/2014 | 6/23/2014 | 11/20/2013 |
| PVSC SUP No. 31630016 | New GWTP | Obtained 10/1/2013 | 6/30/2018 | 9/30/2018 | 10/29/2013 |
| PVSC SUP No. 31630005 | Existing GWTP/SA-7 | Obtained 1/1/2014 | Renewal Not Needed | 12/31/2018 | - |
| NJDEP Discharge to Groundwater (DGW) for In-Situ Treatment of Chromium Impacted Soils | SA-6 North Only | Obtained 4/30/2012 | Not Specified | Not Specified | 5/10/2012 |
| NJDEP DGW for In-Situ Treatment of Chromium Impacted Soils | SA-6 South Only | Obtained 1/3/2013 | Not Specified | Not Specified | - |
| NJPDES Permit | SA-7 | Renewed: Effective 12/01/12 | Renewal Not Needed | 6/30/2015 | 1/11/2013 |
| Subchapter 8 Air Permit Application for the Waste Water Treatment Plant | SA-7 | Issued: 06/24/2009 | Renewal Not Needed | 6/23/2014 | 7/15/2009 |
| Individual Waterfront Development Permit and Water Quality Certificate for Sediment Remedy | SA-7 | Issued: 05/27/2011 Modified: 07/02/2012 | N/A | 5/26/2016 | 5/27/2011, 7/5/2012 |
| Tidelands Licenses for Sediment Remedy | SA-7 | Re-Issuance of Final Tidelands License is pending and will be effective 7/21/13 | N/A | 7/21/2014 | 7/19/2012 |
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |

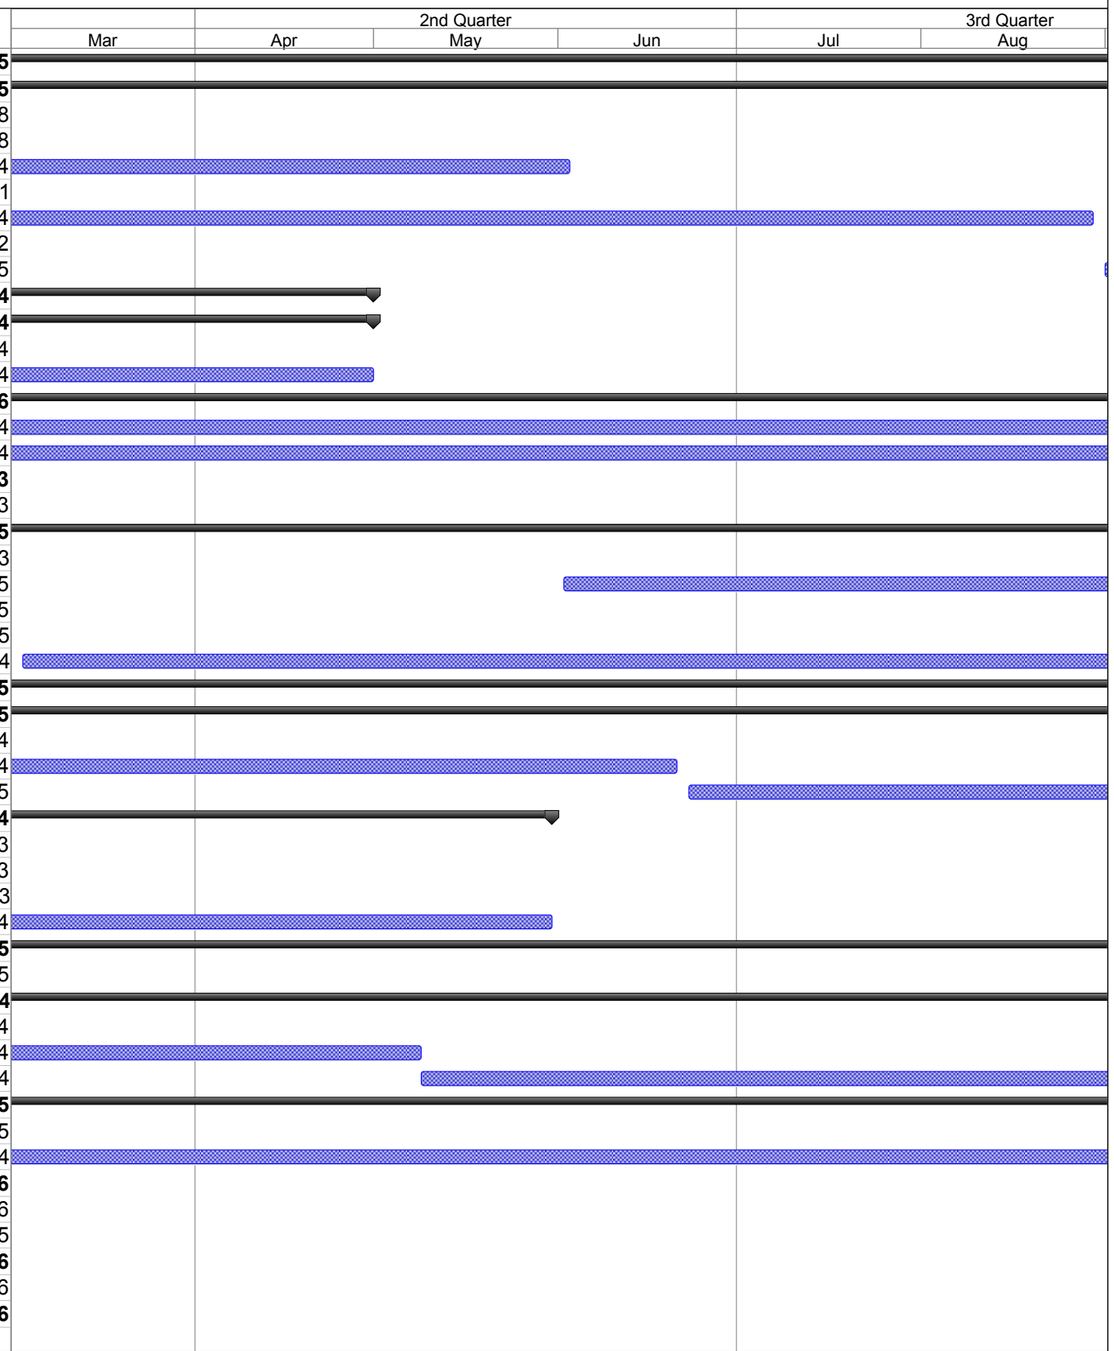
## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Complete abandonment in place of the former 54-inch discharge pipe from the Sedimentation Basin.
- Complete installation of vertical hydraulic barrier wall proximate to the 72-inch force main.
- Initiate placement of surcharge materials in SA-6N Area 1N.

- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 43 through 53.
- Continue stockpiling potential >1,000 mg/kg soils for sampling.
- Continue off-site disposal of petroleum-impacted soils.
- Resume backfill placement and associated compaction testing activities.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Complete permanent piping tie-ins to PW-1/PW-2 and 215-BR and continue full-scale SA-6N Ground Water Treatment Plant operational activities.
- Complete decommissioning of 80 Kellogg Ground Water Treatment Plant.
- Mobilize demolition contractor for equipment salvage at the 80 Kellogg Ground Water Treatment Plant.
- Continue SWPPP inspections.
- Complete PVSC compliance sampling.
- Conduct quarterly LTMP groundwater level measurements.
- Conduct S-3 Sand Injection Event No.12 in well 088-IW-01.

**ATTACHMENTS:**

1: Schedule – 6 Month Look Ahead
2: Site Photographs
3: Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/Sidewall Confirmatory Points
   - Backfill Compaction Locations *(no update for this reporting period/not provided in this submittal)*
   - Field Density Test Summary Log *(no update for this reporting period/not provided in this submittal)*
4: Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-1)
   - SA-6 South Deep Well Data (DW-2)
5: SA-6 Construction Water Discharge Data (To PVSC)
6: Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7: Perimeter Pools Update
8: Quality and Level Data in GWET Wells *( not included in this submittal -provided on a quarterly basis)*
9: Surcharge Monitoring Update
   - Surcharge Monitoring Plan Report Figures B1 and F1 *(figures updated to show installed locations)*



10: Sheet Pile Update
- Hydraulic Barrier Wall Plan & Profile
- Sheet Deflection Along Open Excavation
- Sheet Pile Repair Log/Photos

11: Weekly SWPPP Reports

12: 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (January 2014) *(not provided in this submittal – this information was previously provided in Progress Report 2014-01)*

## Attachment 1:  Schedule – 6 Month Look Ahead

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 | Fri 2/12/16 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 | Wed 12/30/15 |
| **67** | **Restoration** | **164 days** | **Tue 9/1/15** | **Fri 4/15/16** |
| 67a | Restoration | 164 days | Tue 9/1/15 | Fri 4/15/16 |
| **68** | **Demobilization** | **21 days** | **Mon 4/18/16** | **Mon 5/16/16** |
| 68a | Deferred Remediation of SA-6 South Along Bulkhead | | | |

## Attachment 2: Site Photographs

**Site Photograph 1:** Barrier wall installation progress on Kellogg St. properties looking east.

**Site Photograph 2:** Equipment installs barrier wall sheet pile on Kellogg St. properties.

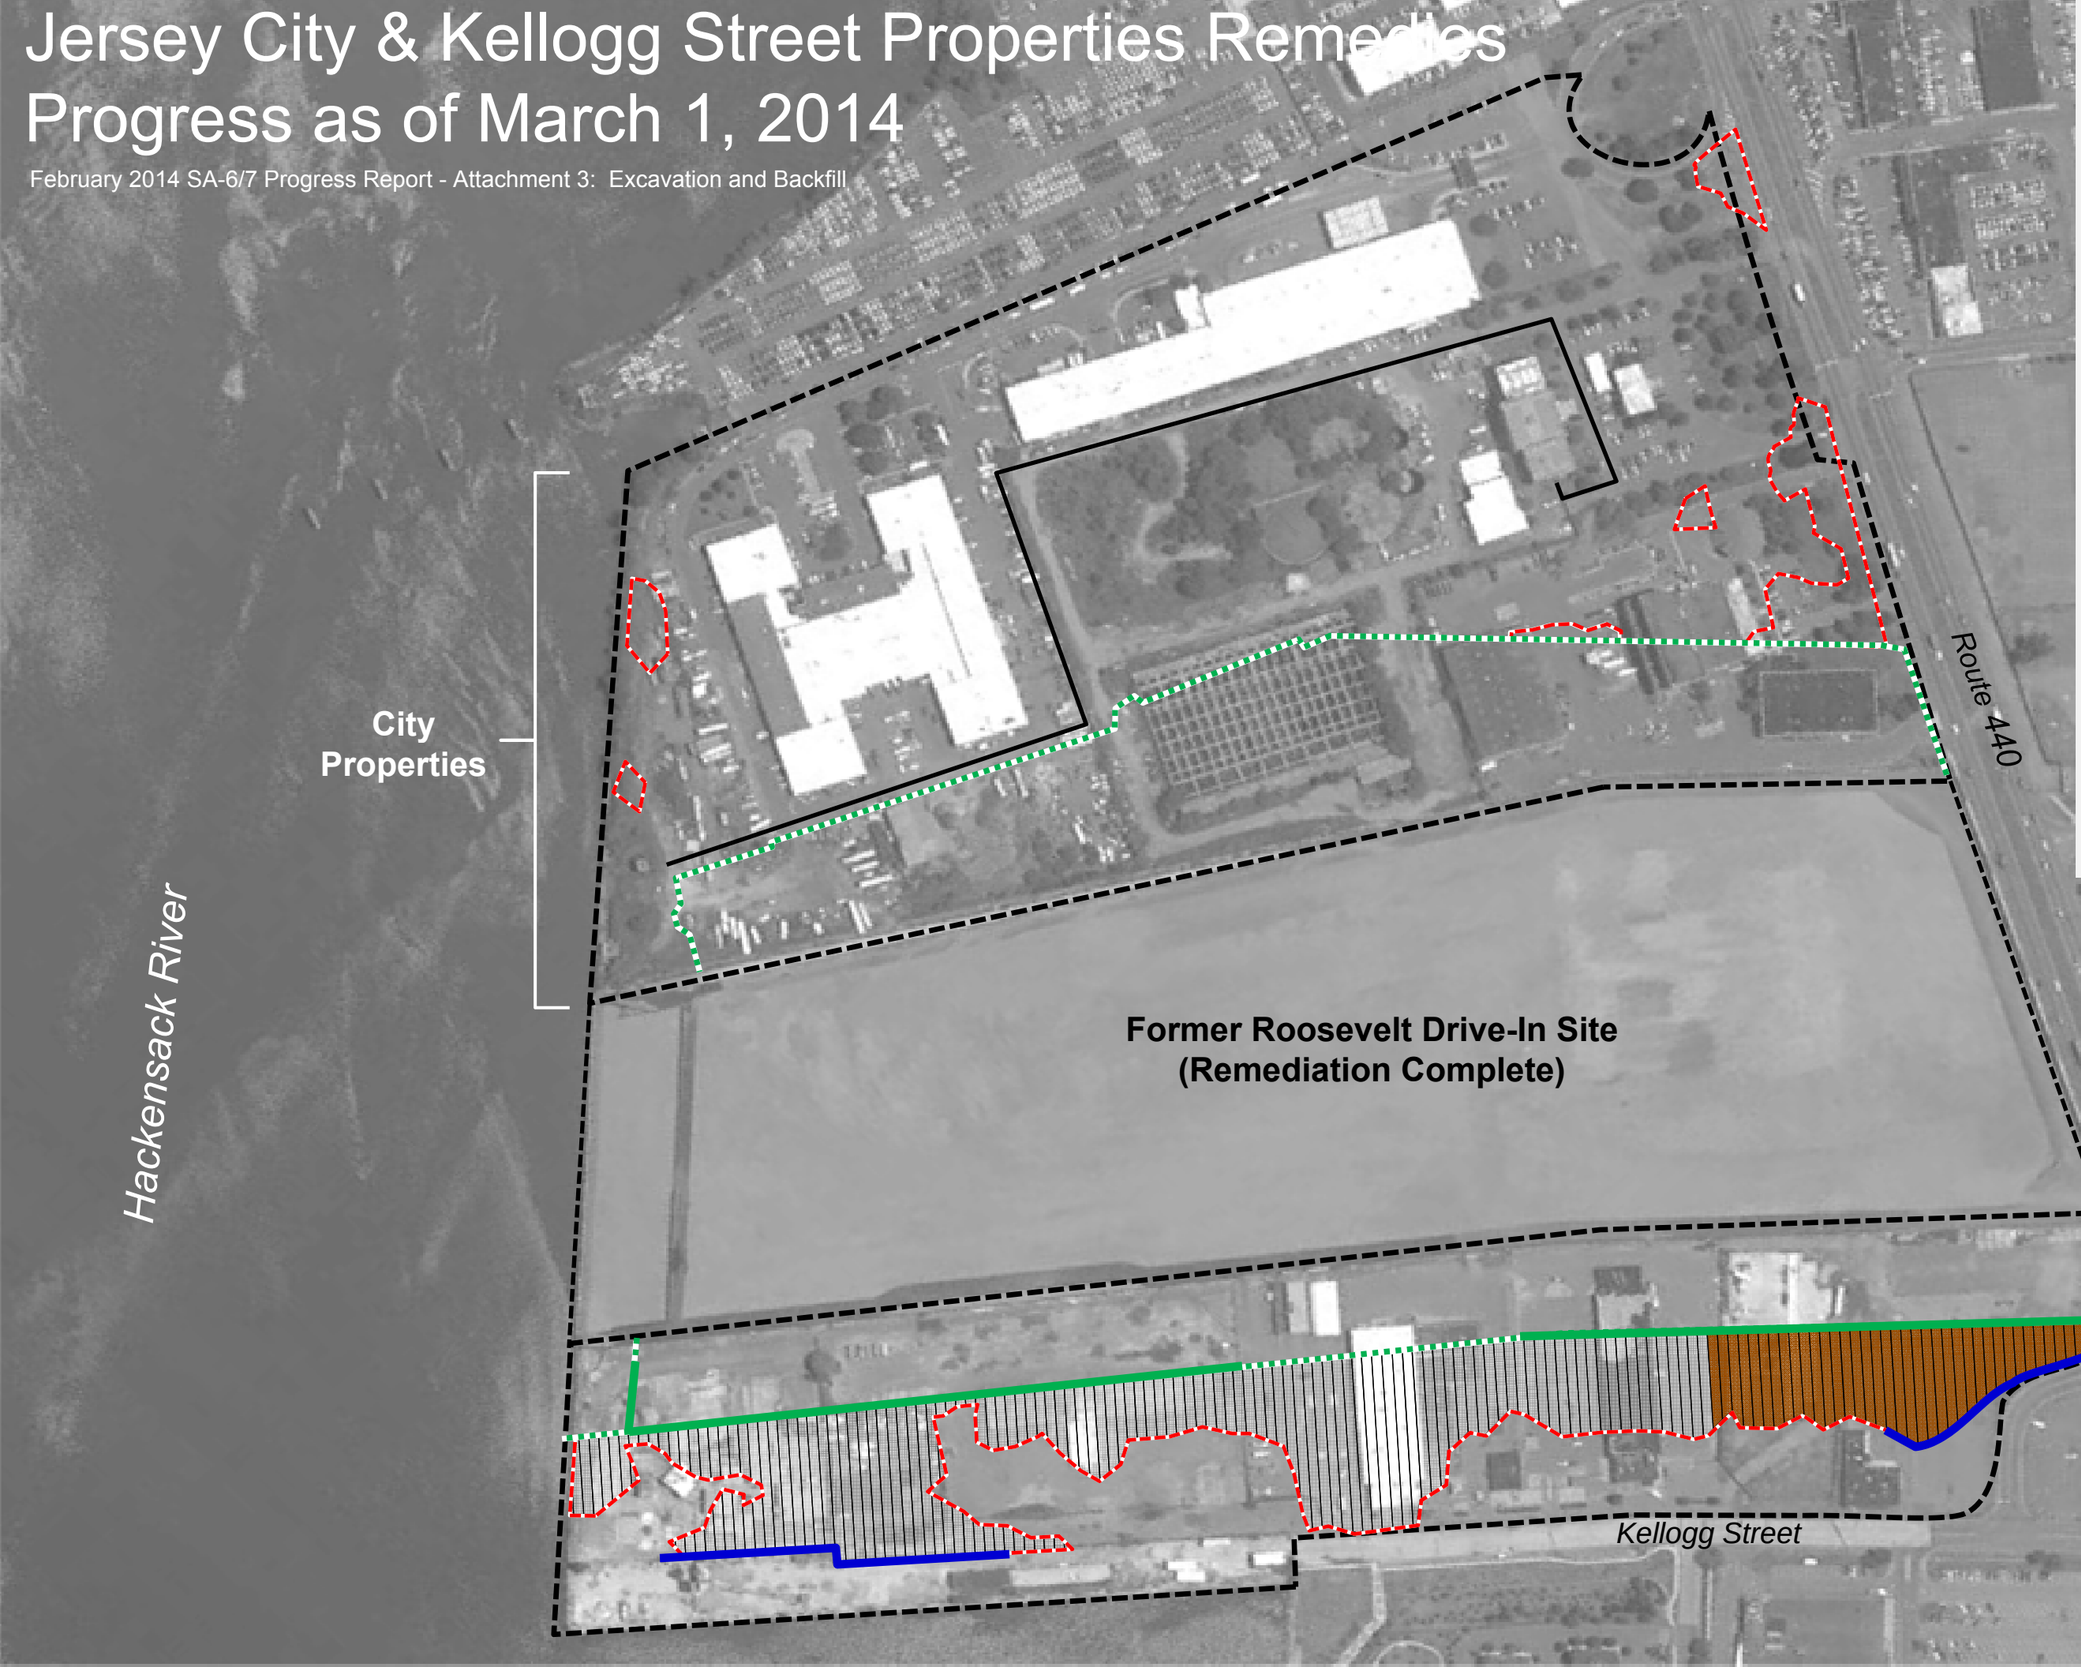
**Site Photograph 3:** Excavation and backfill progress Kellogg St. properties looking south.

**Site Photograph 4:** Excavation continues on Kellogg St. properties looking north.

**Site Photograph 5:** Excavation continues on Kellogg St. properties looking west.

**Site Photograph 6:** Former discharge pipeline being demolished on Jersey City properties.

**Site Photograph 7:** New GWTP final construction.



**Site Photograph 8:** Spare repair section of sewer pipe arrives on-site.

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area

* Elevation based on Surveyed Center Point

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

Note: Data shown is for recent months activity

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. SURCHARGE PILE GEOMETRY IS BASED ON THE ASSUMPTION THAT THE SEDIMENTATION BASIN WALLS ARE IN PLACE AT THE TIME OF SURCHARGING.
5. COMMENCE FILL AT THE SEDIMENTATION BASIN AND WORK TOWARDS THE HACKENSACK RIVER.
6. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
7. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
8. AT ALL SURVEY LOCATIONS CLEAN ADEQUATELY A SUFFICIENT AREA ON THE TOP SURFACE OF THE 72 INCH FORCE MAIN TO EPOXY THE SURVEY MARKER AND ELECTRONIC EQUIPMENT.

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

| **TOTAL** | **64** | **65** | **66** | **73** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Conducted quarterly LTMP groundwater level measurement round.
- Conducted S-3 Injection/Mass Removal Event No.12 in well 088-IW-01.
- Completed new Ground Water Treatment Plant (GWTP) commissioning activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Completed abandonment of former 54" Sedimentation Basin outfall pipe on SA-6N.
- Continued well abandonment activities in accordance with approved Monitoring Well Abandonment Plan.
- Began 80 Kellogg St GWTP demolition activities.

- Completed decommissioning activities associated with the 80 Kellogg GWTP to include exterior ModuTanks, sludge tanks, microfilters and miscellaneous equipment.
- Completed all scheduled crane lifts for 80 Kellogg salvage equipment removals, two (2) sludge tanks, one (1) filter press and one (1) generator.
- Collected March PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Non-chromium activities, ARCADIS continues to work with NJDEP on the modification to the existing NJDEP-Discharge to Groundwater Permit by Rule for additional Enhanced Anaerobic in-situ bioremediation (EAISB) injections planned for JCMUA and JCDPW UST Areas.

## C. SA-6 N GROUND WATER TREATMENT PLANT

- Completed permanent connection of PW-2 to the GWTP.
- Complete permanent connection of PW-1 to the GWTP.
- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer tank using the original Siemens' formula (300 cc powder per 100 gallon drum batch).

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 03/09/2014 | 03/16/2014 | 03/23/2014 | 03/30/2014 |
| Avg. Gallons Treated & Discharged (per day) | 71,112 | 53,872 | 77,063 | 79,192 |
| Average Flow (gpm) for Operating Period | 49 | 43 | 54 | 55 |
| Avg. Hours of Plant Operation | 24 | 18 | 24 | 24 |
| GWTP ModuTanks (gal.) | 4,680 | 4,668 | 4,800 | 6,240 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in Cells 43 through 56.
- Continued storm-water management activities.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |

| **Entact/ Montecalvo** | 30 cubic Yard Roll off | Bayshore Recycling | NA | Creosote Debris (non-haz) | 1 | 8.1 | 8.1 |
| **Entact/Tilcon** | Tri-axle Dump | Tilcon, Mt. Hope | NA | Asphalt | 28 | 22.91 | 641.49 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 55,56 |
| **Excavation Completed** | Cell Number(s) 42 through 52<br>Volume Excavated - Total for Reporting Period: 10,712 CY/ Total to Date:41,592 CY |
| **Backfill in Progress** | Cell Number(s) 1 through 43 |

### 3. BACKFILL MATERIALS USED

| Source | (Week Ending) | | | |
|---|---|---|---|---|
| | 03/09/2014 | 03/16/2014 | 03/23/2014 | 03/30/2014 |
| <20ppm re-use, CY | 0 | 0 | 0 | 0 |
| Weldon, Import-Tons | 0 | 863.90 | 1,628.19 | 3,145.29 |
| Tilcon, Import-Tons | 518.04 | 3,973.37 | 2,801.16 | 908.06 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~60% complete. Access limitations due to ice and demolition materials. No Surcharge Initiated.
- Area 2S: Instrumentation Installation ~75% complete. Completion of instrument installation deferred pending completion of demolition activities. No Surcharge Initiated.
- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Instrumentation Installation ~100% complete. No Surcharge initiated.

- Area 2N: No instrumentation installed. Settlement platforms have been installed in the sedimentation basin to the north of Area 2 and portion of the Sedimentation Basin has been temporarily filled with screened materials that will be used for surcharging the designated Surcharge Areas.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Hydraulic Barrier installation was completed adjacent to the 72-inch force main. Vibration Monitoring indicated maximum accelerations continue to be within allowable range (0.2 in/sec observed, while the allowable acceleration is 1.0 in/sec).
- Acoustical Monitoring. PVSC/Hatch Mott MacDonald (HMM) report that there was no wire breaks recorded during the current reporting period.

## G. PERMIT STATUS

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Initiate placement of surcharge materials in SA-6N Area 1N.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 56 through 60 and Cells 156 to 132.

- Continue stockpiling potential >1,000 mg/kg soils for sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Initiate construction of SA-6S Contingent Groundwater Trench System.
- Continue demolition activities associated with 80 Kellogg.
- Continue SWPPP inspections.
- Complete PVSC compliance sampling.

1: Schedule – 6 Month Look Ahead
2: Site Photographs
3: Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/Sidewall Confirmatory Points
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
4: Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-1)
   - SA-6 South Deep Well Data (DW-2)
5: SA-6 Construction Water Discharge Data (To PVSC)
6: Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7: Perimeter Pools Update
8: Groundwater Quality Data in GWET Wells *(provided on a quarterly basis - not available as of this report date)*
9: Surcharge Monitoring Update
   - Instrumentation Location Plan 1N
   - Instrumentation Installation Data
10: Sheet Pile Update
   - Hydraulic Barrier Wall Plan & Profile
   - Sheet Deflection Along Open Excavation
   - Sheet Pile Repair Log
11: Weekly SWPPP Reports
12: 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (February 2014)

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 | Fri 2/12/16 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 | Wed 12/30/15 |
| **67** | **Restoration** | **164 days** | **Tue 9/1/15** | **Fri 4/15/16** |
| 67a | Restoration | 164 days | Tue 9/1/15 | Fri 4/15/16 |
| **68** | **Demobilization** | **21 days** | **Mon 4/18/16** | **Mon 5/16/16** |
| 68a | Deferred Remediation of SA-6 South Along Bulkhead | | | |

Project: SA-6 Remediation Schedule
Revision 3
Date: Tue 4/1/14

Task  Milestone  Summary  Critical

## Attachment 2:  Site Photographs

**Site Photograph 1:** Former timber piles removed as part of excavation.

**Site Photograph 2:** Standing water removed prior to backfilling.

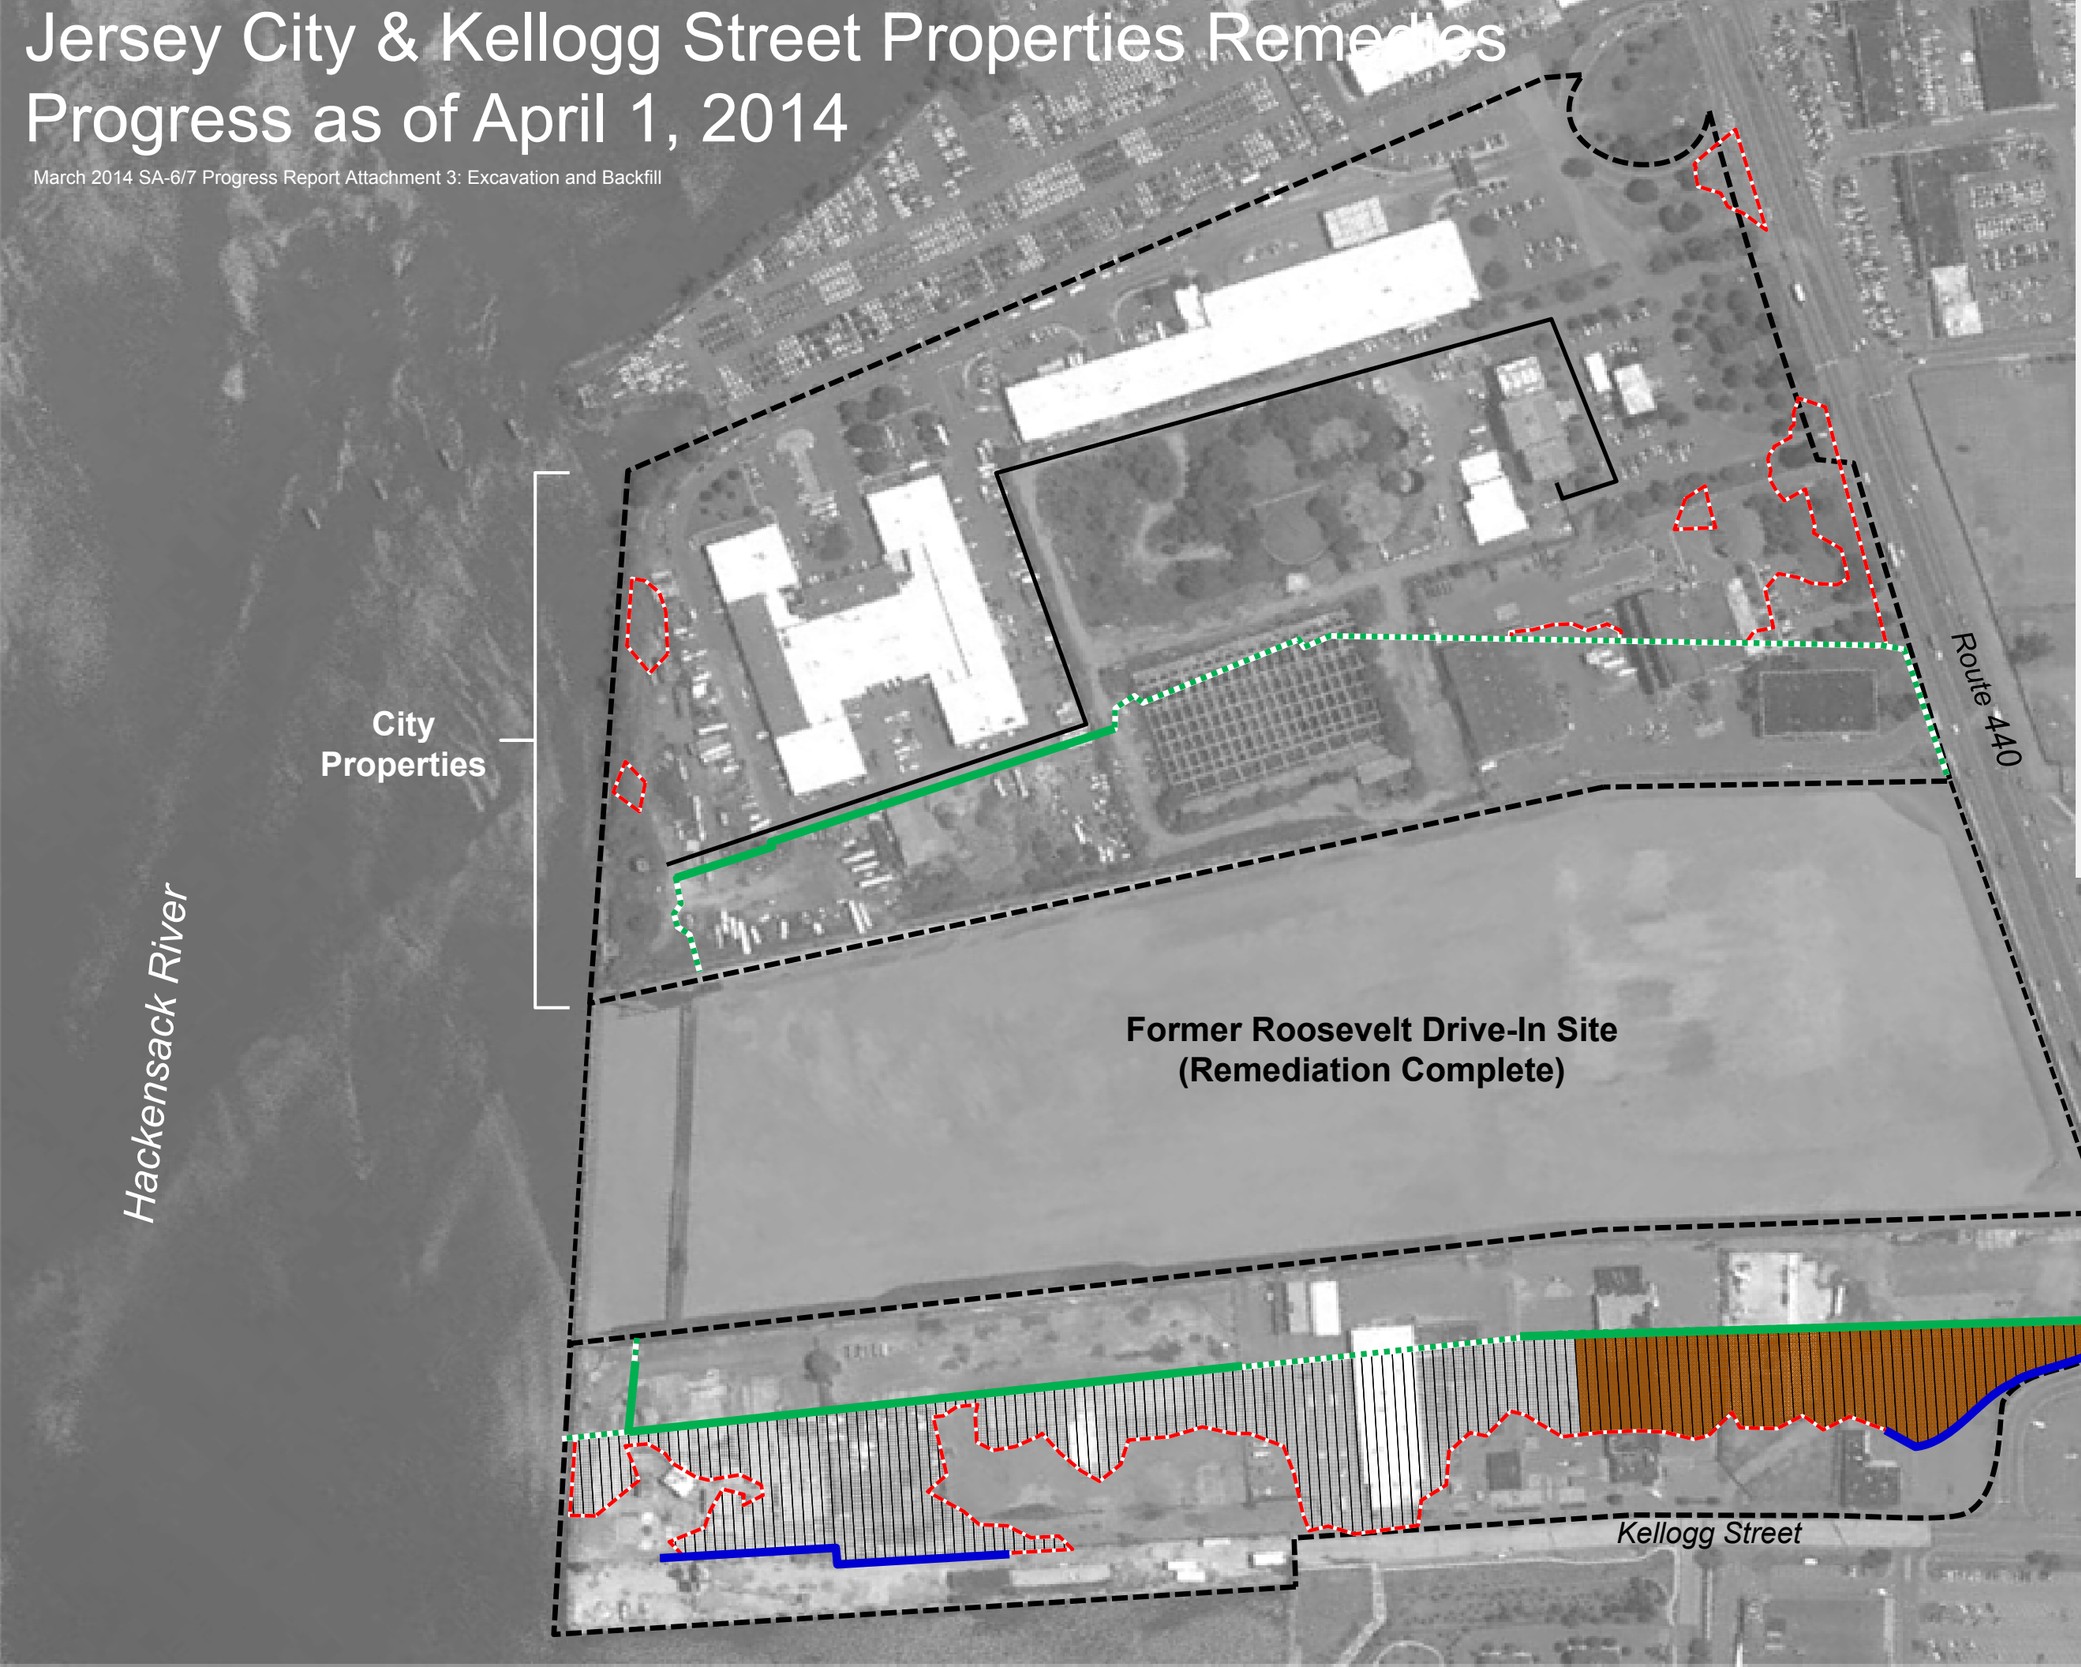
**Site Photograph 3:** Excavation reaches the 60 Kellogg warehouse foundation.

**Site Photograph 4:** Installation of stormwater control measures on Kellogg St Properties.

**Site Photograph 5:** Contractor crushes concrete debris at JC Properties.

**Site Photograph 6:** 80 Kellogg St WWTP tank cleanout prior to demo.

**Site Photograph 7:** Salvage of tanks for reuse at other facilities.



**Site Photograph 8:** Sheetpile installation along Sewer Line at JC Properties.

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

Note: Data shown is for recent months activity

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.
Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b
Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C
Bottom of excavation elevation based on Maser survey data (Center Point elevations)
Sample ID BF-01-01 where:
BF = Backfill (At frequency of 1 test/2500 SF)
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

Note: Data shown is for recent months activity

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. SURCHARGE PILE GEOMETRY IS BASED ON THE ASSUMPTION THAT THE SEDIMENTATION BASIN WALLS ARE IN PLACE AT THE TIME OF SURCHARGING.
5. COMMENCE FILL AT THE SEDIMENTATION BASIN AND WORK TOWARDS THE HACKENSACK RIVER.
6. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
7. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
8. AT ALL SURVEY LOCATIONS CLEAN ADEQUATELY A SUFFICIENT AREA ON THE TOP SURFACE OF THE 72 INCH FORCE MAIN TO EPOXY THE SURVEY MARKER AND ELECTRONIC EQUIPMENT.

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-31

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-32

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-33

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-34

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-37

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/13/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-38

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-41

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-42

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-43

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-44

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-1

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-2

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-3

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-5

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-6

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-7

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-8

Date Exposed: _____

Describe Damage: Damage by bucked during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-9

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-10

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-11

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-12

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-13

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-14

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-15

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-16

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-17

Date Exposed: _____

Describe Damage: Damage by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/11/14

Inspected by: AE

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-18

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: MS

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: 3/25/14

Date: [signature]

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-19

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: MS

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-20

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: MS

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-21

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: MS

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 6P1-22

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: MS

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-1

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-2

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-3

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-4

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, repair

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-5

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-6

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-7

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation.

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-8

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-9

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-10

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-11

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-12

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 7P1-13

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 8-P1-1

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 8P1-2

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: 8P1-3

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-4

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-5

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-6

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-7

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-8

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: SP1-9

Date Exposed: _____

Describe Damage: _____

Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: MM

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

**RE: NJPDES Permit NJ0156311: February 2014 Surface Water Discharge Monitoring Report**
**Study Area 7, Jersey City, NJ**

Dear Mr. Salvo:

In accordance with the Honeywell International NJPDES Permit NJ0156311, enclosed please find the February 2014 Surface Water Discharge Monitoring Report for Outfall 001A. This is the last DMR for Permit NJ0156311.

Please be advised that the Groundwater Treatment Plant's last day of discharge was February 28, 2014. The Plant is currently being demolished. A new Groundwater Treatment Plant has been built and is treating groundwater for discharge to the Passaic Valley Sewerage Commission treatment plant.

Please contact me at 973-455-2989 should you have any questions.

On Behalf of Honeywell
Sincerely,

Helen Fahy
Program Manager

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

**Subject:** SA7; WWTP Bioassay Lab Failure

Helen,

I was informed about noon today by QC Laboratories' manager Robert Martino that their Southampton, PA lab was without power and phone for several days last week due to extreme storm conditions. Consequently they lost all bioassays then in progress, including ours.

We will be getting an official notification of the failure from QC in the next several days.

Regards,
Frank
(973) 722-5240

QC LABORATORIES

February 10th, 2014

Dear Valued Customer,

QC Laboratories was without power for approximately between February 4th and 6th due to the ice storm that took out power lines feeding our laboratory.

Although generators were employed we were unable to maintain the required test condition specified in EPA and state regulations. It was decided to invalidate all studies running that week. Although a costly decision, it was the only one we could make that would ensure that no client would be negatively impacted.

All studies affected have been or are in the process of being rescheduled. It was been a tough winter and we certainly appreciate your patience in this matter.

Regards,
Robert Martino

**Subject:** **Riverkeeper et al v. Honeywell International Inc. et al**
**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-04**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from April 1 – April 30, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

| **Arecon/US Ecology Subcontractors** | 1 | 1 | 1 | 1 |
| **OSC (-80 Kellogg Demolition** | 0 | 0 | 4 | 5 |
| **ENR (SA-6N GWTP Utilities)** | 0 | 0 | 0 | 0 |
| **BCA (SA-6N Building Construction)** | 0 | 0 | 0 | 0 |
| **Siemens** | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 1 | 0 | 0 | 0 |
| **HPS (SA-6N GWTP Process Controls)** | 0 | 0 | 0 | 0 |
| **Other** | 0 | 0 | 0 | 0 |
| **TOTAL** | **60** | **58** | **57** | **62** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Conducted quarterly LTMP groundwater level measurement round.

- Conducted S-3 Injection/Mass Removal Event No.13 in well 088-IW-03.
- Continued new Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Completed installation of the temporary SA-6 North Surcharge area dewatering system.
- Continued well abandonment activities in accordance with approved Monitoring Well Abandonment Plan.
- Continued former 80 Kellogg St GWTP and truck wash demolition activities.
- Collected April PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Based upon a final inspection the Hudson, Essex and Passaic Soil Conservation District issued a Report of Compliance on 4/21/2014 for the SA-7 Sediment Remediation Project.
- Non-chromium activities, ARCADIS continues to work with NJDEP on the modification to the existing NJDEP-Discharge to Groundwater Permit by Rule for additional Enhanced Anaerobic in-situ bioremediation (EAISB) injections planned for JCMUA and JCDPW UST Areas.

## C. SA-6 N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received fully compliant monthly lab results for the GWTP effluent PVSC sampling conducted on March 28, 2014.
- Changed out sludge box from the ground water treatment plant.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 04/06/2014 | 04/13/2014 | 04/20/2014 | 04/27/2014 |
| Avg. Gallons Treated & Discharged (per day) | 78,664 | 78,458 | 77,874 | 78,925 |
| Average Flow (gpm) for Operating Period | 55 | 54 | 54 | 55 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 |
| GWTP InfluentTanks (gal.) | 11,520 | 12,240 | 11,400 | 9,293 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in Cells 56 through 59 and Cells 152A through 135A and 146B through 142B
- Continued storm-water management activities.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.

- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 15.92 | 15.92 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 195 | 21.69 | 4,250.24 |
| **Entact/ Montecalvo** | 30 cubic Yard Roll off | Bayshore Recycling | NA | Creosote Debris (non- haz) | 2 | 11.58 | 23.17 |
| **Entact/Tilcon** | Tri-axle Dump | Tilcon, Mt. Hope | NA | Asphalt | 37 | 24 | 890.20 |
| **OSC** | 30yd Roll Off | 375 RT 1-9 South Jersey | IWS | C&D | 33 | TBD | TBD |
| **OSC** | 40yd Roll Off | Cinelli JC | Cinelli | Light Iron | 21 | TBD | TBD |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 146B-142B, 137A-135A |
| **Excavation Completed** | Cell Number(s) 55 through 58, 152A-140A<br>Volume Excavated - Total for Reporting Period: 9,607CY/ Total to Date:51,199 CY |
| **Backfill in Progress** | Cell Number(s) 1 through 58, 152A-140A |

### 3. BACKFILL MATERIALS USED

| Source | (Week Ending) | | | |
|---|---|---|---|---|
| | 04/6/2014 | 04/13/2014 | 04/20/2014 | 04/27/2014 |
| <20ppm re-use, CY | 0 | 0 | 0 | 1,598 |
| Weldon, Import-Tons | 4,592.86 | 5,195.18 | 6645.69 | 2,082.82 |
| Tilcon, Import-Tons | 0 | 0 | 50.61 | 308.24 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~85% complete. Instrumentation installation scheduled for completion in May 2014. No Surcharge initiated.
- Area 2S: Instrumentation Installation ~75% complete. Completion of instrument installation deferred pending completion of 80 Kellogg demolition activities. No Surcharge initiated.

- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Instrumentation Installation ~100% complete. Placement of surcharge material initiated on April 8, 2014.
- Area 2N: No instrumentation installed. Initial surcharge instrument data to be submitted under separate cover.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Two (2) pairs driven on the hydraulic barrier wall at Sta 25+65 on SA-6 South.

## G. PERMIT STATUS

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP Waterfront Development | SA-6 North Only | Obtained 6/23/2010 | Not Specified, Est. 3/31/2015 | 6/23/2015 | - |
| NJDEP CAFRA/FHA | SA-6 South Only | Obtained 9/26/2012 | Renewal Not Needed | 9/25/2017 | 10/09/2012 |

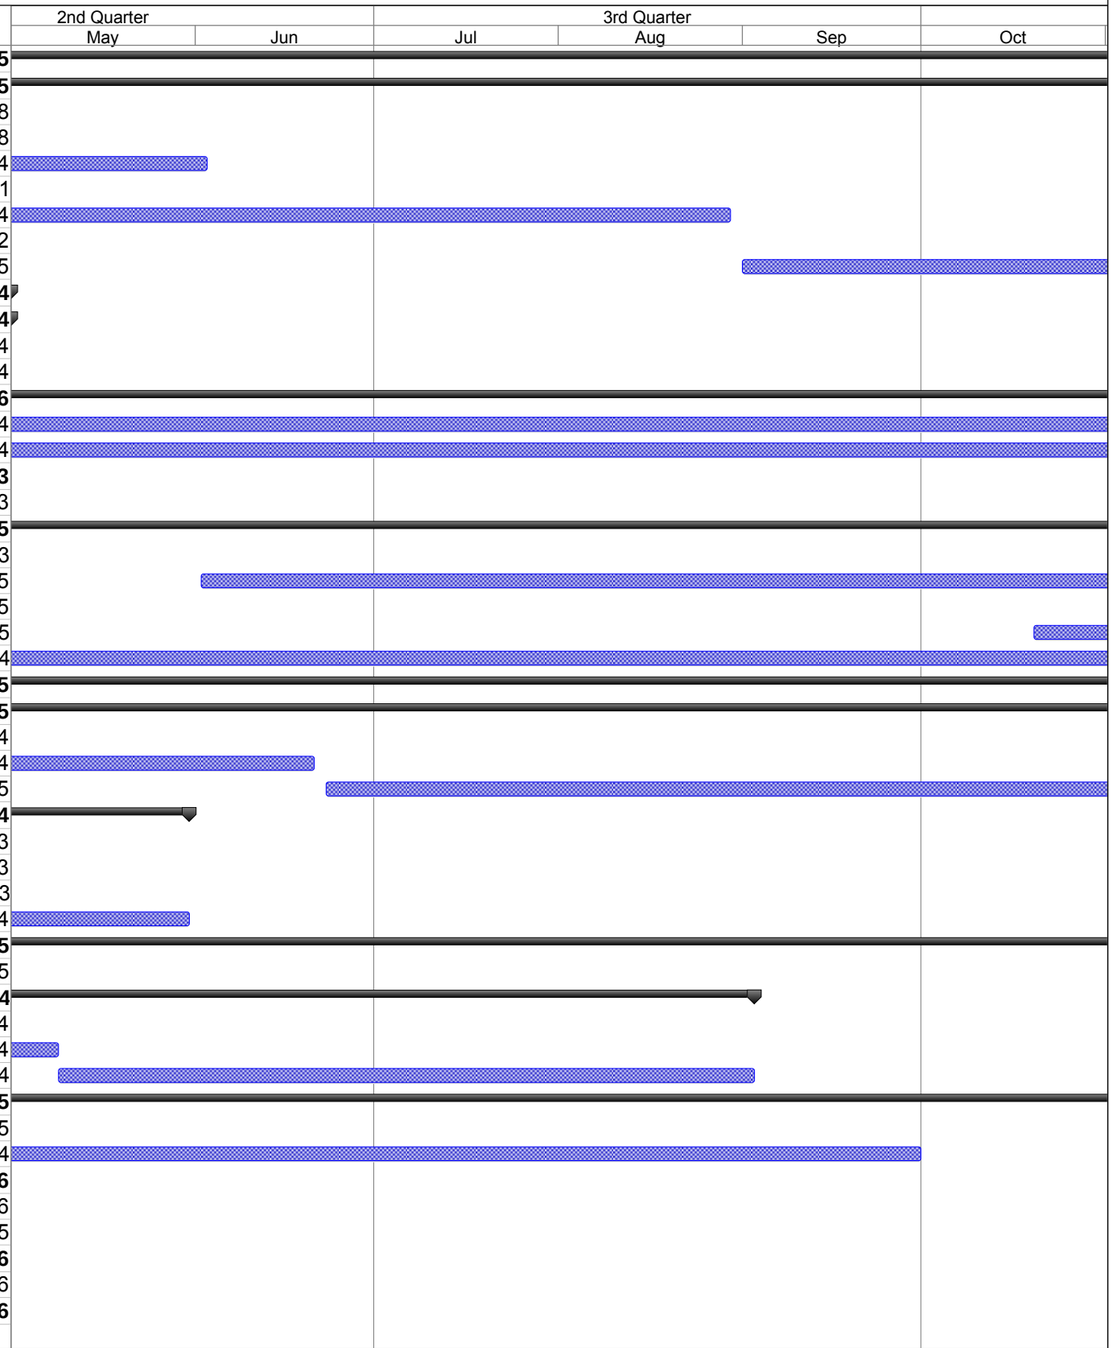
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Continue placement of surcharge materials in SA-6N Area 1N.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 135-120.

- Continue stockpiling of potential <20 mg/kg and >1,000 mg/kg hexavalent chromium soils for sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Complete demolition activities associated with the former 80 Kellogg Ground Water Treatment Plant and Truck Wash Building.
- Continue SWPPP inspections.
- Complete PVSC compliance sampling.



**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-1)
   - SA-6 South Deep Well Data (DW-2)
   - SA-6 South Deep Well Data (DW-5)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. Groundwater Quality Data Surcharge Monitoring Update
   - Summary of Groundwater Quality Data from GWET Wells
   - Quarterly Water Wells
   - Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells
9. Surcharge Monitoring Update
   - Instrumentation Location Plan 1N
   - Instrumentation Location Plan 1S
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Pile Repair Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (March 2014)
    - Request to NJDEP re Permit NJG0156311 Permit Revocation
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (March 2014)

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |

Project: SA-6 Remediation Schedule
Revision 3
Date: Mon 5/5/14

Task  Milestone  Summary  Critical

## Attachment 2:  Site Photographs

**Site Photograph 1:** Backfill is placed at the western end of the Kellogg St. excavation.

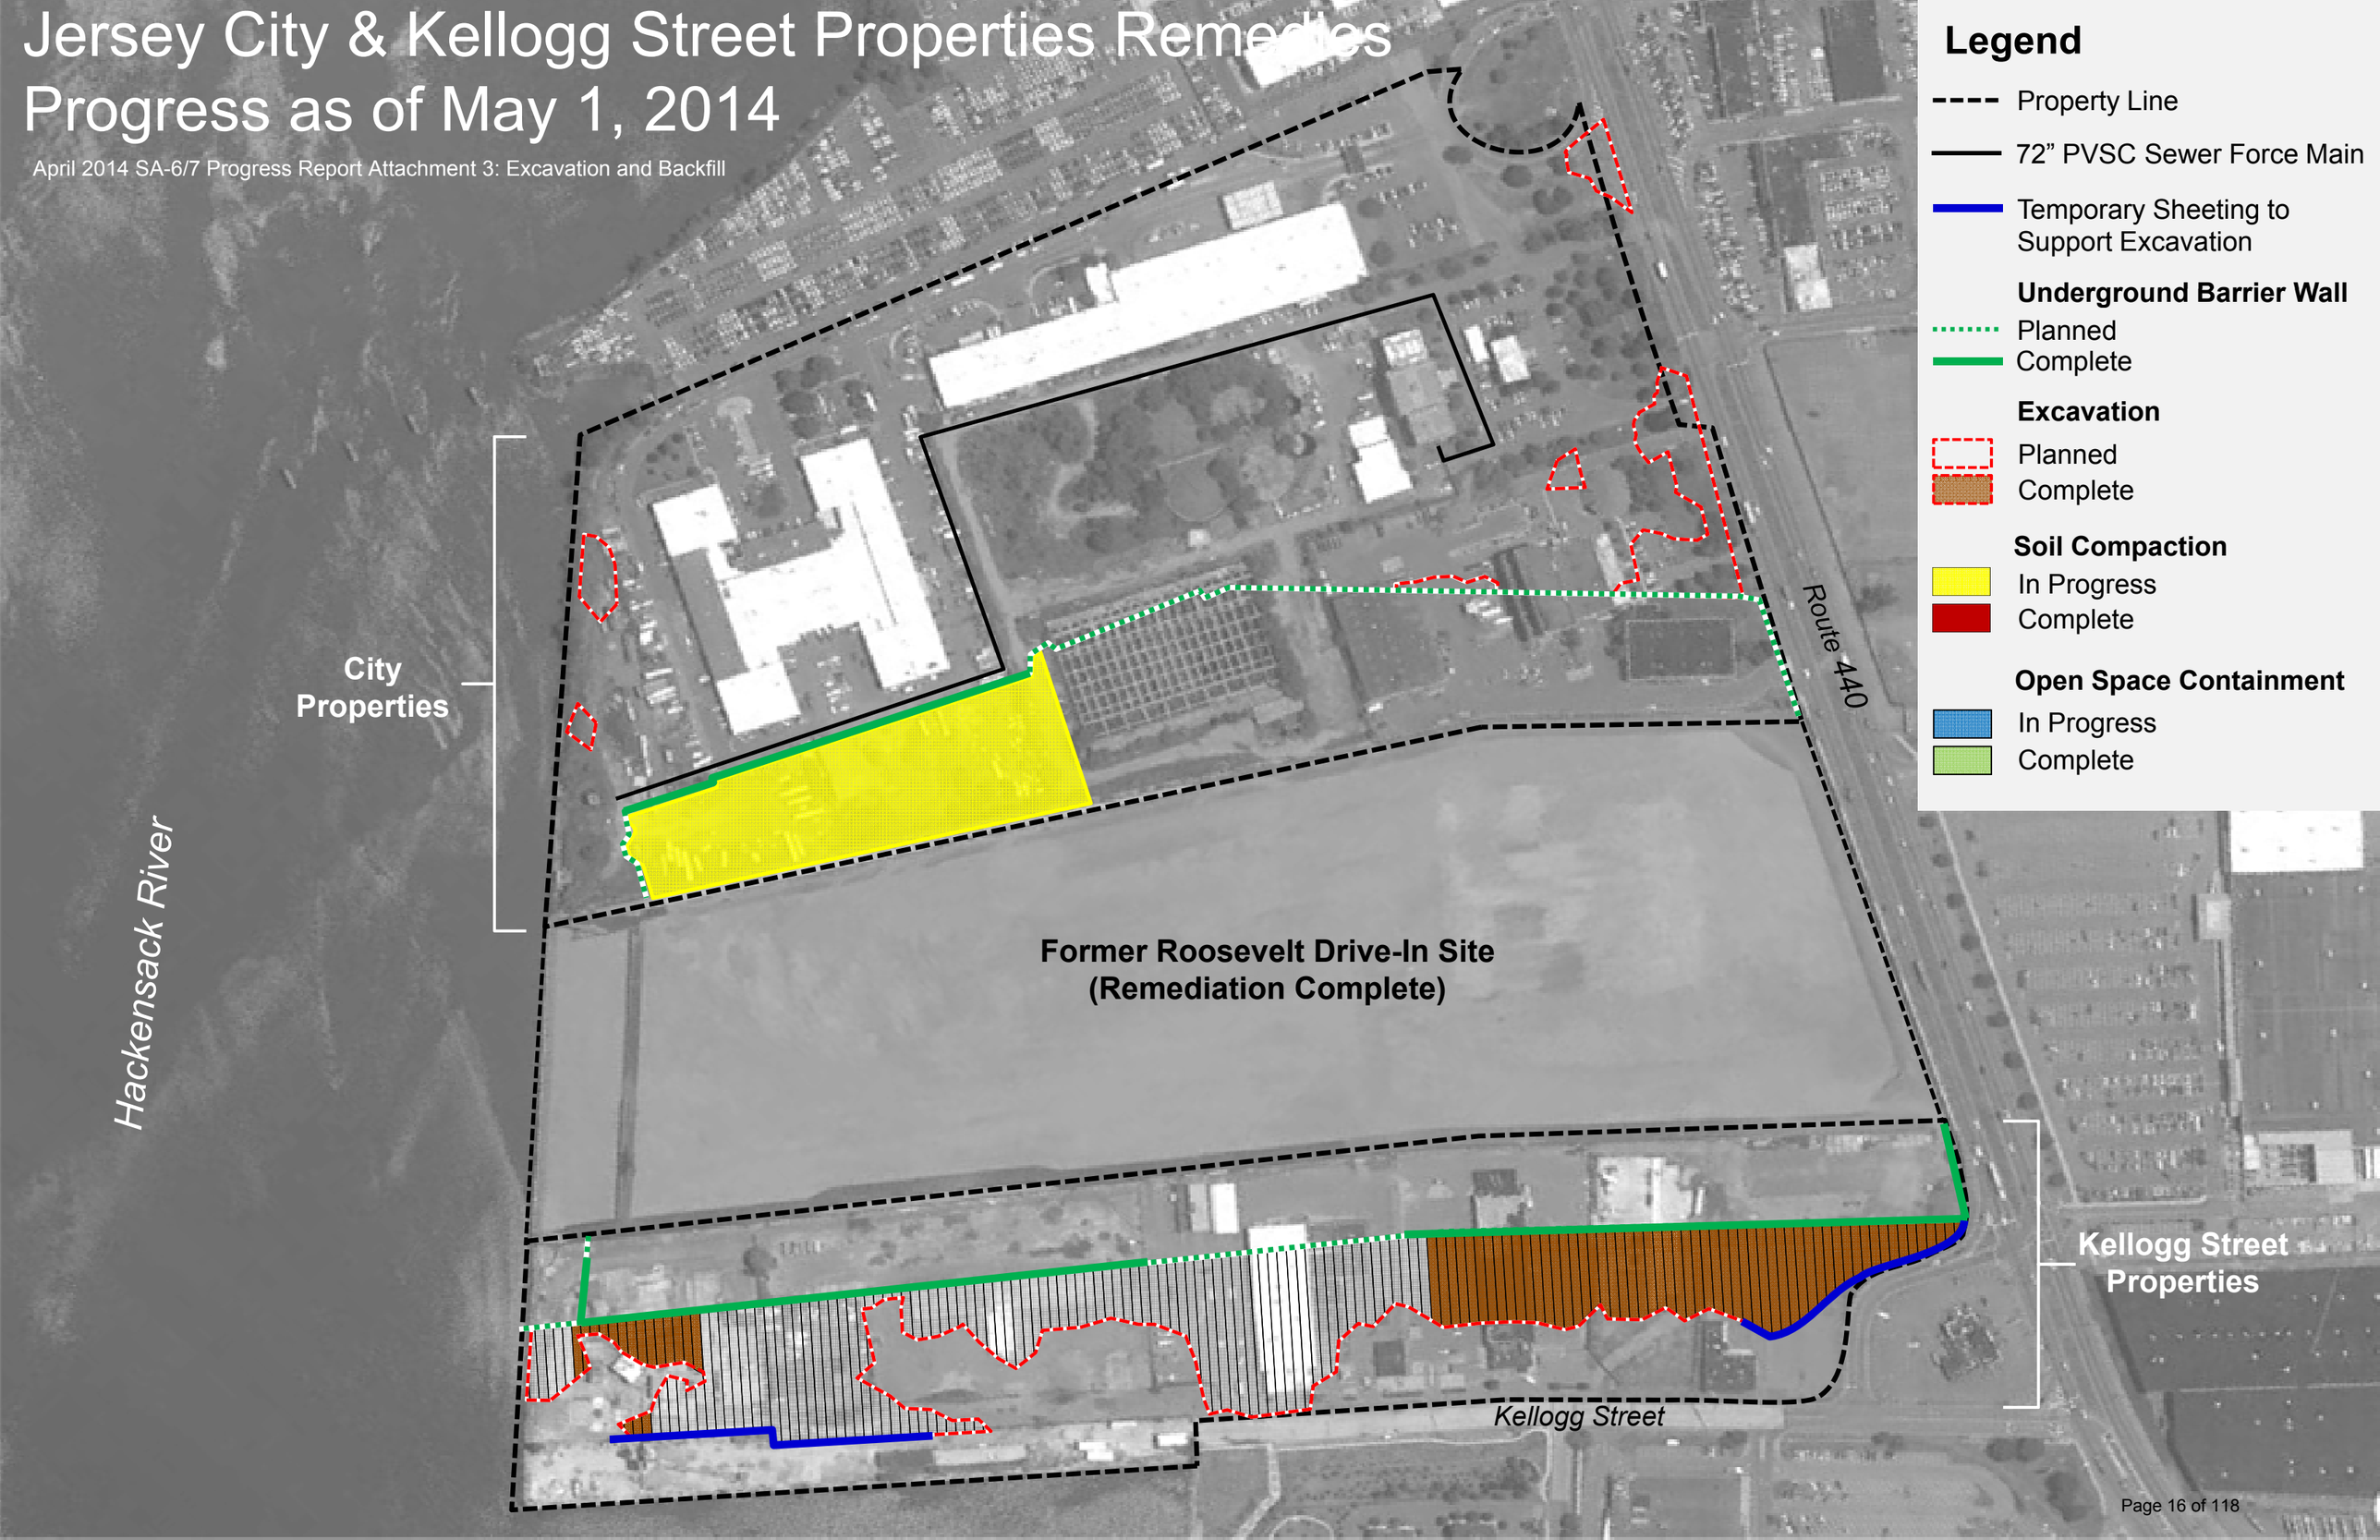
**Site Photograph 2:** Contractor breaks up concrete slab prior to excavation along Kellogg St.

**Site Photograph 3:** Contractor continues to backfill eastern area of excavation at Kellogg St.

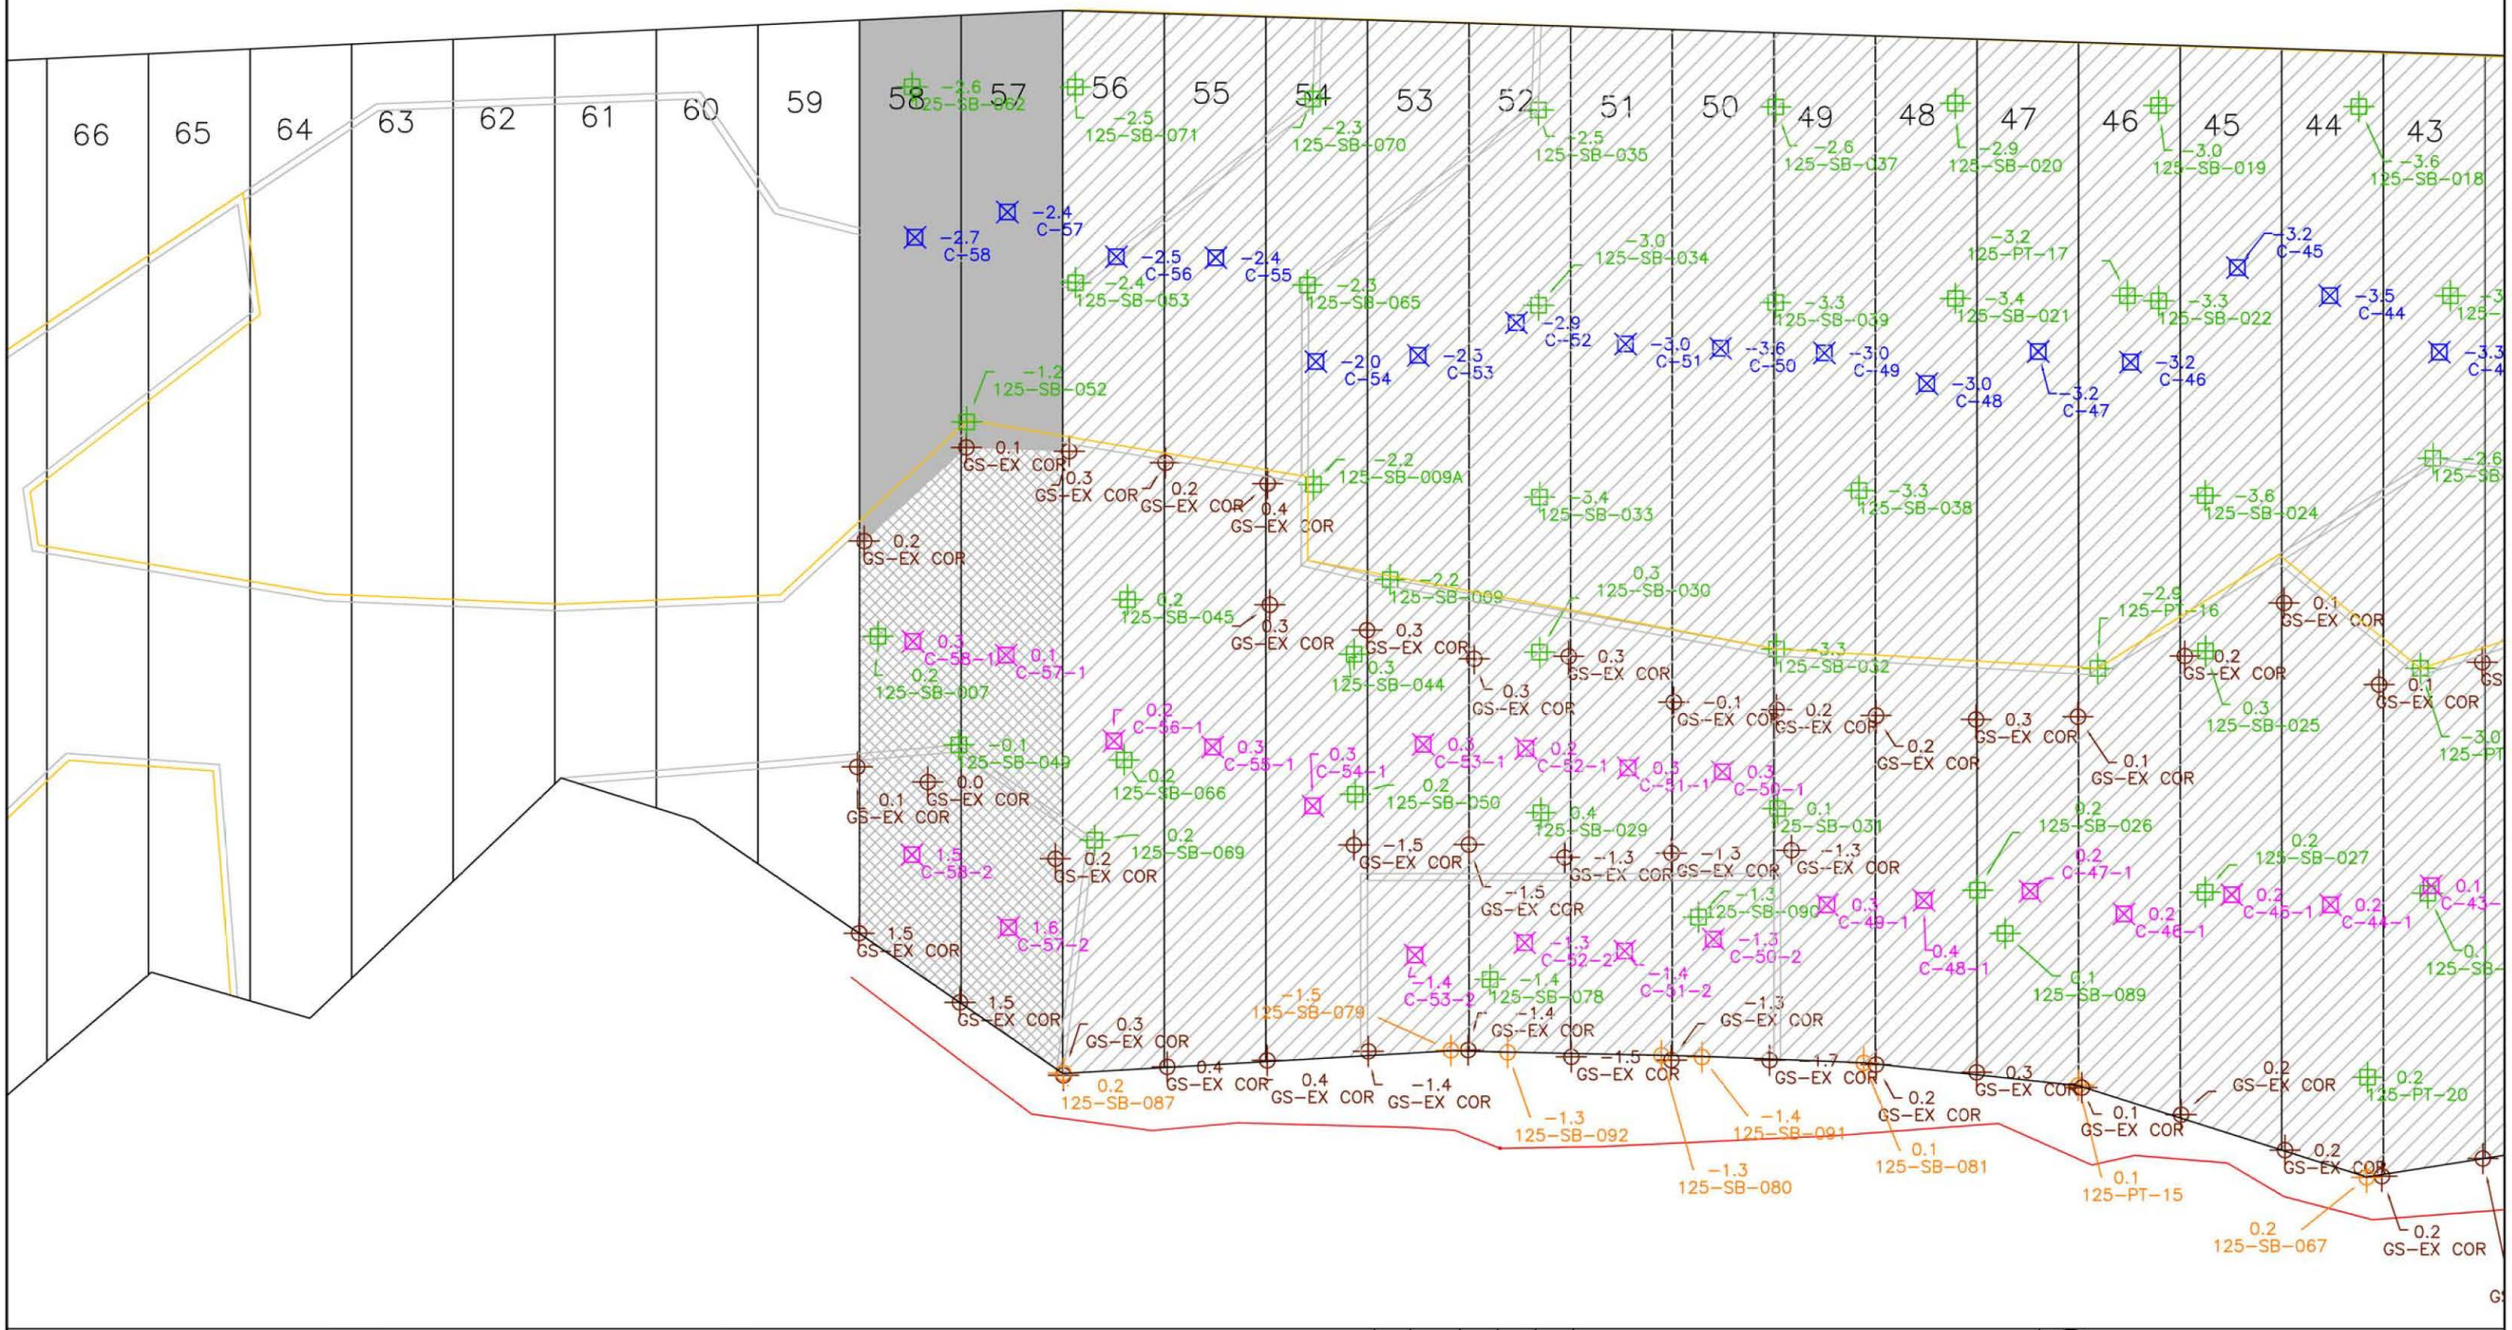
**Site Photograph 4:** Contractor excavates against the temporary sheet pile along western portion of Kellogg St.

**Site Photograph 5:** Contractor loads soils for use as surcharge material on JC property.

**Site Photograph 6:** Contractor places surcharge soil over white geotextile fabric on JC property.



**Site Photograph 7:** Demolition of the 80 Kellogg building is started.



## Attachment 3: Excavation and Backfill

- Progression Chart
- Excavation Bottom Elevations
- Maser Survey Tables (SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points)
- Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
- Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

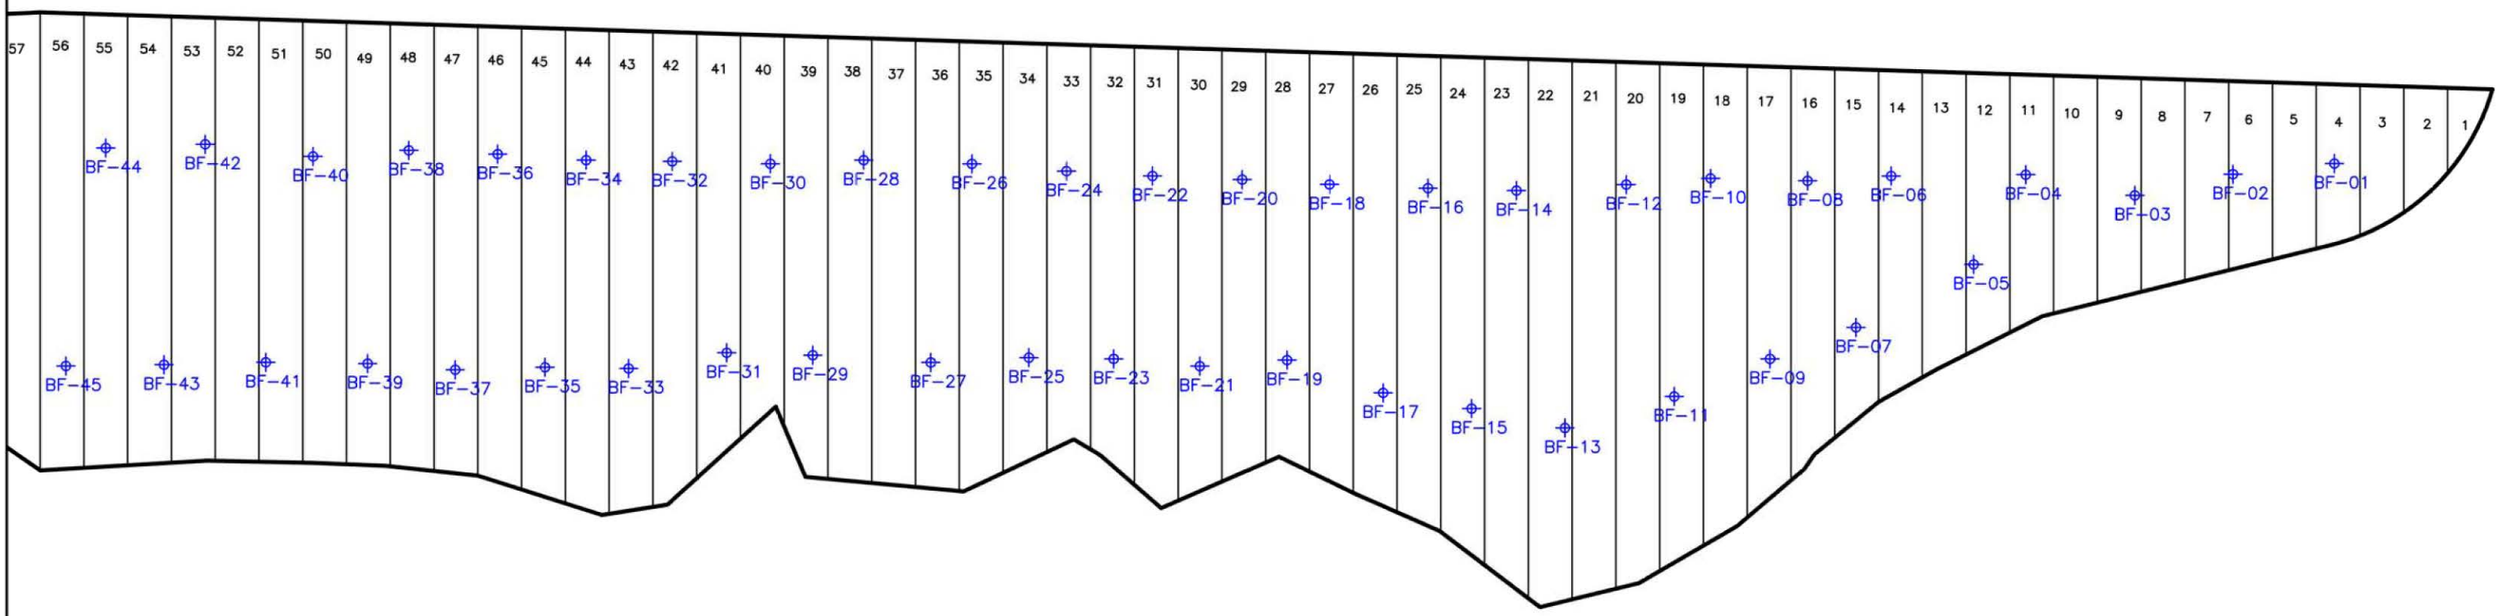
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.



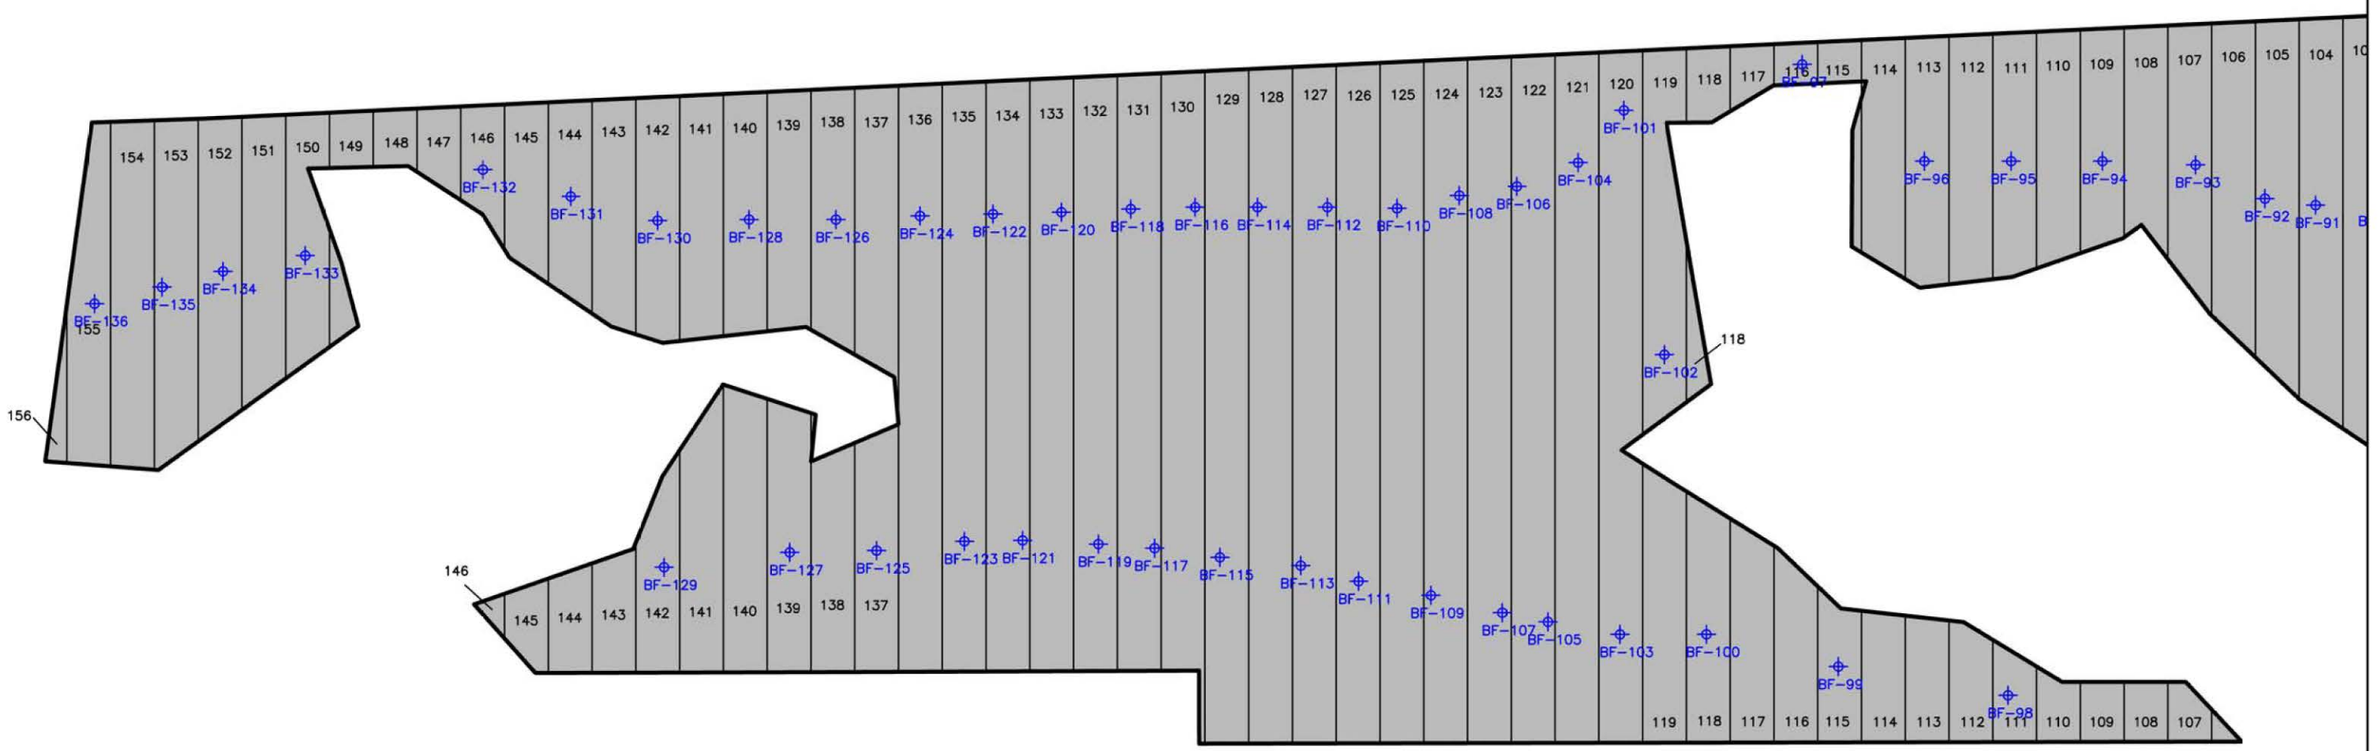
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

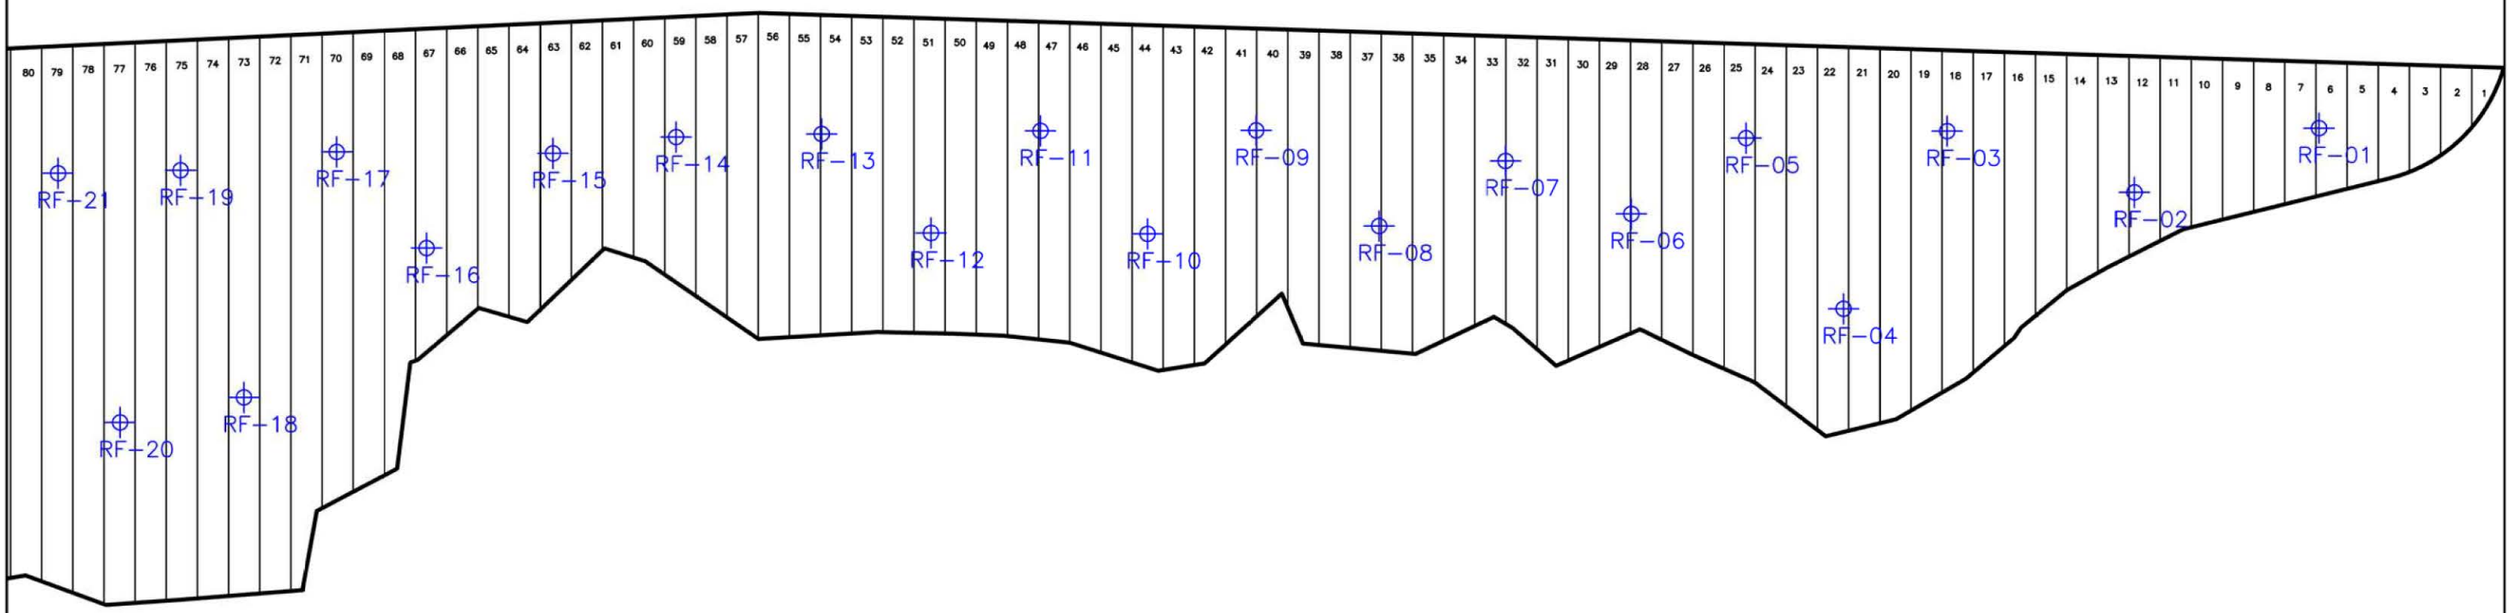
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

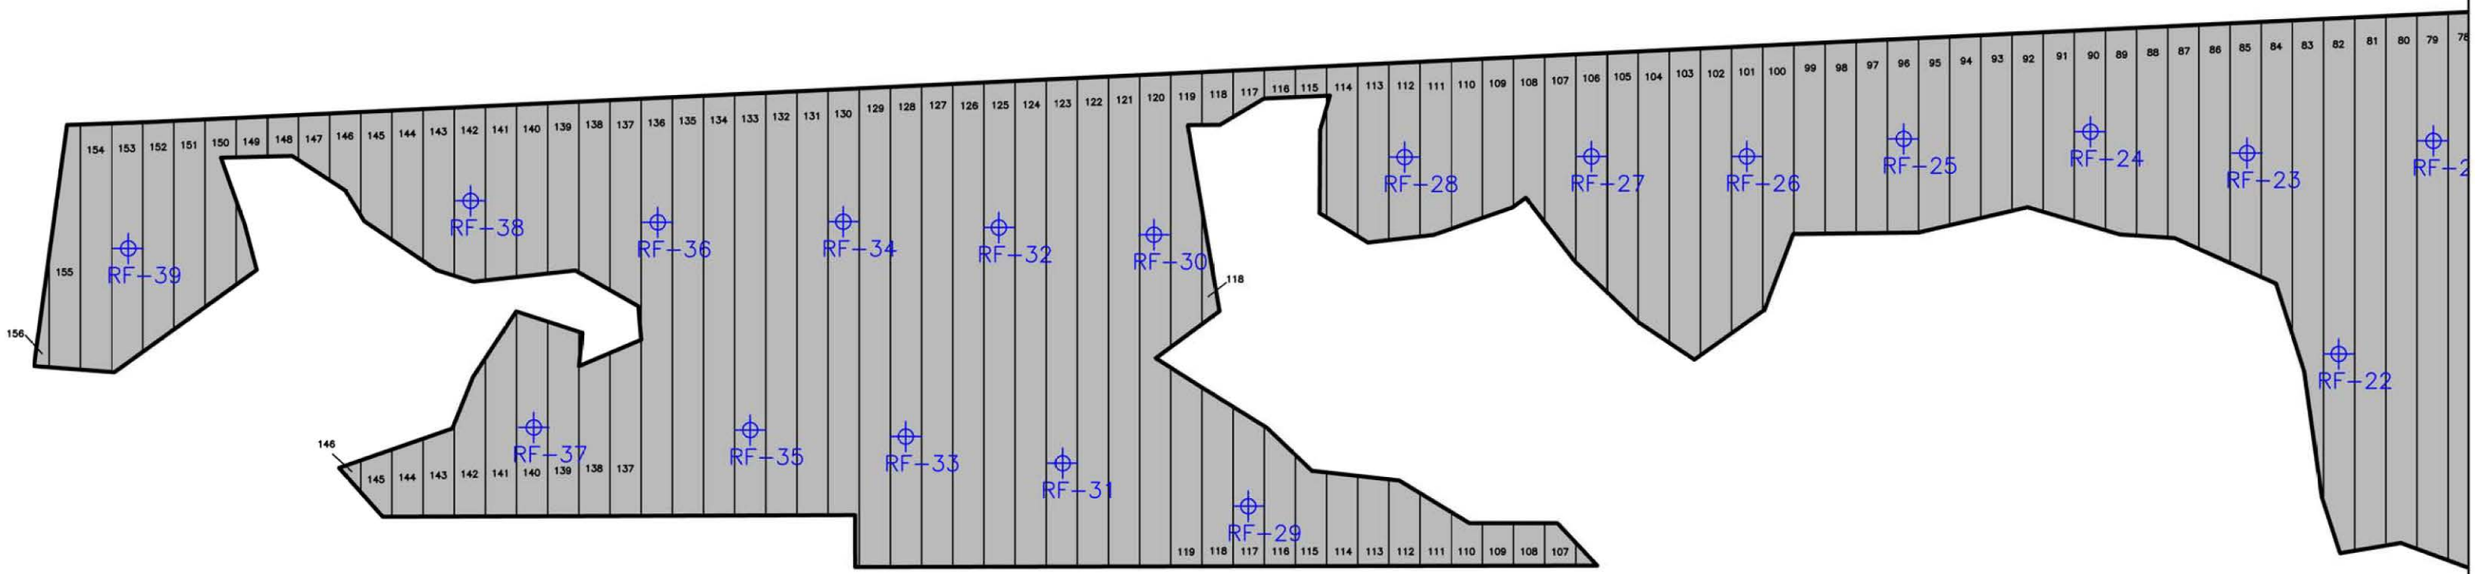
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. SURCHARGE PILE GEOMETRY IS BASED ON THE ASSUMPTION THAT THE SEDIMENTATION BASIN WALLS ARE IN PLACE AT THE TIME OF SURCHARGING.
5. COMMENCE FILL AT THE SEDIMENTATION BASIN AND WORK TOWARDS THE HACKENSACK RIVER.
6. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
7. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
8. AT ALL SURVEY LOCATIONS CLEAN ADEQUATELY A SUFFICIENT AREA ON THE TOP SURFACE OF THE 72 INCH FORCE MAIN TO EPOXY THE SURVEY MARKER AND ELECTRONIC EQUIPMENT.

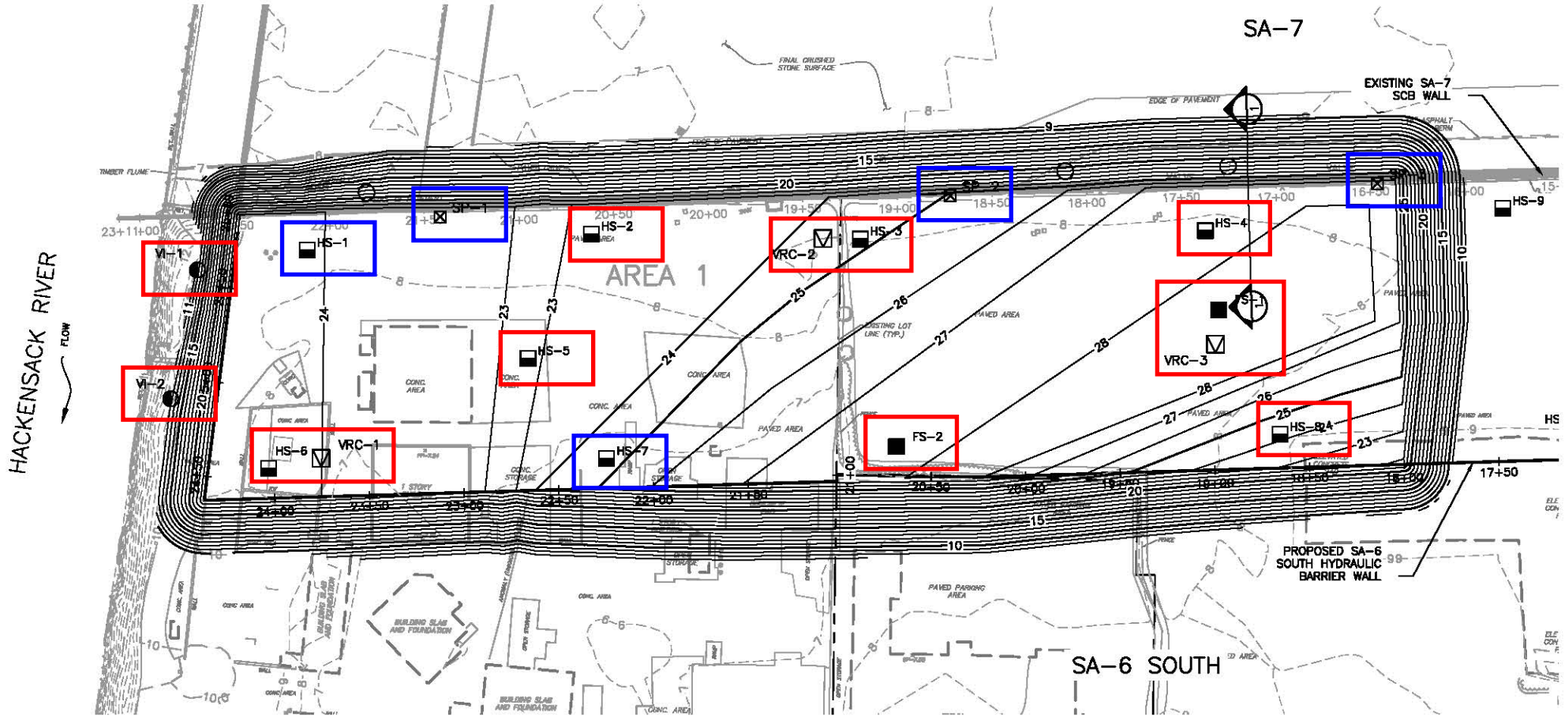
Installed Instrumentation Locations



Instrumentation Locations Not Installed

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
3. COMMENCE FILL AT THE HACKENSACK RIVER AND WORK EAST TOWARD ROUTE 440.
4. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
5. AFTER COMPLETION OF AREAS 1 AND 3 SURCHARGE LOADING, REMAINING FILL FROM THESE AREAS WILL BE COMBINED TO FORM THE SURCHARGE AREA 2.

- VI–2 — INCLINOMETER LOCATION
- FS–1–1 — SETTLEMENT MONITORING POINT FULL – SET UP
- HS–1–1 — SETTLEMENT MONITORING POINT HALF – SET UP
- SP12 — SETTLEMENT MONITORING PLATFORM
- RP — APPROXIMATE LOCATION OF SA–7 PERIMETER POOL RISER PIPE (SEE NOTE 7)

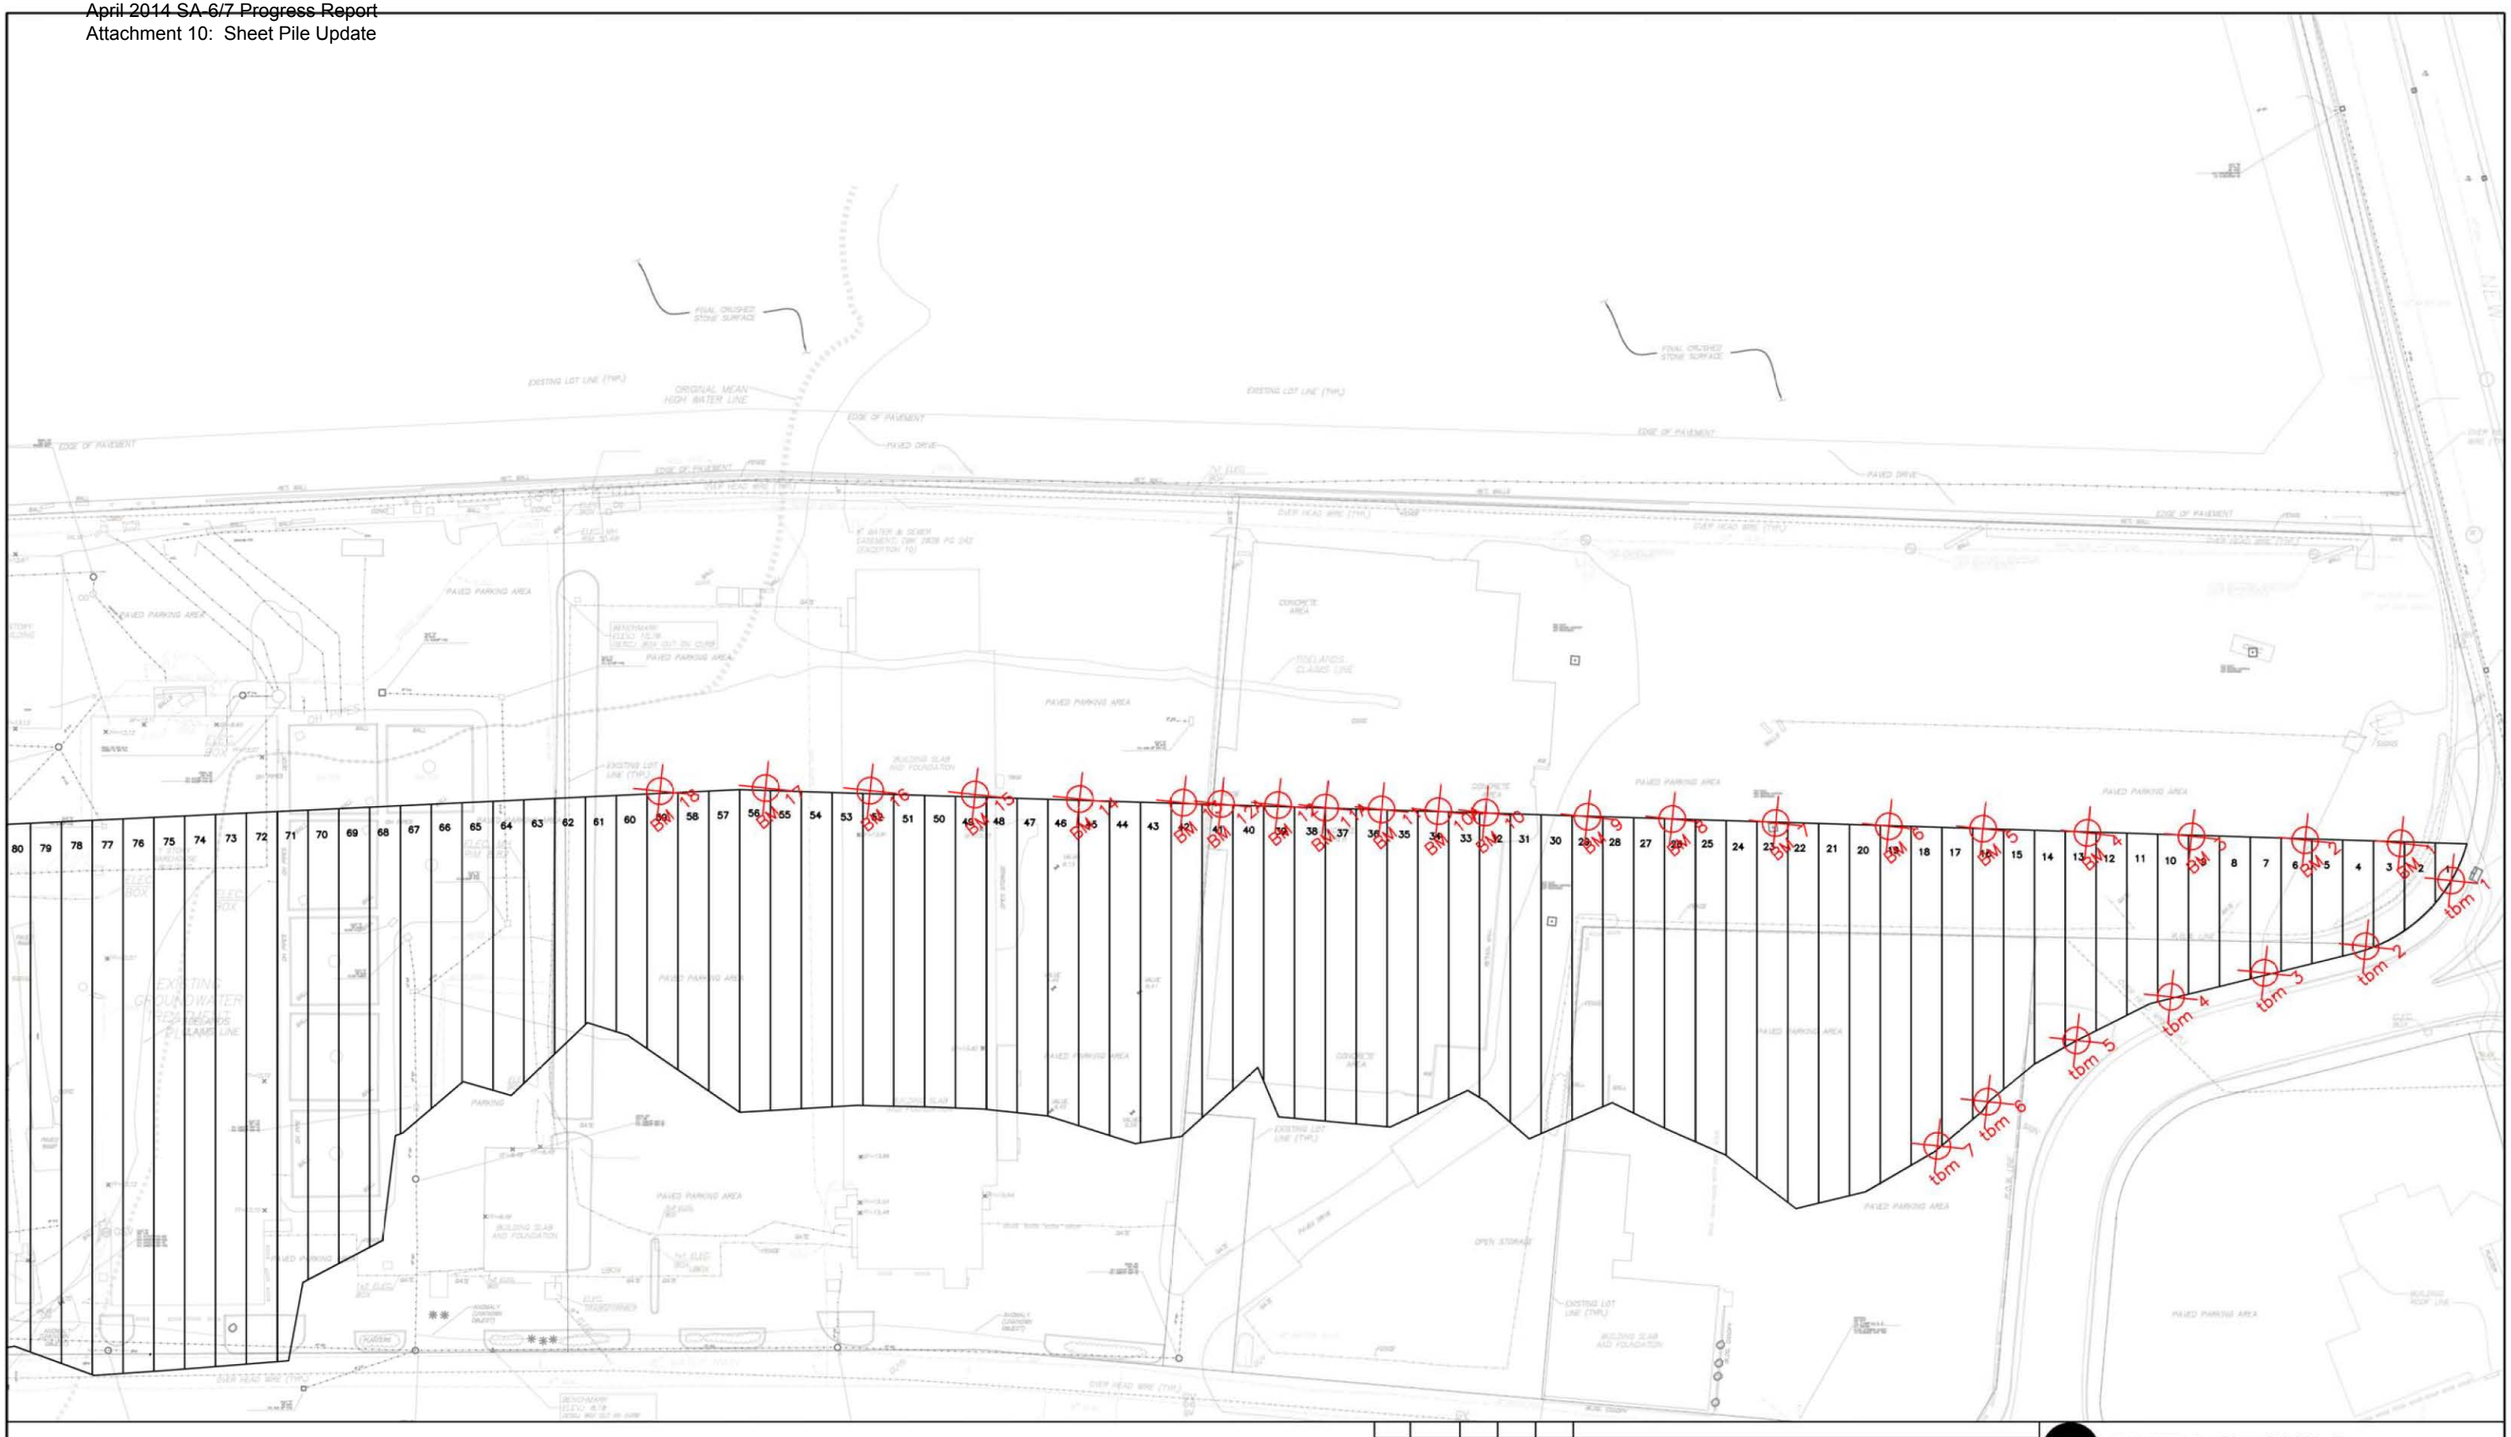
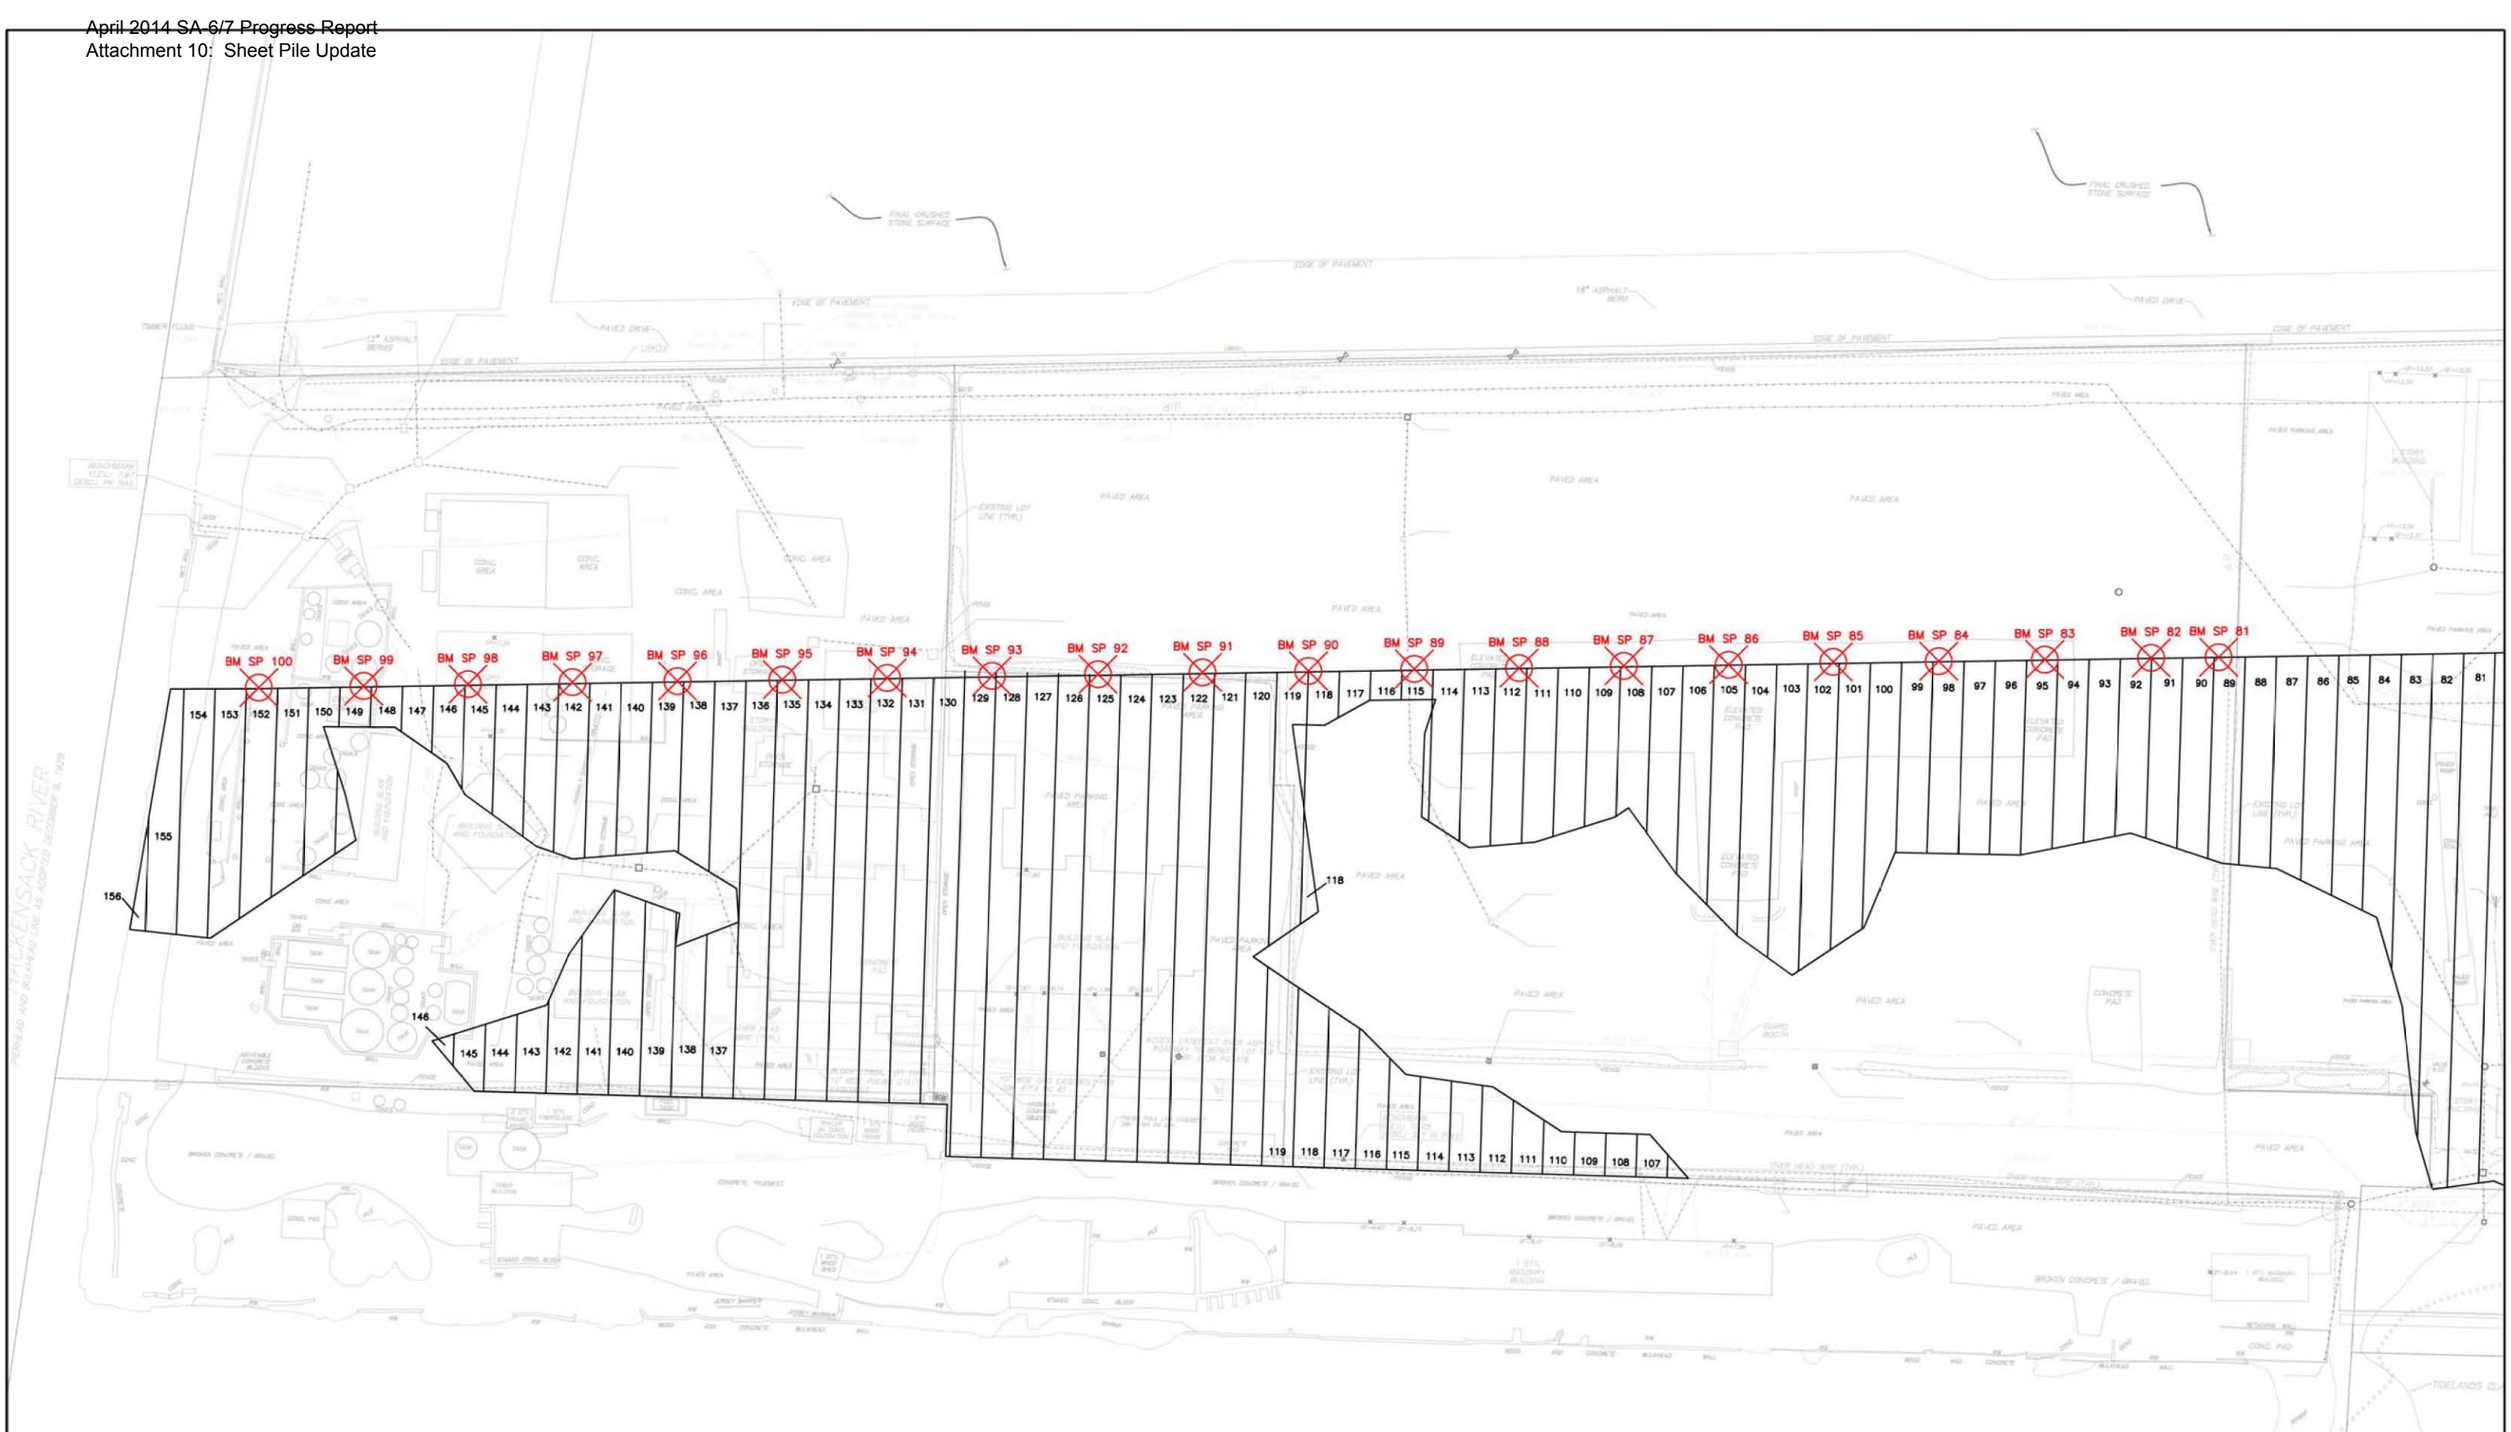
# Sheet Deflection Along Open Excavation- East



Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the

# Sheet Deflection Along Open Excavation- West

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.



NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-24

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-25

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-26

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/21/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 3/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: _____

Entact ID: BP1-27

Date Exposed: _____

Describe Damage: Damaged by bucket during excavation

Damage Location (ft below top of sheet, inboard side outboard side): _____

Date Repaired: 3/31/14

Inspected by: M. Senna

Describe Repair: Clean, grind, coat

Repair Log Closure: AMEC Signature: [signature]

Date: 4/4/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

# New Jersey Pollutant Discharge Elimination System

## Request for Permit Revocation / Certification of Closure

### 1. APPLICANT(S)/OPERATING ENTITY(IES)

NJPDES Permit # NJG0156311 P.I. # 234822

Name Honeywell International Inc.

Mailing Address 101 Columbia Rd

City or Town Morristown State NJ Zip Code 07962

Telephone ( 973 ) 455-2989 E-Mail helen.fahy@honeywell.com

### 2. LOCATION OF FACILITY/SITE

Name of Facility/Site Honeywell Study Area 7

Street Address/Location 441 RT 440 S

City or Town Jersey City State NJ Zip Code 07305

### 3. FACILITY CONTACT (Person Familiar with the Facility/Site and this Application)

Name Helen Fahy Telephone ( 973 ) 455-2989

Affiliation Fahy Associates, Remediation Manager

Fax ( 973 ) 695-2444 E-Mail helen.fahy@honeywell.com

### 4. Treatment plant/units or storage units closed, including the date closed (e.g., sludge facilities, lagoons, equalization tanks, trickling filters, clarifiers, sludge digesters, etc.). If the entire plant has been closed write "entire." The units closed are as follows:

- entire
- _____
- _____
- _____
- _____
- _____
- _____
- _____

### 5. The plant or units described in Item 4 above have been closed because of one of the following:

- [x] Facility has been closed.
- [ ] Connection to Sewerage Entity (e.g., connection to another wastewater treatment plant).
- [ ] Other – Describe: _____

6. All wastes and components of the treatment plant or other units described in Item 4 above have been properly managed, disposed and secured as follows where applicable:

| ACTIVITY | YES | N/A |
|---|---|---|
| • Influent and effluent pipes have been sealed. | ✓ | |
| • The affected units have been closed in such a manner so as to protect public safety and health, and to assure that no cont amination of ground or surface w ater will occur as a result of removing such facilities and equipment from service, either through the act of closure or through continuing the discharge of pollut ants into or through equipment; or through leaking, leaching, or discharge of pollutants from w astewater or residuals or other by-products remaining in facilities or equipment which has been removed or remains on site. | ✓ | |
| • All residual materials and all other solids from the treatment process including, but not limited to, liquid and dried sludges, grit and screenings, scum and sand bed materials have been removed and/or managed in a manner approved by the Department. | ✓ | |
| • Other, explain: _____ | | |

After verifying that the applicant no longer requires a permit for the discharge, the appropriate Water Compliance and Enforcement Bureau will advise the Office of Permit Management to revoke the NJPDES permit or GP Authorization.

I understand that it is a violation of the "Water Pollution Control Act", N.J.S.A. 58:10A-1 et seq., to discharge pollutants except in conformity with a NJPDES permit and that I may be subject to significant civil/criminal penalties for said violation.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based upon my inquiry of the person(s) who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. ## WHO MUST SIGN?

A Responsible Official is defined in N.J.A.C. 7:14A – 4.9 as follows:

For a corporation: A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions for the corporation; or the manager of one or more manufacturing, production, or operating facilities, provided:

(1) The manager is authorized to make management decisions that govern the operation of the regulated facility, including having the explicit or implicit duty of recommending major capital investment, initiating and directing comprehensive measures to assure long term compliance with environmental laws and regulations, and ensuring that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; or
(2) The authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

For a partnership or sole proprietorship: A general partner or the proprietor.

For a government agency: A ranking elected official; or the chief executive officer of the agency; or a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrator).

A duly authorized representative as defined in N.J.A.C. 7:14A-4.9(b).

PVSC FORM MR-1 REV: 4 6/87 P1

# PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used: All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3. SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler. All samples are iced in a cooler during transport to the lab.

**I certify under penalty of law that this document and attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted.
