**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-05**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from May 1 – May 31, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

## B. SITE OPERATIONS

### 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | | |
|---|---|---|---|---|---|
| | 05/04/2014 | 05/11/2014 | 05/18/2014 | 05/25/2014 | 06/01/2014 |
| Construction Management (AMEC) | 9 | 10 | 10 | 10 | 10 |
| Engineering (AMEC) | 2 | 2 | 2 | 1 | 1 |
| Air Monitoring (Emilcott) | 1 | 1 | 1 | 1 | 1 |
| Security (Securitas) | 3 | 3 | 3 | 3 | 3 |
| Entact/Subcontractors | 32 | 40 | 42 | 47 | 45 |
| Arecon/US Ecology Subcontractors | 1 | 1 | 1 | 1 | 1 |
| OSC (80 Kellogg Demolition) | 5 | 3 | 0 | 0 | 0 |
| ENR (SA-6N GWTP Utilities) | 0 | 0 | 0 | 1 | 3 |
| Siemens | 1 | 1 | 1 | 1 | 1 |
| HBS (SA-6N GWTP Security System) | 1 | 0 | 0 | 0 | 0 |
| Other | 0 | 0 | 0 | 0 | 0 |
| **TOTAL** | **55** | **61** | **60** | **65** | **65** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued new Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Continued well abandonment activities in accordance with approved Monitoring Well Abandonment Plan.
- Completed former 80 Kellogg St GWTP and truck wash demolition activities.
- Collected May PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Non-chromium activities, ARCADIS continues to work with NJDEP on the modification to the existing NJDEP-Discharge to Groundwater Permit by Rule for additional Enhanced Anaerobic in-situ bioremediation (EAISB) injections planned for JCMUA and JCDPW UST Areas.

## C. SA-6 N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on April 23, 2014.

- Completed installation of asphalt ramps associated with the north and south tanker offloading pads and the roll off garage door

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | | |
|---|---|---|---|---|---|
| | 05/04/2014 | 05/11/2014 | 05/18/2014 | 05/25/2014 | 06/01/2014 |
| Avg. Gallons Treated & Discharged (per day) | 79,342 | 78,825 | 79,068 | 81,360 | 78,896 |
| Average Flow (gpm) for Operating Period | 55 | 54 | 55 | 56 | 55 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 | 24 |
| GWTP InfluentTanks (gal.) | 13,132 | 11,058 | 12,258 | 11,560 | 12,698 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in Cells 139A through 125A and 146B through 126B.
- Continued storm-water management activities.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 223 | 21.8 | 4,868 |
| **Entact/ Montecalvo** | Tri-axle Dump | Bayshore Recycling | NA | Non Haz Petroleum Soil | 041 | 24.98 | 1,024. |
| **Entact/ Montecalvo** | 30yd Roll Off | NJMC Landfill | NA | Non Haz Concrete | 21 | 22.3 | 468 |
| **OSC** | 30yd Roll Off | 375 RT 1-9 South Jersey | IWS | C&D | 30 | 13.1 | 393 |
| **OSC** | 40yd Roll Off | Cinelli JC | Cinelli | Light Iron | 9 | 6.1 | 55.6 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 128B-126B, 126A-125A |
| **Excavation Completed** | Cell Number(s) 139A –127A, 146B-129B Volume Excavated - Total for Reporting Period: 11,420 CY/ Total to Date: 62,619 CY |
| **Backfill in Progress** | Cell Number(s) 1 through 58, 152-128A, 146B-136B |

### 3. BACKFILL MATERIALS USED

| Source | (Week Ending) | | | | |
|---|---|---|---|---|---|
| | 05/04/2014 | 05/11/2014 | 05/18/2014 | 05/25/2014 | 06/01/2014 |
| <20ppm re-use, CY | 1,755 | 3,489 | 0 | 0 | 315 |
| Weldon, Import-Tons | 1,550. | 4,603 | 4,563 | 3,108 | 0 |
| Tilcon, Import-Tons DGA | 1,186 | 1,785 | 1,520 | 550 | 302 |
| Tilcon, Import Tons – 1.5" Stone | 0 | 0 | 126.07 | 0 | 201 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~90% complete. One instrument location and the settlement platforms over the perimeter pool remain to be installed. Completion of instrumentation installation is scheduled for June2014. No Surcharge initiated.
- Area 2S: Instrumentation Installation ~75% complete. Completion of instrument installation deferred pending completion of 80 Kellogg demolition activities. No Surcharge initiated.
- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Instrumentation Installation ~100% complete. Placement of surcharge material initiated on April 8, 2014. As of May 30$^{th}$ approx. 80% of surcharge has been placed. The results of the monitoring provided in Surcharge Monitoring Report #2 to be submitted under separate cover.
- Area 2N: No instrumentation installed. Initial surcharge instrument data to be submitted under separate cover.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Forty Eight (48) pairs driven on the hydraulic barrier wall from Sta 12+70 to 14+90+65 on SA-6 South.
- The grout angle on one sheet pair (designated 20P-15) was dislodged from the sheet during driving. A new angle will be installed when the joint is exposed during excavation. The angle will be flushed and grouted following backfill.

## G. PERMIT STATUS

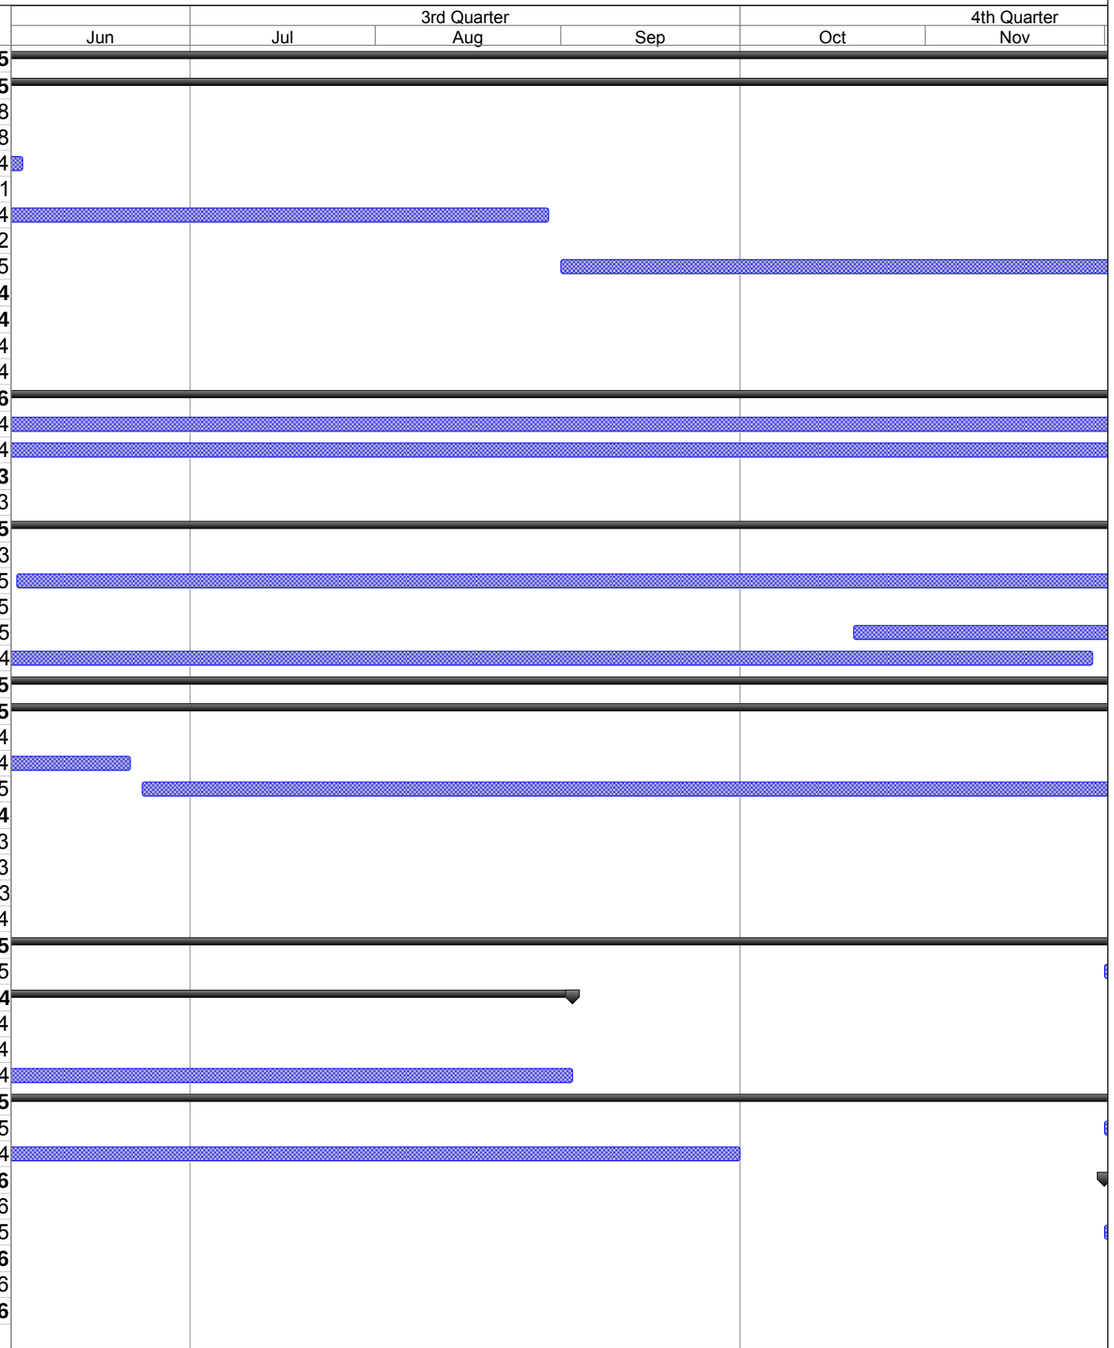
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Complete placement of surcharge materials in SA-6N Area 1N.
- Begin placement of surcharge materials in SA-6S Area 1S.
- Continue installation of the contingent groundwater system on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 125to 108. Continue stockpiling of presumed <20 mg/kg for additional sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Conduct S-3 Injection/Mass Removal Event No.14 in well 088-IW-03 (completed on June 1, 2014.)

- Conduct quarterly LTMP groundwater level measurement round.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.



**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-5)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. Groundwater Quality Data Surcharge Monitoring Update *(provided on a quarterly basis - not available as of this report date)*
   - Summary of Groundwater Quality Data from GWET Wells
   - Quarterly Water Wells
   - Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells
9. Surcharge Monitoring Update
   - Instrumentation Location Plan 1S
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Pile Repair Log
    - Vibration Monitoring Update
11. Weekly SWPPP Reports
12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (April 2014)
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (April 2014)
13. SA-6 North & South Design Change Tracking Log

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified In the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

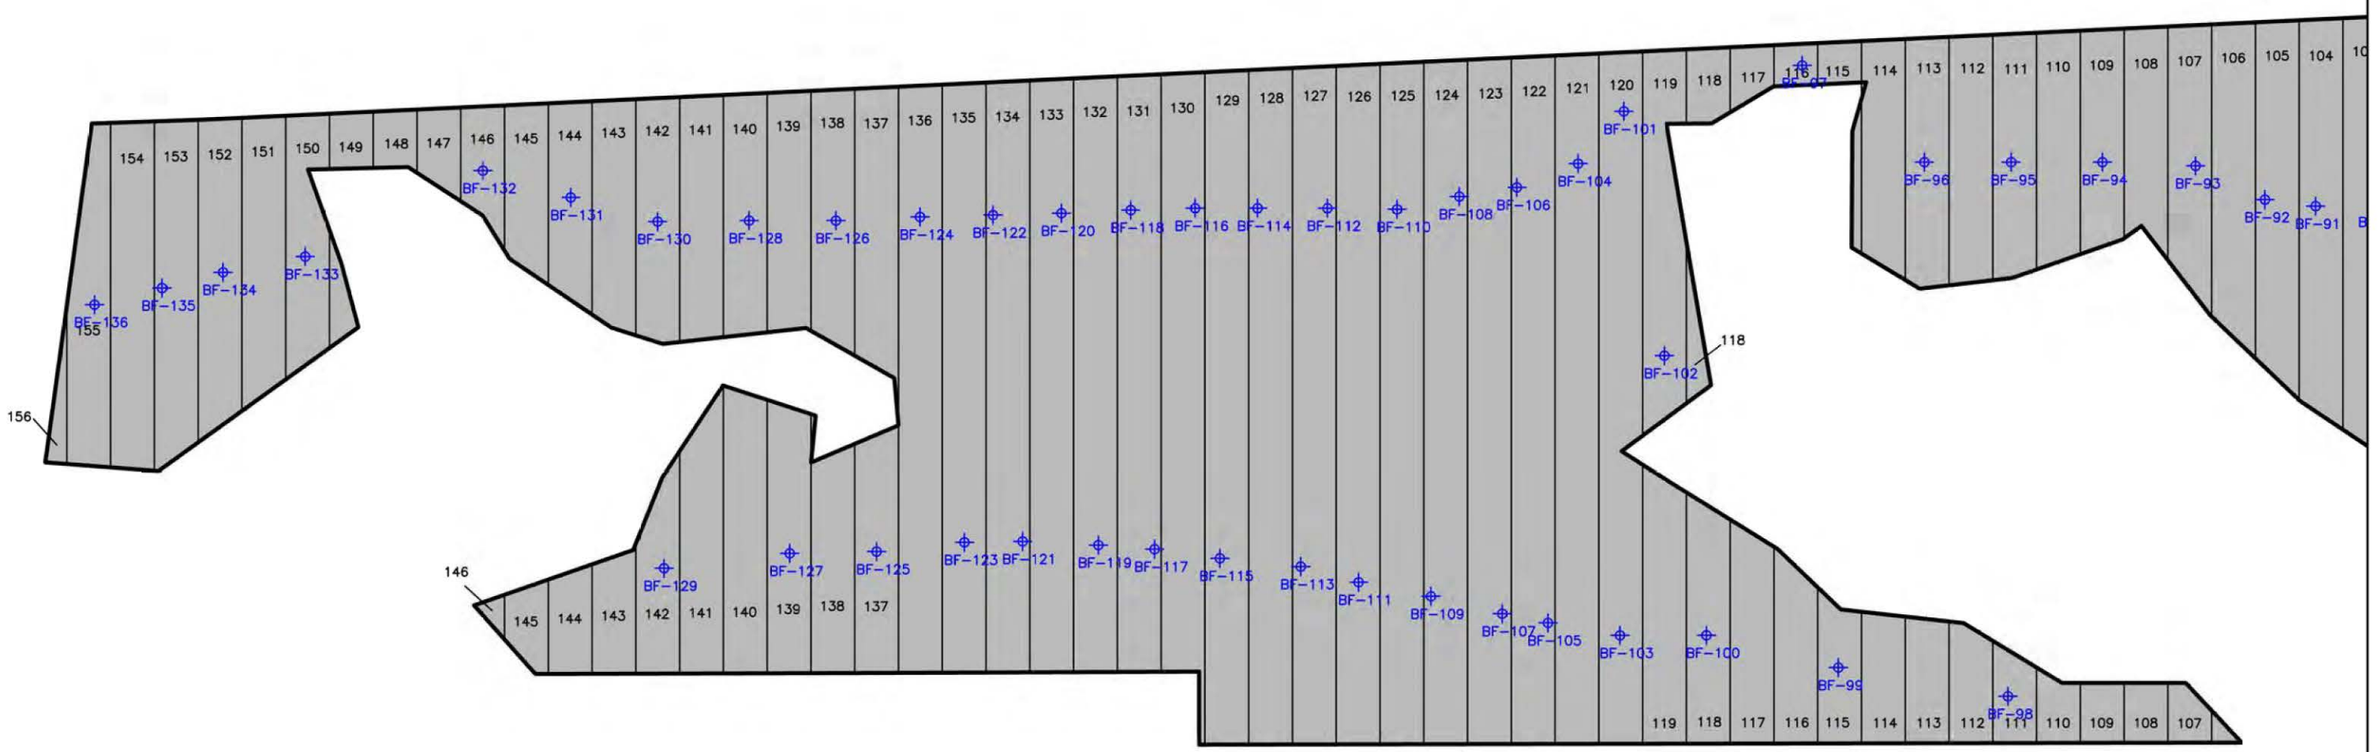
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.



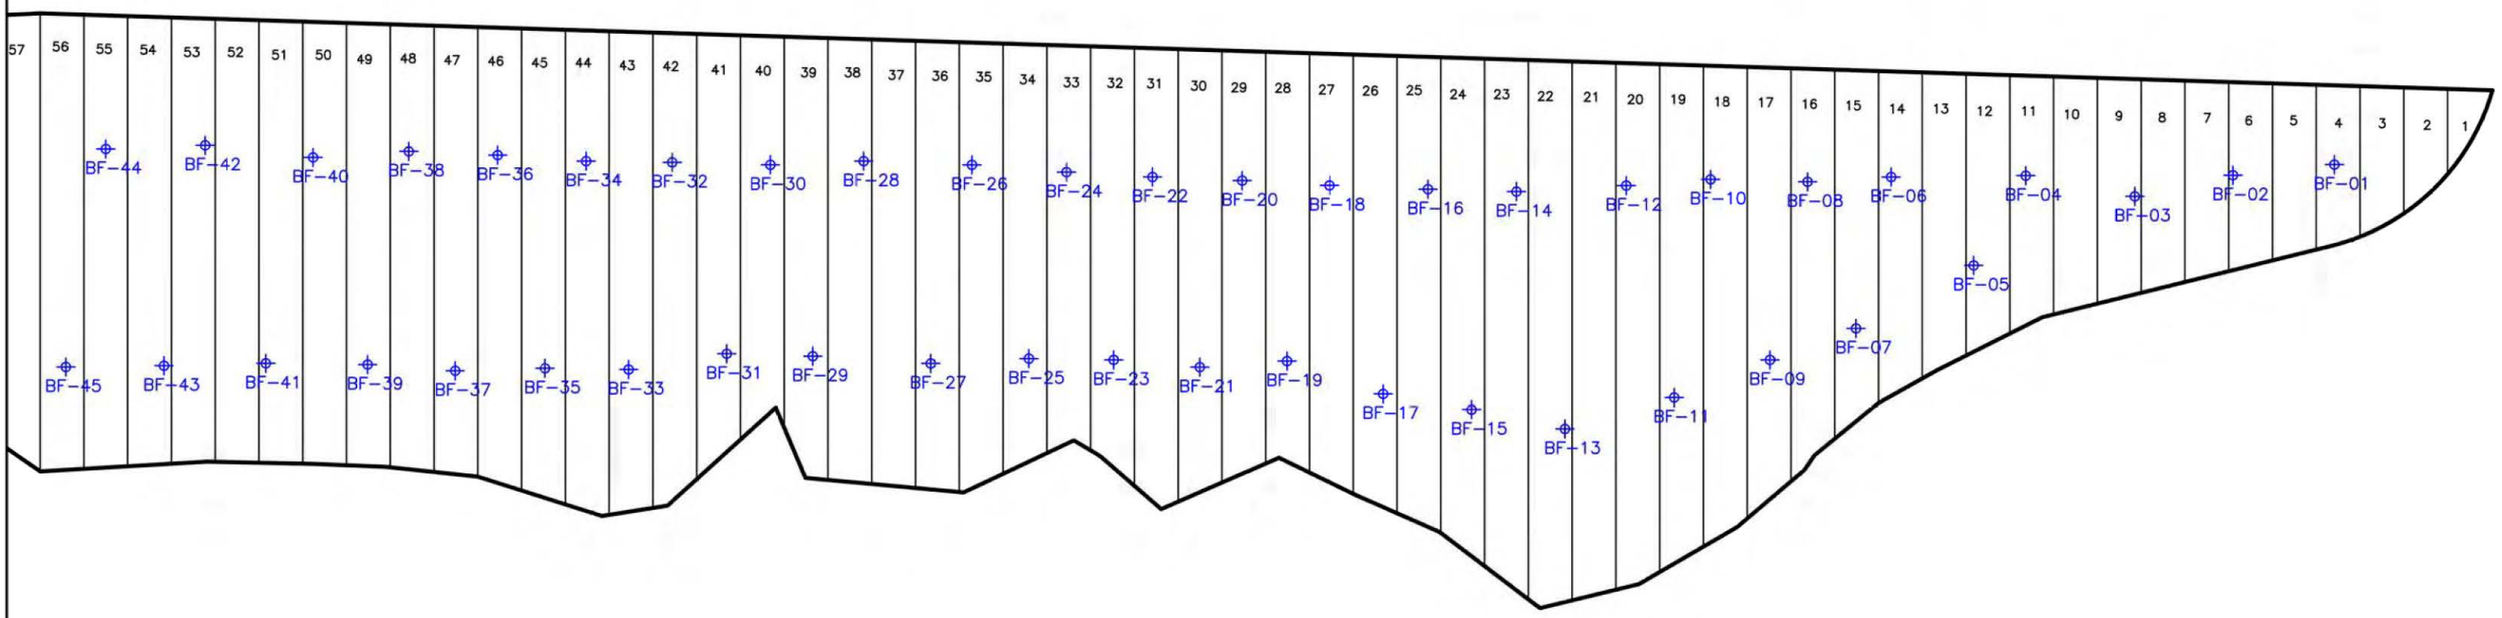
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run agair



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

ENTACT 302 Unity Plaza Latrobe, PA 15650

DRAWING NAME: BACKFILL COMPACTION LOCATIONS EVERY 2,500 SF BF-95 TO BF-136

PROJECT NAME & LOCATION: HONEYWELL SA-6 REMEDIATION JERSEY CITY, NJ

NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

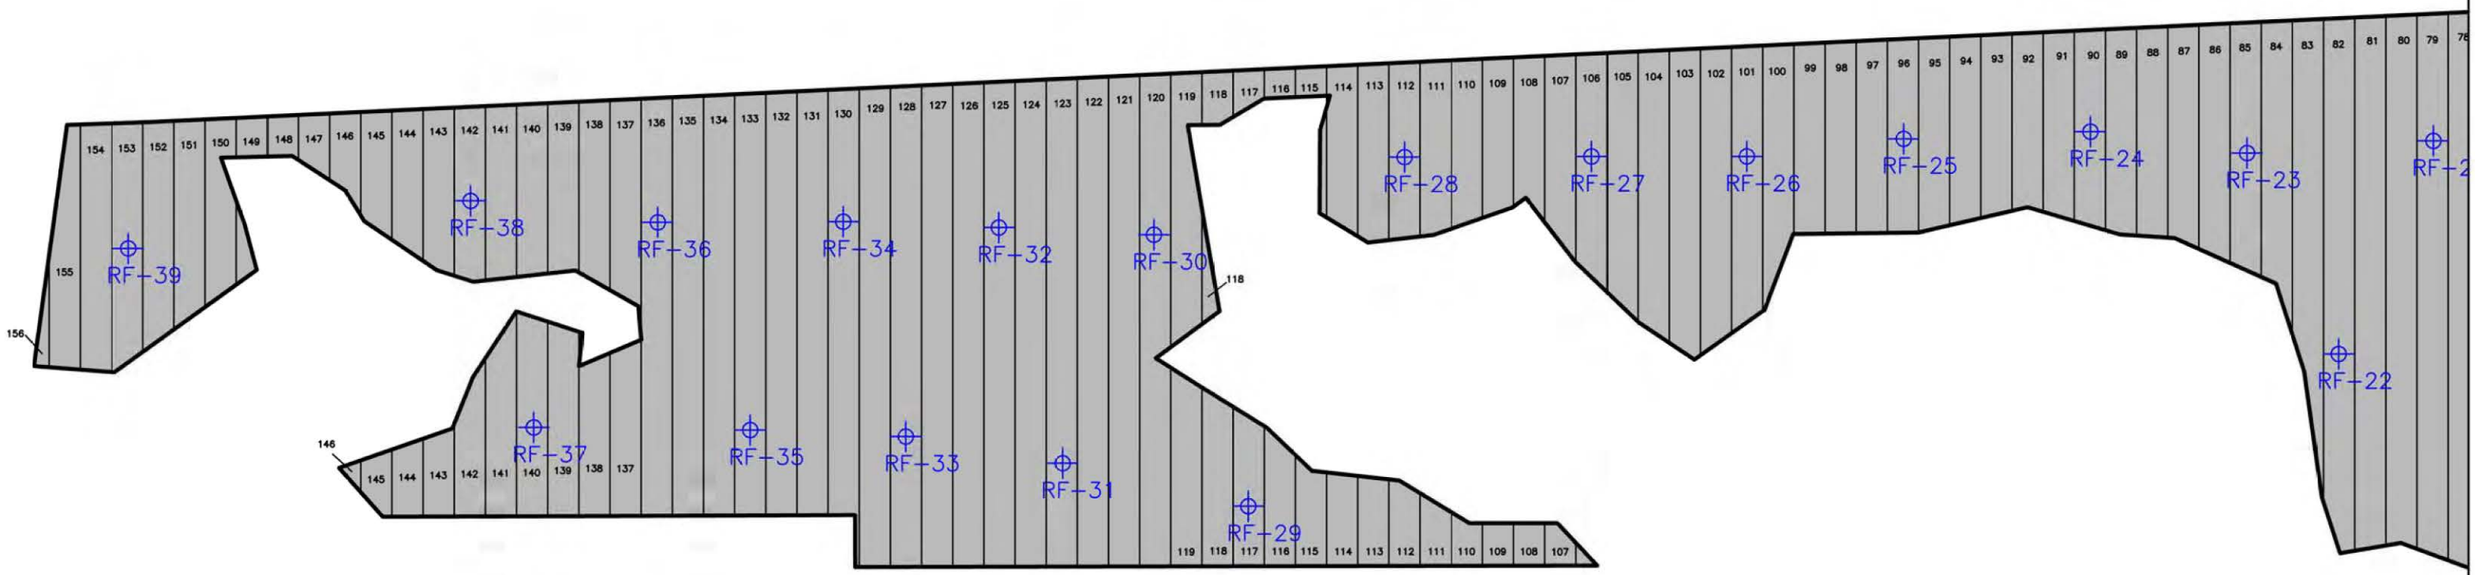
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b.

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C.

Bottom of excavation elevation based on Maser survey data (Center Point elevations).



Sample ID RF-01-01 where:

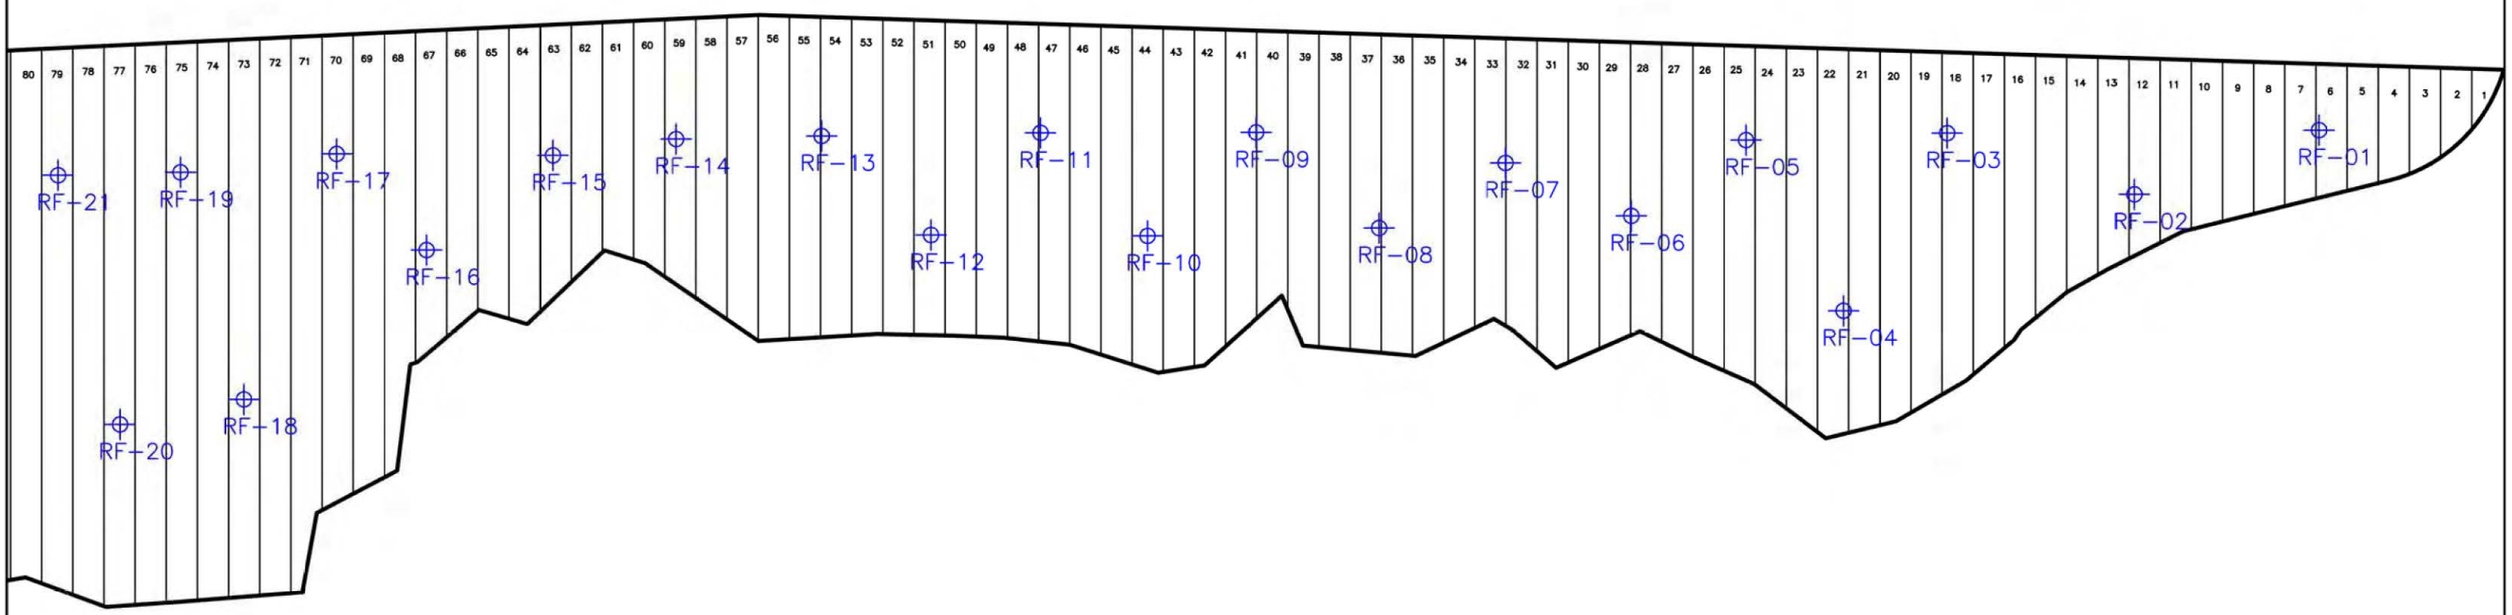
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

ENTACT 302 Unity Plaza Latrobe, PA 15650

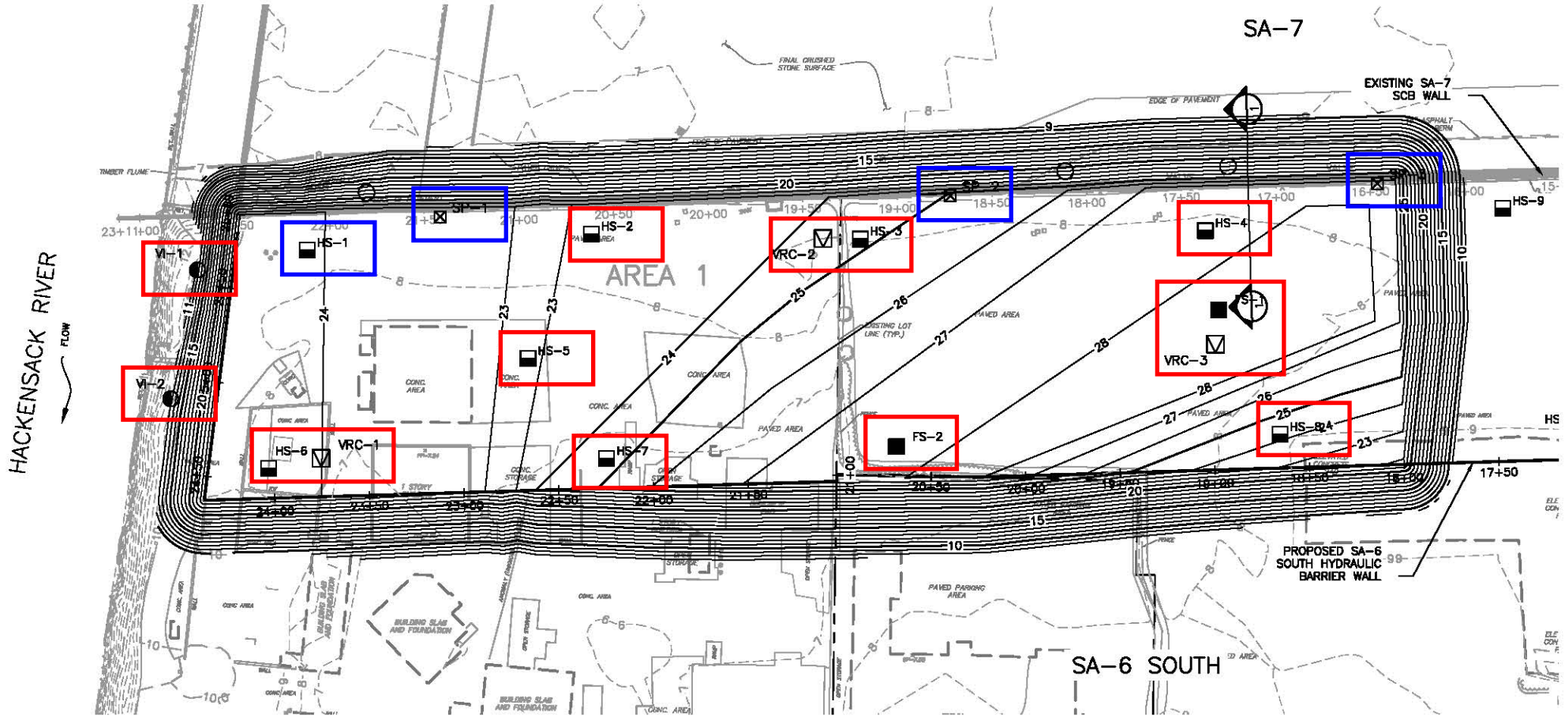
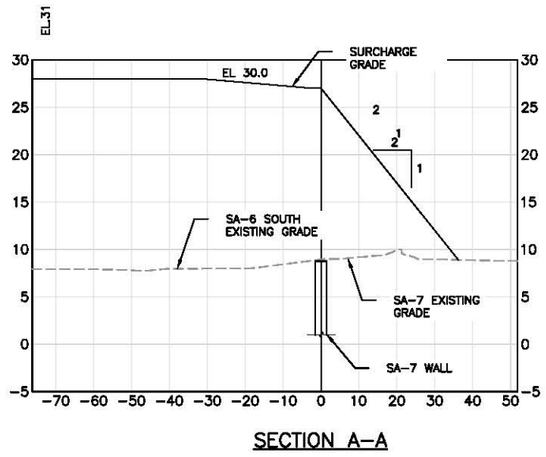
The following wells have been abandoned in accordance with the SA-6 100% Design:
134-W4-DO, 087-MW-001, 087-MW-019, 087-MW-Y20, 115-E1-DO, 115-E1-SO, 125-MW-01, 073-MW-BB-11, 073-MW-Y10, 134-MW-Q08.

The following wells and perimeter pool risers are temporarily inaccessible:
134-MW-V09, N3W, N4E, N4W, E1A-SO



## Attachment 8: Quality and Level Data in GWET Wells



(not available as of this report date - provided on a quarterly basis)

- Summary of Groundwater Quality Data from GWET Wells
- Quarterly Water Wells
- Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells

## Attachment 9:  Surcharge Monitoring Update

- Instrumentation Location Plan 1S

Installed Instrumentation Locations

Instrumentation Locations Not Installed

| SP–2 | 685410.62 | 601852.31 |
| SP–3 | 685276.93 | 602033.96 |

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
3. COMMENCE FILL AT THE HACKENSACK RIVER AND WORK EAST TOWARD ROUTE 440.
4. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
5. AFTER COMPLETION OF AREAS 1 AND 3 SURCHARGE LOADING, REMAINING FILL FROM THESE AREAS WILL BE COMBINED TO FORM THE SURCHARGE AREA 2.

# Sheet Deflection Along Open Excavation-West

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.
8. Deflections were not measurable due to the limited depth of cut for BM 98-100.

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 14P-7

Entact ID:

Date Exposed:

Describe Damage: (9) minor scrapes by excavator bucket - range in size from 1"Ø to 1"x10"

Damage Location (ft below top of sheet, inboard side outboard side): 7' - 10' outboard

Date Repaired: 5/5/14

Inspected by: Brian Shea

Describe Repair: Epoxy applied w/ 3" brush

Repair Log Closure: AMEC Signature: BSL

Date: 5/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 14P-6

Entact ID:

Date Exposed:

Describe Damage: (5) minor scrapes by excavator bucket - Range in size from 1/2" Ø to 1"x8"

Damage Location (ft below top of sheet, inboard side outboard side): 7'-10' outboard

Date Repaired: 5/5/14

Inspected by: Brian Shea

Describe Repair: Epoxy applied w/ 3" Brush

Repair Log Closure: AMEC Signature: BSL

Date: 5/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 14-P-8

Entact ID:

Date Exposed:

Describe Damage: (5) minor scapes by excavator bucket. Range in size 1/2" Ø to 1/2" x 10"

Damage Location (ft below top of sheet, inboard side outboard side): 7' to 12' outboard

Date Repaired: 5/5/14

Inspected by: Brian Shea

Describe Repair: Epoxy applied w/ 3" brush

Repair Log Closure: AMEC Signature: BSL

Date: 5/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

Inspected by: Brian Shea

Describe Repair: Pressure Wash, wire brush, apply epoxy w/ 4" wire brush

Repair Log Closure: AMEC Signature: BS

Date: 5/22/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15P-7

Entact ID:

Date Exposed:

Describe Damage:
(4) miner scrapes by Cat 349E excavator bucket - 1/2"Ø, 1/2"Ø, 1"x3", 1"x6".

Damage Location (ft below top of sheet, inboard side outboard side):
6'-10' outboard

Date Repaired:

Inspected by: Brian Shea

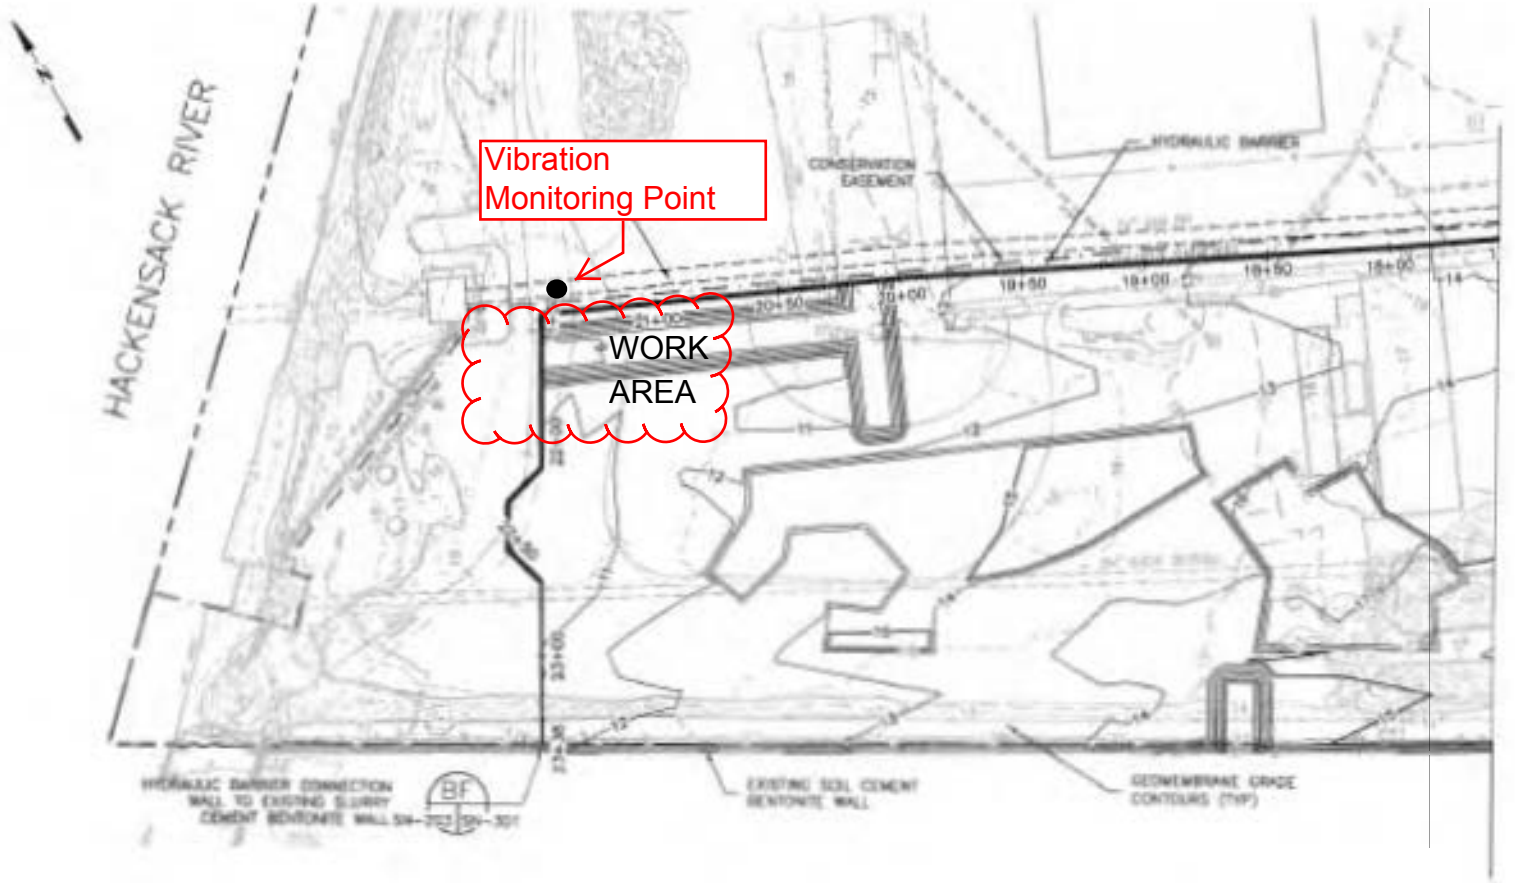
# Vibration Monitoring Report

## Study Area 6 North

**Prepared by**
**Geocomp Engineering**



**February 27th, 2014**
**For ENTACT, LLC**

**NOTES:**

**Summary of Work:**
Sheet pile driving commenced at 2:12 PM until 3:12 PM. An Instantel Blastmate III was used to record vibrations via a geophone placed on the ground over the 72 inch force main.

Four sheets were driven, and no exceedances were recorded. See attached plan for area of work and location of the seismograph. See attached Blastware reports for PPV at this location.

Trigger Level: 0.5 in/sec
Alert Level: 1.0 in/sec

# Vibration Monitoring Report

## Study Area 6 North

**Prepared by**
**Geocomp Engineering**

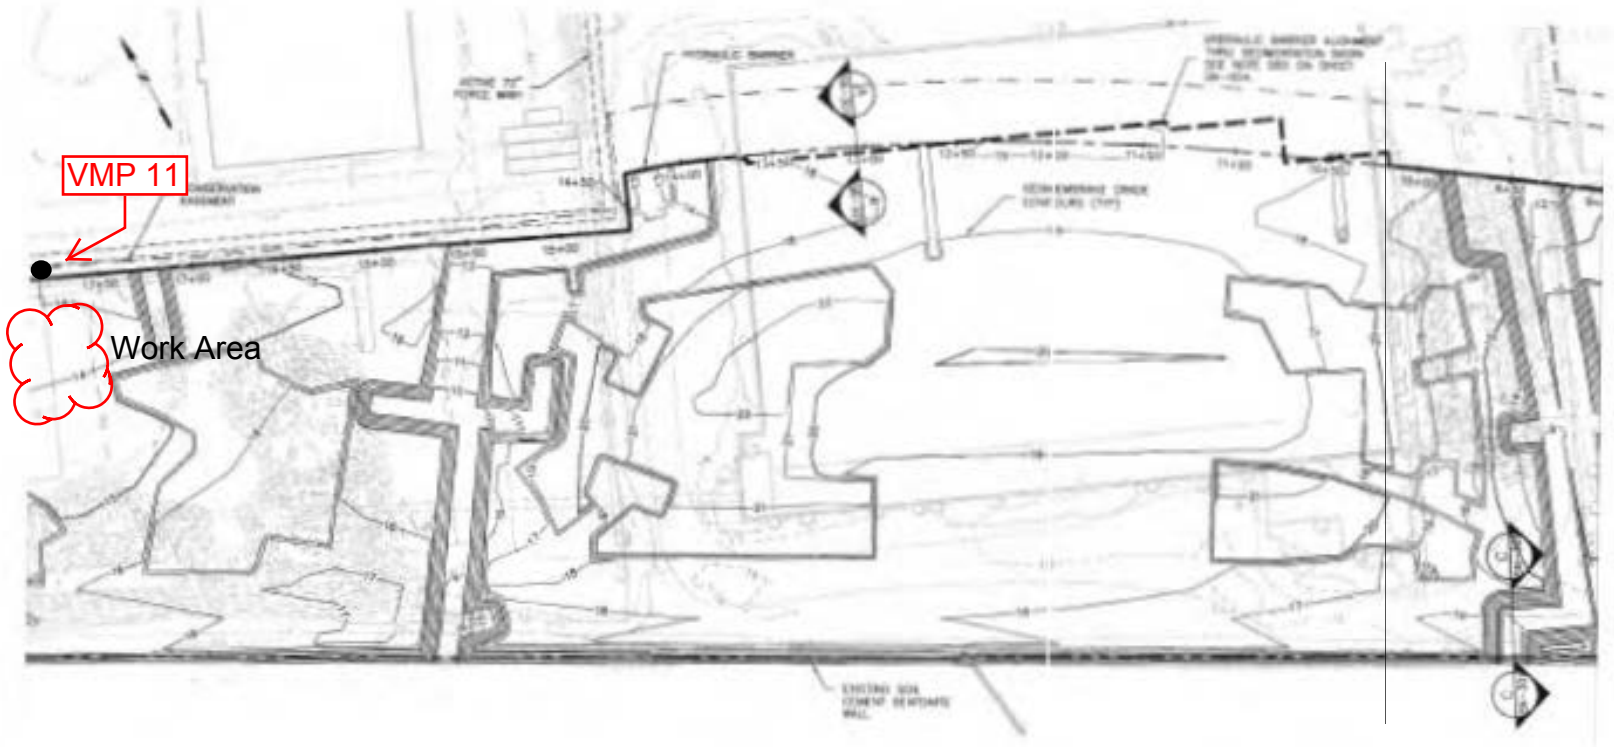
**March 10th, 2014**
**For ENTACT, LLC**



**NOTES:**

**Summary of Work:**
Sheet pile driving commenced at 11:30 AM and ended at 5:05 PM. An Instantel Blastmate III was used to record vibrations via a geophone placed on the ground over the 72 inch force main.

30 sheets were driven, and no exceedances were recorded. See attached plan for area of work and location of the seismograph. See attached Blastware reports for PPV at this location.

Novartis Soil Pile
SESCP SCD: EEPSQUO2YB
PERMIT CLOSED

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | Sediment controls in a catch basin to the north of the original guard shack require maintenance/replacement. |
| 2 | IA2Q4A1AL8 | The hose which supplies the shower trailer is leaking and requires repair |
| 3 | IA2Q4A1AL8 | Silt fence along the north side of the N-1 surcharge pile is not properly installed. |
| 4 | IA2Q4A1AL8 | The surcharge material haul road along the northern perimeter of Study Area 7 has excessive sediment/soil material on it's surface and requires cleaning/maintenance. |
| 5 | IA2Q4A1AL8 | Fencing is needed at the southeast corner of the N-1 surcharge pile. The grade change due to surcharge material placement now allows access to the spill-over tank on the southern side of the sedimenation basin and fencing is required for safety. |

# PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used: All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3. SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler. All samples are iced in a cooler during transport to the lab.

## Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending May 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area; Update the list of monitoring wells to be abandoned / retained | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead | Submitted to all Parties on May 19, 2014. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-06**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from June 1 – June30, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

## B. SITE OPERATIONS

### 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | |
|---|---|---|---|---|
| | 06/08/14 | 06/15/14 | 06/22/14 | 06/29/14 |
| **Construction Management (AMEC)** | 9 | 13 | 13 | 12 |
| **Engineering (AMEC)** | 1 | 2 | 2 | 1 |
| **Air Monitoring (Emilcott)** | 1 | 1 | 1 | 1 |
| **Security (Securitas)** | 3 | 3 | 3 | 3 |
| **Entact/Subcontractors** | 44 | 42 | 37 | 37 |
| **Arecon/US Ecology Subcontractors** | 1 | 1 | 1 | 1 |
| **OSC (80 Kellogg Demolition)** | 0 | 0 | 0 | 0 |
| **ENR (SA-6N GWTP Utilities)** | 2 | 0 | 0 | 0 |
| **Siemens** | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 0 | 0 | 0 | 0 |
| **Other** | 0 | 0 | 1 | 2 |
| **TOTAL** | **62** | **63** | **59** | **58** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Collected June PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- On June 11, met with JCIA and JCRA representatives to discuss relocation schedule and finalization of the bid documents for the Above-grade Demolition of the designated JCIA Structures.
- On June 30, excavation contractor encountered a previously unknown underground storage tank while excavating in Cell 114. The site designated LSRP was notified and is responsible for registering and closing the UST in accordance with NJDEP requirements as part of the non-chromium remedial action being conducted concurrently.

## C. SA-6 N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on May 13, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 06/08/14 | 06/15/14 | 06/22/14 | 06/29/14 |
| Avg. Gallons Treated & Discharged (per day) | 76,998 | 80,687 | 78,742 | 79,710 |
| Average Flow (gpm) for Operating Period | 53 | 56 | 54 | 55 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 |
| GWTP InfluentTanks (gal.) | 9,410 | 13,658 | 13,987 | 11,625 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in cells 127B – 116B, 124A – 114A.
- Continued storm-water management activities.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 32 | 21.7 | 693.60 |
| **Entact/ Montecalvo** | Tri-axle Dump | Bayshore Recycling | NA | Non Haz Petroleum Soil | 105 | 25.7 | 2703.22 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 127B – 116B, 124A – 114A |
| **Excavation Completed** | Cell Number(s) 128B – 118B, 125A – 115A<br>Volume Excavated - Total for Reporting Period: 15,127 CY/ Total to Date: 77,746 CY |
| **Backfill in Progress** | Cell Number(s) 152A-114A, 146B-128B |

### 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | |
|---|---|---|---|---|
| | 06/08/14 | 06/15/14 | 06/22/14 | 06/29/14 |
| <20ppm re-use, CY | 1,779 | 968 | 1,037 | 1,531 |
| Weldon, Import-Tons | 0 | 4,603 | 811.11 | 2,125.7 |
| Tilcon, Import-Tons DGA | 1,260 | 359 | 0 | 0 |
| Tilcon, Import Tons – 1.5" Stone | 379.7 | 0 | 0 | 0 |
| Weldon, Imported Tons - QP | 0 | 250.34 | 1,367.7 | 3,290 |
| Celgene - Loads | 0 | 0 | 0 | 240 |
| Tilcon, Imported Tons – 2.5" Stone | 0 | 0 | 0 | 51.13 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Instrumentation Installation ~95% complete. The settlement platforms over the perimeter pool remain to be installed. They will be installed prior to construction of the slope. Surcharge initiated June 16th.
- Area 2S: Instrumentation Installation ~95% complete. The settlement platforms over the perimeter pool remain to be installed. They will be installed prior to construction of the slope.
- Area 3S: Instrumentation Installation 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Instrumentation Installation ~100% complete. Continued placement of surcharge material initiated on April 8, 2014. As of June 27th, ~95% of surcharge has been placed. The results of the monitoring provided in Surcharge Monitoring Report #3 to be submitted under separate cover. Surcharge placement was stopped due to detected movements and V1-4. Amec has been in regular communication with PVSC regarding these readings.
- Area 2N: Instrumentation Installation ~85% complete. Initial surcharge instrument data to be submitted under separate cover.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Two single sheets driven on the hydraulic barrier wall at Sta 12+68 for the Closure Piece 1, SA-6 South.

## PERMIT STATUS

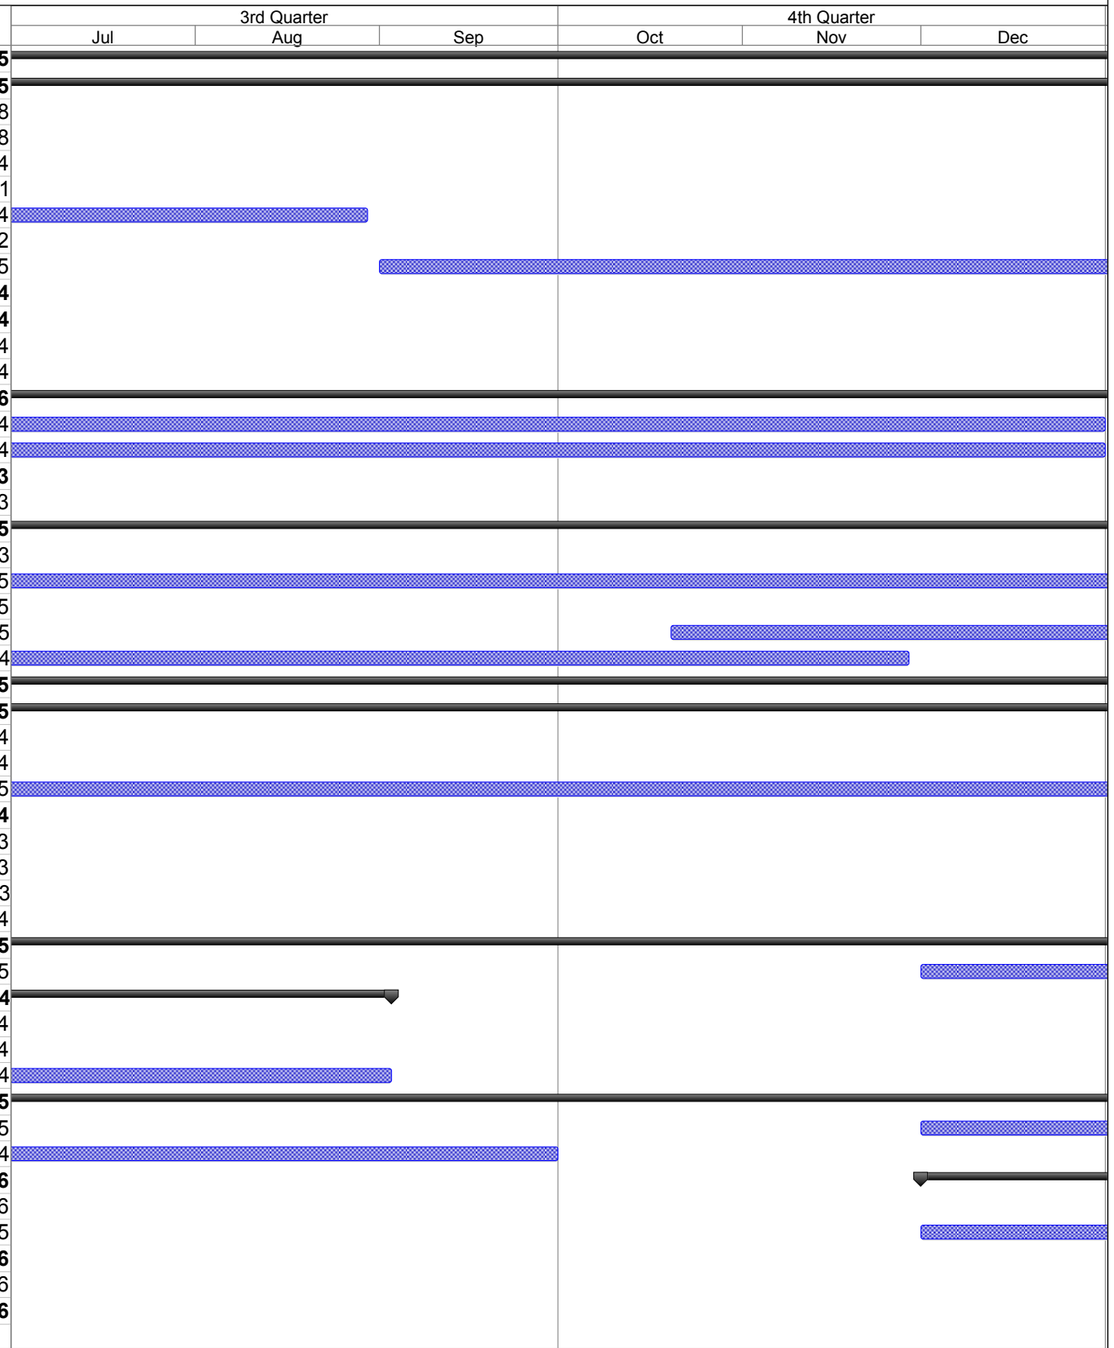
| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP Waterfront Development | SA-6 North Only | Obtained 6/23/2010 | Not Specified, Est. 3/31/2015 | 6/23/2015 | - |
| NJDEP CAFRA/FHA | SA-6 South Only | Obtained 9/26/2012 | Renewal Not Needed | 9/25/2017 | 10/09/2012 |
| HEPSCD SESCP | Novartis Soil Pile/SA-7 | Obtained 8/21/2012 | Renewal Not Needed | 2/21/2016 | - |
| NJDEP RFA | Novartis Soil Pile/SA-7 | Obtained 9/7/2012 | Renewal Not Needed | Not Specified | - |
| PVSC SUP No. 31630019 | SA-6 Chromium Remedy | Obtained 3/26/2014 Final Revision 5/23/14 | Renewal Not Needed | 8/31/2018 | 04/19/2014 |
| SESCP | SA-6 Chromium Remedy | Obtained 5/16/2013 | Renewal Not Needed | 11/16/2016 | - |
| RFA | SA-6 Chromium Remedy | Obtained 5/29/2013 | Not Specified | Not Specified | - |
| NJDEP - Water Allocation | SA-6 Chromium Remedy | Obtained 6/19/2013 | Renewal Not Needed | 5/31/2018 | - |
| NJDEP – Treatment Works Approval | SA-6 Chromium Remedy | Obtained 7/8/2013 | Not Specified, Est. 3/31/2015 | 7/7/2015 | - |
| NJDOT - Highway Occupancy Permit | SA-6 Chromium Remedy | Obtained 9/11/2013 | Not Specified, Est. 6/11/2014 | 9/11/2014 | - |
| NJDEP CAFRA/WFD/FHA GWTP Force Mains | GWTP | Obtained 4/22/2008 | Renewal Not Needed | 4/22/2013 | - |
| HEPSCD SESCP | GWTP | Obtained 8/27/2012 | Renewal Not Needed | 2/27/2016 | - |
| NJDEP CAFRA/WFD/FHA | GWTP | Obtained 11/16/2012 | Renewal Not Needed | 6/23/2015 | - |
| NJDEP Treatment Works Approval | GWTP | Obtained 4/11/2013 | Renewal Not Needed | 4/10/2015 | 4/23/2013 |
| NJDEP Air Pollution Control Preconstruction Permit | Existing GWTP | Obtained 9/24/2013 | Not Specified, Est. 3/31/2014 | 6/23/2014 | 11/20/2013 |
| PVSC SUP No. 31630016 | New GWTP | Obtained 10/1/2013 | 6/30/2018 | 9/30/2018 | 10/29/2013 |
| PVSC SUP No. 31630005 | Existing GWTP/SA-7 | Obtained 1/1/2014 | Renewal Not Needed | 12/31/2018 | - |
| NJDEP Discharge to Groundwater (DGW) for In-Situ Treatment of Chromium Impacted Soils | SA-6 North Only | Obtained 4/30/2012 | Not Specified | Not Specified | 5/10/2012 |

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP DGW for In-Situ Treatment of Chromium Impacted Soils | SA-6 South Only | Obtained 1/3/2013 | Not Specified | Not Specified | - |
| NJPDES Permit | SA-7 | Renewed: Effective 12/01/2012 | Renewal Not Needed | 6/30/2015 | 1/11/2013 |
| Subchapter 8 Air Permit Application for the Waste Water Treatment Plant | SA-7 | Issued: 06/24/2009 | Renewal Not Needed | 6/23/2014 | 7/15/2009 |
| Individual Waterfront Development Permit and Water Quality Certificate for Sediment Remedy | SA-7 | Issued: 05/27/2011 Modified: 07/02/2012 | N/A | 5/26/2016 | 5/27/2011, 7/5/2012 |
| Tidelands Licenses for Sediment Remedy | SA-7 | Re-Issuance of Final Tidelands License is pending and will be effective 7/21/2013 | N/A | 7/21/2014 | 7/19/2012 |
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |

## G. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Initiate bidding process for the Above-grade Demolition of the four designated JCIA Structures.
- Complete placement of surcharge materials in SA-6N Area 1N.
- Continue placement of surcharge materials in SA-6S Area 1S.
- Begin placement of surcharge materials in SA-6N Area 2N.
- Continue installation of the contingent groundwater system on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 108 to 88.
- Continue stockpiling of presumed <20 mg/kg for additional sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Conduct S-3 Injection/Mass Removal Event No.15 in well 088-IW-01.
- Conduct quarterly LTMP groundwater level measurement round.

- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.



**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-5)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. Groundwater Quality Data Update *(provided on a quarterly basis)*
   - Summary of Groundwater Quality Data from GWET Wells
   - Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells
9. Surcharge Monitoring Update
   - Instrumentation Location Plan 1S
   - Instrumentation Location Plan 2N
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Pile Repair Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (May 2014)
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (May 2014)
13. SA-6 North & South Design Change Tracking Log

## Attachment 1: Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 | Fri 2/12/16 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 | Wed 12/30/15 |

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

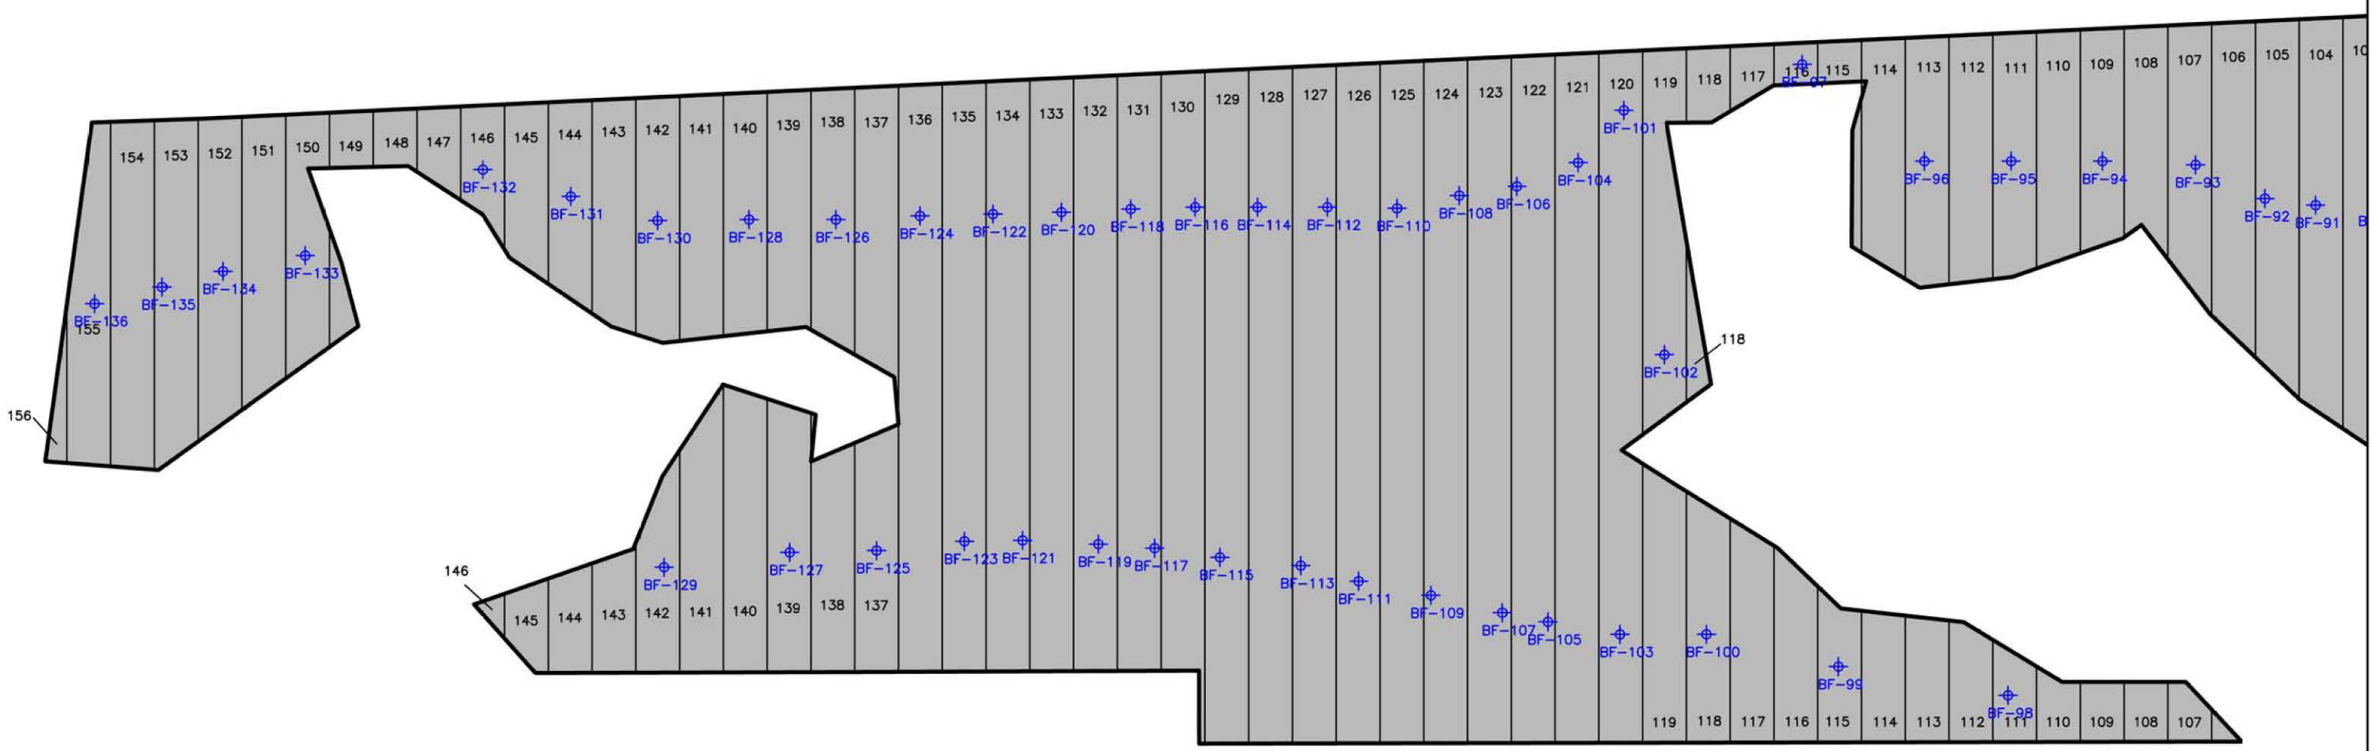
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b



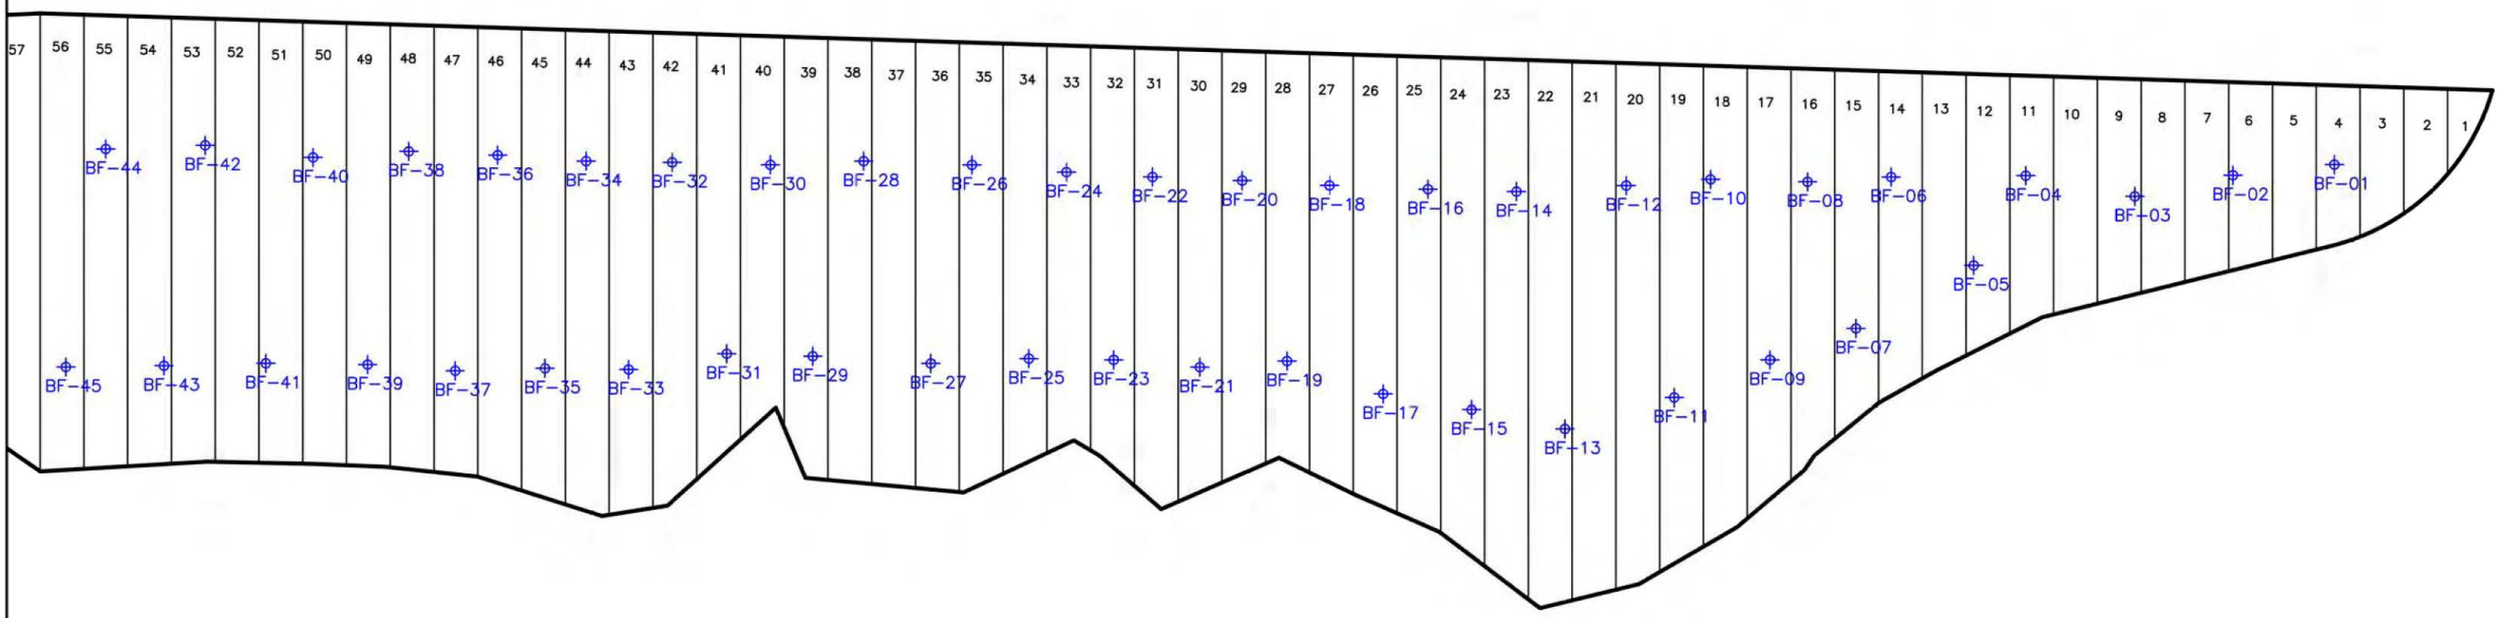
Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)

01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

ENTACT 302 Unity Plaza Latrobe, PA 15650

DRAWING NAME: BACKFILL COMPACTION LOCATIONS EVERY 2,500 SF BF-95 TO BF-136

PROJECT NAME & LOCATION: HONEYWELL SA-6 REMEDIATION JERSEY CITY, NJ

NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

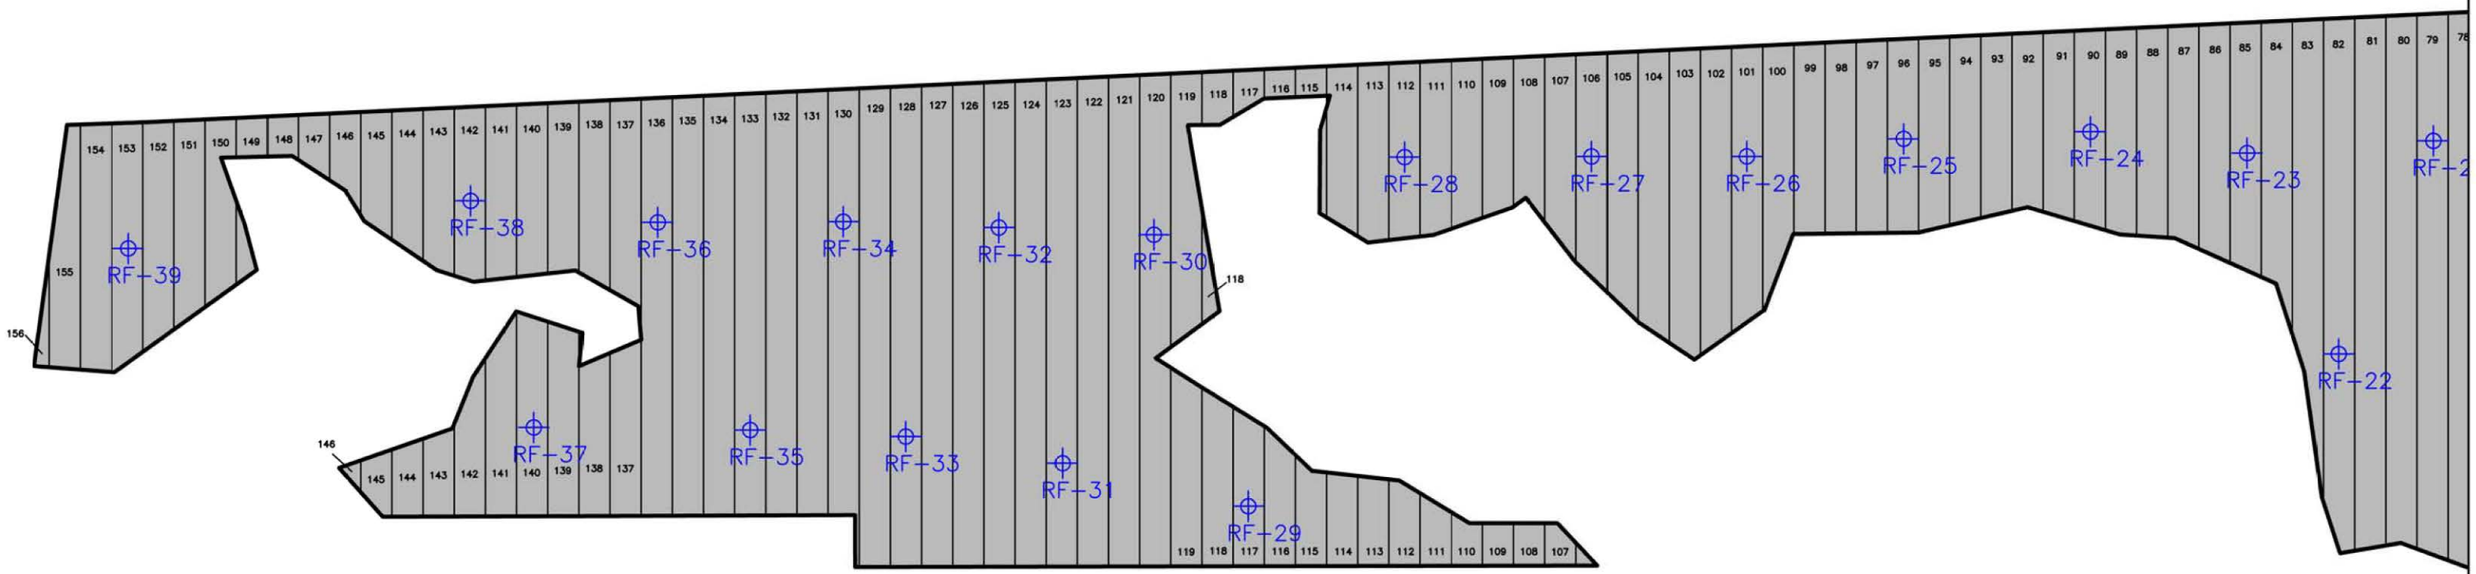
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

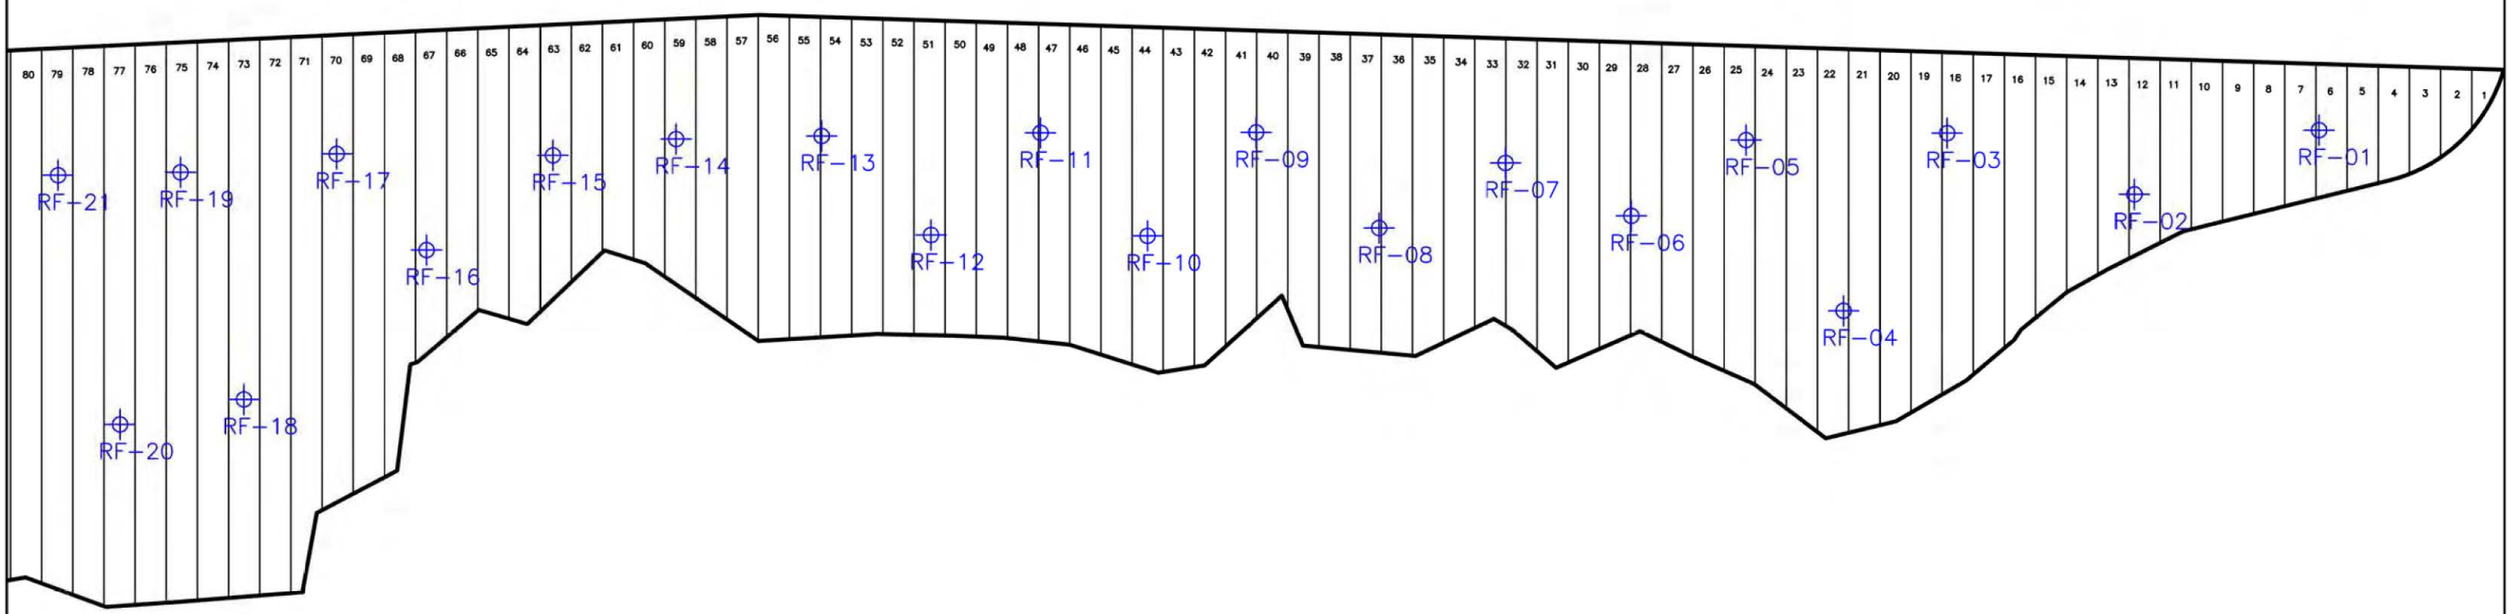
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

ENTACT 302 Unity Plaza Latrobe, PA 15650

Installed Insturment Locations

Insturment Locations Not Installed

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA-7 FENCE AND SA-7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. PILE GEOMETRY IS BASED ON THE ASSUMPTION THAT THE SEDIMENTATION BASIN WALLS ARE IN PLACE AT THE TIME OF SURCHARGING.
5. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
6. LOCATION OF SA-7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

ENTACT 302 Unity Plaza Latrobe, PA 15650

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15P-10

Entact ID:

Date Exposed: 5/21/14

Describe Damage: (6) Miner scrapes by the Cat 349E Excavator Bucket- Range from 1/2"Ø to 1"x3" (Cell 128)

Damage Location (ft below top of sheet, inboard side,outboard side): 7'-10' outboard side

Date Repaired: 6/2/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15P-11

Entact ID:

Date Exposed: 5/21/14

Describe Damage: (5) Miner scrapes by the Cat 349E Excavator Bucket- (Cell 128)

Damage Location (ft below top of sheet, inboard side outboard side): 7'-10' outboard side

Date Repaired: 6/2/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15P-12

Entact ID:

Date Exposed: 5/21/14

Describe Damage: (4) Scrapes by the Cat 349E Excavator bucket - (Cell 128)

Damage Location (ft below top of sheet, inboard side outboard side): 5'-10' outboard

Date Repaired: 6/2/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15P-13

Entact ID:

Date Exposed: 5/21/14

Describe Damage: (8) scrapes by the CAT349E Excavator Bucket - (Cell 128)

Damage Location (ft below top of sheet, inboard side outboard side): 6-10' outboard

Date Repaired: 6/2/14

Inspected by: Brian Shea

Describe Repair: Pressure Wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 15P-14

Entact ID:

Date Exposed: 5/23

Describe Damage:

(3) minor scrapes by the Cat 349E Excavator bucket - cell 127

Damage Location (ft below top of sheet, inboard side outboard side):

6'-10' outboard

Date Repaired: 6/2/14

Inspected by: Mike Senna

Describe Repair: pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: B Shea

Date: 6/5/14

*A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 15P-15

Entact ID:

Date Exposed: 5/23

Describe Damage:

(4) minor scrapes by the Cat 349E Excavator bucket - cell 127

Damage Location (ft below top of sheet, inboard side outboard side):

6'-10' outboard side

Date Repaired: 6/2/14

Inspected by: Mike Senna

Describe Repair: pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: B Shea

Date: 6/5/14

*A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 15P-16

Entact ID:

Date Exposed: 5/23

Describe Damage:

(4) minor scrapes by the Cat 349E Excavator Bucket - (Cell 127)

Damage Location (ft below top of sheet, inboard side outboard side):

7-10' outboard side

Date Repaired: 6/2/14

Inspected by: Mike Senna

Describe Repair: pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: B Shea

Date: 6/5/14

*A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 15P-17

Entact ID:

Date Exposed: 5/27/14

Describe Damage:

(3) Minor scrapes by the Cat 349E Excavator Bucket (Cell 126)

Damage Location (ft below top of sheet, inboard side outboard side):

6'-10' outboard

Date Repaired: 6/2/14

Inspected by: Mike Senna

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: B Shea

Date: 6/5/14

*A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 15 P-18

Entact ID:

Date Exposed: 5/27/14

Describe Damage: Scrapes by Cat 349E excavator bucket- 1"Ø, 1/2"Ø, 1/2"x4" - Cell 126

Damage Location (ft below top of sheet, inboard side outboard side): 8-10' outboard

Date Repaired: 6/3/14

Inspected by: Brian Shea

Describe Repair: pressure wash, wire brush, and apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

Date Exposed: 6/24/14

Describe Damage: (10) scrapes by the Cat 349E excavator bucket - 1x10", 1x6", 1"Ø, 1/2"Ø, 1"Ø, 1x2", 1/2x3", 5x36", 1x36" 1/2"Ø - Cell 116

Damage Location (ft below top of sheet, inboard side outboard side): 10/15' outboard

Date Repaired: 6/24/14

Inspected by: Brian Shea

Describe Repair: Prossure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/25/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P-3

Entact ID:

Date Exposed: 6/24/14

Describe Damage: (13) scrapes by the cat 349E excavator bucket- (7) 1/2"Ø, (4) 1"Ø, 1x8", 1/2x60", - Cell 116

Damage Location (ft below top of sheet, inboard side outboard side): 9-15' outboard

Date Repaired: 6/26/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/26/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P1-4

Entact ID:

Date Exposed: 6/24/14

Describe Damage: (8) scrapes by Cat 349E excavator bucket - 1/2"x6", 1/4x3", 1x12", 2x10", 1/2x3", 1/2"Ø, 1/2x8", 12"Ø, - Cell 116

Damage Location (ft below top of sheet, inboard side outboard side): 10-15 outboard

Date Repaired: 6/26/14

Inspected by: Brian Shea

Describe Repair: pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/26/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P1-5

Entact ID:

Date Exposed: 6/24/14

Describe Damage: (6) scrapes by the Cat 349E excavator bucket - 1x18", 1x30", 1/2x1", 1/2x4", 1/2x8", 12"Ø - cell 115

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 6/26/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 6/26/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

**Novartis Soil Pile**
SESCP SCD: EEPSQUO2YB
PERMIT CLOSED

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | Exclusion Zone signs on the orange fencing immediately west of the scale house are not needed and should be removed to avoid confusion. |
| 2 | IA2Q4A1AL8 | REPEAT: A cut-out in the 18" asphalt berm which is located on the western edge of the western SA-7 roadway requires silt protection. |
| 3 | IA2Q4A1AL8 | REPEAT: Silt fencing along the southern toe of the N-1 surcharge area requires maintenance. |
| 4 | IA2Q4A1AL8 | The truck entrance/exit to the Novartis stockpile containment area requires additional measures to prevent the tracking of material out onto Study Area 7. |
| 5 | IA2Q4A1AL8 | REPEAT: A small pile of backfill material located to the east of the SA-7 river bulkhead requires removal. The material was transported to this area during snow removal activities over the previous winter. |

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

# PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets):

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used:

All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3.

SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler.

All samples are iced in a cooler during transport to the lab.

## Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending June 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area; Update the list of monitoring wells to be abandoned / retained | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead | Submitted to all Parties on May 19, 2014. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-07**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from July 1 – July 31, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Collected July PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed S-3 Injection/Mass Removal Event #15 in well 088-IW-01.
- On July 29, met with JCIA and JCRA representatives to discuss demolition and relocation schedule. Conducted pre- bid meetings on July 8th and July 15th for the JCIA structures demolition project.
- On, July 2nd and July 3rd the excavation contractor encountered two additional unknown underground storage tanks while excavating in Cells 114 to 111. The site designated LSRP was notified and observed removal of the tanks and associated sampling. The LSRP is responsible for registering and closing the UST in accordance with NJDEP requirements as part of the non-chromium remedial action being conducted concurrently.

- Initiated In-Situ treatment activities on SA6 South. Site 163. A total of 10 temporary well points were installed during the reporting period.

## C. SA-6 N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on June 11, 2014.

### 1. WEEKLY SUMMARY

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in cells 113A-103A, 115B – 106B.
- Continued storm-water management activities.
- Completed UST removal activities. A total of 3 UST were removed and staged on site for registration and disposal.
- Collected an additional soil bottom of excavation sample for hexavalent chromium analysis from the UST area (beneath the second UST). Laboratory data confirmed that the result is less than 20 mg/kg (2.1 mg/kg).
- Collected two additional sidewall soil samples for hexavalent chromium analysis from a visually suspect area along Cell 149. One of the samples was less than 20 mg/kg (4.7 mg/kg); however the second location was greater than 20 mg/kg (42.3 mg/kg) and resulted in minor additional material excavation up to 4 feet below grade. A subsequent sidewall sample was collected and data indicated that the less that 20 mg/kg was met (7.9 mg/kg).
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 0 | 0 | 0 |
| **Entact/ Montecalvo** | Tri-axle Dump | Bayshore Recycling | NA | Non Haz Petroleum Soil | 0 | 0 | 0 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 113A-103A, 115B – 106B |
| **Excavation Completed** | Cell Number(s) 114A-105A, 117B – 106B<br>Volume Excavated - Total for Reporting Period: 11,199 CY/ Total to Date: 88,945 CY |
| **Backfill in Progress** | Cell Number(s) 146B – 106B, 152A – 105A |

### 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | |
|---|---|---|---|---|
| | 07/06/14 | 07/13/14 | 07/20/14 | 07/27/14 |
| <20ppm re-use, CY | 0 | 0 | 1,373 | 675 |
| Weldon, Import-Tons Screenings | 3,337 | 2,771 | 3,790 | 5,915 |
| Tilcon, Import-Tons DGA | 0 | 0 | 306 | 932 |
| Tilcon, Import Tons – 1.5” Stone | 308 | 759 | 30 | 0 |
| Weldon, Imported Tons - QP | 814 | 1,646 | 223 | 1,125 |
| Celgene - Loads | 611 | 946 | 802 | 777 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 0 | 0 | 0 |

## E. SURCHARGE OPERATIONS *(see **Attachment 9**)*

- Area 1S: Surcharge subgrade placement continued though the month using soils with hexavalent chromium impacted soils.
- Area 2S: Surcharging continued from 1S into the western portion of 2 S. Settlement Platforms have been placed along the perimeter pools.
- Area 3S: Instrumentation installation is 100% complete as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles in area. No Surcharge initiated.
- Area 1N: Surcharge material placement was completed to the design grade in the southeast quadrant the first week in July. Additional surcharge was placed on the north slope near HS-4 to bring that area to the surcharge design grade the during the week ending August 1st. Results

indicate that surcharge is now complete in Area 1N and fill materials are ready for removal by contractor. Details to be provided in the next Surcharge Monitoring Report.

- Area 2N: Instrumentation Installation 100 % complete. Initial surcharge instrument data to be submitted under separate cover.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- One single sheet driven on the hydraulic barrier wall at Sta 13+30 for the Closure Piece 2, SA-6S. This completes he hydraulic barrier wall installation on SA-6S.

## PERMIT STATUS

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP Waterfront Development | SA-6 North Only | Obtained 6/23/2010 | Not Specified, Est. 3/31/2015 | 6/23/2015 | - |

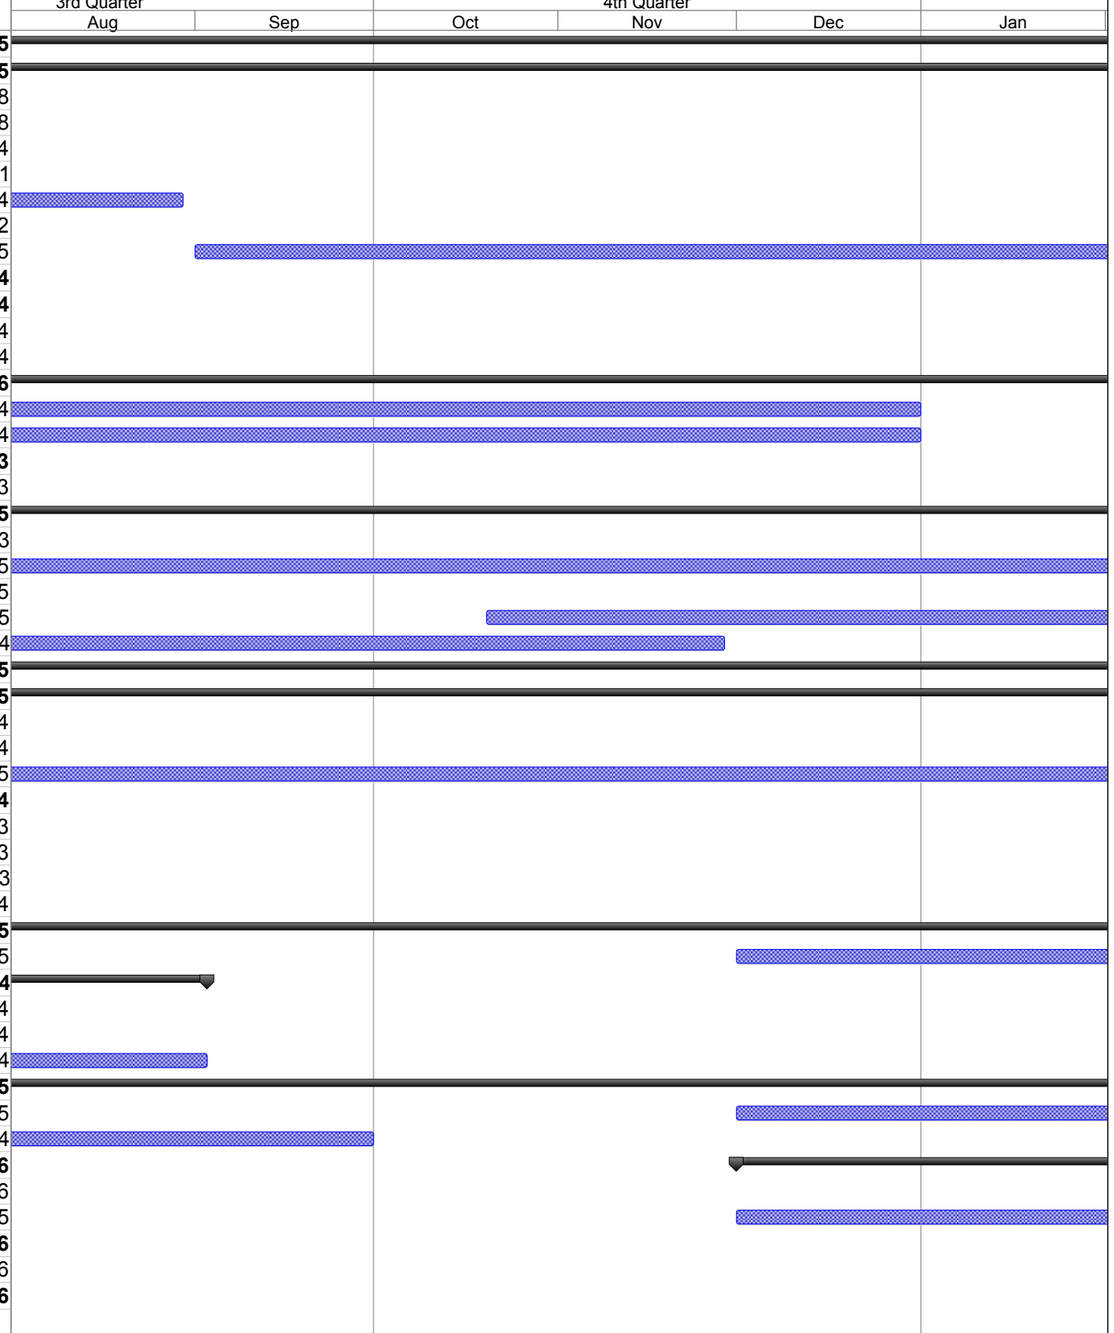
## G. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Finalize bidding process for the Above-grade Demolition of the four designated JCIA Structures. Bid opening scheduled for August 13, 2014.
- Complete In-Situ treatment activities at Site 163.
- Continue placement of surcharge materials in SA-6S Area 1S.

- Begin placement of surcharge materials in SA-6N Area 2N.
- Continue installation of the contingent groundwater system on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 103 to 70.
- Continue stockpiling of presumed <20 mg/kg for additional sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Continue surcharge monitoring instrument installation activities on SA-6N and SA-6S.
- Conduct S-3 Injection/Mass Removal Event No.16 in well 088-IW-03.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.

**ATTACHMENTS:**



1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-4)
   - SA-6 South Deep Well Data (DW-5)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. Groundwater Quality Data Surcharge Monitoring Update *(provided on a quarterly basis - not available as of this report date)*
   - Summary of Groundwater Quality Data from GWET Wells
   - Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells
9. Surcharge Monitoring Update
   - Instrumentation Location Plan 1S
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Pile Repair Log
11. Weekly SWPPP Reports

12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (June 2014)
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (June 2014)
13. SA-6 North & South Design Change Tracking Log

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |

| SA-6 South Excavation: Confirmatory Points (Table 1.5) | | | | | | | |
|---|---|---|---|---|---|---|---|
| Bottom Target Coordinates (based on PDI) | | | | | As-built Elevations | | |
| Northing | Easting | Elevation 1 | Sample ID | Corresponding Cell # | Date Obtained | Elevation | Comments |
| 684928.5 | 601848.2 | 4.1 | 134-SB-154R | 106B | 7/17/2014 | 3.8 | Target Elevation Reached |
| | | | | | | | |
| | | | | | | | |

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

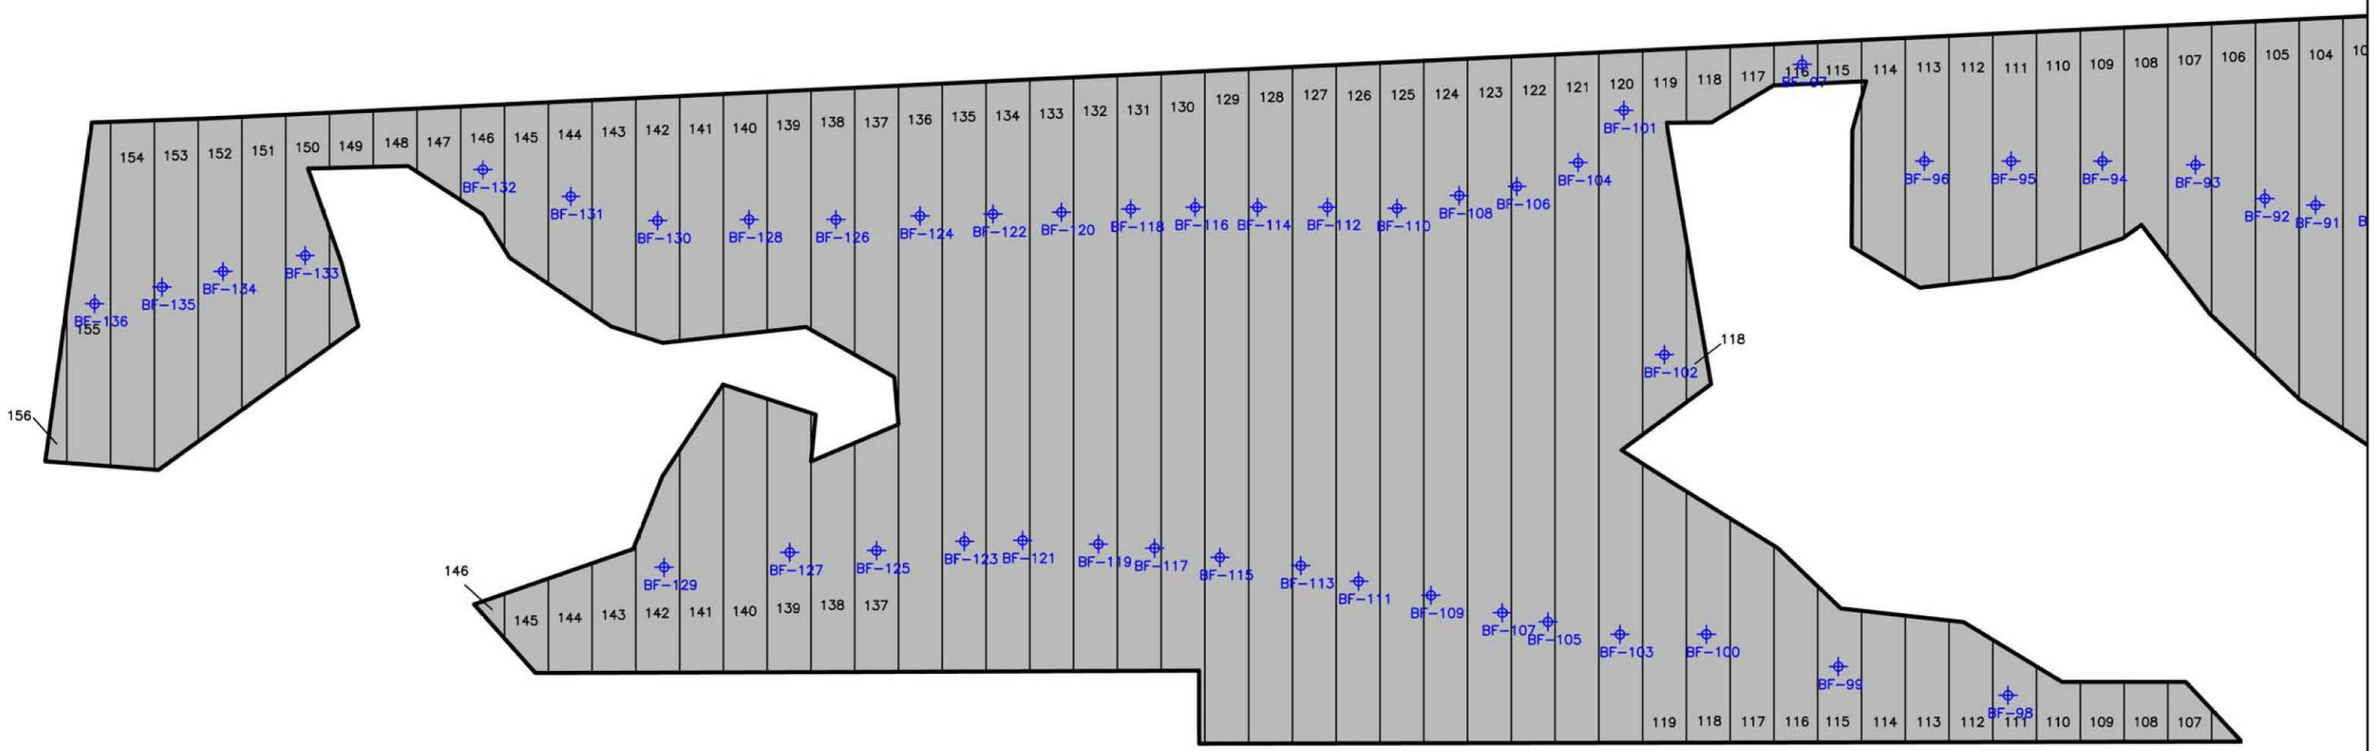
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



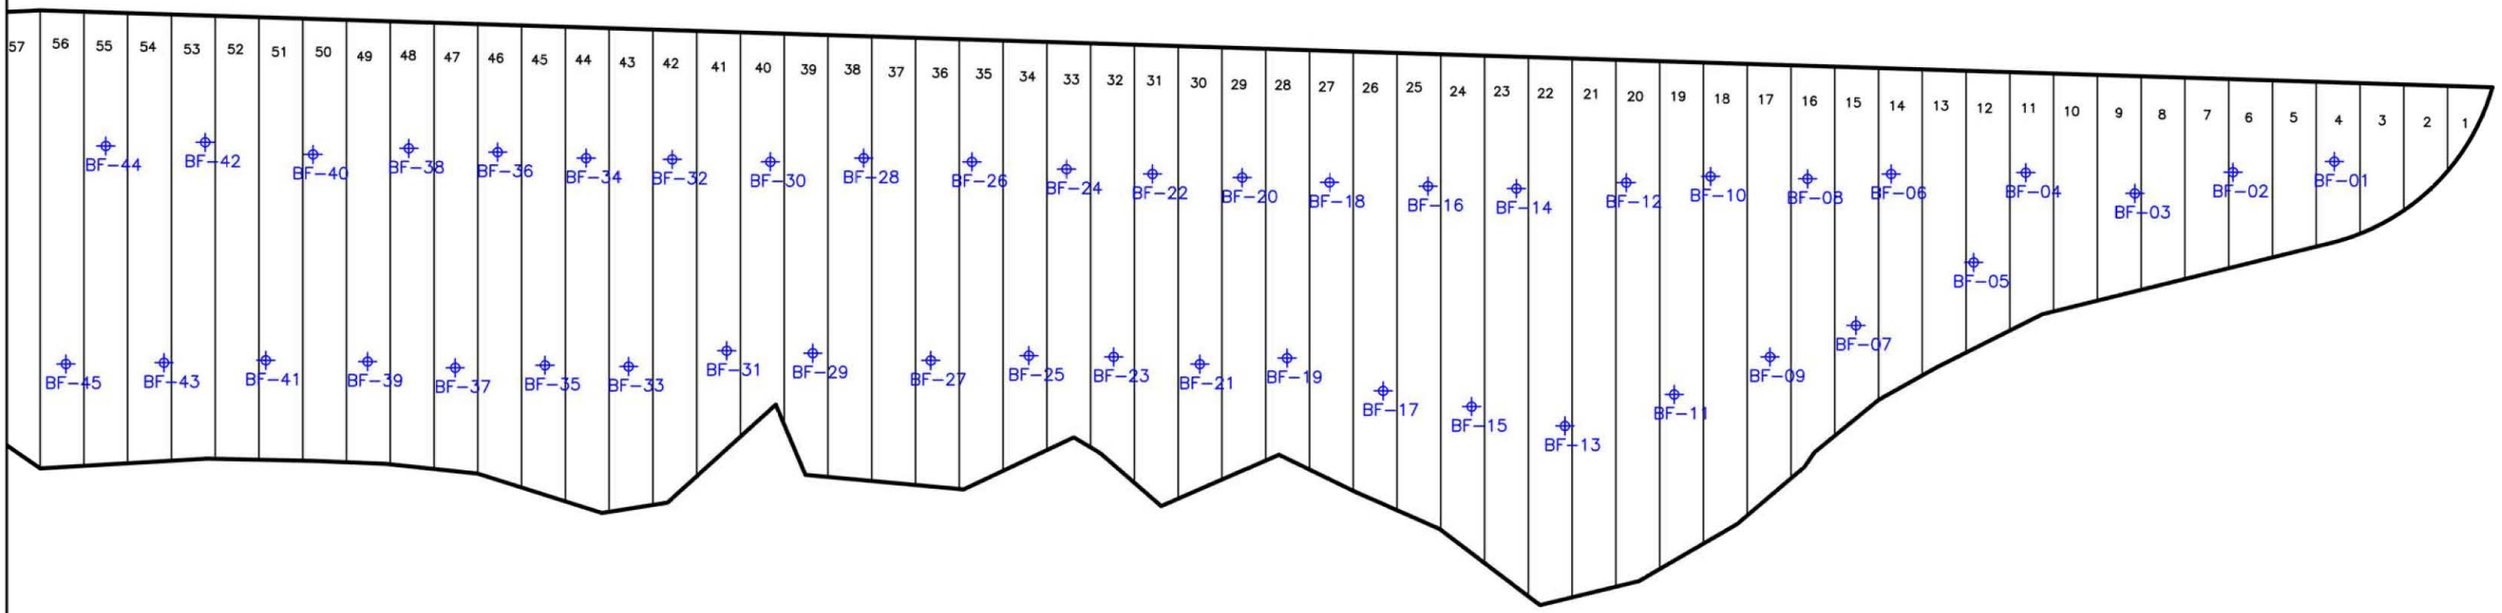
Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

ENTACT 302 Unity Plaza Latrobe, PA 15650

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

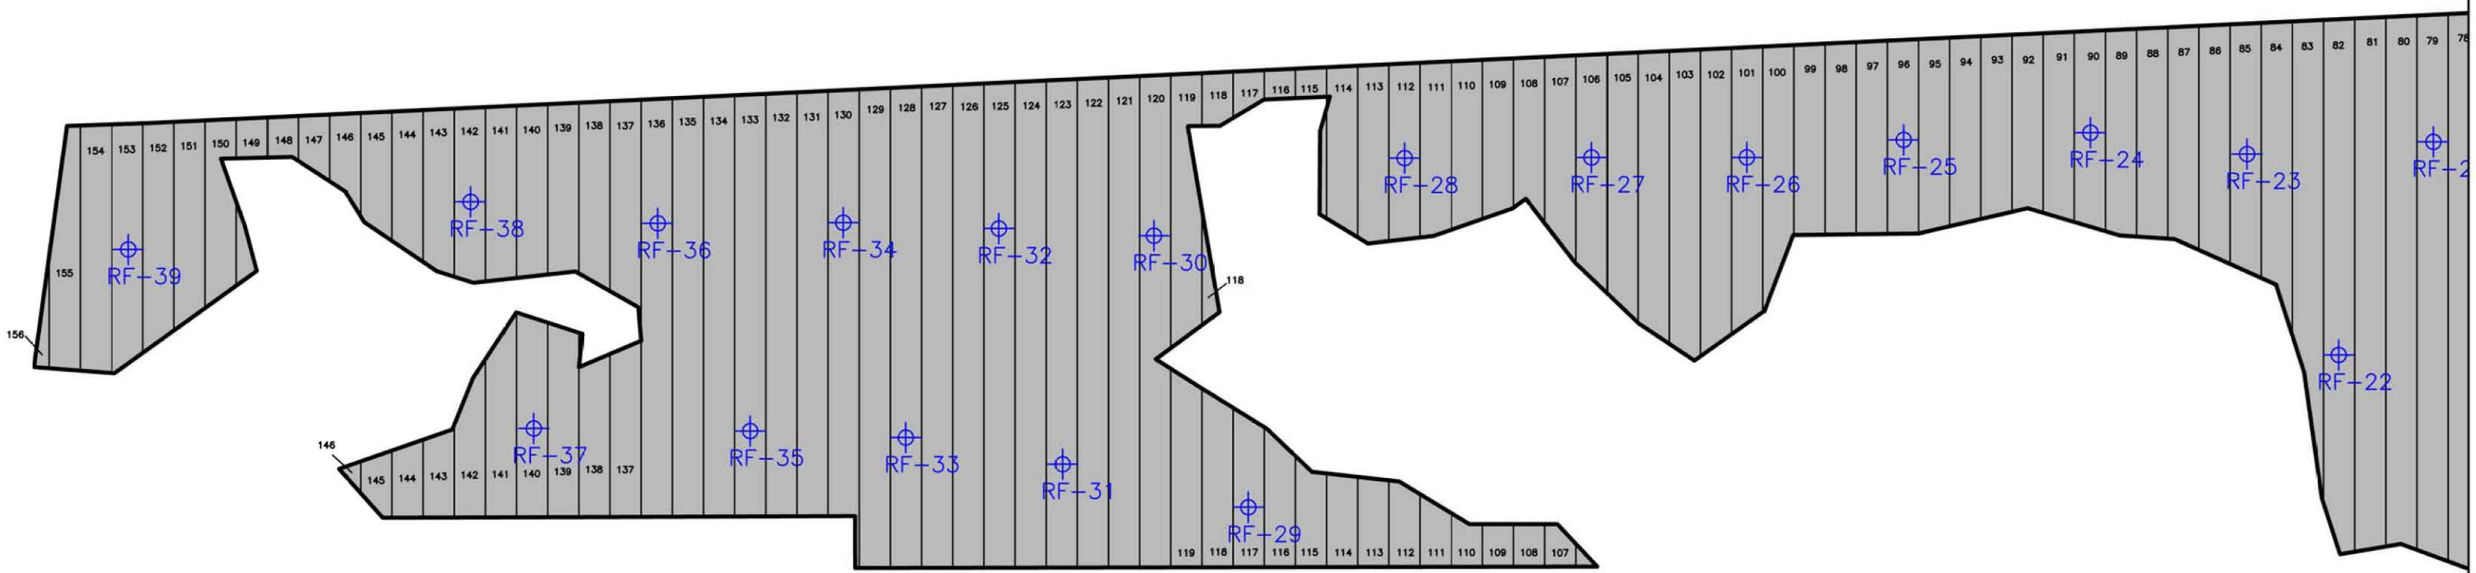
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

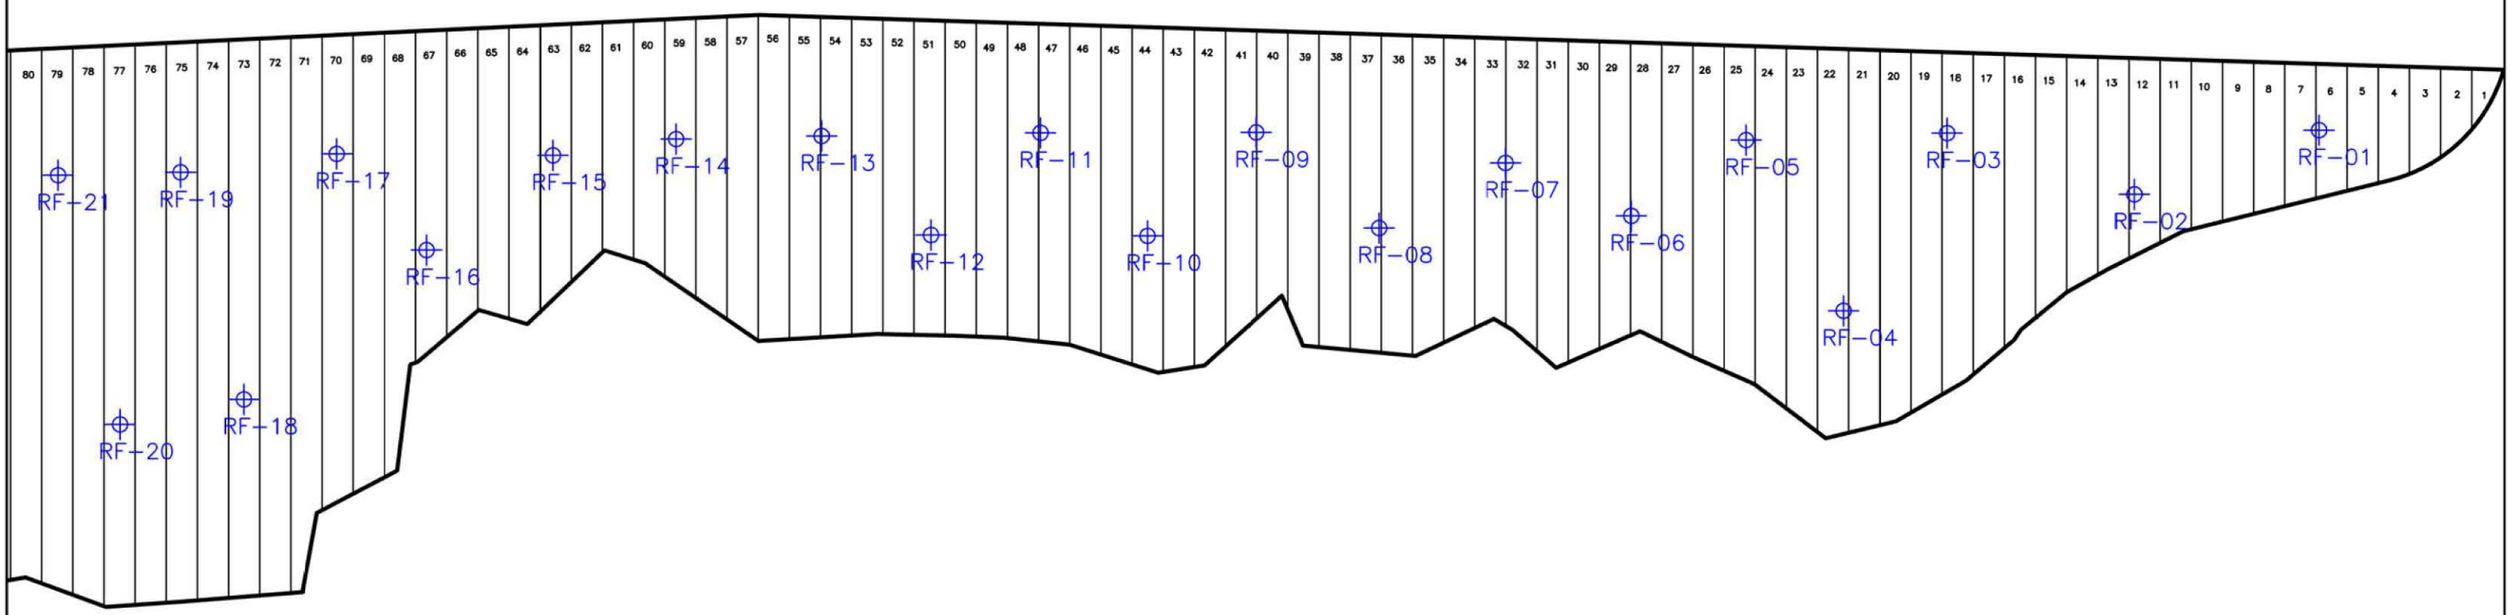
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

ENTACT 302 Unity Plaza Latrobe, PA 15650

| SP–3 | 685276.93 | 602033.96 |

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA–7 FENCE AND SA–7 FLOODLIGHTS.
2. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
3. COMMENCE FILL AT THE HACKENSACK RIVER AND WORK EAST TOWARD ROUTE 440.
4. LOCATION OF SA–7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.
5. AFTER COMPLETION OF AREAS 1 AND 3 SURCHARGE LOADING, REMAINING FILL FROM THESE AREAS WILL BE COMBINED TO FORM THE SURCHARGE AREA 2.

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.

NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 17P1-8

Entact ID:

Date Exposed: 6/27/14

Describe Damage:
(7) scrapes by Cat 349E excavator bucket - 1/2x4", 1/2"Ø, 1/2x8", 1"Ø, 1x3", 1/2x5", 1/4"x2" - (Cell 114)

Damage Location (ft below top of sheet, inboard side outboard side):
9-15' outboard

Date Repaired: 7/2/14

Inspected by: Brian Shea

Describe Repair: Pressure washed, wire brushed, epoxy applied w/ 4" Paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/2/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 17P1-9

Entact ID:

Date Exposed: 6/27/14

Describe Damage:
(28) Scrapes by cat 349E excavator bucket - 1"x14", 1/2x10", 1"x24", 2-1"Ø, 1/2x10", 3"Ø, 2"x6", 1/4x1", 5x14", 1"x6", 1x8", 1x3", 15-1"Ø - Cell 114

Damage Location (ft below top of sheet, inboard side outboard side):
9-16' outboard

Date Repaired: 7/2/14

Inspected by: Brian Shea

Describe Repair: pressure wash, wire brush, epoxy applied w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/2/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 17P1-10

Entact ID:

Date Exposed: 6/27/14

Describe Damage:
(2) scrapes by the Cat 349E excavator bucket - 2"Ø, 2x4" (Cell 114)

Damage Location (ft below top of sheet, inboard side outboard side):
11-13' outboard

Date Repaired: 7/2/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/2/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 17P1-11

Entact ID:

Date Exposed: 6/27/14

Describe Damage:
(1) scrape by the Cat 349E excavator bucket - Cell 113 - 84" scrape

Note: Sheet is covered w/ hardened grout from elv. 10.0' to the BOE.

Damage Location (ft below top of sheet, inboard side outboard side):
9'-16' outboard

Date Repaired: 7/2/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/2/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-1

Entact ID:

Date Exposed: 6/27/14

Describe Damage: (4) scrapes by Cat 349E excavator bucket - 1x30", 1/2x6", 2"Ø, 1/2x10" (Cell 113)

Note: Sheet is covered w/ hardened grout from elv. 8.0' to the BoE.

Damage Location (ft below top of sheet, inboard side outboard side): 10'-7' outboard

Date Repaired: 7/2/14

Inspected by: Brian Shea

Describe Repair: pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/2/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-3

Entact ID:

Date Exposed: 7/2/14

Describe Damage: (3) Scrapes by the Cat 349E excavator - 1x48", 1"Ø, 1x6". Cell 113/112.

Note: Sheet is covered w/ hardened grout from elv. 5.0' - 0.0'.

Damage Location (ft below top of sheet, inboard side outboard side): 7'-15' outboard

Date Repaired: 7/7/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/7/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-4

Entact ID:

Date Exposed: 7/2/14

Describe Damage: (8) scrapes by the Cat 349E excavator bucket - 2"Ø, 1x3", 1"Ø, 1/2"Ø, 1x12", (2) 1/2x3", 2x4". Cell 112.

Note: Sheet is covered w/ hardened grout from elv. 8.0' to elv. 0.0 (BoE).

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 7/7/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/7/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-5

Entact ID:

Date Exposed: 7/2/14

Describe Damage: (6) scrapes by the Cat 349E Excavator bucket - 3"Ø, 1"x18", 1"Ø, 1/2"x10", 1"Ø, 1x4". Cell 112.

Note: Sheet is covered w/ hardened grout from elv. 8.0 to the BoE.

Damage Location (ft below top of sheet, inboard side outboard side): 10-13' outboard

Date Repaired: 7/7/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/9/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 17P2-6

Entact ID:

Date Exposed: 7/2/14

Describe Damage: (10) scrapes by the cat 349E excavator bucket - (4) 1"Ø, 1x6", (3) 1/2"Ø, 1/2x14", 2"Ø. Cell 112. Note: Sheet covered by hardened grout from elv. 6.0' to the BOE.

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 7/9/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure AMEC Signature: BShea

Date: 7/9/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 17P2-7

Entact ID:

Date Exposed: 7/7/14

Describe Damage: (12) scrapes by the Cat 349E excavator bucket - (6) 1/2"Ø, 1/2"x12", 1x3", (2) 1"Ø, 1x2", 4"Ø - Cell 111. Note: Sheet is covered by hardened grout from elv. 5.0' to 1.0'.

Damage Location (ft below top of sheet, inboard side outboard side): 11-15' outboard

Date Repaired: 7/9/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/9/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 17P2-8

Entact ID:

Date Exposed: 7/7/14

Describe Damage: (9) scrapes by the cat 349E excavator bucket - 1/2"x6", 1"Ø, 2"Ø, 1/2x4", 1"x3", (4) 1/2"Ø, Cell 111. Note: Sheet is covered by hardened grout from elv. 5.0' to 1.0'.

Damage Location (ft below top of sheet, inboard side outboard side): 11-15' outboard

Date Repaired: 7/9/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure AMEC Signature: BShea

Date: 7/9/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

Date Exposed: 7/9/14
Describe Damage: (4) Scrapes by the Cat 349E excavator bucket- 1"ø, 2×6", 1/2×12", 2"ø- cell 110

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 7/10/14
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush
Repair Log Closure: AMEC Signature: B.Shea
Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-11
Entact ID:
Date Exposed: 7/9/14
Describe Damage: (20) Scrapes by the Cat 349E excavator bucket- 1×18", 1/4×2", 1×6", 1/2"ø, 1/2×36", 1/2×8", 1/4×3", 1"ø, 2×10", 3×12", 4×8", 3×12", 1"ø, (4) 1"ø, 1/2×3", 2"ø, 1/4×1"- Cell 110

Damage Location (ft below top of sheet, inboard side outboard side): 9-13' outboard

Date Repaired: 7/10/14
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush
Repair Log Closure: AMEC Signature: B.Shea
Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-12
Entact ID:
Date Exposed: 7/9/14
Describe Damage: (11) Scrapes by the Cat 349E excavator bucket- 1/4"ø, 1"ø, 3×6", 3×8", 1×4", 2×10", 1/2×24", 1/2×3", 1"ø, 2×8", 1/2×10"- cell 110

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 7/10/14
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush
Repair Log Closure: AMEC Signature: B.Shea
Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-13
Entact ID:
Date Exposed: 7/9/14
Describe Damage: (15) scrapes by the Cat 349E excavator bucket- 1"ø, 1×6", 1×3", 1/2"ø, 1×5", 8"×18", 2×6", 1"×18", 1/2"ø, 1"ø, 1/2×3", 2"ø, 1/2"ø, 2×36", 3"ø- Cell 110/109.

Damage Location (ft below top of sheet, inboard side outboard side): 9-15' outboard

Date Repaired: 7/10/14
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush
Repair Log Closure: AMEC Signature: B.Shea
Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-14

Entact ID:

Date Exposed: 7/9/14

Describe Damage: (5) scrapes by the Cat 349E excavator bucket - (3) 1"ø, 1x2", 1/2"ø, Cell 109

Damage Location (ft below top of sheet, inboard side outboard side): 11-15' outboard

Date Repaired: 7/10/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 17P2-15

Entact ID:

Date Exposed: 7/9/14

Describe Damage: (14) scrapes by the Cat 349E excavator bucket - 1/2x4, 1/2S, 1"ø, 1/2x2", (4) 1/2"ø, 3x24", 1x12", 2x18", 1/4x3", 2x6", 1"ø. cell 109

Damage Location (ft below top of sheet, inboard side outboard side): 5-12' outboard

Date Repaired: 7/10/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4' paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/10/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 18P-1

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (5) scrapes by the Cat 349E excavator bucket - 1"x6", 1"ø, 1x8", 2"ø, 4"ø. Cell 109/108

Note: Sheet is covered w/ hardened epoxy from Elv 6.0' to 1.5'

Damage Location (ft below top of sheet, inboard side outboard side): 6'-12' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 18P-2

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (12) scrapes by the Cat 349E excavator - 1/2x4", 1"ø, 2x4", 3"ø, 1x3", 1"ø, 3"ø, 1x4", 1/2x6", 1"ø, 1/2x3", 2x10", Cell 108

N

Damage Location (ft below top of sheet, inboard side outboard side): 6-12' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4' paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-3

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (8) scrapes by the Cat 349E excavator bucket - 1/2x12", 2"ø, 1"x6", 2x8", 1/2x6", 3x10", 1x14", 1"x18". Cell 108

Damage Location (ft below top of sheet, inboard side outboard side): 6-12' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date:

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-4

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (7) scrapes by the Cat 349E excavator bucket - 1x6", 3"ø, 1/2x8", 1"ø, 1"ø, 1x3", 1/2x12". Cell 108

Damage Location (ft below top of sheet, inboard side outboard side): 8-17' outboard

Date Repaired: 7/18/18

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-5

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (11) scrapes by the Cat 349E excavator bucket - 1/2 x 24", 1x2", 2"ø, 1/2x4", 1"ø, 1"ø, 2x4", 1/2x 2, 1/2"ø, 1x5", 1"ø. Cell 108

Damage Location (ft below top of sheet, inboard side outboard side): 8-16' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-6

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (5) scrapes by the Cat 349E excavator bucket - 1/2x18", 1"ø, 1x3", 1/2x6", 1x3" cell 107

Damage Location (ft below top of sheet, inboard side outboard side): 8-16' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 18P-7

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (4) Scrapes by the Cat 349E excavator bucket - 1"x6", 1"Ø, 1/2"Ø, 1/2x3", 1x3", Cell 107

Damage Location (ft below top of sheet, inboard side outboard side): 13-17' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 18P-8

Entact ID:

Date Exposed: 7/16/14

Describe Damage: (5) scrapes by the Cat 349E excavator bucket - 1/2x24", 1x5", 2"Ø, 1"Ø, 1/2x12". Cells 107/106

Damage Location (ft below top of sheet, inboard side outboard side): 12-17' outboard

Date Repaired: 7/18/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/18/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 18P-9

Entact ID:

Date Exposed: 7/17/14

Describe Damage: (9) scrapes by the Cat 349E excavator bucket - 1/2x4", 3"Ø, 1/2x1", 1"Ø, 1/2x2", 1"Ø 1/2x12", 2"Ø, 1/2x18", Cell 106

Damage Location (ft below top of sheet, inboard side outboard side): 12-18' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG*

Sheet Number/DB ID: 18P-10

Entact ID:

Date Exposed: 7/17/14

Describe Damage: (16) scrapes by the cat 349E excavator bucket - (6) 1"Ø, 1/2x30", 1/2x6", 1x3", 2"Ø, 3x6", 1/2"Ø, 1/2"Ø, 1x8", 2x6", 2"Ø, Cell 106

Damage Location (ft below top of sheet, inboard side outboard side): 12-18' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-11

Entact ID:

Date Exposed: 7/17/14

Describe Damage: (11) scrapes by the Cat 349E excavator bucket - (5) 1/2"Ø, (3) 1"Ø, 2x10", 1/2x36", 1"x18". Cell 106/105

Damage Location (ft below top of sheet, inboard side outboard side): 13-18' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-12

Entact ID:

Date Exposed: 7/21/14

Describe Damage: (8) scrapes by the Cat 349E excavator bucket - 1/2x12", 2"Ø, 1/2x8", 1/2x30", 1x12", 2x5", 1/2x60", 3"Ø. Cell 105

Damage Location (ft below top of sheet, inboard side outboard side): 11-18' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-13

Entact ID:

Date Exposed: 7/21/14

Describe Damage: (6) scrapes by the Cat 349E excavator bucket- 1/2x4", 1"Ø, 1x5", 1x12", 2"Ø, 1/2"Ø. Cell 105. Note: sheet is covered by hardened grout from elv 8.0'-(2.5')

Damage Location (ft below top of sheet, inboard side outboard side): 14-17' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 18P-14

Entact ID:

Date Exposed: 7/21/14

Describe Damage: (7) scrapes by the Cat 349E excavator bucket - 1x8", (3) 1"Ø, 1/2x10", 1/2x24", 1/2x2", 1x4", 2"Ø. Cell 105. Note: Sheet is partially covered w/ hardened epoxy from elv. 1.0'-(4.0')

Damage Location (ft below top of sheet, inboard side outboard side): 14-18' outboard

Date Repaired: 7/24/14

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 4" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 7/24/14

* A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

**Novartis Soil Pile**
SESCP SCD: EEPSQUO2YB
PERMIT CLOSED

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | The restricted area warning tape along the top of the temporary sheet pile alignment must be extended to the east in order to keep workers a minimum of 6 feet from unprotected sheet pile wall (fall hazard). |
| 2 | IA2Q4A1AL8 | Sediment must be removed from the asphalt surfaces in the areas of the SA-6 South western excavation which are not being excavated. |
| 3 | IA2Q4A1AL8 | Sediment along the toes of material stockpiles in eastern SA-6 South is accumulating against the SA-7 SCB wall and must be cast back to prevent overtopping of the SCB wall and migration onto the SA-7 site. |
| 4 | IA2Q4A1AL8 | Stone in the tracking pad at the truck exit gate is compacted and requires cleaning/reworking |
| 5 | IA2Q4A1AL8 | A sinkhole has developed along the north side of the ramp which is located at the eastern end of the N-1 surcharge stockpile. This sinkhole requires repairs. |
| 6 | IA2Q4A1AL8 | A section fo temporary fencing is open to the south of the JCDPW H-building. This opening should be closed off and the perimeter fencing in this area maintained. |

**CHECK IF APPLICABLE:** ☒ **No Discharge this Monitoring Period** ☐ **Monitoring Report Comments Attached**

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

**Re: Honeywell International Inc.**
**Court Ordered Regional Groundwater Remedy Treatment Plant**
**Located at 525 & 575 Route 440, Jersey City**
**MR 1 and MR 2**
**Permit ID# 31630016**

Dear Mr. Caltagirone:

Honeywell is submitting the June 2014 discharge monitoring reports, MR 1 and MR 2, for the Court Ordered Regional Groundwater Remedy treatment plant located at 525 & 575 Route 440 in Jersey City.

Please contact me at 973-455-2989 if you need further clarification or have questions.

On Behalf of Honeywell
Sincerely

Helen Fahy
Remediation Manager

## PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used:

All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3.

SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler.

All samples are iced in a cooler during transport to the lab.

## Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending June 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Pending submittal |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to Contractor only. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal |
| **DC 2014** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Pending submittal |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Subject:** **Riverkeeper et al v. Honeywell International Inc. et al**
**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-08**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from August 1 – August 31, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

WJH:jtc/sgf

## B. SITE OPERATIONS

### 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | | |
|---|---|---|---|---|---|
| | 8/3/14 | 8/10/14 | 8/17/14 | 8/24/14 | 8/31/14 |
| **Construction Management (AMEC)** | 12 | 13 | 12 | 11 | 9 |
| **Engineering (AMEC)** | 1 | 1 | 1 | 1 | 1 |
| **Air Monitoring (Emilcott)** | 1 | 1 | 1 | 1 | 1 |
| **Security (Securitas)** | 3 | 3 | 3 | 3 | 3 |
| **Entact/Subcontractors** | 40 | 40 | 45 | 46 | 45 |
| **Arecon/US Ecology Subcontractors** | 1 | 1 | 1 | 1 | 1 |
| **ERFS In Situ Treatment** | 3 | 4 | 4 | 2 | 0 |
| **Summit Drilling** | 3 | 2 | 2 | 1 | 0 |
| **Siemens** | 1 | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 0 | 0 | 0 | 0 | 0 |
| **Other** | 0 | 0 | 0 | 1 | 1 |
| **TOTAL** | **65** | **66** | **70** | **68** | **62** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Collected August PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed S-3 Injection/Mass Removal Event #16 in well 088-IW-03.
- On August 13, 2014, participated in the public bid opening for the JCIA Structures Demolition project.
- Completed In-Situ treatment field implementation activities on SA6 South- Site 163. A total of 57 temporary well points and 119 injection points were installed. Successfully injected 2,228 gallons of stock 29% CAPs solution (62,492 gallons of diluted solution) in the 15 designated areas during the reporting period.
- On August15, 2014, daylighting of CAPs was observed in Droyer's Cove during one in-situ injection in Area F. Injection operations were stopped at this location, and the NJDEP hotline notified.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 2**0**1 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on August 22, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | | |
|---|---|---|---|---|---|
| | 8/3/14 | 8/10/14 | 8/17/14 | 8/24/14 | 8/31/14 |
| Avg. Gallons Treated & Discharged (per day) | 79,753 | 78,183 | 78,219 | 78,087 | 78,149 |
| Average Flow (gpm) for Operating Period | 55 | 55 | 54 | 55 | 54 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 | 24 |
| GWTP InfluentTanks (gal.) | 7,677 | 11,555 | 10,427 | 9,852 | 9,408 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in cells 102-83.
- Continued storm-water management activities.
- On July 30, 2014, we collected a soil sample from a visually anomalous material observed in a thin lens located above Stratum D. Laboratory analysis received on August 18, 2014 indicated the result was 713 mg/kg. On August 19, 2014, Amec collected two additional soil samples for hexavalent chromium analysis from this lens above Stratum D in the southern portion of Cell 105.

Both of the sample results were greater than 20 mg/kg, (230 mg/kg) and (198 mg/kg). Further delineation and sampling of the anomaly is pending.

- Installed 44 pair of temporary sheets for excavation support along Kellogg Street.
- On July 30, 2014 a 12-inch diameter transite pipe was encounter during pre-trenching activities associated with installation of the temporary sheets along Kellogg Street. Excavation activities were suspended and an abatement contractor was mobilized to remove pipe. A total of 115 linear ft. of 12- inch diameter transite pipe was removed, wrapped in poly-sheeting, placed in a roll-off, and staged on site for future disposal.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

## 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 20 | 21.51 | 430.2 |
| **Entact/ Montecalvo** | 30 cyd roll-off | Bayshore Recycling | NA | Non Haz Creosote Debris | 8 | 10.9 | 87.10 |

## 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 102-83 |
| **Excavation Completed** | Cell Number(s) 102-85<br>Volume Excavated - Total for Reporting Period: 18,482 CY/ Total to Date: 102,627 CY |
| **Backfill in Progress** | Cell Number(s) 129-85 |

## 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | | |
|---|---|---|---|---|---|
| | 8/03/14 | 8/10/14 | 8/17/14 | 8/24/14 | 8/31/14 |
| <20ppm re-use, CY | 0 | 0 | 0 | 0 | 250 |
| Weldon, Import-Tons Screenings | 8,166 | 8,546 | 7,576 | 1,396 | 3,523 |
| Tilcon, Import-Tons DGA | 0 | 0 | 0 | 0 | 656 |
| Tilcon, Import Tons – 1.5” Stone | 0 | 0 | 259 | 0 | 487 |
| Weldon, Imported Tons - QP | 590 | 1,221 | 825 | 1,070 | 0 |
| Weldon, Imported Tons - DGA | 0 | 0 | 0 | 0 | 326 |
| Celgene - Loads | 411 | 724 | 0 | 0 | 0 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 0 | 309 | 0 | 0 |

## E. SURCHARGE OPERATIONS

- Area 1S: Surcharge continued with placement of both chromium impacted soils to the design subgrade and imported Celgene soils between the subgrade and surcharge design grade. Surcharge placement is approximately 85% complete.
- Area 2S: Surcharging continued from 1S into the western portion of 2S. Surcharge placement consisted of subgrade fill and is approximately 15% complete.
- Area 3S: Instrumentation installation was completed as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles are located in this area. No Surcharge has been initiated.
- Area 1N: Surcharge is completed. Surcharge removal is scheduled to commence in September. Details were provided in the August Surcharge Monitoring Report No. 4.
- Area 2N: Instrumentation Installation 100 % complete. Surcharge removed from 1N will be relocated to Area 2N.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- No sheets were driven associated with the hydraulic barrier wall during this reporting period.
- On August 27, 2014, a test pit was excavated to field verify the location of a 90 degree bend in the 72-inch force main. This activity identified that the actual location was approximately 4 feet farther to the east necessitating a design change bulletin to address the needed relocation of the barrier wall.

## G. PERMIT STATUS

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |

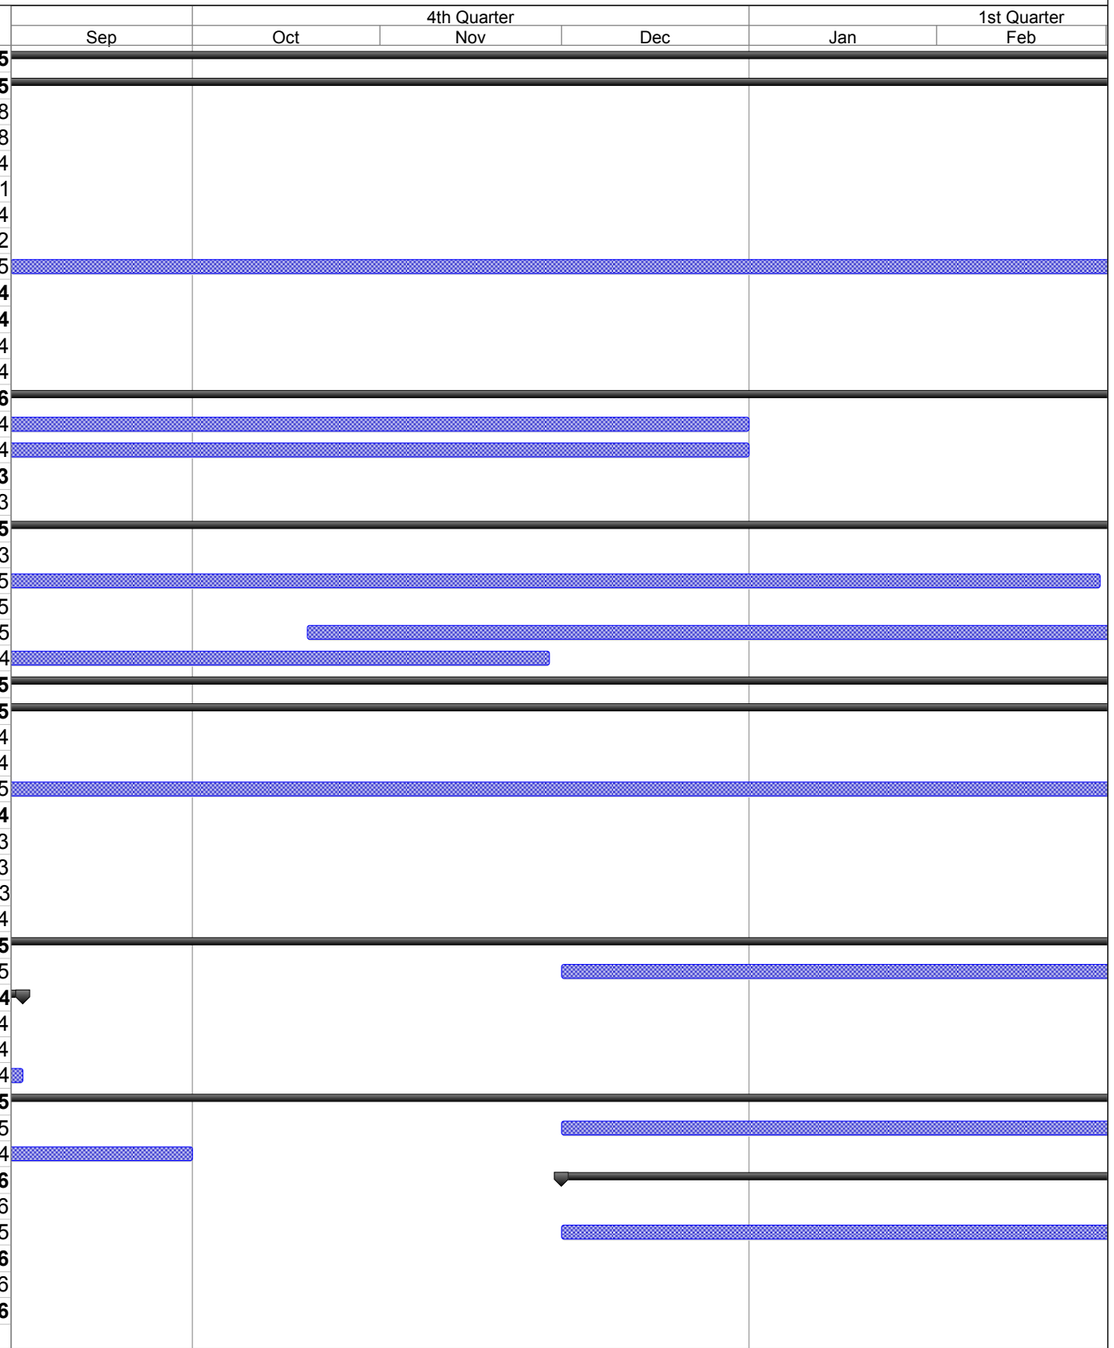
## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Pre-construction meeting for the Above-grade Demolition of the four designated JCIA Structures scheduled for September 4, 2014.
- Complete In-Situ treatment injection/temporary monitoring point abandonment activities at Site 163.
- Continue placement of surcharge materials in SA-6S Area 1S and 2S.
- Begin off loading of surcharge materials from SA-6N Area 1N.
- Begin placement of surcharge materials in SA-6N Area 2N.
- Continue installation of the contingent groundwater system trench on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 83-70.
- Continue stockpiling of presumed <20 mg/kg for additional sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Conduct S-3 Injection/Mass Removal Event No.17 in well 088-IW-02.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.

**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations



- Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
- Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
- Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)

4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-3)
   - SA-6 South Deep Well Data (DW-4)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. *Groundwater Quality Data Surcharge Monitoring Update (provided on a quarterly basis - not available as of this report date)*
9. *Surcharge Monitoring Update (not included in this reporting period)*
10. Sheet Pile Update
    - Sheet Deflection Along Open Excavation
    - Sheet Monitoring Locations
    - Sheet Pile Repair Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (July 2014)
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (July 2014)
13. SA-6 North & South Design Change Tracking Log

## Attachment 1:  Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 | Wed 10/1/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 | Mon 6/2/14 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 | Thu 10/13/11 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 | Fri 8/29/14 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 | Mon 4/30/12 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 | Mon 3/30/15 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** | **Wed 4/30/14** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** | **Wed 4/30/14** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 | Thu 1/30/14 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 | Wed 4/30/14 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** | **Mon 5/16/16** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 | Wed 12/31/14 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 | Wed 12/31/14 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** | **Fri 6/28/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 | Fri 6/28/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** | **Fri 10/30/15** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 | Tue 12/31/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 | Fri 2/27/15 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 | Fri 10/30/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 | Tue 6/30/15 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 | Fri 11/28/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** | **Thu 4/30/15** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** | **Thu 4/30/15** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 | Fri 2/14/14 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 | Fri 6/20/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 | Thu 4/30/15 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** | **Fri 5/30/14** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 | Thu 8/15/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 | Mon 8/26/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 | Fri 11/8/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 | Fri 5/30/14 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** | **Wed 9/30/15** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** | **Tue 9/2/14** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 | Thu 1/2/14 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 | Thu 5/8/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 | Tue 9/2/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** | **Wed 9/30/15** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 | Wed 9/30/15 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 | Tue 9/30/14 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** | **Fri 2/12/16** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 | Fri 2/12/16 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 | Wed 12/30/15 |
| **67** | **Restoration** | **164 days** | **Tue 9/1/15** | **Fri 4/15/16** |
| 67a | Restoration | 164 days | Tue 9/1/15 | Fri 4/15/16 |
| **68** | **Demobilization** | **21 days** | **Mon 4/18/16** | **Mon 5/16/16** |
| 68a | Deferred Remediation of SA-6 South Along Bulkhead | | | |

Project: SA-6 Remediation Schedule
Revision 3
Date: Wed 9/3/14

Task | Milestone | Summary | Critical

## Attachment 2: Site Photographs

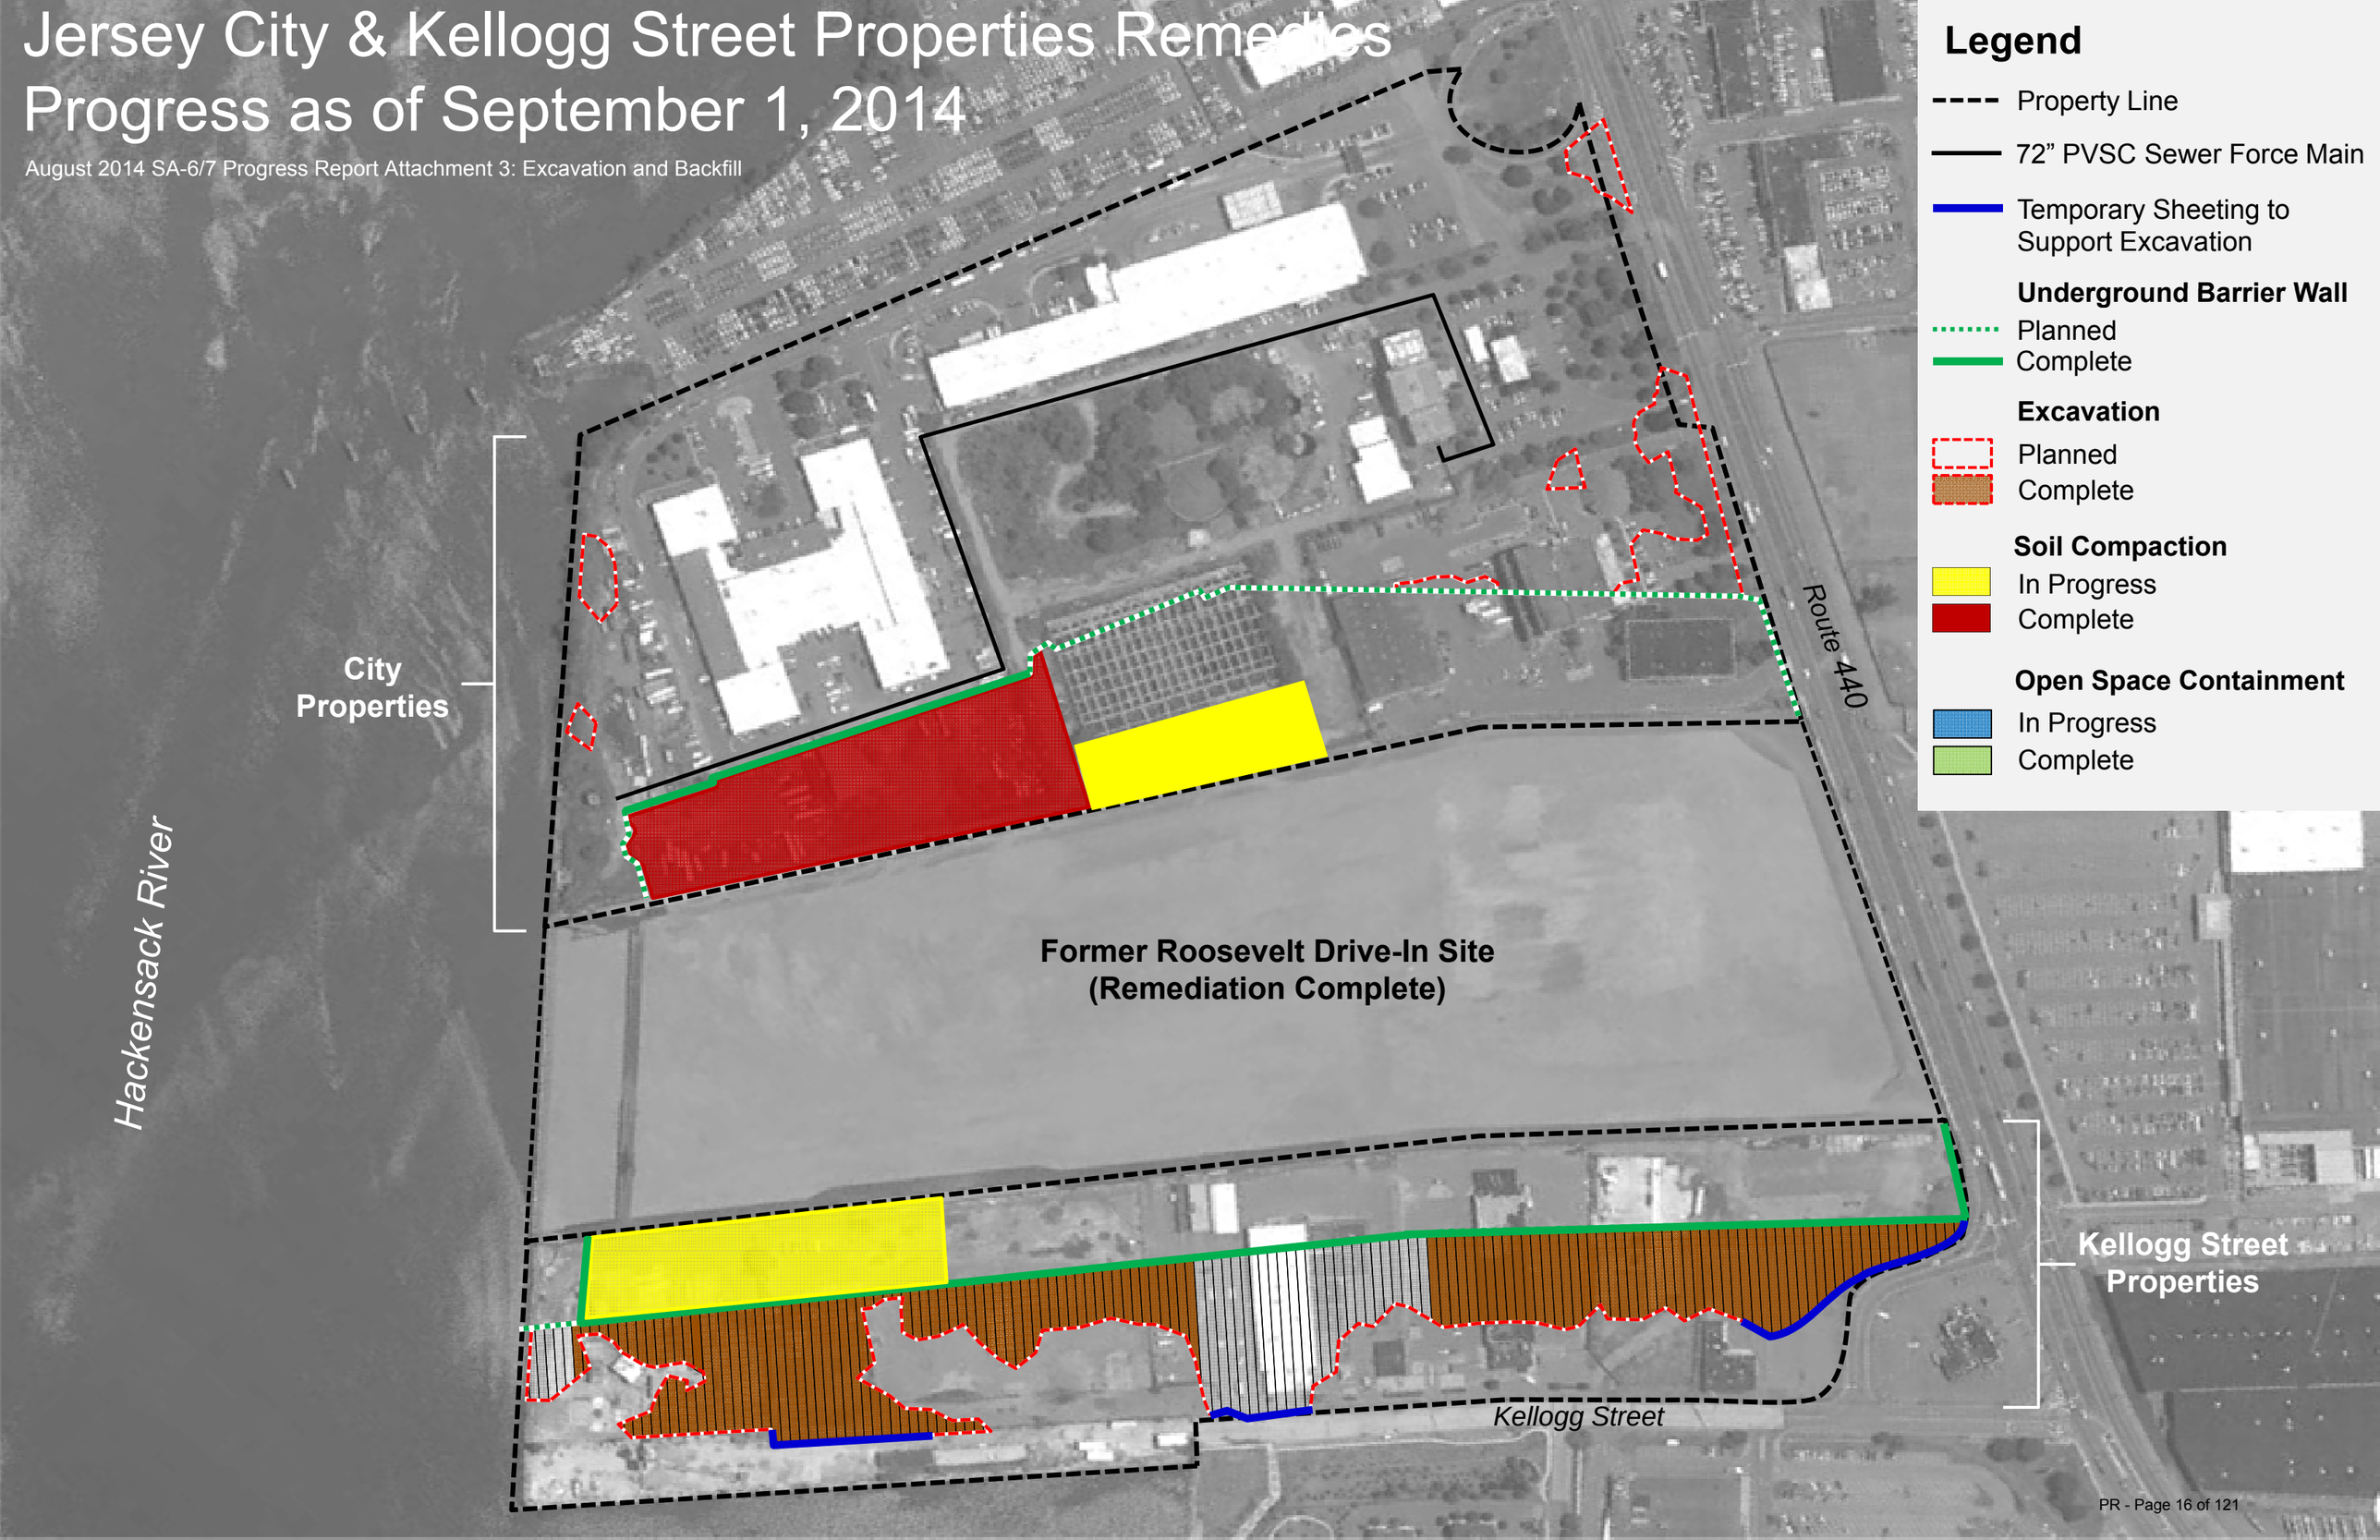
**Site Photograph 1:** Cleaning the steel sheets during excavation.

**Site Photograph 2:** Construction Water Treatment Plant on Jersey City Properties.

**Site Photograph 3:** Contractor compacts clean fill on Kellogg St. Properties.

**Site Photograph 4:** Contractor places surcharge on western area of site.

**Site Photograph 5:** Contractor processes concrete for reuse.



**Site Photograph 6:** Overview of Excavation and backfill operations.

## Attachment 3: Excavation and Backfill

- Progression Chart
- Excavation Bottom Elevations
- Maser Survey Tables (SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points)
- Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
- Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

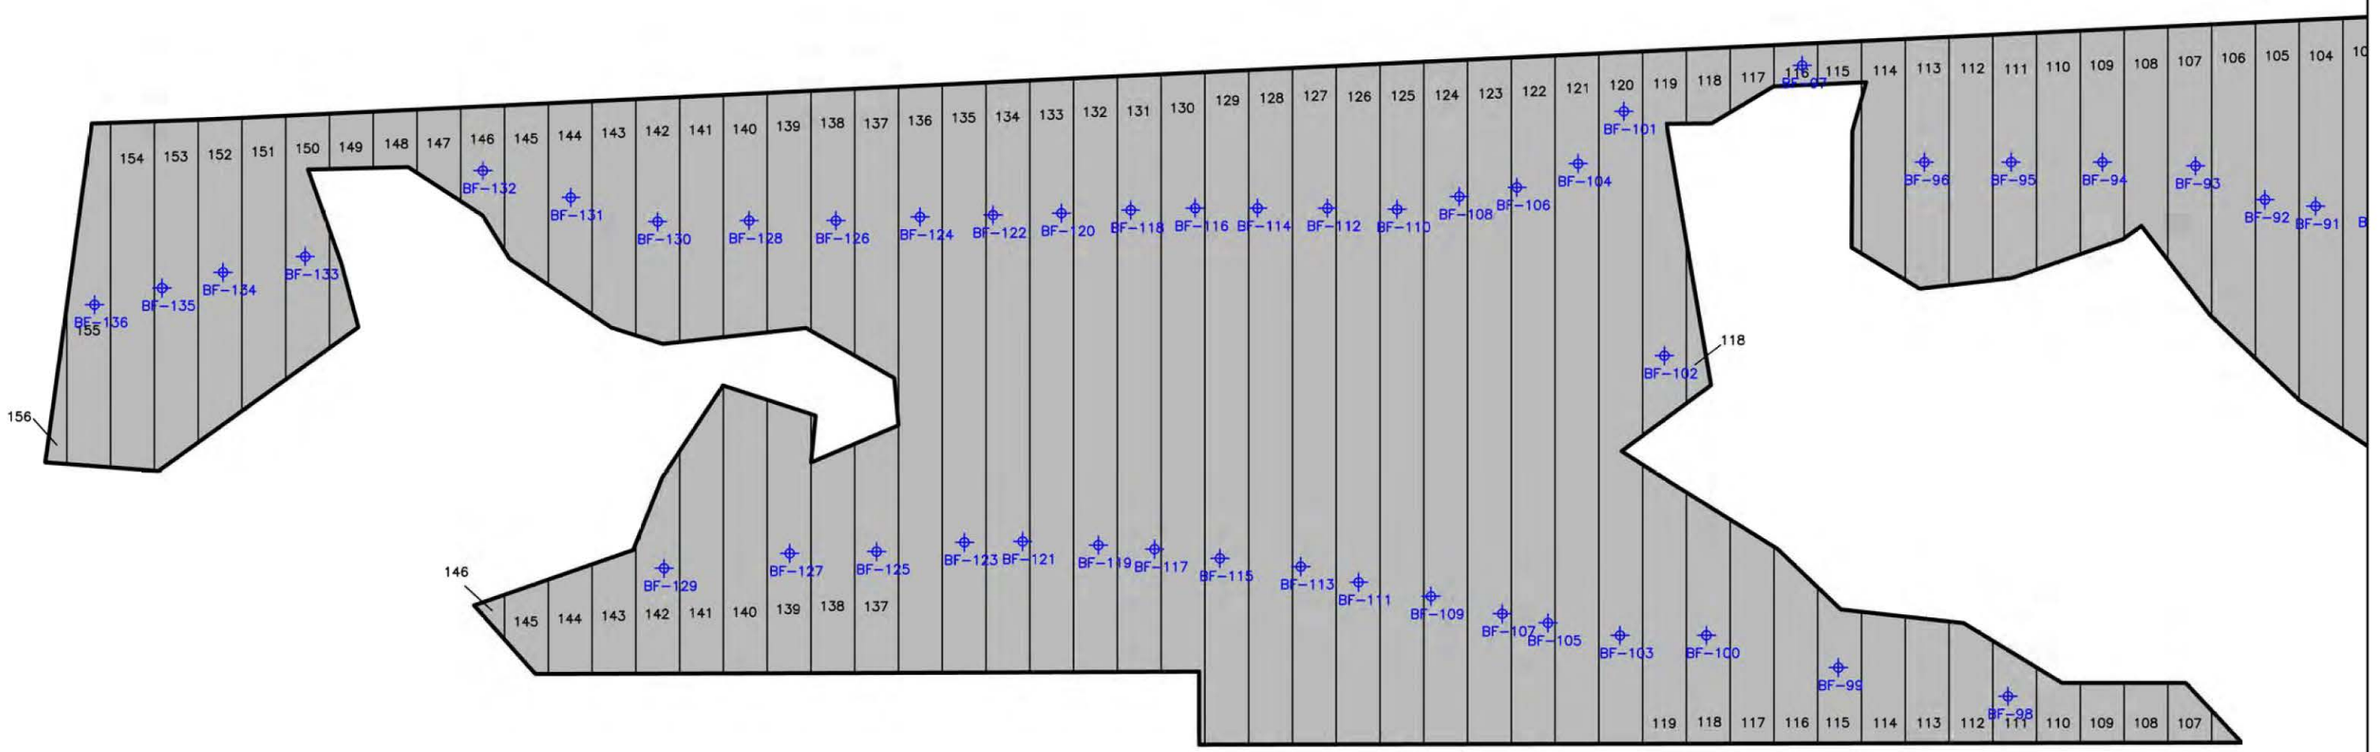
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.



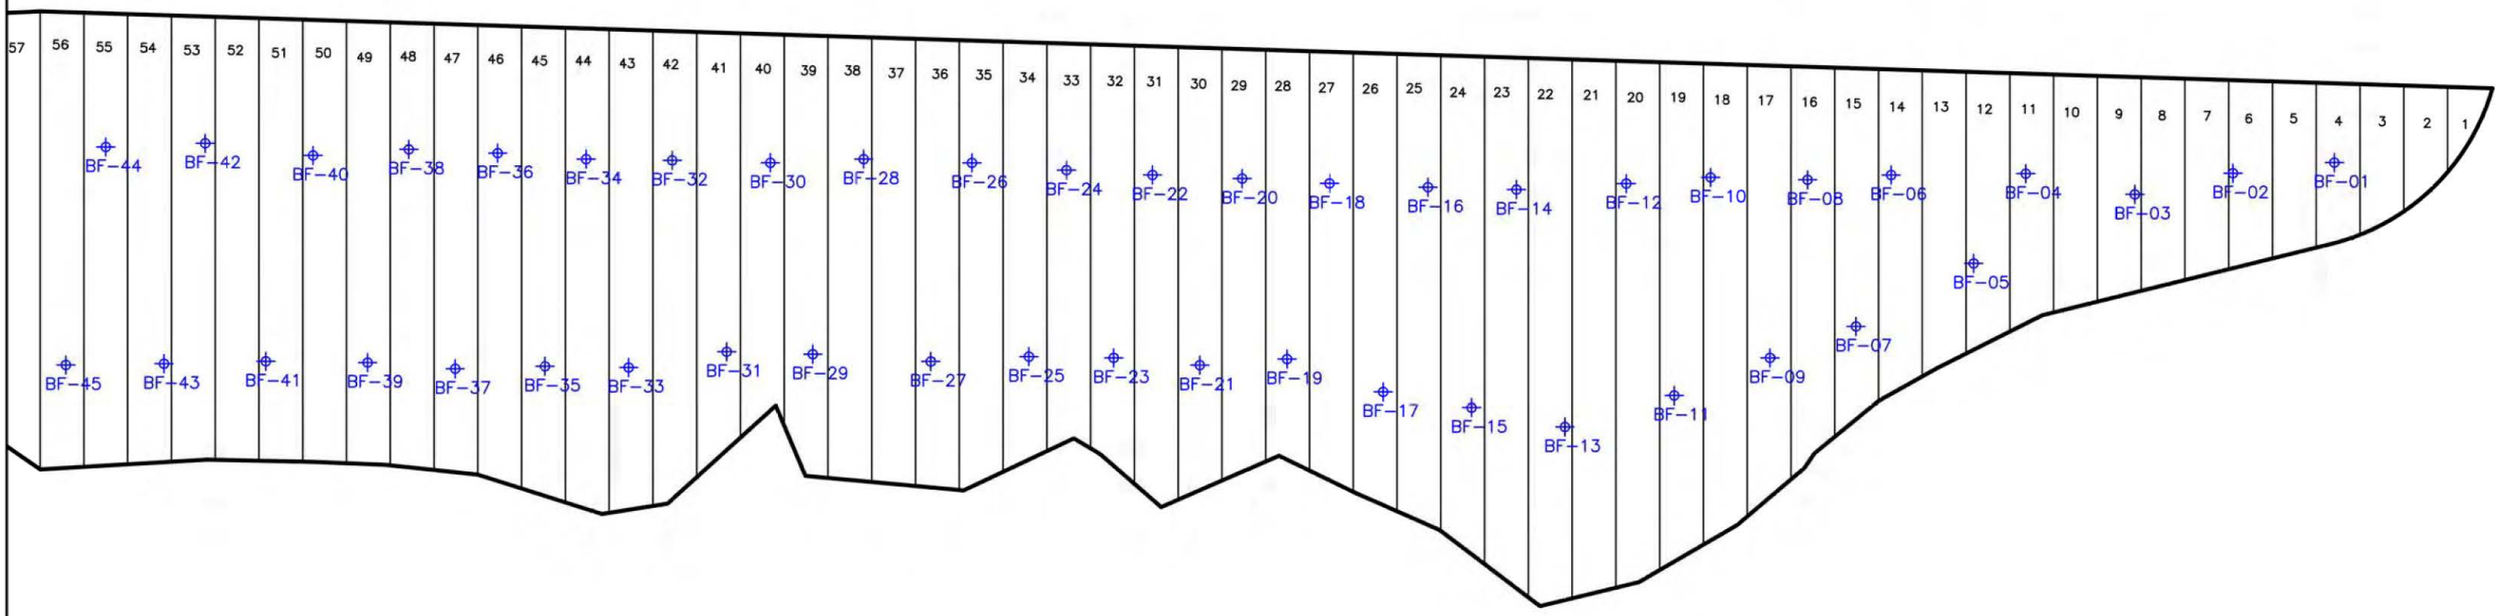
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

ENTACT 302 Unity Plaza Latrobe, PA 15650

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

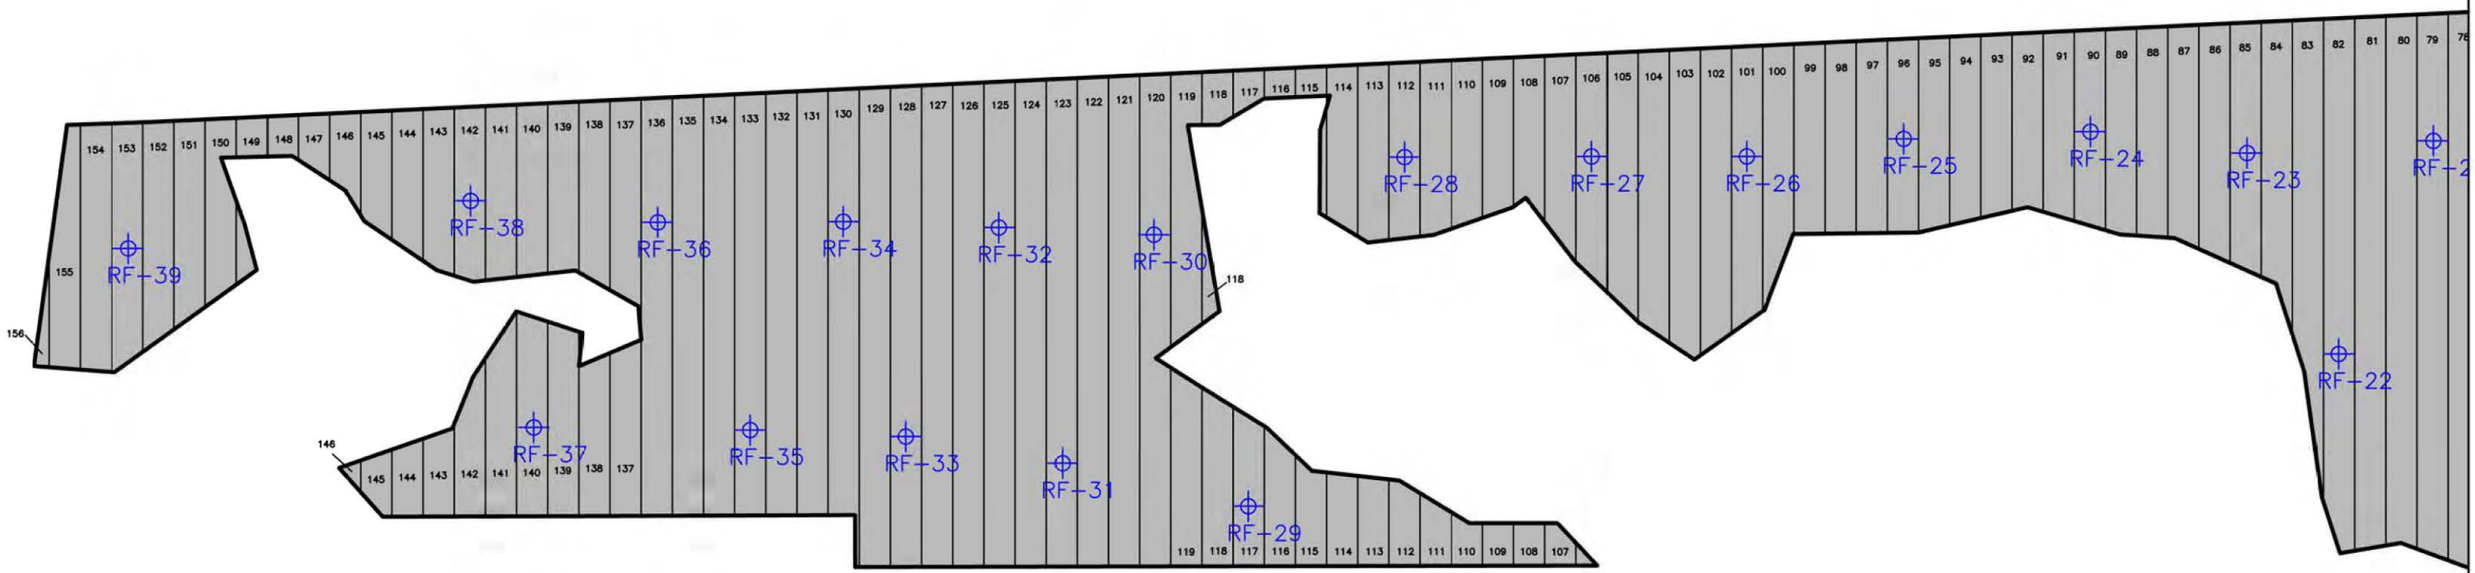
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

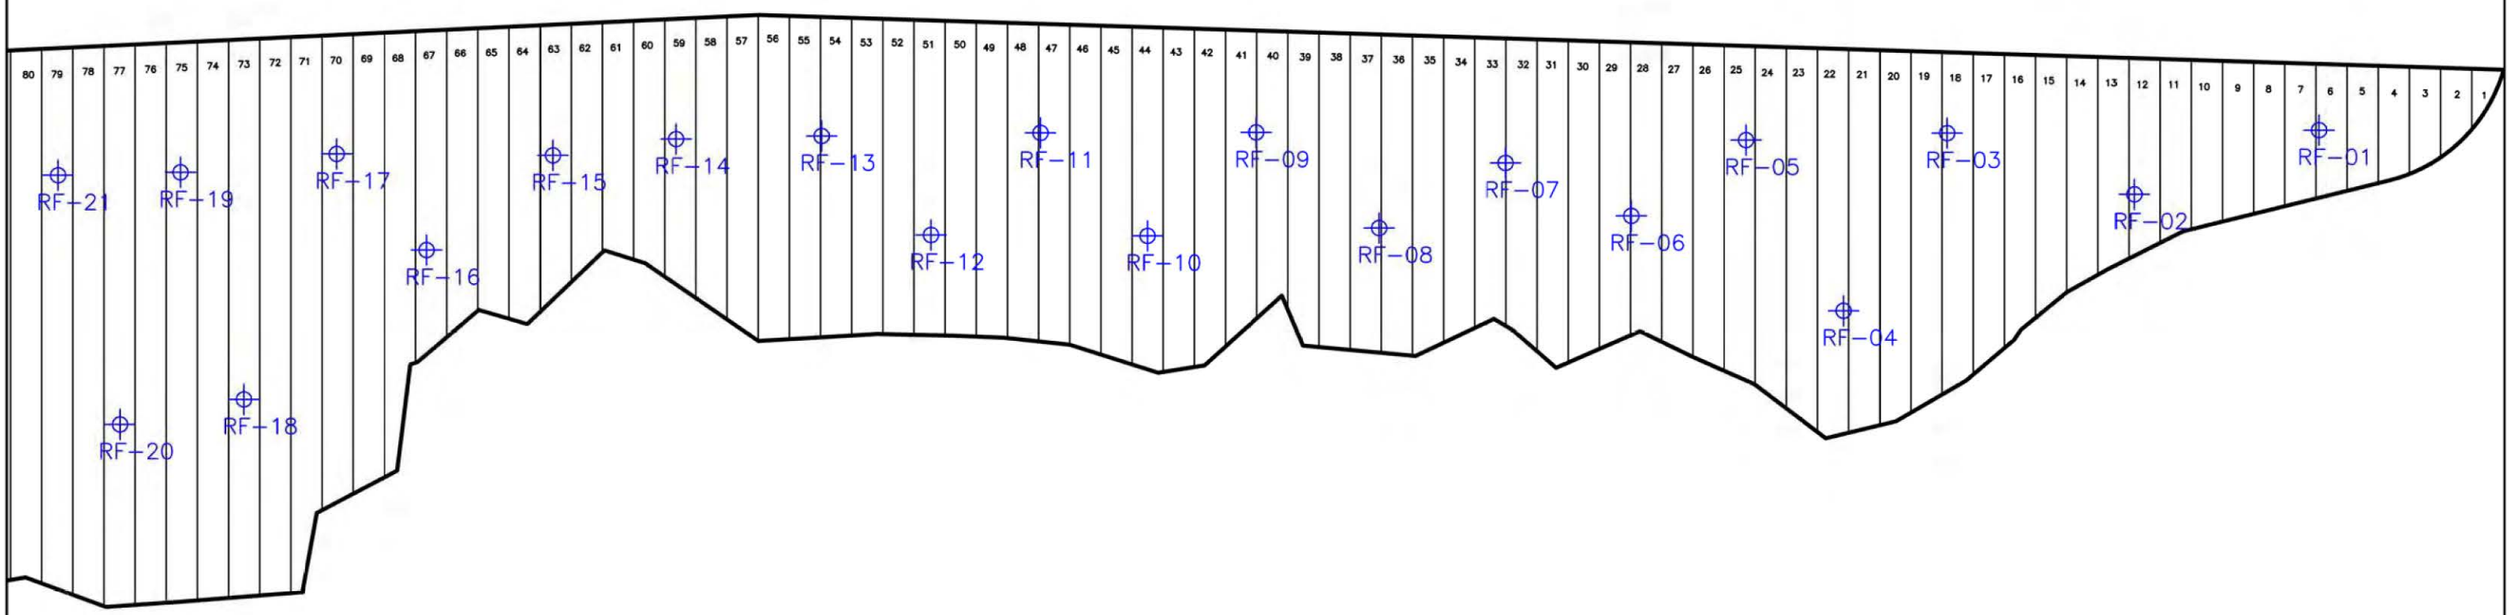
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

ENTACT 302 Unity Plaza Latrobe, PA 15650

The following wells have been abandoned in accordance with the SA-6 100% Design:
134-W4-DO, 087-MW-001, 087-MW-019, 087-MW-Y20, 115-E1-DO, 115-E1-SO, 125-MW-01, 073-MW-BB-11, 073-MW-Y10, 134-MW-Q08.

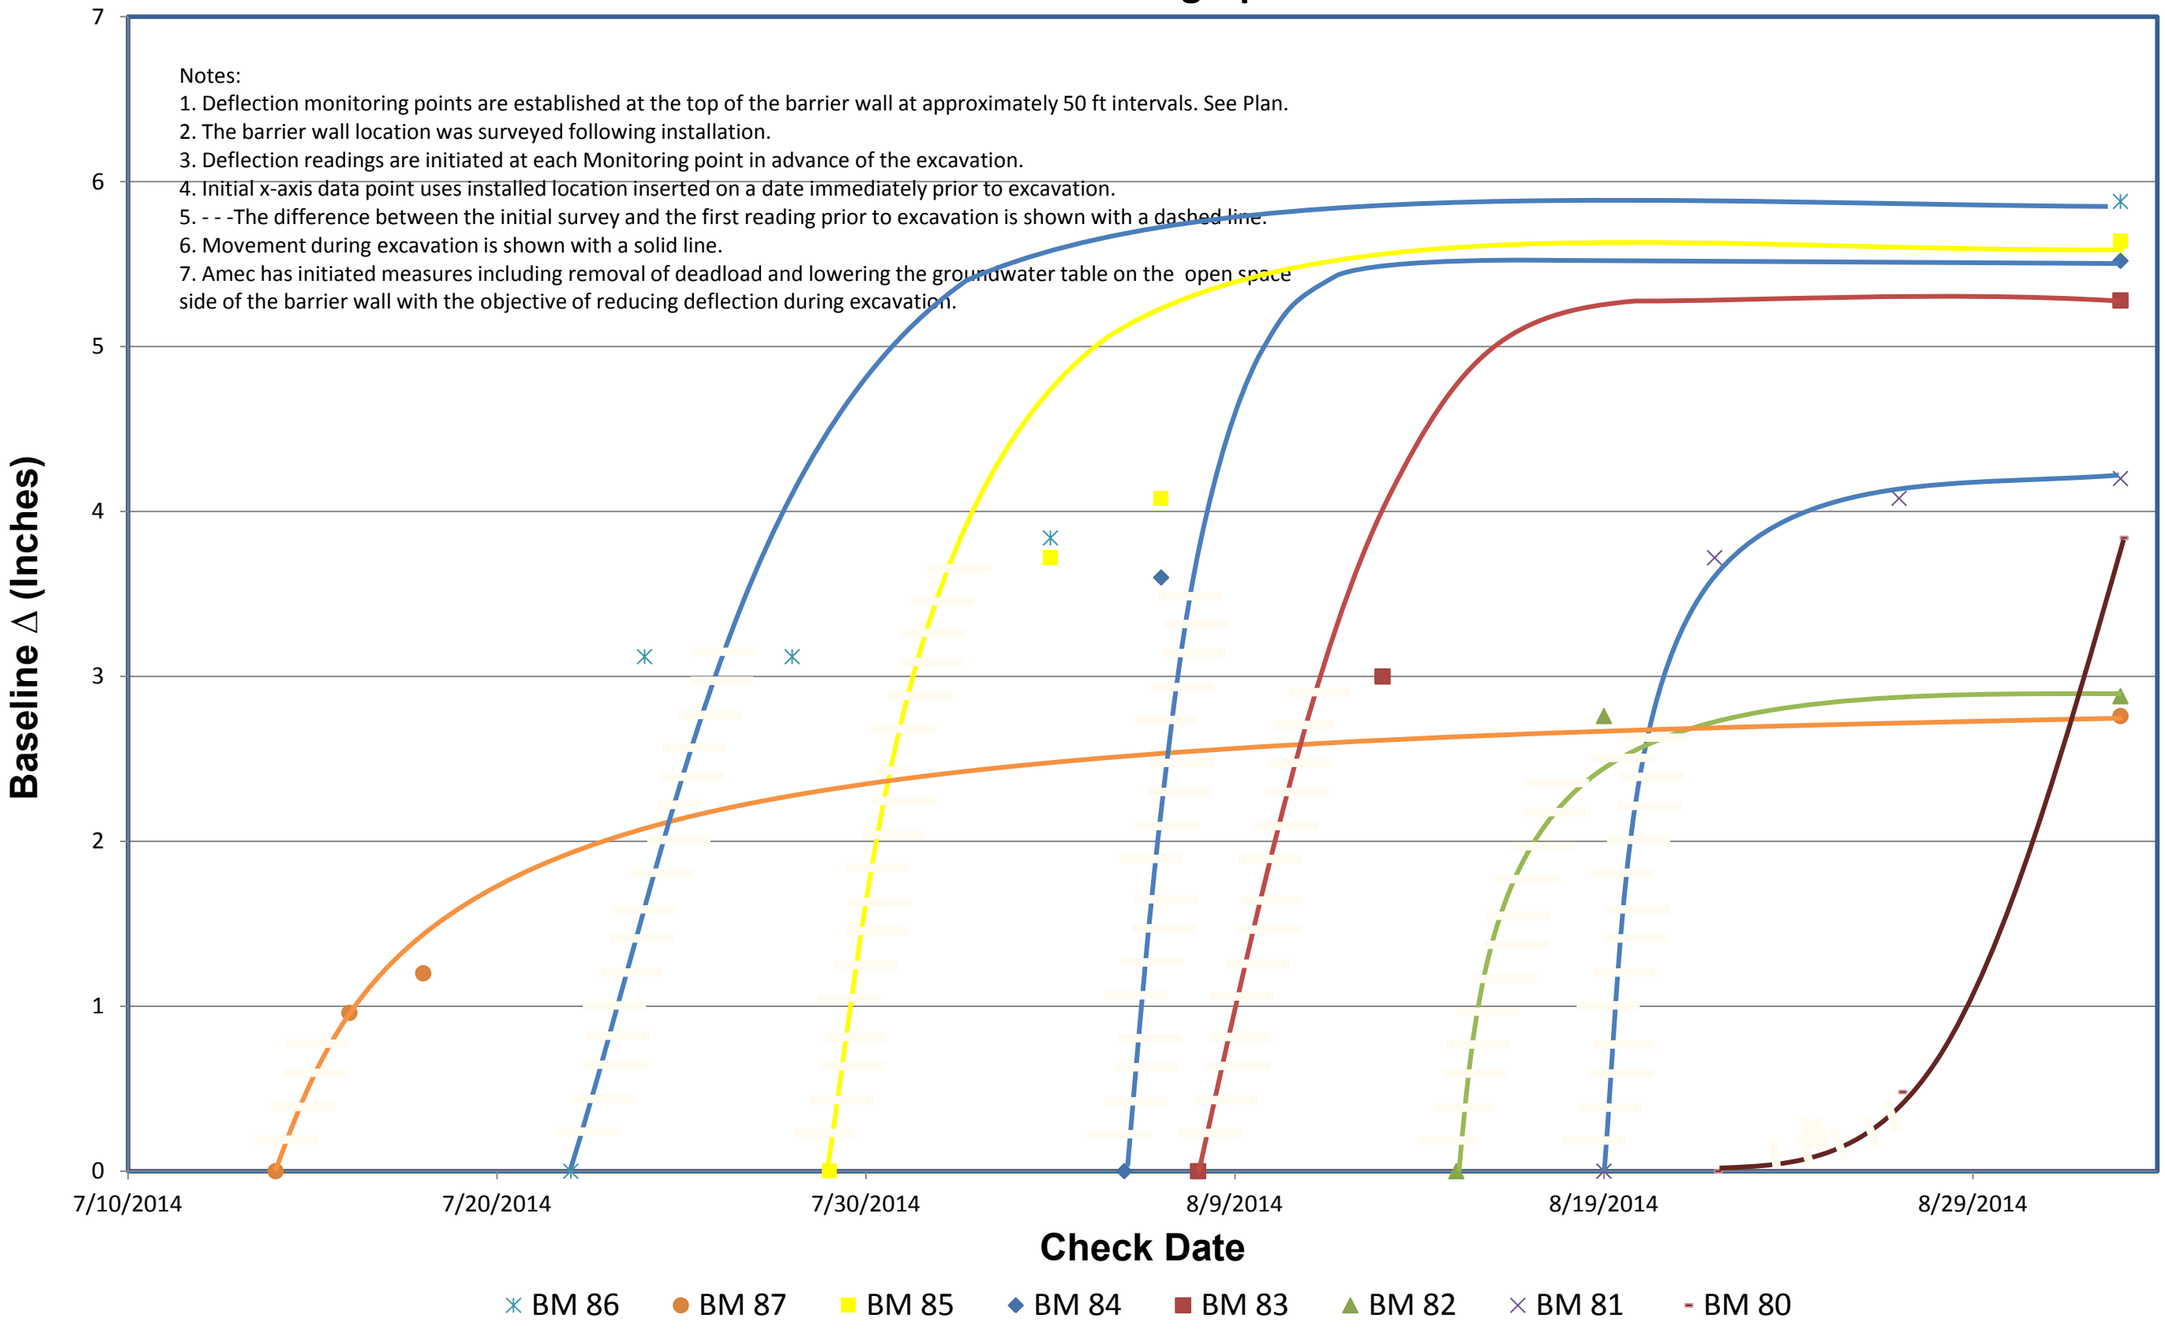
The following wells are temporarily inaccessible:
134-MW-V09, E1A-SO, W1-SO, W5-SO

## Attachment 8: Quality and Level Data in GWET Wells

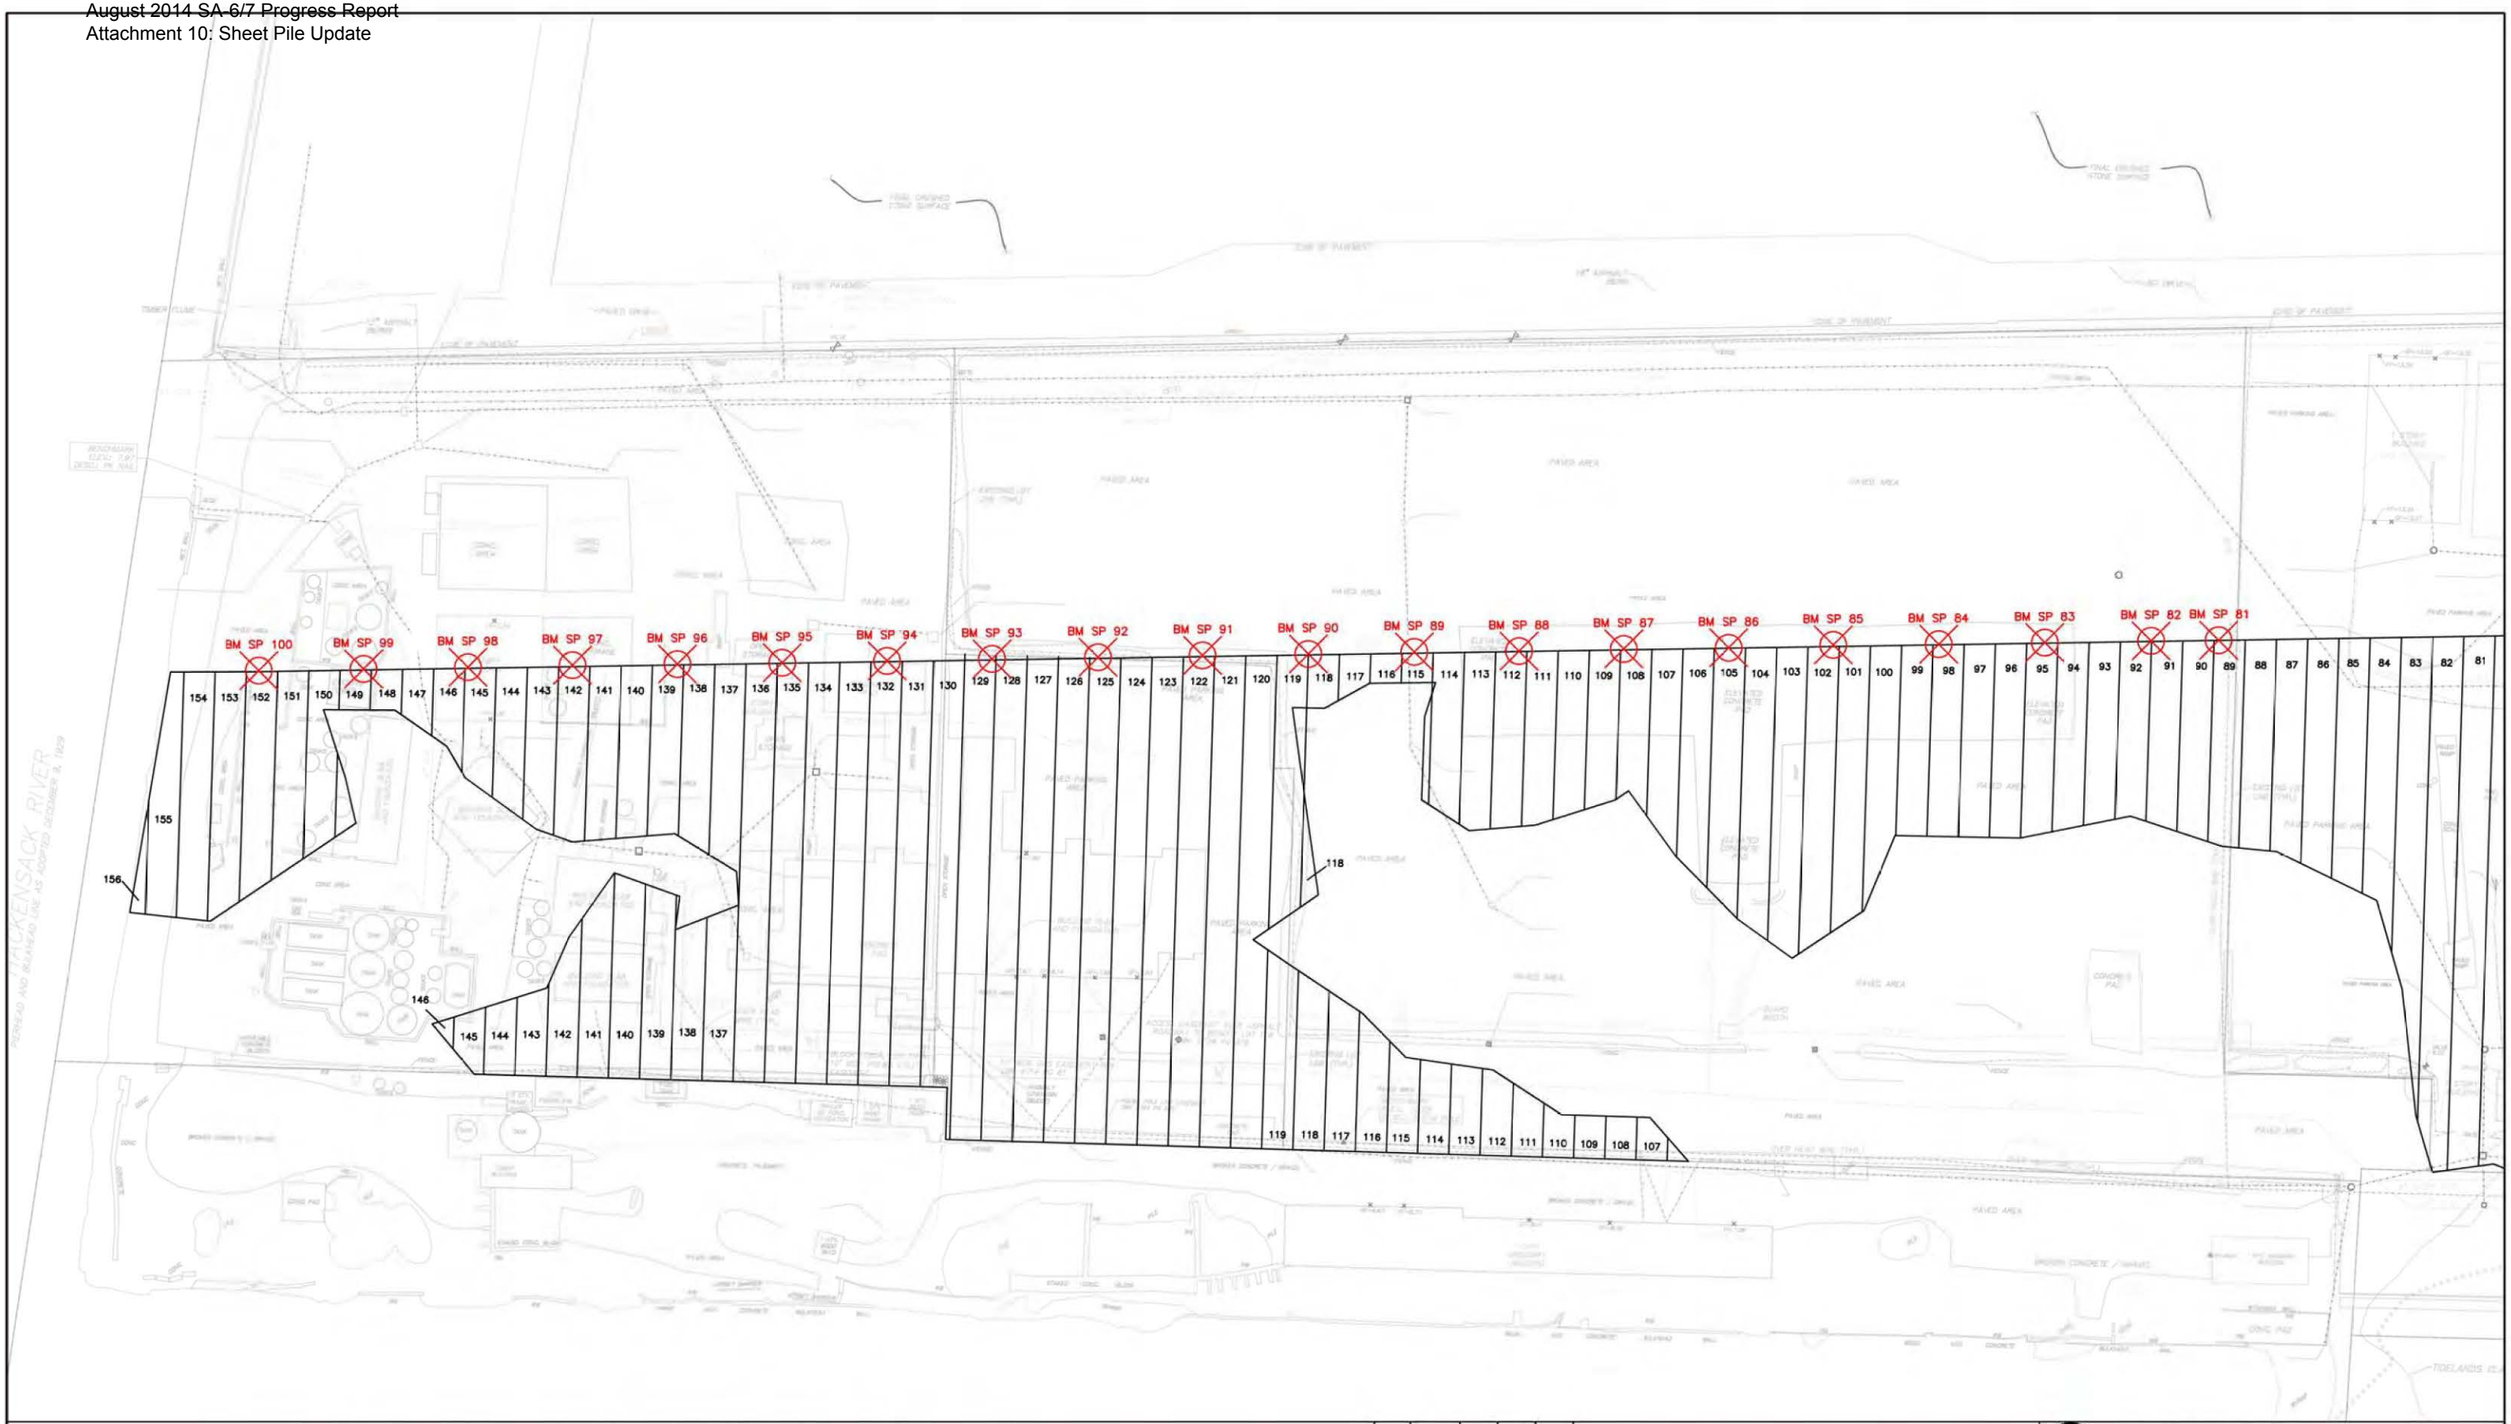
(not available as of this report date - provided on a quarterly basis)

- Summary of Groundwater Quality Data from GWET Wells
- Trichloroethene//Chloroform/Hexavalent Chromium in GWET Wells

## Attachment 9: Surcharge Monitoring Update



(not included in this reporting period)

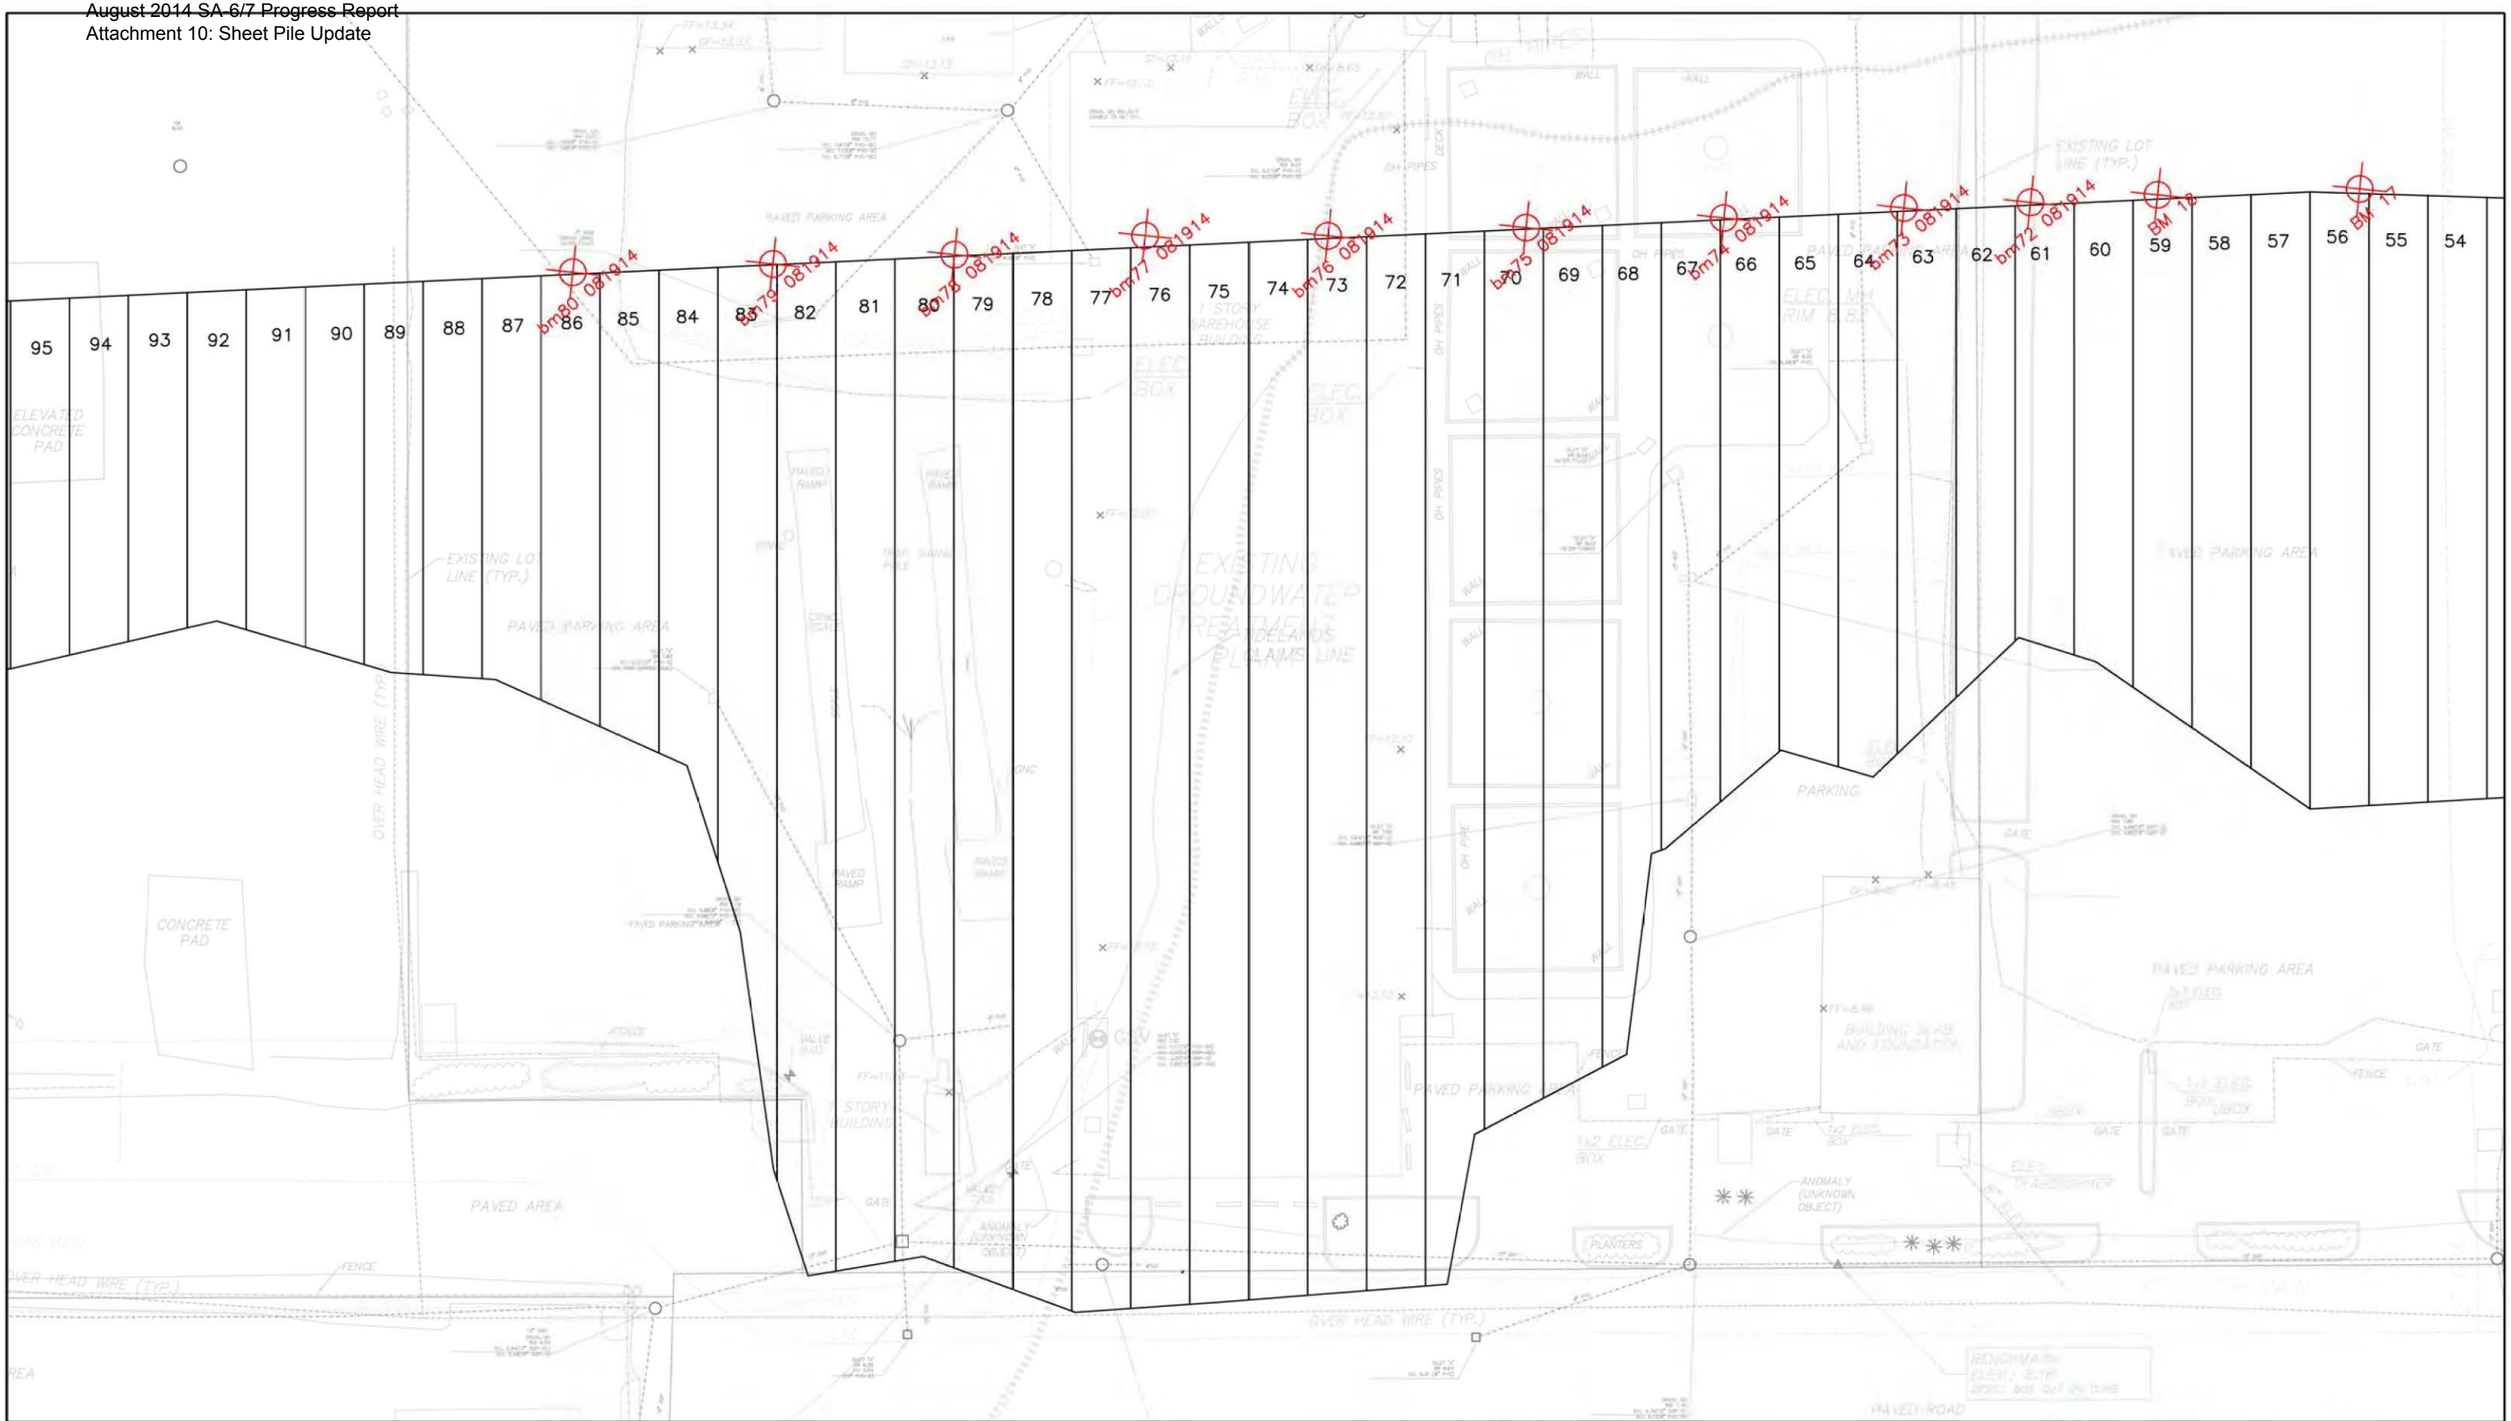


## Attachment 10: Sheet Pile Update

- Sheet Deflection Along Open Excavation
- Sheet Monitoring Locations
- Sheet Pile Repair Log

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.



NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 18P-11
Entact ID:
Date Exposed: 7/17/14
Describe Damage: (11) Scrapes by the Cat 349E excavator bucket - (5) 1/2"Ø, (3) 1"Ø, 2×10", 1/2×36", 1×18". Cell 106/105

Damage Location (ft below top of sheet, inboard side outboard side): 13-18' outboard

Date Repaired: 7/24/14 Partial, 8/5/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 4" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 8/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 18P-12
Entact ID:
Date Exposed: 7/17/14
Describe Damage: (8) Scrapes by the Cat 349E excavator bucket - 1/2×12", 2"Ø, 1/2×8", 1/2×30", 1×12", 2×5", 1/2×60", 3"Ø. Cell 105

Damage Location (ft below top of sheet, inboard side outboard side): 11-18' outboard

Date Repaired: 7/24/14 Partial, 8/5/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Pressure Wash, wire brush, apply epoxy w/ 4" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 8/5/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 18P-13
Entact ID:
Date Exposed: 7/21/14
Describe Damage: (6) scrapes by the Cat 349E excavator bucket - 1/2×4", 1"Ø, 1×5", 1×12", 2"Ø, 1/2"Ø. Cell 105. Sheet is covered w/ hardened grout from elv. 8.0' - (2.5')

Damage Location (ft below top of sheet, inboard side outboard side): 14-17' outboard

Date Repaired: 7/24/14
Inspected by: Bnan Shea
Describe Repair: Pressure Wash, wire brush, apply epoxy w/ 4" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 7/24/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-12

Entact ID:

Date Exposed: 7/30/14

Describe Damage: (8) scrapes by the Cat 349E excavator bucket - 1/2x36", 1"Ø, 2x8", 1/2x6", 1/4x3", 2x4", 4"Ø, 1/2x12". Cell 101

Note. Sheet is covered by hardened grout from elv. 5.0' to (5.0').

Damage Location (ft below top of sheet, inboard side outboard side): 9-15' outboard

Date Repaired: 8/5/14 Partial, 8/6/14 Remaining

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-13
Entact ID:
Date Exposed: 7/30/14
Describe Damage: (8) Scrapes by the Cat 349E excavator bucket - 1x36", (2) 1/2"Ø, 10x14", 1x72", 1/2x3", 1x60", 1x36", and a small leak in the interlock weld. Cell 101

Damage Location (ft below top of sheet, inboard side outboard side): Scrapes 9-15' outboard leak 17' outboard
Date Repaired: 8/5/14 Partial, 8/6/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Scrapes - pressure washed and epoxy painted on w/ a 2" brush. Leak - cleaned, covered/welded by a 5" steel angle, covered w/ epoxy, backfilled, and grouted.
Repair Log Closure: AMEC Signature:
Date: BShea 8/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-14
Entact ID:
Date Exposed: 7/30/14
Describe Damage: (10) Scrapes by the Cat 349E excavator bucket - 1x60", (3) 1"Ø, 4x8", (2) 1/2"Ø, 1x30", 1x48", 3"Ø, Cell 101

Damage Location (ft below top of sheet, inboard side outboard side): 2-16' outboard
Date Repaired: 8/5/14 Partial, 8/6/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 8/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-15
Entact ID:
Date Exposed: 7/31/14
Describe Damage: (10) scrapes by the Cat349E excavator bucket - (6) 1"Ø, 1/2x24", 1/2x3", 1/2x6", 1/2x48". Cell 101/100. Sheet is covered w/ hardened grout from elv. 8.0' to (4.0').

Damage Location (ft below top of sheet, inboard side outboard side): 2-16' outboard
Date Repaired: 8/5/14 Partial, 8/6/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 8/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-16
Entact ID:
Date Exposed: 7/31/14
Describe Damage: (7) Scrapes by the Cat349E excavator bucket - 1/2x4", 1/2x6", 1/2x24", 1x12", 1"Ø, 1x36", 1x12". Cell 100 Sheet is covered w/ hardened grout from elv. 7.0' to (4.0')

Damage Location (ft below top of sheet, inboard side outboard side): 1-15' outboard
Date Repaired: 8/5/14 Partial, 8/6/14 Remaining
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 8/6/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-17

Extact ID:

Date Exposed: 8/5/14

Describe Damage: (15) Scrapes by the Cat 349E excavator bucket- (2) 1×60", 1×24", 1×72", (4) 1/2×12", (4) 1" ø, 1/2×8", 1/2×3, 3" ø.

Cell 100

Damage Location (ft below top of sheet, inboard side, outboard side): 2-15' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure, wire brush, apply epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and treated as repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-18

Extact ID:

Date Exposed: 8/5/14

Describe Damage: (12) Scrapes by the Cat 349E excavator bucket- 1/4×72", 1/2×24", 1×6", 1×6", 1" ø, 1/2×2", (2) 3" ø, (2) 1/2×12", (2) 1/2" ø.

Cell 100. Sheet is covered w/ hardened grout from elv 5.0' to 1.0'

Damage Location (ft below top of sheet, inboard side, outboard side): 2-15' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and treated as repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-19

Extact ID:

Date Exposed: 8/5/14

Describe Damage: (11) Scrapes by the Cat 349E excavator bucket- (6) 1/2" ø, 1×8", 1/2×4", (2) 1×60", 3×8".

Cell 99

Sheet is covered w/ hardened grout from elv. 7.0' to 3.0'.

Damage Location (ft below top of sheet, inboard side, outboard side): 1-15' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and treated as repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-20

Extact ID:

Date Exposed: 8/5/14

Describe Damage: (8) Scrapes by the Cat 349E excavator bucket- (4) 1" ø, 1×36", 1/2×60", (2) 1×12".

Cell 99

Sheet is covered w/ hardened grout from elv. 6.0' to 1.0'

Damage Location (ft below top of sheet, inboard side, outboard side): 4-15' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and treated as repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-21

Entact ID:

Date Exposed: 8/6/14

Describe Damage: (6) Scrapes by the Cat 349E excavator bucket - 1"ø, 1"x24", 1x36", 1x12", 1/2x6", 3"ø. Cell 99

Damage Location (ft below top of sheet, inboard side outboard side): 2-12' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-22

Entact ID:

Date Exposed: 8/6/14

Describe Damage: (8) Scrapes by the Cat 349E excavator bucket - 1/2x12", 1/2x12", 1/2x8", 1/4x18", 4"ø, 1x6", 1/2"ø, 1/2x3". Cell 98

Damage Location (ft below top of sheet, inboard side outboard side): 2x12' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-23

Entact ID:

Date Exposed: 8/6/14

Describe Damage: (5) scrapes by the Cat 349E excavator bucket - 1x36", 1/2x8", 1x8", 1/2x48", 1/4x24". Cell 98.

Damage Location (ft below top of sheet, inboard side outboard side): 4-10' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-24

Entact ID:

Date Exposed: 8/6/14

Describe Damage: (12) Scrapes by the Cat 349E excavator bucket - (2) 1/2x14", 10"ø, 1/2x3", 1/2x6", 1/2x10", 1"ø, 1/2"ø, 2"ø, 1/2x36", 1"ø, 1/2x6". Cell 98

Damage Location (ft below top of sheet, inboard side outboard side): 2-10' outboard

Date Repaired: 8/6/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-25

Extact ID:

Date Exposed: 8/7/14

Describe Damage: (7) Scrapes by the Cat 349E excavator bucket - 1/2x48", (2) 1"ø, 1/2x12", 2x6", 2"ø, 1x12", Cell 97

Damage Location (ft below top of sheet, inboard side, outboard side): 3-13' outbaard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log shall be completed for each sheet pile section that is exposed and repaired if repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-26

Extact ID:

Date Exposed: 8/7/14

Describe Damage: (6) Scrapes by the Cat 349E excavator bucket - (2) 1"ø, 1/2x18", 1/2x24", 1/2x8", 1x24". Cell 97

Damage Location (ft below top of sheet, inboard side, outboard side): 8-13' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log shall be completed for each sheet pile section that is exposed and repaired if repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-27

Extact ID:

Date Exposed: 8/7/14

Describe Damage: (4) Scrapes by the Cat 349E and Cat 322C excavator buckets - 1/4x3", 1/2x4", 1/2x6", 1"ø. Cell 97. Sheet is covered w/ hardened grout from elv. 7.0' to (4.0')

Damage Location (ft below top of sheet, inboard side, outboard side): 10-14' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure washed, wire brushed, applied epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log shall be completed for each sheet pile section that is exposed and repaired if repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-28

Extact ID:

Date Exposed: 8/7/14

Describe Damage: (8) Scrapes by the Cat 349E and Cat 322C excavator buckets - 1/2x36", 1/2x24", 1"ø, 1x12", 1x12", 2x8", 1x14", 1/2"ø. Cell 96.

Damage Location (ft below top of sheet, inboard side, outboard side): 10-14' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure washed, wire brushed, applied epoxy w/ 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log shall be completed for each sheet pile section that is exposed and repaired if repair

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-29

Entact ID:

Date Exposed: 8/8/14

Describe Damage: (7) Scrapes by the Cat 349E and Cat 322C excavator buckets- 1/2x36", 1"ø, 1x6", 12"ø, 1/2x48", 1x18", 1/2x24". Cell 96.

Damage Location (ft below top of sheet, inboard side outboard side): 10-14' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-30

Entact ID:

Date Exposed: 8/8/14

Describe Damage: (9) scrapes by the Cat 349E and Cat 322C excavator buckets- 2"x60", 1x36", 1x24", 10"ø, 1x30", 2"ø, 1x18", 1/2x36", 1/2x12"! Cell 96

Damage Location (ft below top of sheet, inboard side outboard side): 2-14' outboard.

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-31

Entact ID:

Date Exposed: 8/8/14

Describe Damage: (5) scrapes by the Cat 349E and Cat 322C excavator buckets- 1x36", 1x12", 2"ø, 2x12", 1/2x24", cell 96/95

Damage Location (ft below top of sheet, inboard side outboard side): 6-15' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: BranShea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG

Sheet Number/DB ID: 19P-32

Entact ID:

Date Exposed: 8/8/14

Describe Damage: (4) Scrapes by the Cat 349E excavator bucket - 1/2x60", 3"ø, 1x24", 1x12", Cell 95.

Damage Location (ft below top of sheet, inboard side outboard side): 6-15' outboard

Date Repaired: 8/13/14 Partial, 8/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply, epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 8/15/14

A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-33

Entact ID:

Date Exposed: 8/11/14

Describe Damage: (8) Scrapes by the Cat 349E and Cat 322C excavator buckets- 1/2×2", 1×8", 1/2×4", 1×48", 3"Ø, 6"Ø, 2"×48", 1×12", Cell 95

Damage Location (ft below top of sheet, inboard side outboard side): 2-15' outboard

Date Repaired: 8/15/14 Partial, 8/21/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-45

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (4) Scrapes by the Cat 349E and 322C excavator buckets - (2) 3"Ø, 1×24", 1/2×12". Cell 91

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: AP-46

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (3) Scrapes by the Cat 349E and 322C excavator buckets - 1×6", 1×12", 1/4"×6". Cell 91

Damage Location (ft below top of sheet, inboard side outboard side): 9-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-47

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (8) Scrapes by the Cat 349E and 322C excavator buckets - (5) 1"Ø, 1×8", 1/2×6", 1/2×12". Cell 91

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-48

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (13) Scrapes by the Cat 349E and 322C excavator buckets - (2) 1/2×18", 2×6", 6×12", (5) 1"Ø, (3) 1/2"Ø, 1×8". Cell 90

Damage Location (ft below top of sheet, inboard side outboard side): 9-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-49

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (8) Scrapes by the Cat 349E excavator bucket- (2) 1"Ø, 2x12", 1/2x12", 1/4x4", 1/4"x8", 1x3", 1x12", Cell 90

Damage Location (ft below top of sheet, inboard side outboard side): 4-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-50

Entact ID:

Date Exposed: 8/18/14

Describe Damage: (11) Scrapes by the Cat 349E and 322C excavator buckets- (3) 1"Ø, 1x12", 1x36", 1x18", 1/4x12", (2) 2x4", 1/2x24", 1/2x3", Cell 90

Damage Location (ft below top of sheet, inboard side outboard side): 4-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 8/21/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-51

Entact ID:

Date Exposed: 8/19/14

Describe Damage: (10) Scrapes by the Cat 349E and 322C excavator buckets- 1/4x4", 1/2x12", 1/2x14", 2"Ø, 1"Ø, 1x18", 1/2x3", 1/2x6", 1/2x6", 1"Ø, 1/2"Ø. Cell 90/89.

Damage Location (ft below top of sheet, inboard side outboard side): 4-15' outboard

Date Repaired: 8/20/14 Partial, 8/21/14 Total

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | Pretrenching and other activities along the western end of Kellogg Street may result in material or sediment washing into the street during storm events. |
| 2 | IA2Q4A1AL8 | Exclusion Zone fencing around the Contamination Reduction Zone on SA-6 South requires maintenance. |
| 3 | IA2Q4A1AL8 | Surcharge material at the west end of the SA-6 South cap area is close to the top of the sheet pile containment and erosion run-off from a storm may result in material washing into the backfill area or onto SA-7. |
| 4 | IA2Q4A1AL8 | Used PPE is being stockpiled in plastic garbage bags at various locations throughout SA-6 South |

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | There are insufficient erosion control measures present between the recently-installed surcharge material on the outside of the SA-6 South hydraulic barrier and the swale in the northwestern corner of SA-6 South. |
| 2 | IA2Q4A1AL8 | Exclusion Zone fencing surrounding the material stockpiles on the south side of the excavation is not continuous and the Exclusion Zone is open on the western perimeter. |
| 3 | IA2Q4A1AL8 | Storm water has accumulated in the secondary containment of the waste oil storage tank. |
| 4 | IA2Q4A1AL8 | Flood control measures are inadequate around the excavation and stockpile areas on SA-6 South. |
| | | |

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that reponsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to $50,000 per violation.

# PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used: All analyte results are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3. SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler. All samples are iced in a cooler during transport to the lab.

**I certify under penalty of law that this document and attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.**

## Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending August 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Submitted to all Parties on July 10, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to Contractor only. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal |
| **DC 2014-8-13** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Submitted to all Parties on August 19, 2014. |
| **DC 2014-9-2** | Revised hydraulic barrier wall alignment adjacent the 72" force main in order to provide a clearance of 25 ft. between the centerline of the 72" force main and the barrier wall as previously agreed with PVSC. | Submitted to all Parties on September 4, 2014. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-09**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from September 1 – September 30, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

WJH:jtc/sgf

## B. SITE OPERATIONS

### 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | |
|---|---|---|---|---|
| | 9/7/14 | 9/14/14 | 9/21/14 | 9/28/14 |
| **Construction Management (AMEC)** | 11 | 11 | 11 | 12 |
| **Engineering (AMEC)** | 1 | 1 | 1 | 1 |
| **Air Monitoring (Emilcott)** | 1 | 1 | 1 | 1 |
| **Security (Securitas)** | 3 | 3 | 3 | 3 |
| **Entact/Subcontractors** | 47 | 49 | 49 | 47 |
| **Arecon/US Ecology Subcontractors** | 1 | 0 | 1 | 1 |
| **ERFS In Situ Treatment** | 1 | 0 | 0 | 0 |
| **Summit Drilling** | 1 | 0 | 0 | 0 |
| **Siemens** | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 0 | 0 | 0 | 0 |
| **Other** | 0 | 0 | 0 | 1 |
| **TOTAL** | **67** | **66** | **67** | **67** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Collected September PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed S-3 Injection/Mass Removal Event #17 in well 088-IW-02.
- Conducted Pre-construction meeting for the Above-grade Demolition of the four designated JCIA Structures on September 4, 2014.
- Issued Limited Notice to Proceedto the JCRA demolition contractor on September 17, 2014.
- Collected groundwater parameter measurements from 15 selected temporary well points associated with the in situ treatment activities at Site 163.
- Abandoned all 57 temporary well points associated with the in situ treatment activities at Site 163.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 2**0**1 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on September 11, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 9/7/14 | 9/14/14 | 9/21/14 | 9/28/14 |
| Avg. Gallons Treated & Discharged (per day) | 77,717 | 76,980 | 77,592 | 76,809 |
| Average Flow (gpm) for Operating Period | 55 | 53 | 55 | 54 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 |
| GWTP InfluentTanks (gal.) | 10,116 | 5,760 | 6,720 | 5,877 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued excavation activities in cells 83-73.
- Continued storm-water management activities.
- Continued delineation activities associated with anomalous material in the southern portion of Cell 105. A summary of the results and boring locations is presented on attached figure.
- On September 23, 2014, an abatement contractor was mobilized to remove a total of 800 sq. ft.of ceramic and mastic ACM from the former footprint of the concrete plant garage.

- Excavated approximately 100 cubic yards of soil outside the temporary sheets as part of the non-chromium remedy.
- Continued installation of the Contingent Groundwater Extraction System Pipe.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

## 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 21.35 | 21.35 |
| **Entact/ Horowith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 20 | 21.33 | 426.68 |
| **Entact/ Montecalvo** | 30 cyd roll-off | Bayshore Recycling | NA | Non Haz Creosote Debris | 3 | 13.01 | 39.03 |

## 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 83-73 |
| **Excavation Completed** | Cell Number(s) 84-76<br>Volume Excavated - Total for Reporting Period: 14,495CY/ Total to Date: 117,122 CY |
| **Backfill in Progress** | Cell Number(s) 104-76 |

## 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | |
|---|---|---|---|---|
| | 9/7/14 | 9/14/14 | 9/21/14 | 9/28/14 |
| <20ppm re-use, CY | 0 | 68 | 721 | 720 |
| Weldon, Import-Tons Screenings | 3,245 | 4,367 | 2,073 | 4,666 |
| Tilcon, Import-Tons DGA | 608 | 0 | 0 | 0 |
| Tilcon, Import Tons – 1.5” Stone | 0 | 254 | 0 | 178 |
| Weldon, Imported Tons - QP | 590 | 1,221 | 1,999 | 0 |
| Weldon, Imported Tons - DGA | 0 | 0 | 0 | 0 |
| Celgene - Loads | 0 | 0 | 0 | 0 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 0 | 309 | 0 |

## E. SURCHARGE OPERATIONS

- Area 1S: Surcharge continued with placement of imported Celgene soils between the subgrade and surcharge design grade. Surcharge placement is approximately 95% complete.
- Area 2S: Surcharging continued from 1S into the western portion of 2S. Surcharge placement consisted of both chromium impacted soils to the design subgrade and imported Celgene soils and is approximately 50% complete.
- Area 3S: Instrumentation installation was completed as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles are located in this area. No Surcharge has been initiated.
- Area 1N: Began Surcharge removal activities on 8/29/14. Surcharge removal activities area approximately 50% complete. Details were provided in the September Surcharge Monitoring Report No. 5.
- Area 2N: Instrumentation Installation 100% complete. Surcharge being removed from Area 1N is being relocated to Area 2N. Surcharge placement is approximately 60% complete.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- A total of 14 pair of sheet pile was driven on SA6 North from Sta14+00 to 14+60.

## G. PERMIT STATUS

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP Waterfront Development | SA-6 North Only | Obtained 6/23/2010 | Not Specified, Est. 3/31/2015 | 6/23/2015 | - |

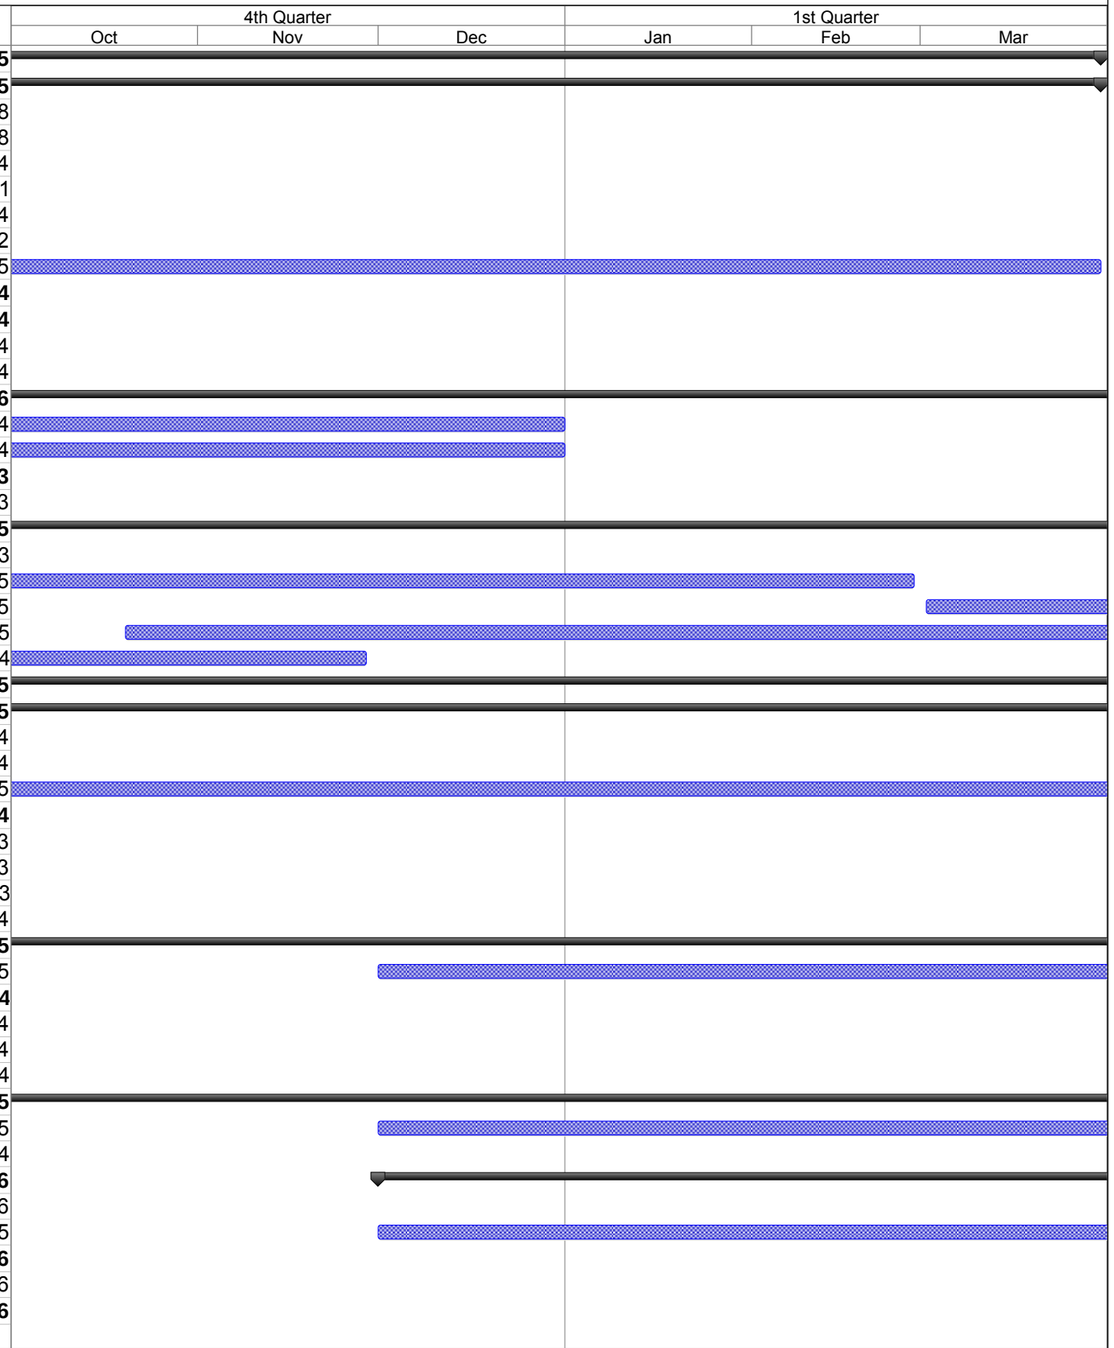
## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Complete final walkthrough of the Jersey City Incinerator Authority structures with representatives from JCIA and JCRA.
- Begin mobilization activities for the above grade demolition of the four designated JCIA Structures.
- Continue placement of surcharge materials in SA-6S Area 1S and 2S.
- Continue off loading of surcharge materials from SA-6N Area 1N.
- Continue placement of surcharge materials in SA-6N Area 2N.
- Continue installation of the contingent groundwater system trench on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Continue excavation activities in SA-6S Cells 71-59.
- Continue stockpiling of presumed <20 mg/kg for additional sampling.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Begin excavation activities associated with Site 163.
- Continue dewatering and storm-water management activities.
- Conduct S-3 Injection/Mass Removal Event No. 18 in injection well to be determined.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.
- Begin cap thickness verification inspections, pore water sampling, bathymetric surveys and biological sampling of SA7 sediments pursuant to Long Term Monitoring Plan.

**ATTACHMENTS:**



1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Lens of Anomalous Material – Supplemental Boring Locations
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-3)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. Groundwater Quality Data Surcharge Monitoring Update
   - Summary of Groundwater Quality Data from GWET Wells
   - Quarterly Water Wells
   - Trichloroethene/Chloroform/Hexavalent Chromium in GWET Wells
9. *Surcharge Monitoring Update (not included in this reporting period)*
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Monitoring Locations
    - Sheet Pile Repair Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 80 Kellogg Ground Water Treatment Plant Discharge Monitoring Report (August 2014)
    - 9/15/14 NJDEP Correspondence re: Administrative Revocation NJDPES Permit #NJG0156311
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (August 2014)
13. SA-6 North & South Design Change Tracking Log

Project: SA-6 Remediation Schedule
Revision 3
Date: Thu 10/2/14

Task  Milestone  Summary  Critical

# Attachment 2: Site Photographs

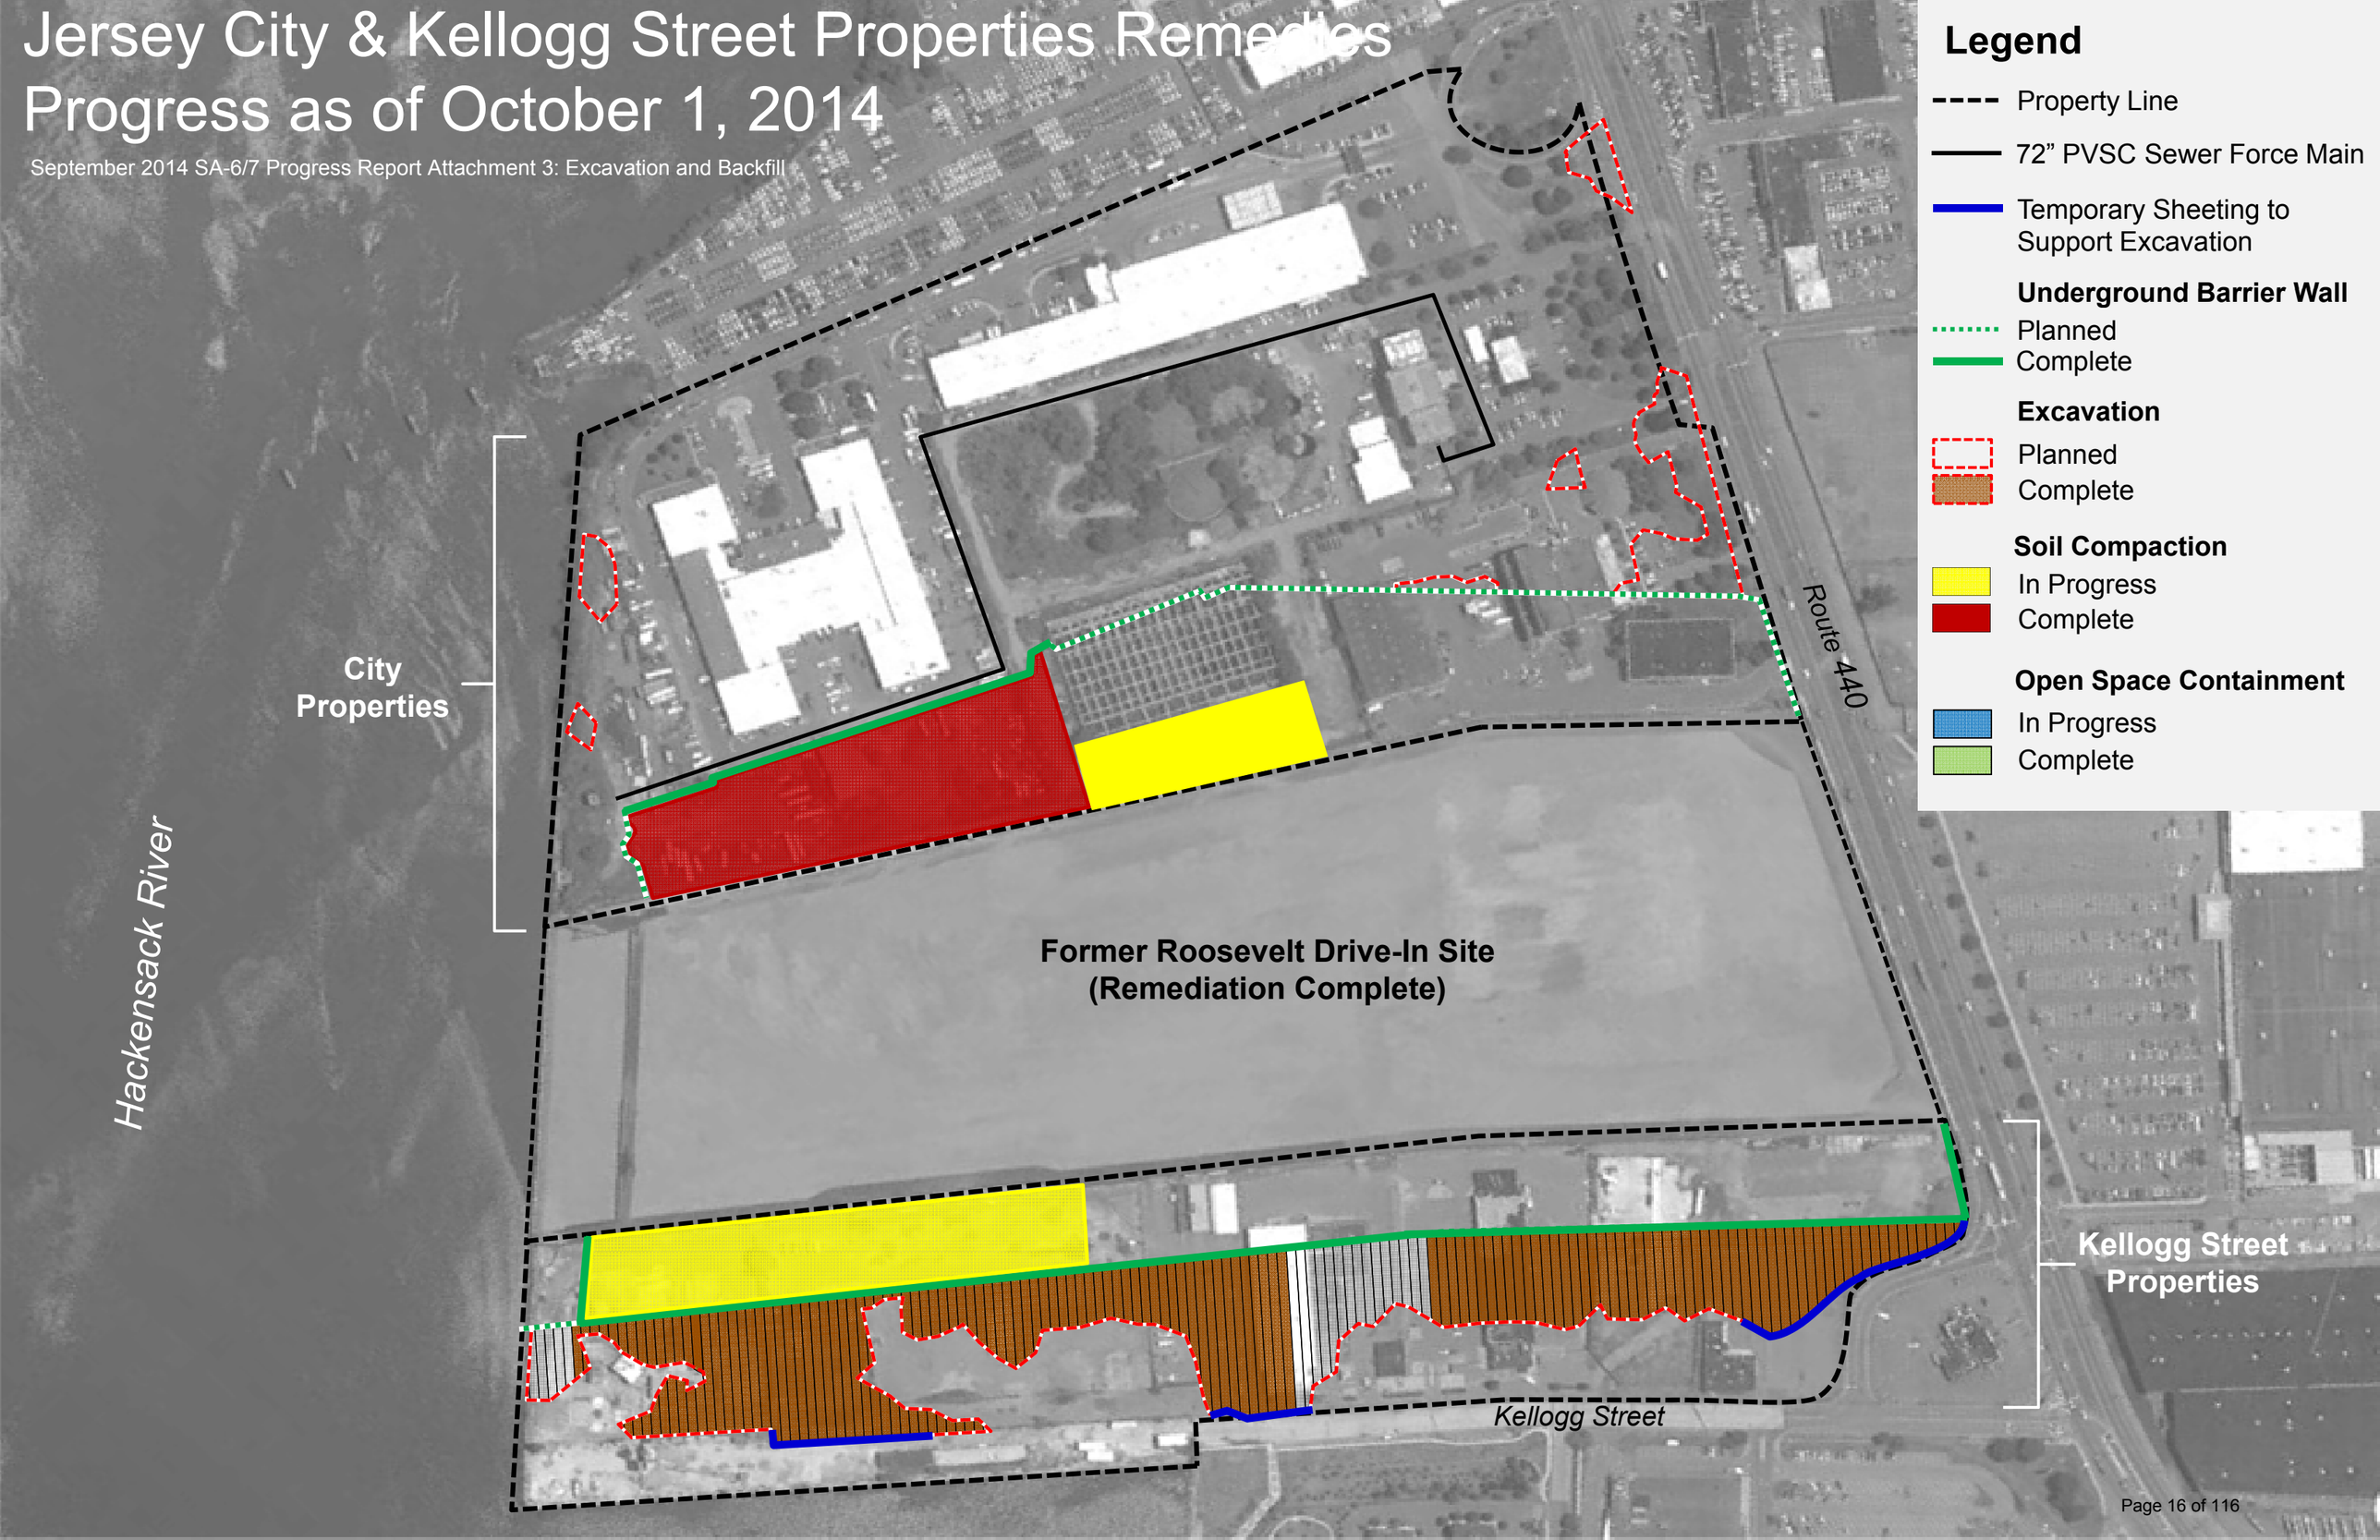
**Site Photograph 1:** Contractor backfilling excavations on Kellogg St. property.

**Site Photograph 2:** Contractor completing excavation segment on Kellogg St. property.

**Site Photograph 3:** Contractor Demolishing a foundation on Kellogg St. property 9/17/14.

**Photograph 4:** Contractor places surcharge soils on Kellogg St Property.

**Site Photograph 5:** Contractor places surcharge soils on Jersey City Property.



**Site Photograph 6:** Loading soils for onsite transport.

| SA-6 South Excavation: Confirmatory Points (Table 1.6) | | | | | | | |
|---|---|---|---|---|---|---|---|
| Bottom Target Coordinates (based on PDI) | | | | | As-built Elevations | | |
| Northing | Easting | Elevation 1 | Sample ID | Corresponding Cell # | Date Obtained | Elevation | Comments |
| 684862.9 | 602228.0 | -6.1 | 134-SB-032R | 84 | 9/4/2014 | -5.6 | Stratum D Reached |
| | | | | | | | |
| | | | | | | | |

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

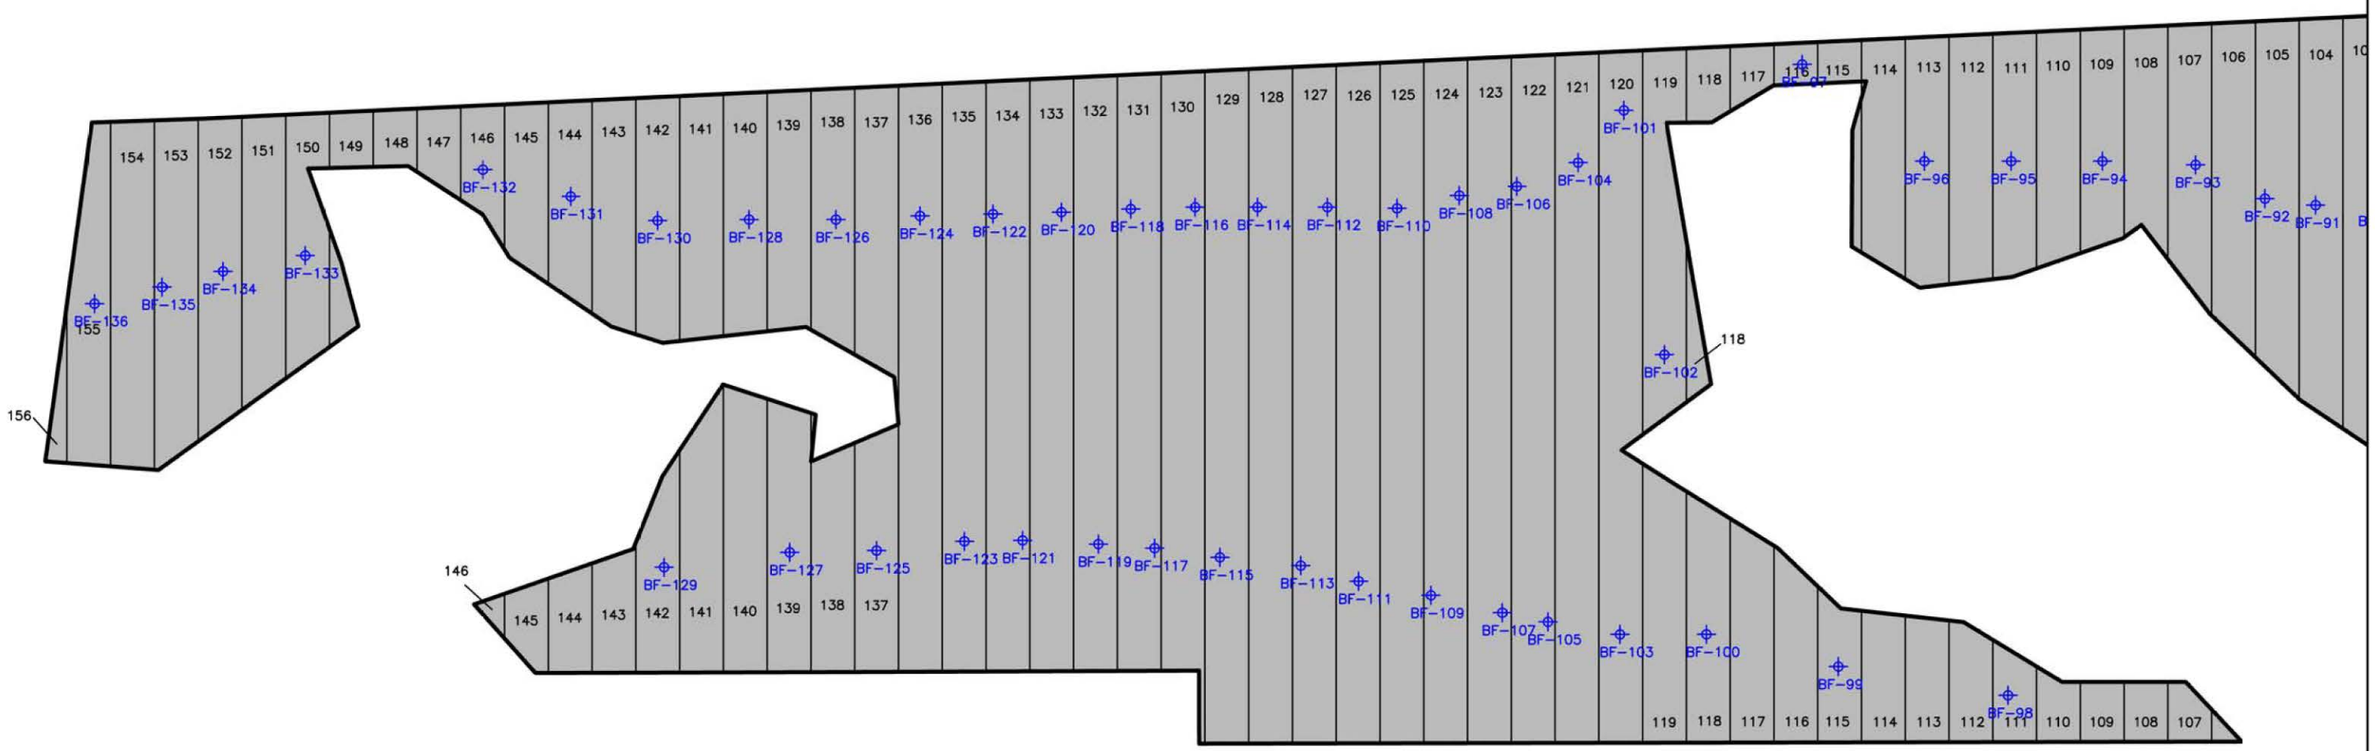
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



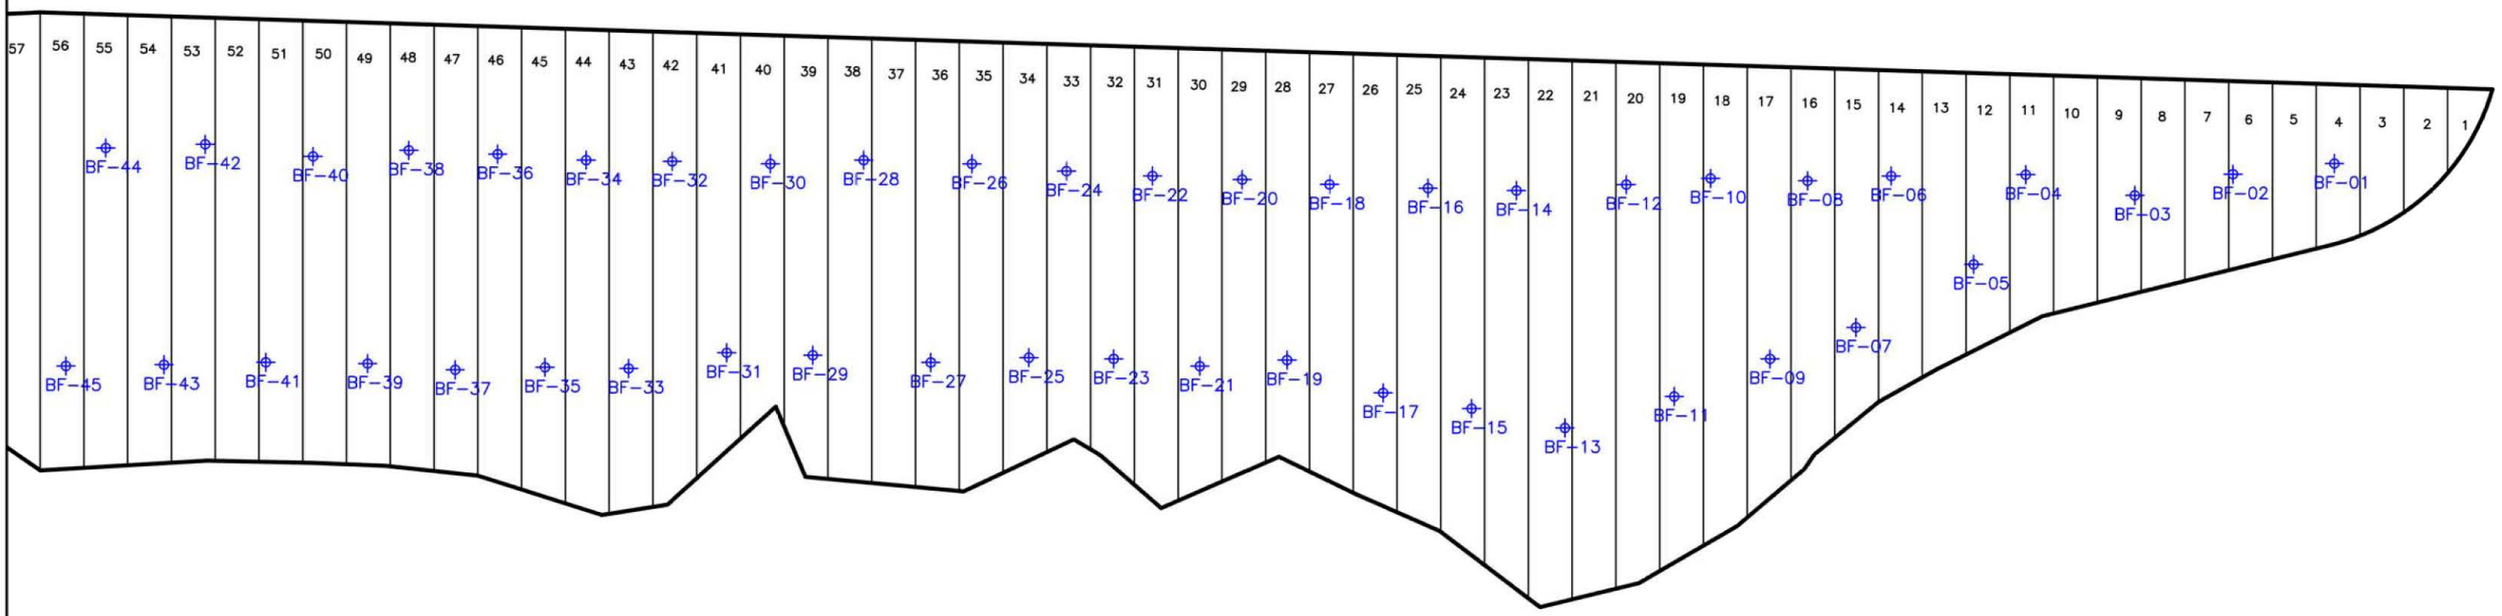
Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

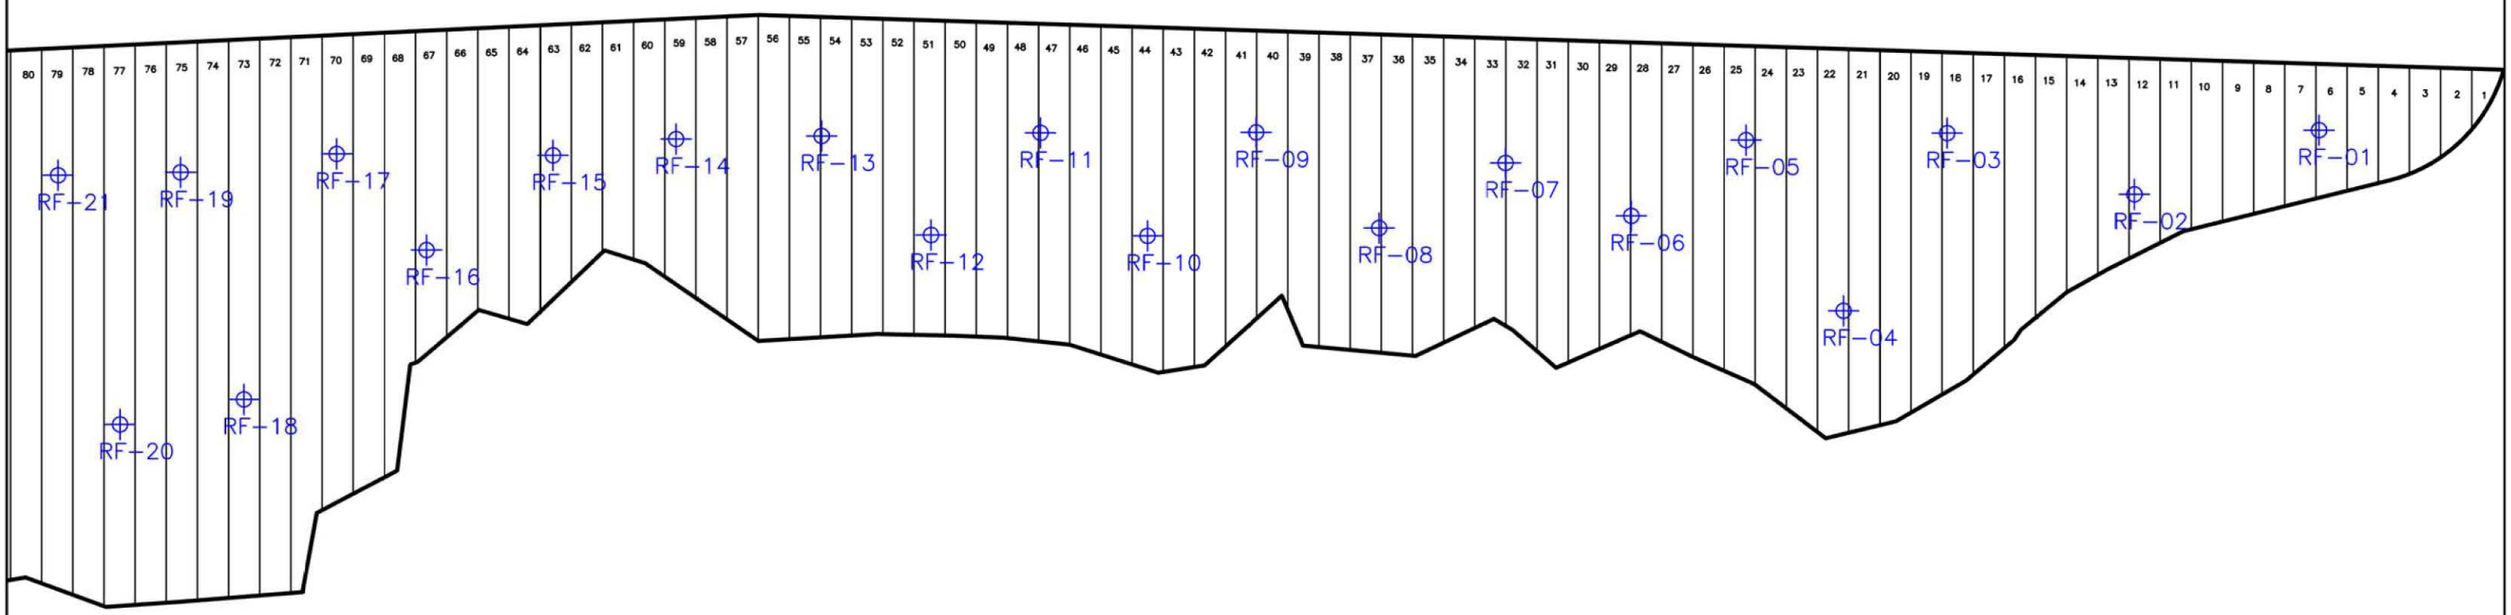
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.
Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b
Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C
Bottom of excavation elevation based on Maser survey data (Center Point elevations)
Sample ID RF-01-01 where:

RF = Reduced Frequency
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

ENTACT 302 Unity Plaza Latrobe, PA 15650

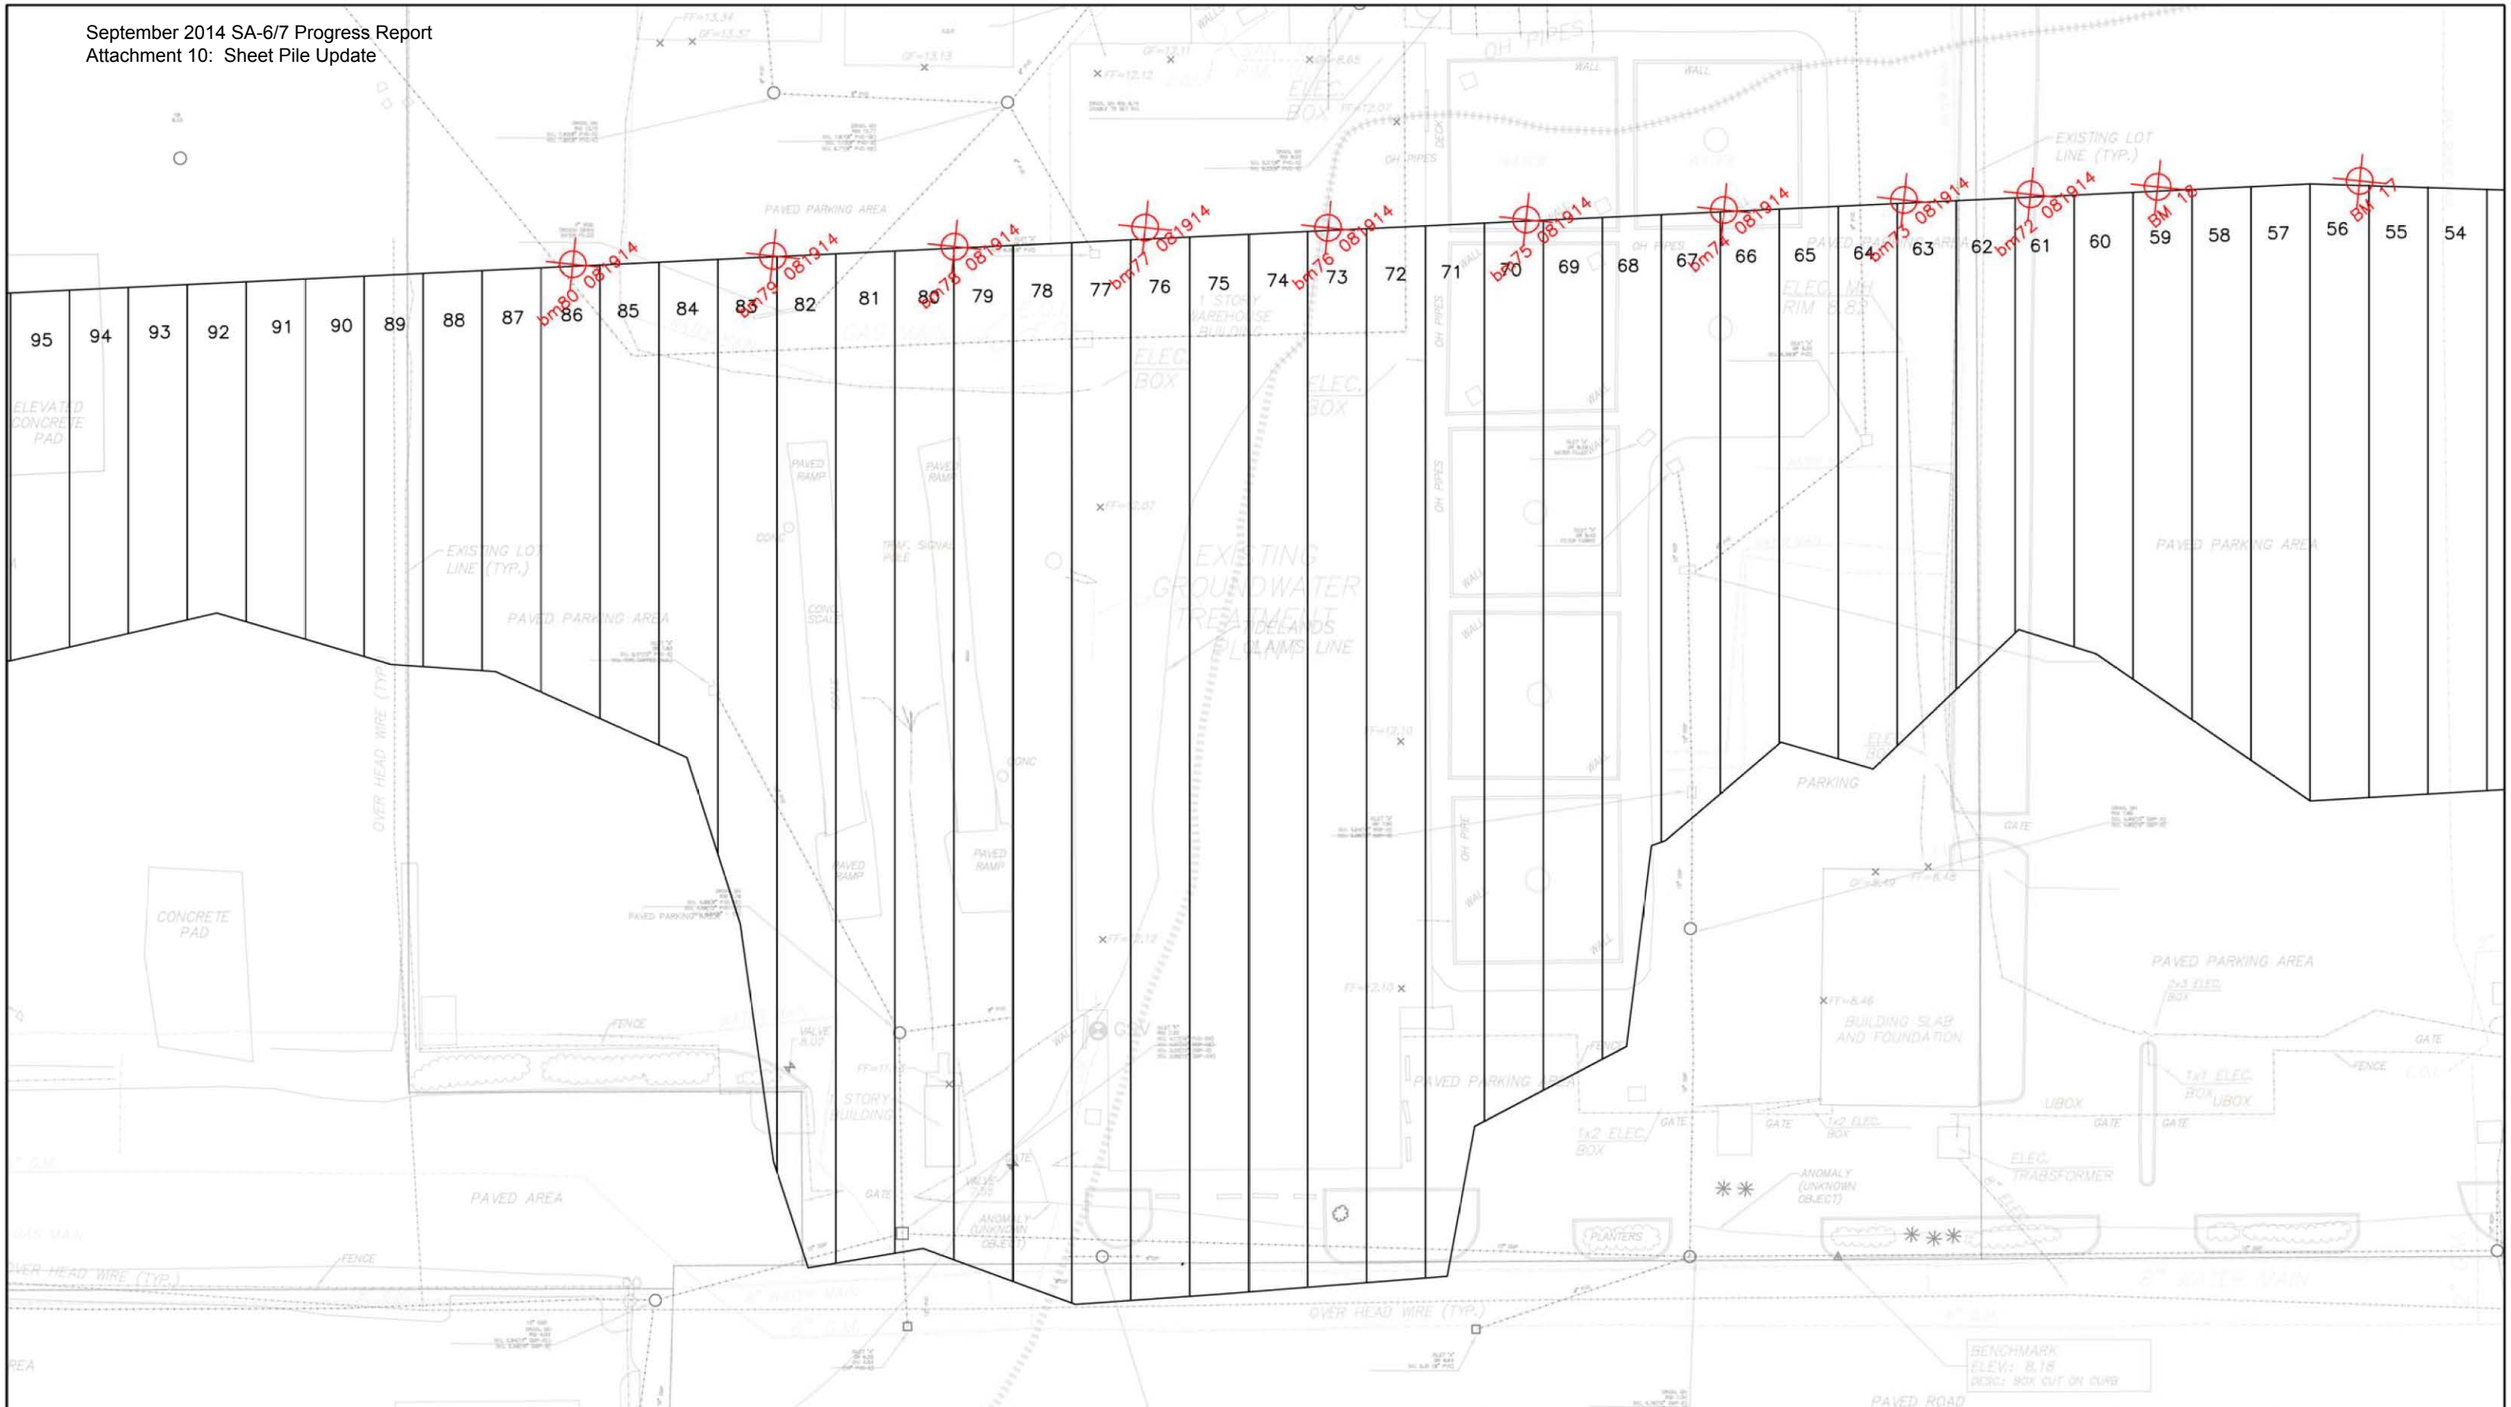
# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the  open space side of the barrier wall with the objective of reducing deflection during excavation.



NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-53

Entact ID:

Date Exposed: 8/19/14

Describe Damage: (15) Scrapes by the Cat 349E and 322C excavator buckets- (10) 1"Ø, 1/2x24, 1x12", 1x6", 1/2x48", 1/2x3". Cell 89

Damage Location (ft below top of sheet, inboard side outboard side): 3-16' outboard

Date Repaired: 8/26/14, 9/11/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 9/11/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-54

Entact ID:

Date Exposed: 8/22/14

Describe Damage: (5) scrapes by the Cat 349E and 322C excavator buckets- 1x48", 1x8", 1x6", 1/2x36", 1x36". Cell 88

Damage Location (ft below top of sheet, inboard side outboard side): 2-16' outboard

Date Repaired: 8/26/14, 9/15/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-55

Entact ID:

Date Exposed: 8/22/14

Describe Damage: (5) Scrapes by the Cat 349E and 322C excavator buckets- 1/2x24", 1/4x48", 5"Ø, 2x4", 1x6". Cell 88

Damage Location (ft below top of sheet, inboard side outboard side): 2-15' outboard

Date Repaired: 8/26/14 Partial, 9/15/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-62

Entact ID:

Date Exposed: 8/26/14

Describe Damage: (15) Scrapes by the Cat 349E and 322C excavator buckets - (6) 1"Ø, 1x18", 1x36", 2x4", 10"Ø, (2) 1x24, 2"x36", 4"Ø, 1/4x84". Cell 86

Damage Location (ft below top of sheet, inboard side outboard side): 6-15' outboard

Date Repaired: 8/29/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-63

Entact ID:

Date Exposed: 8/26/14

Describe Damage: (8) Scrapes by the Cat 349E and 322C excavator buckets - (2) 1/2x6", 2"Ø, 2x18", 1/2"Ø, 10x48", 1x24", 1x5". Cell 86/85

Damage Location (ft below top of sheet, inboard side outboard side): 2-15' outboard

Date Repaired: 8/29/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-64

Entact ID:

Date Exposed: 8/26/14

Describe Damage: (13) scrapes by the Cat 349E and 322C excavator buckets - (4) 1"Ø, 1x24", 1x4", 2x48", 1x36", (2) 2"Ø, (2) 1x3", 12"Ø. Cell 85

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 8/29/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-65

Entact ID:

Date Exposed: 8/27/14

Describe Damage: (15) scrapes by the Cat 349E excavator bucket- (3) 1/2x12", (2) 1x36", 1x12, 10"Ø, 1x120", 2"Ø, 24"Ø, 1x18", 1/4x60", 1x3", (2) 1/2x6", Cell 85

Damage Location (ft below top of sheet, inboard side outboard side): 4-16' outboard

Date Repaired: 8/29/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14 Total

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-66

Entact ID:

Date Exposed: 8/27/14

Describe Damage: (9) scrapes by the Cat 349E and 322C excavator buckets - 1x48", 1x36", (4) 1x6", (2) 1x3"), 2"Ø. Cell 85/84

Damage Location (ft below top of sheet, inboard side outboard side): 1-15' outboard

Date Repaired: 9/4/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14 Total

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-67

Entact ID:

Date Exposed: 8/29/14

Describe Damage: (7) Scrapes by the Cat 349E and 322C excavator buckets- 1x96", 1x84", 1x36", (2) 2"Ø, 1x6", 1"Ø. Cell 84

Damage Location (ft below top of sheet, inboard side outboard side): 3-15' outboard

Date Repaired: 9/4/14 Partial, 9/15/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" Paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 9/15/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

## Notice of Administrative Revocation

September 15, 2014

JOHN MORRIS
HONEYWELL INTERNATIONAL INC
101 COLUMBIA RD
MORRISTOWN, NJ 07962

RE: Administrative Revocation
Discharge Category(s): BGR
NJPDES Permit #NJG0156311
HONEYWELL STUDY AREA 7
Jersey City, Hudson County

Dear Mr. Morris:

Please be advised that the Department has confirmed that you are no longer performing any activities requiring a permit under the New Jersey Pollutant Discharge Elimination System (NJPDES) permitting program. Therefore, your NJPDES permit is administratively revoked effective 04/29/2014.

The Water Pollution Control Act prohibits the discharge of pollutants except as authorized by a NJPDES permit. If you plan to discharge pollutants to the surface or ground waters of the state of New Jersey, you must submit a new application at least 180 days before proposing to discharge.

If you have any questions please contact me at (609) 984-4428 or via email at Terry.Beym@dep.nj.gov.

Sincerely,

Terry Beym

Terry Beym, Acting Section Chief
Office of Permit Management

# NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM

The New Jersey Department of Environmental Protection hereby grants you a NJPDES permit for the facility/activity named in this document. This permit is the regulatory mechanism used by the Department to help ensure your discharge will not harm the environment. By complying with the terms and conditions specified, you are assuming an important role in protecting New Jersey's valuable water resources. Your acceptance of this permit is an agreement to conform with all of its provisions when constructing, installing, modifying, or operating any facility for the collection, treatment, or discharge of pollutants to waters of the state. If you have any questions about this document, please feel free to contact the Department representative listed in the permit cover letter. Your cooperation in helping us protect and safeguard our state's environment is appreciated.

# PRETREATMENT MONITORING REPORT

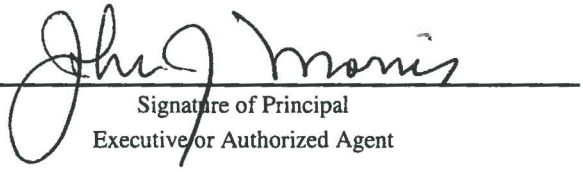
Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used:

All analyte results are compliant (see attached report).



Explain Method for preserving samples: Monthly metals are preserved with HNO3.

SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler.

All samples are iced in a cooler during transport to the lab.

# Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending September 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Submitted to all Parties on July 10, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to all Parties on August 26, 2014. Responded on September 11, 2014 to Plaintiffs' September 9, 2014 request for clarification. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal |
| **DC 2014-8-13** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Submitted to all Parties on August 19, 2014. |
| **DC 2014-9-2** | Revised hydraulic barrier wall alignment adjacent the 72" force main in order to provide a clearance of 25 ft. between the centerline of the 72" force main and the barrier wall as previously agreed with PVSC. | Submitted to all Parties on September 4, 2014. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

Lambertville, NJ 08530

**Subject:** **Riverkeeper et al v. Honeywell International Inc. et al**
**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-10**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from October 1 – October 31, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

## B. SITE OPERATIONS

### 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | | |
|---|---|---|---|---|---|
| | 10/5/14 | 10/12/14 | 10/19/14 | 10/26/14 | 11/2/14 |
| **Construction Management (AMEC)** | 11 | 11 | 11 | 12 | 12 |
| **Engineering (AMEC)** | 1 | 1 | 1 | 1 | 1 |
| **Air Monitoring (Emilcott)** | 1 | 1 | 1 | 1 | 1 |
| **Security (Securitas)** | 3 | 3 | 3 | 3 | 3 |
| **Entact/Subcontractors** | 50 | 48 | 47 | 43 | 44 |
| **Arecon/US Ecology Subcontractors** | 1 | 1 | 1 | 1 | 1 |
| **Evoqua** | 1 | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 0 | 0 | 0 | 0 | 0 |
| **Other** | 0 | 0 | 0 | 0 | 0 |
| **TOTAL** | **68** | **66** | **65** | **62** | **63** |

### 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6S and SA-6N.
- Collected October PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed S-3 Injection/Mass Removal Event #18 in well 088-IW-03.
- Issued Unrestricted Notice to Proceed to the JCIA demolition contractor on October 7, 2014.
- Began mobilization activities at the JCIA demolition project on October 9, 2014.
- Environ and Aquasurvey representatives performed long term monitoring activities in accordance with the sediment monitoring plan, including the bathometric survey, cap thickness verifications, sediment profile imaging (SPI), biological sampling, and pore water sampling.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on October 14, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | | |
|---|---|---|---|---|---|
| | 10/5/14 | 10/12/14 | 10/19/14 | 10/26/14 | 11/2/14 |
| Avg. Gallons Treated & Discharged (per day) | 76,883 | 75,961 | 77,733 | 76,422 | 77,950 |
| Average Flow (gpm) for Operating Period | 55 | 53 | 55 | 53 | 54 |
| Avg. Hours of Plant Operation | 23 | 24 | 24 | 24 | 24 |
| GWTP Influent Tanks (gal.) | 10,900 | 7,821 | 12,463 | 11,147 | 14,262 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Completed excavation activities in cells 73-59.
- Continued storm-water management activities.
- On October 8, 2014 we collected a soil sample from a visually anomalous material observed in a thin lens located in the southern portion of Cell 70. Laboratory analysis received on October 16, 2014 indicated the result was 6.5 mg/kg. No further action was required.
- Began Site 163 excavation activities.
- Continued installation of the Contingent Groundwater Extraction Trench Pipe.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 20.0 | 20.0 |
| **Entact/ Horwith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 0 | 0 | 0 |
| **Entact/ Montecalvo** | 30 cyd roll-off | Bayshore Recycling | NA | Non Haz Creosote Debris | 3 | 14.14 | 42.42 |

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Entact/ FCI** | 30 cyd roll off | Tullytown, Pa | WM Grows | ACM Tile & Mastic | 1 | 12.0 | 12.0 |
| **Entact/ FCI** | Tri-axle Dump | Kearny, NJ | NJ Meadowlands | Dieldrin Stained Concrete | 4 | 21.12 | 84.5 |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | TCE Impacted Soil | 9 | 26.1 | 235.6 |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | Mercury Impacted Soil | 3 | 26.36 | 79.09 |

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Under Excavation** | Cell Number(s) 73-59 |
| **Excavation Completed** | Cell Number(s) 75-59<br>Volume Excavated - Total for Reporting Period: 34,191 CY/ Total to Date: 151,313 CY |
| **Backfill in Progress** | Cell Number(s) 104-59 |

### 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | | |
|---|---|---|---|---|---|
| | **10/5/14** | **10/12/14** | **10/19/14** | **10/26/14** | **11/2/14** |
| <20ppm re-use, CY | 878 | 3,309 | 2,633 | 248 | 270 |
| Weldon, Import-Tons Screenings | 103 | 0 | 0 | 0 | 3,946 |
| Tilcon, Import-Tons DGA | 688 | 1,719 | 994 | 1,876 | 1,229 |
| Tilcon, Import Tons – 1.5” Stone | 317 | 26 | 0 | 0 | 101 |
| Weldon, Imported Tons - QP | 0 | 0 | 207 | 0 | 0 |
| Weldon, Imported Tons - DGA | 0 | 0 | 0 | 0 | 0 |
| –Tilcon, Imported 6”-8” stone | 0 | 0 | 0 | 0 | 92.08 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 0 | 0 | 50 | 0 |

## E. SURCHARGE OPERATIONS

- Area 1S: Completed placement of imported Celgene soils between the sub-grade and surcharge design grade on the eastern portion. Began offloading western 100 ft. of 1S on October 24, 2014.
- Area 2S: Surcharging continued on Area 2S. Surcharge placement consisted of both chromium impacted soils to the design sub-grade and both imported Celgene and Novartis soils. Surcharge placement is approximately 80% complete.

- Area 3S: Instrumentation installation was completed as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles are located in this area. No surcharge has been initiated.
- Area 1N: Continued surcharge removal activities. Surcharge removal activities area approximately 75% complete. Details were provided in the October 2014 Surcharge Monitoring Report No. 5.
- Area 2N: Instrumentation Installation 100% complete. Surcharge being removed from Area 1N is being relocated to Area 2N. Surcharge placement is approximately 95% complete.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Began grouting angles of 19P1 Sheets.

## G. PERMIT STATUS

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |

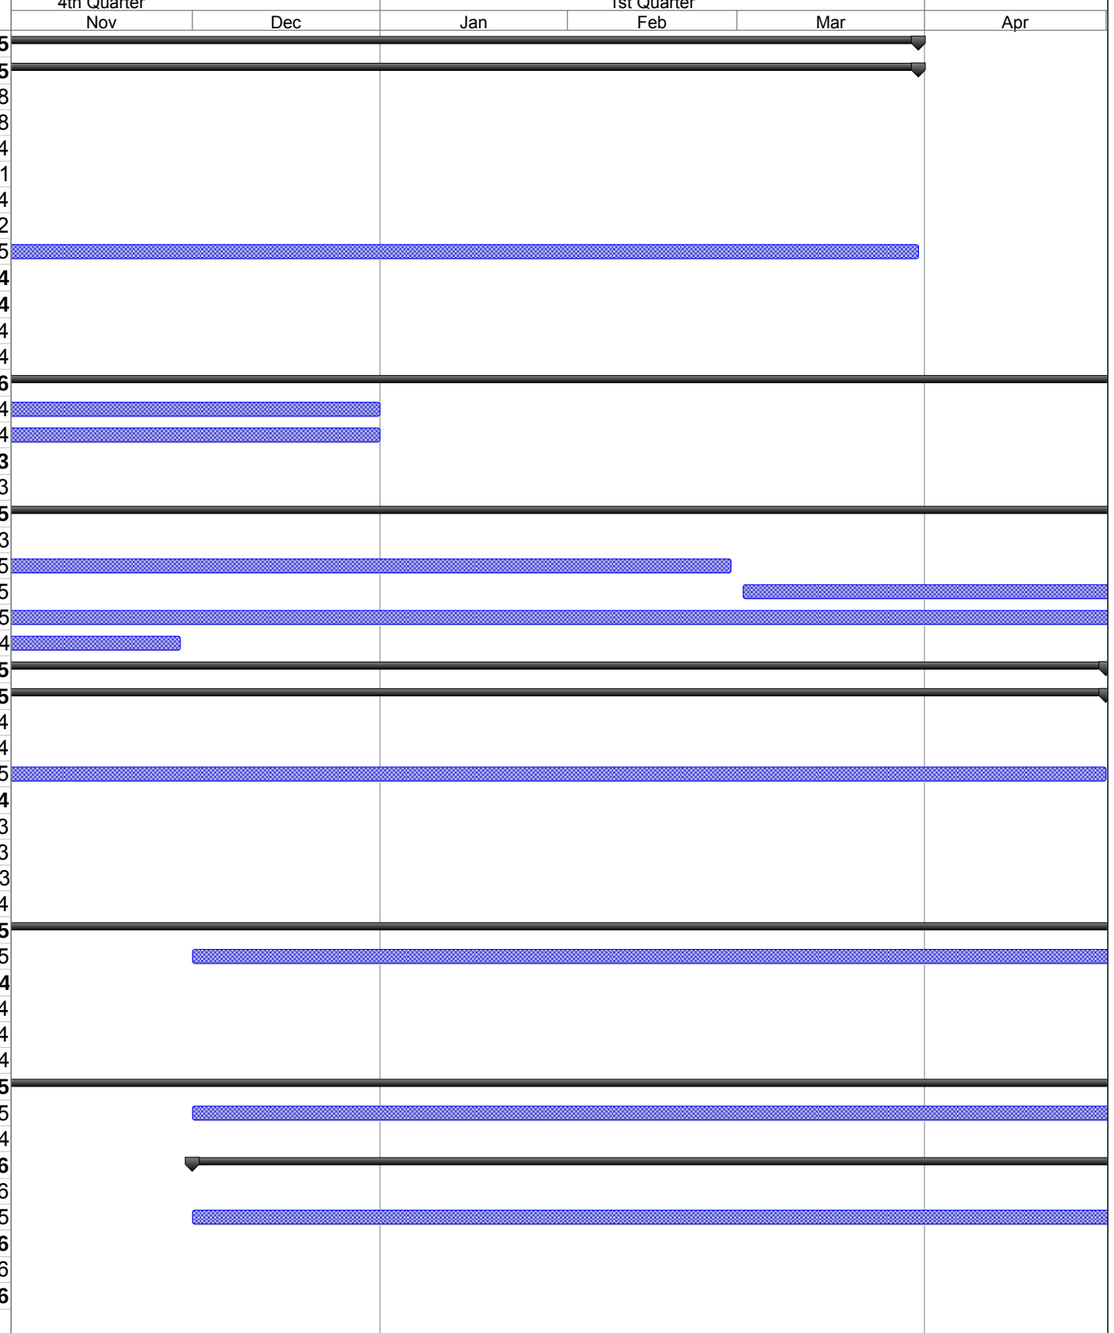
## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Continue JCIA Structures Demolition activities to include site preparation and abatement activities.
- Continue placement of surcharge materials in SA-6S Area 2S.
- Begin placement of surcharge material in SA-6S Area 3S.
- Continue off loading of surcharge materials from SA-6N Area 1N.
- Initiate off loading of surcharge materials from SA-6S Area 1S.
- Complete placement of surcharge materials in SA-6N Area 2N.
- Continue installation of the contingent groundwater system trench on SA-6S.
- Continue dewatering of well points/sumps installed within the SA-6S open space area.
- Complete Site 163 excavation and backfilling activities.
- Complete excavation of standalone Areas 41 and 43.
- Begin excavation of the lens of anomalous material proximate to Cell 104.
- Continue loadout and transportation and disposal activities at SA-6S.
- Continue backfill placement and associated compaction testing activities at SA-6S.
- Continue dewatering and storm-water management activities.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.
- Complete sediment long term monitoring activities and final report preparation.



**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Dewatering Data (Headers)
   - SA-6 South Deep Well Data (DW-3)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. *Groundwater Quality Data Surcharge Monitoring Update (not included in this reporting period)*
9. Surcharge Monitoring Update
   - Figure C1: Instrumentation Location Plan 2N
   - Figure G1: Instrumentation Location Plan 2S
10. Sheet Pile Update
    - Hydraulic Barrier Wall Plan & Profile
    - Sheet Deflection Along Open Excavation
    - Sheet Monitoring Locations
    - Sheet Pile Repair Log
    - Sheet Pile Angle Grout Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (September 2014)
13. SA-6 North & South Design Change Tracking Log

# Attachment 1: Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start | Finish |
|---|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** | **Mon 3/30/15** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** | **Mon 3/30/15** |

Project: SA-6 Remediation Schedule
Revision 3
Date: Tue 11/4/14

Task Milestone Summary Critical

# Attachment 2: Site Photographs

**Site Photograph 1:** Compacting backfill north of Kellogg Street.

**Site Photograph 2:** Contractor begins backfilling with a geotextile.

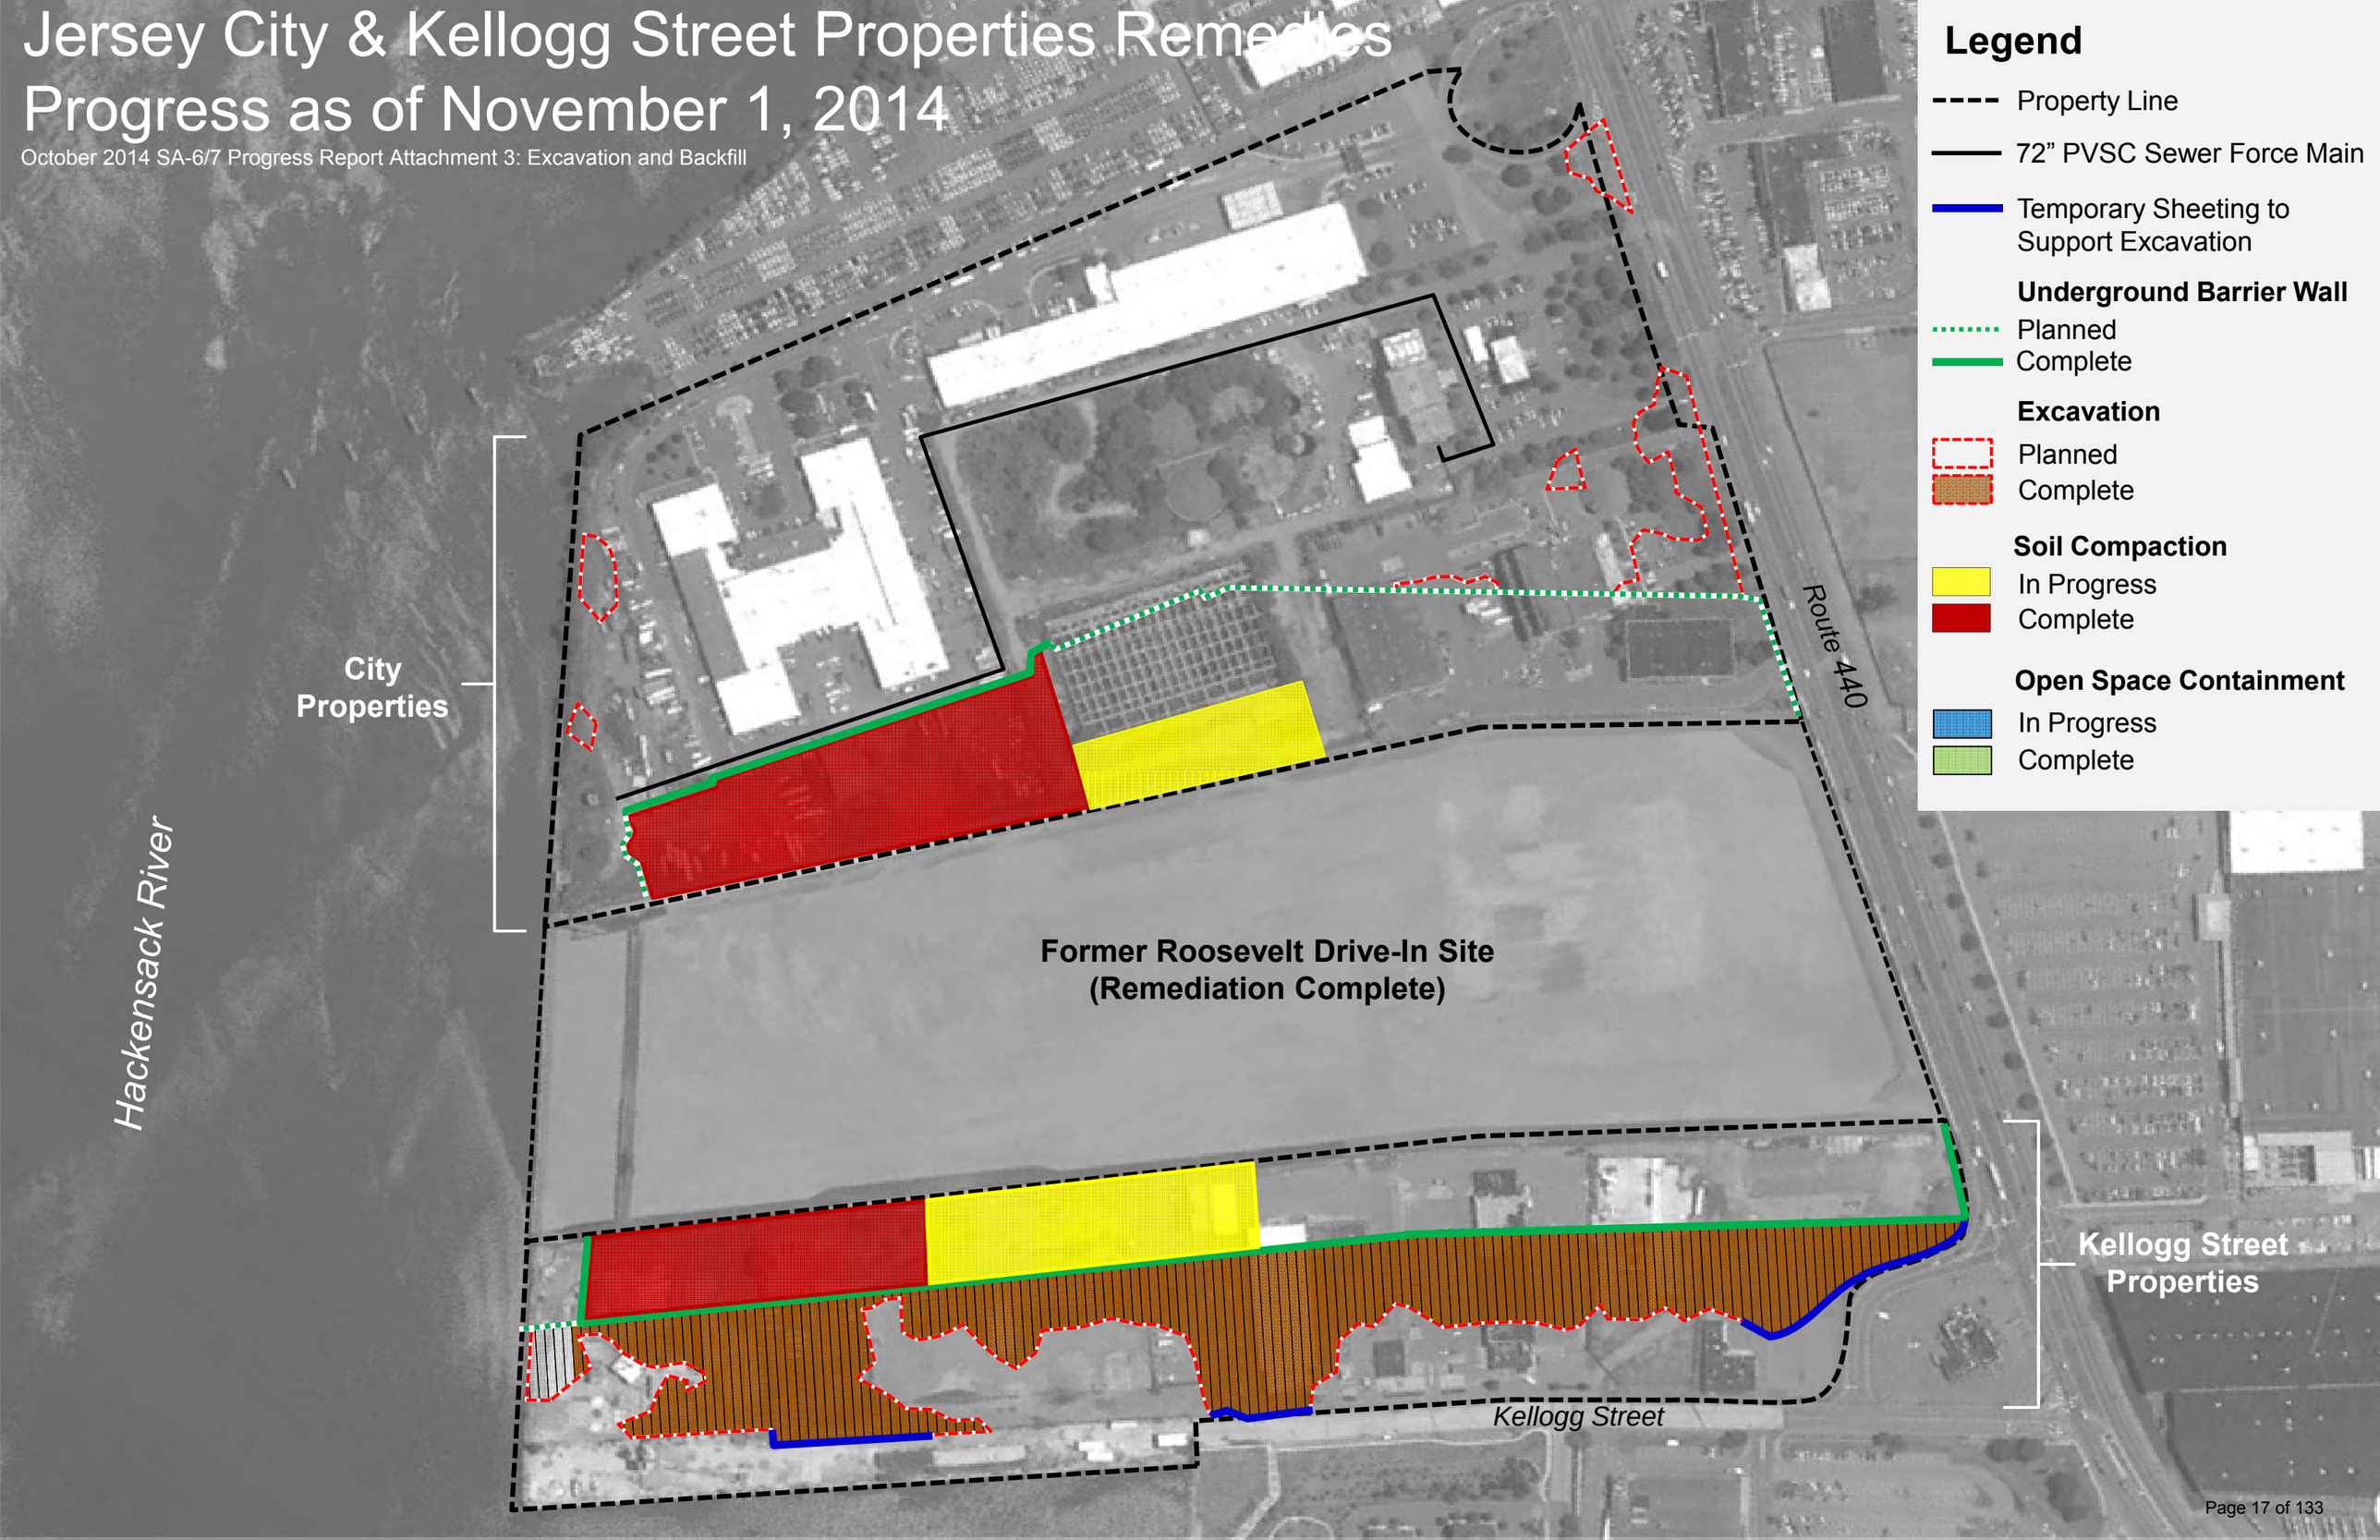
**Site Photograph 3:** Contractor constructs a new bermed area.

**Photograph 4:** Contractor loads surcharge material from the stockpile**.**

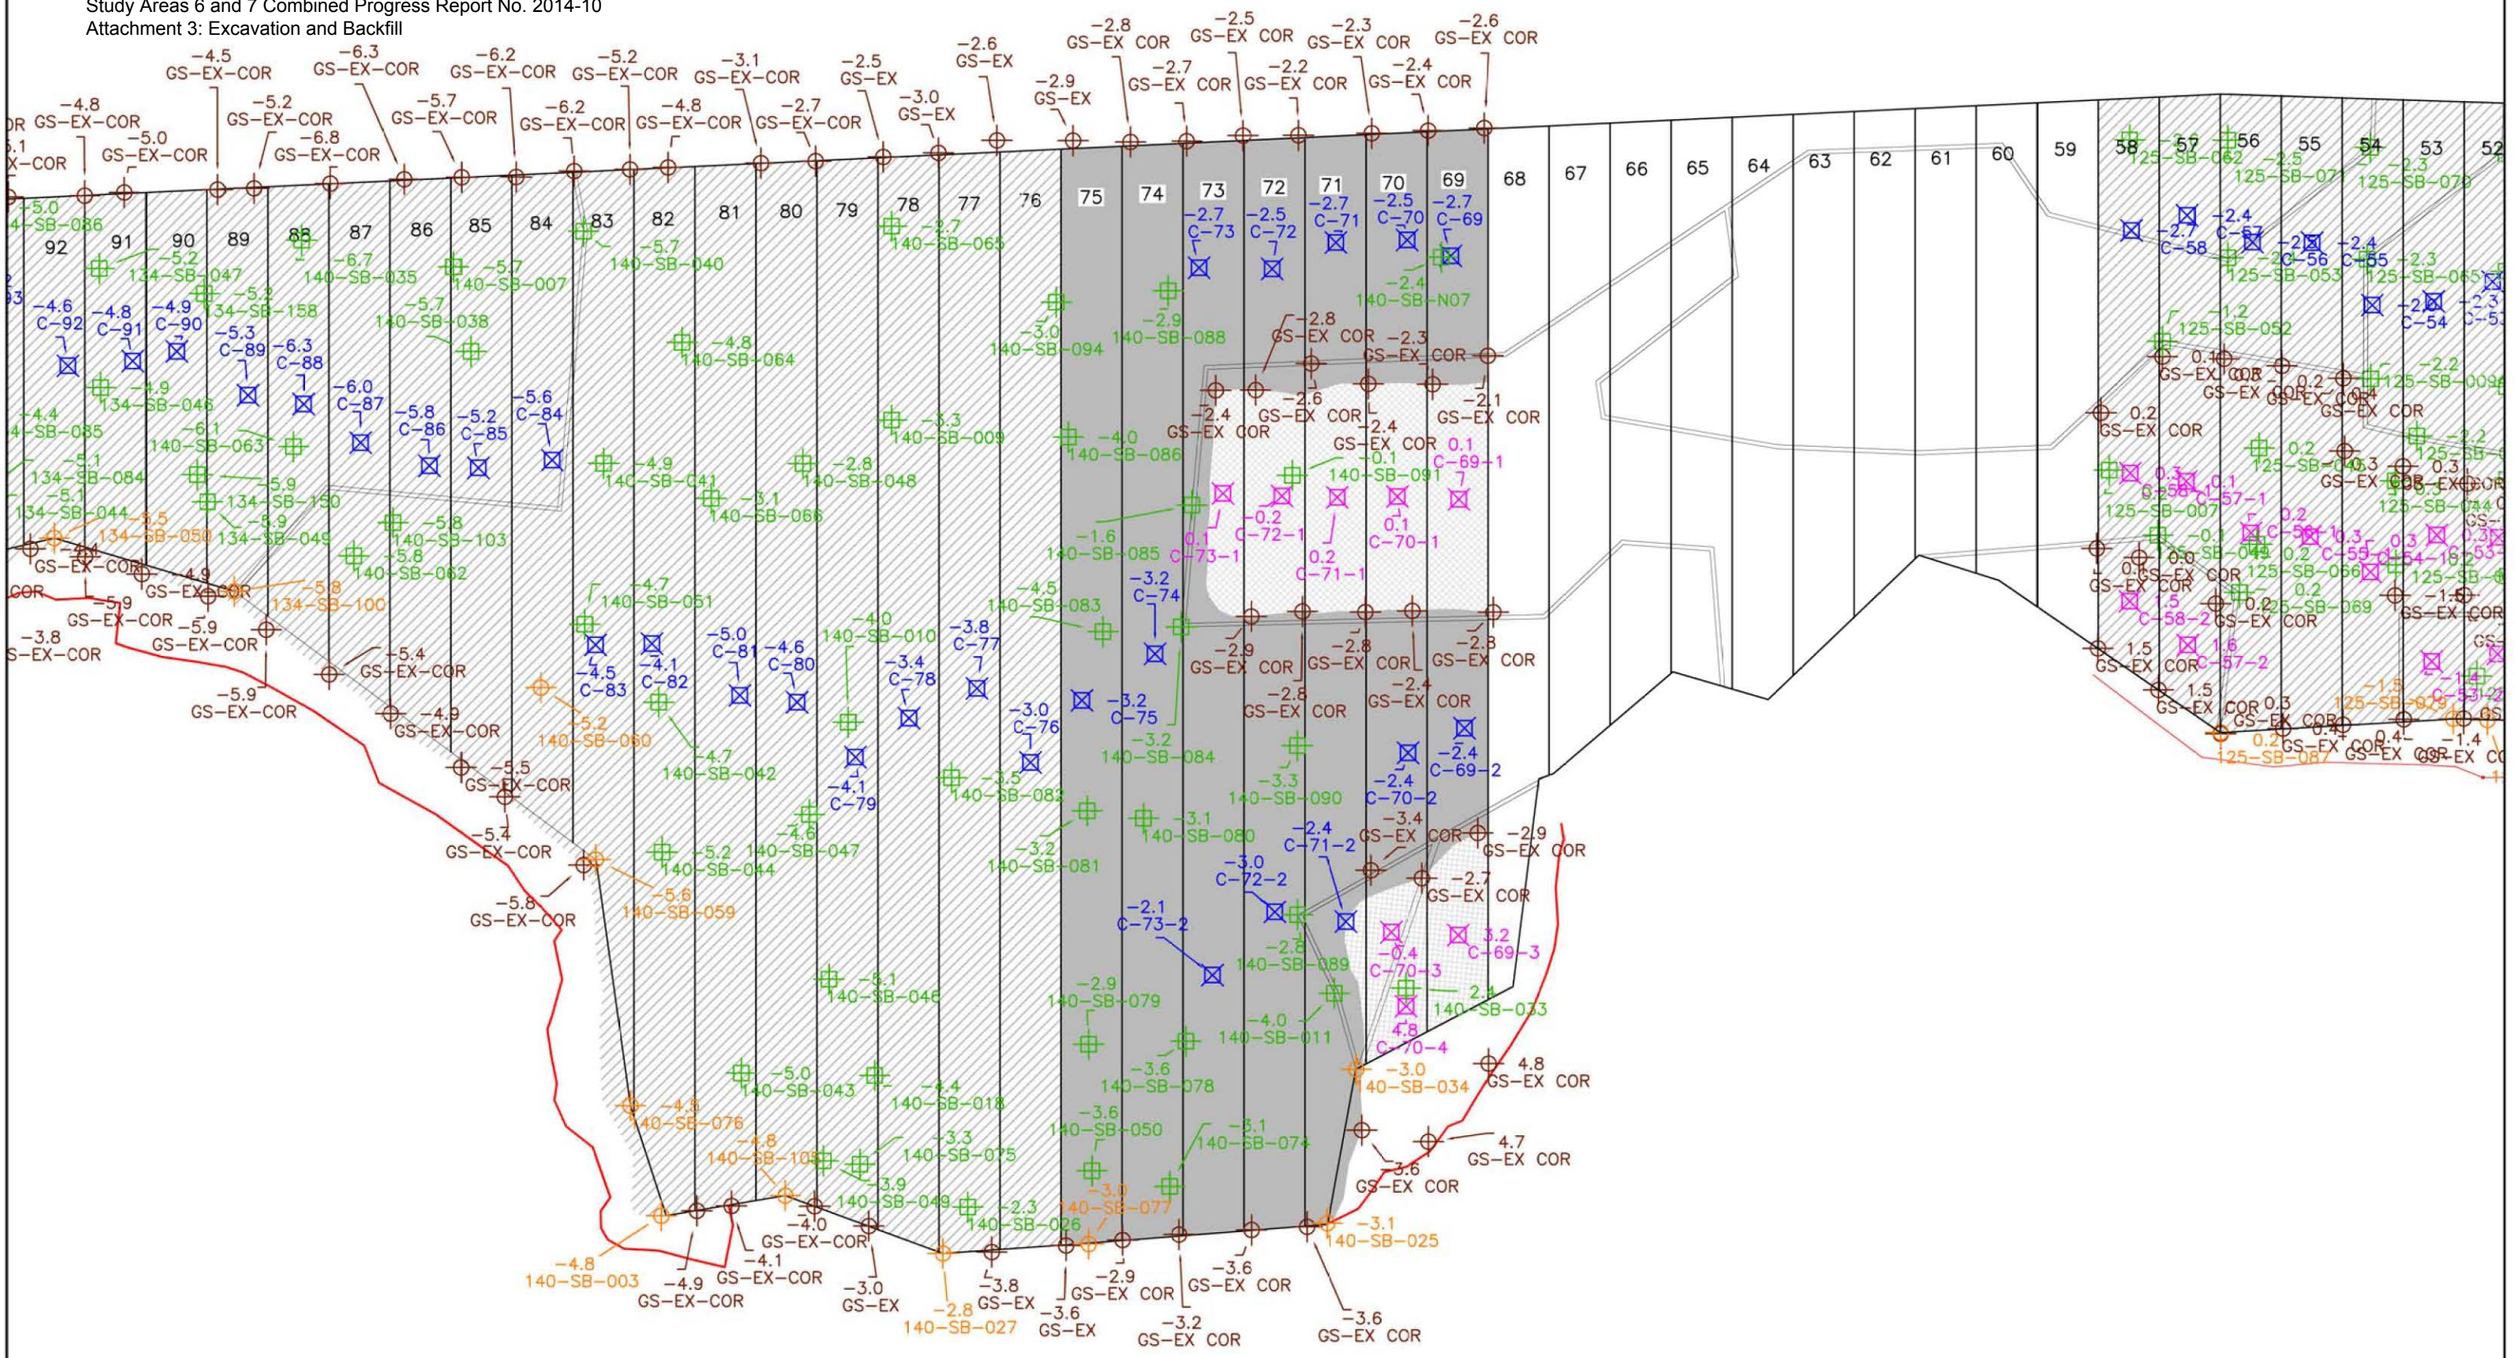
**Site Photograph 5:** Contractor places geotextile on the excavation bottom.

**Site Photograph 6:** Cutting former wooden pilings.

**Site Photograph 7:** Excavation continues in Kellogg Street properties.



**Site Photograph 8:** Separation fabric placed for surcharge.



## Attachment 3: Excavation and Backfill

- Progression Chart
- Excavation Bottom Elevations
- Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
- Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
- Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)

| **CC:** | Kurt Gimbel – ENTACT |
| | Keith Goisse – ENTACT |
| | Jim Hosgood – ENTACT |
| **Project Number/Title:** | E8140C/Honeywell SA6 North and South |
| **Transmittal Title:** | Survey Data and Verification |
| | Cells 75-69 |
| **Submission Date:** | October 21, 2014 |

**Documents Attached:**

1) Excavation Confirmatory Points (Maser Consulting P.A.)
2) Excavation Bottom Elevations
3) Excavation Progress Map

**Survey Data Verification:**

Entact verifies that Maser Consulting P.A. has surveyed the bottom of excavations and that the final excavation grade(s) are at or below the design excavation grades throughout the corresponding excavation cells.

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

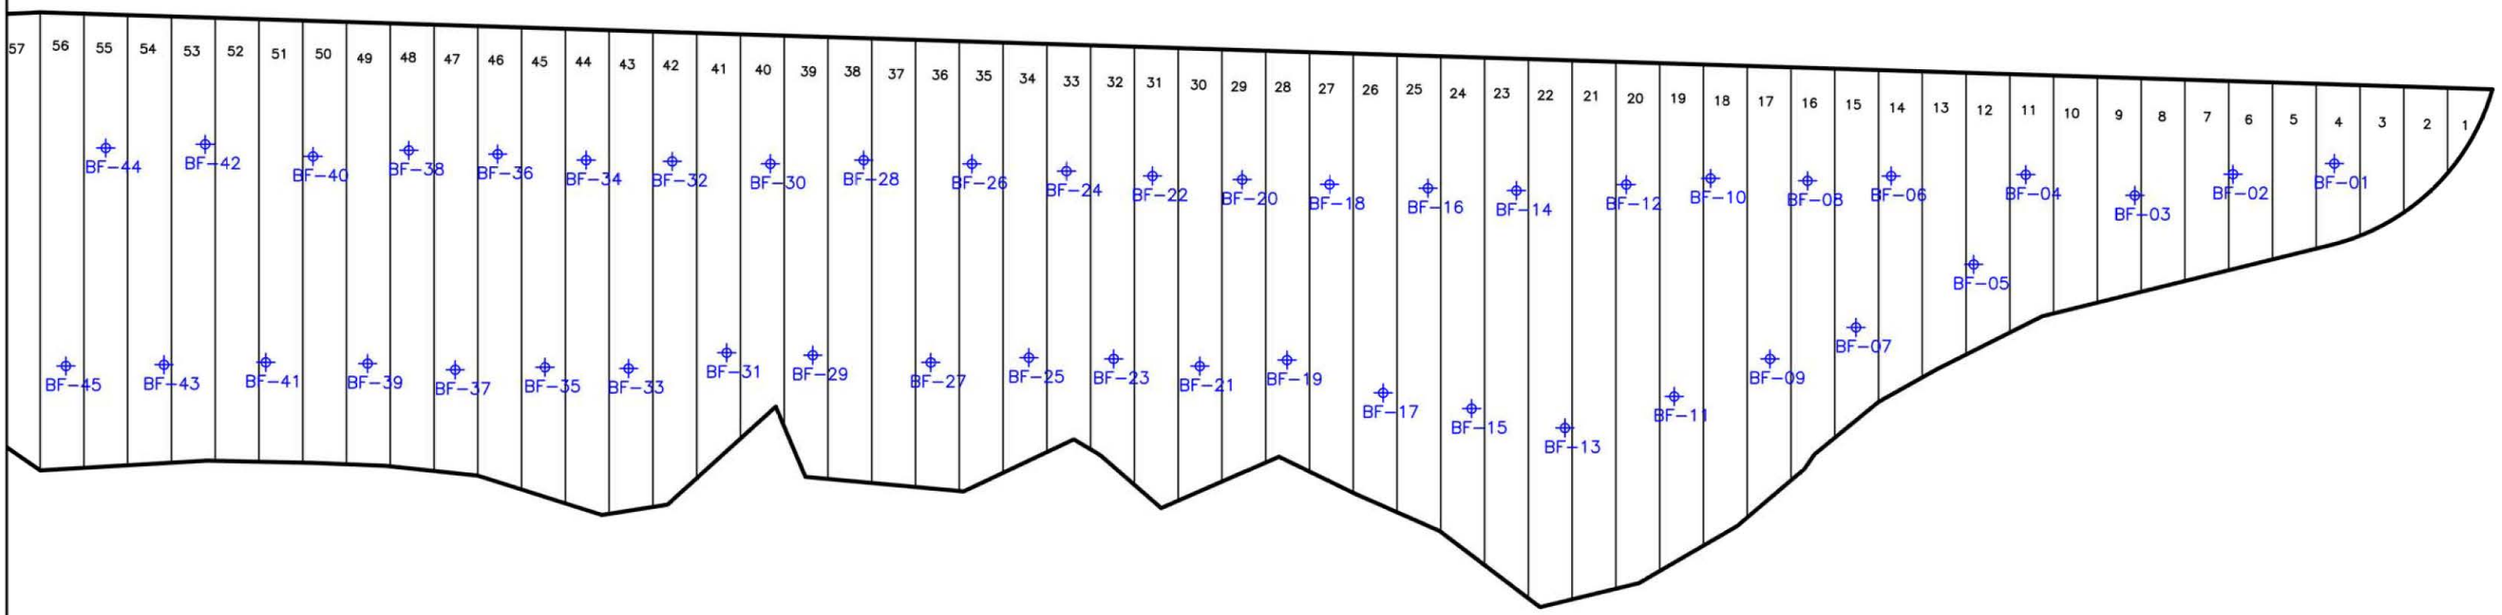
***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Maximum Dry Density for Weldon LH Screenings based on Vertical V Laboratory Report No. 12643 dated 9/29/14.



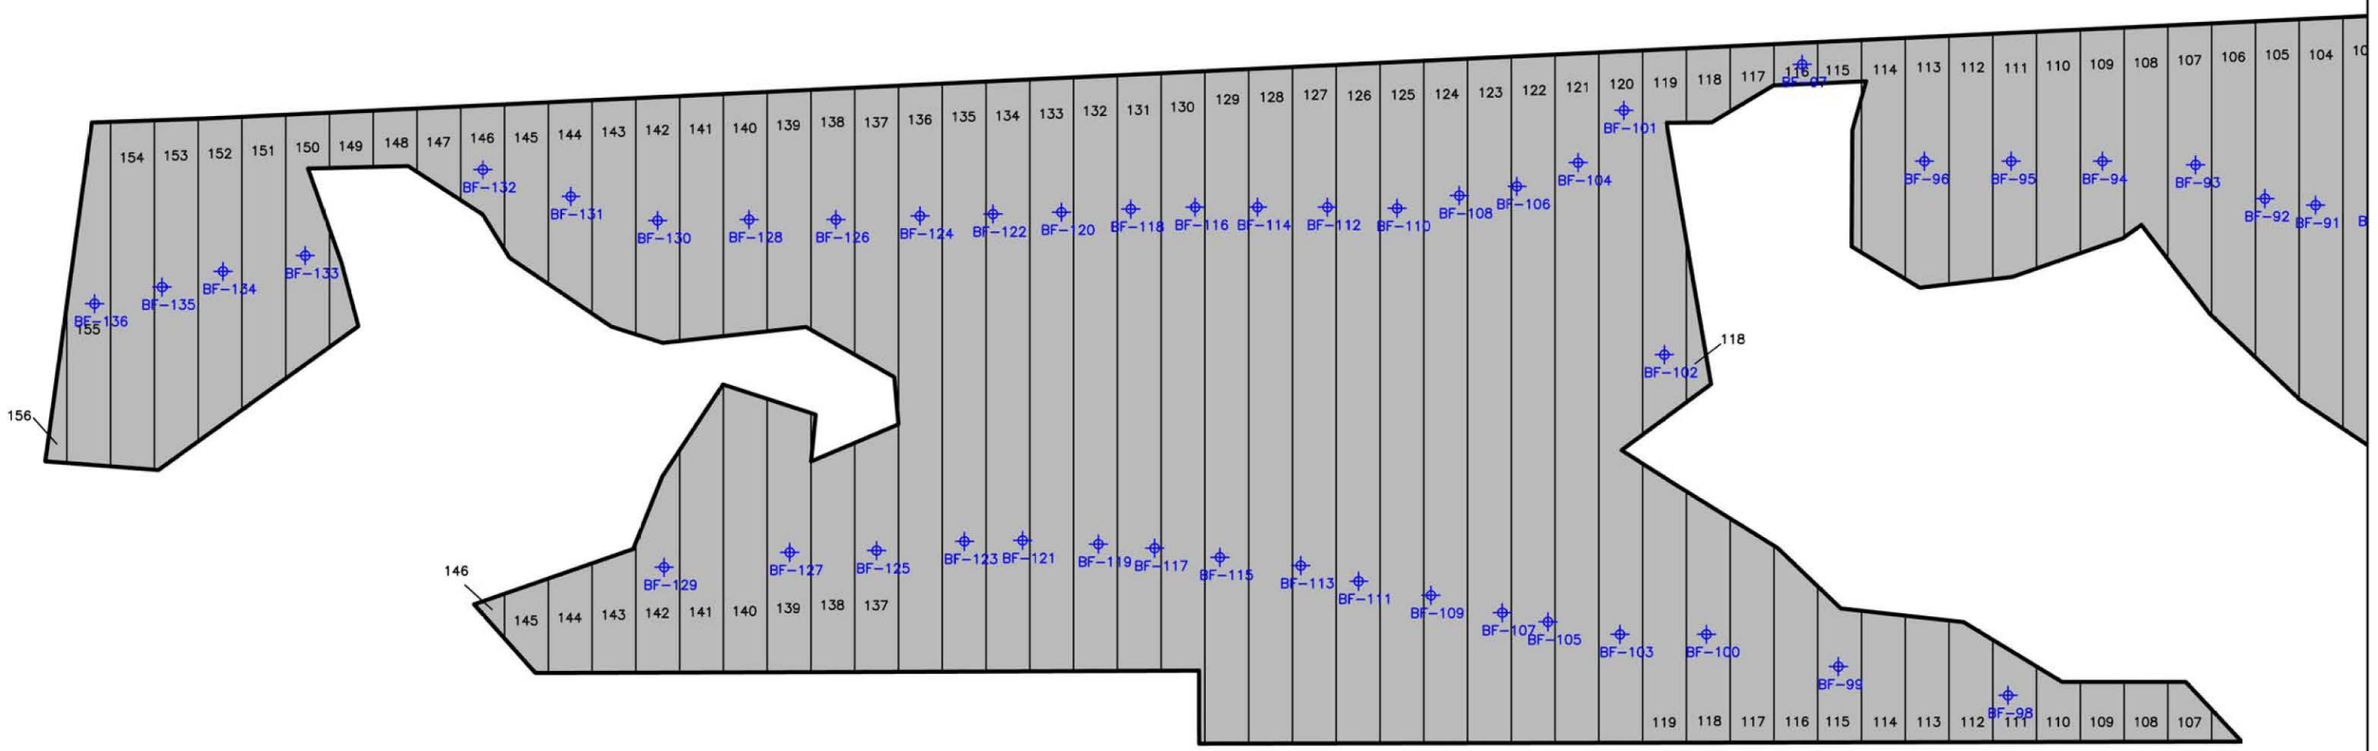
Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)

Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)
01 = Test Location (as noted on Backfill Compaction Location Figure)
01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

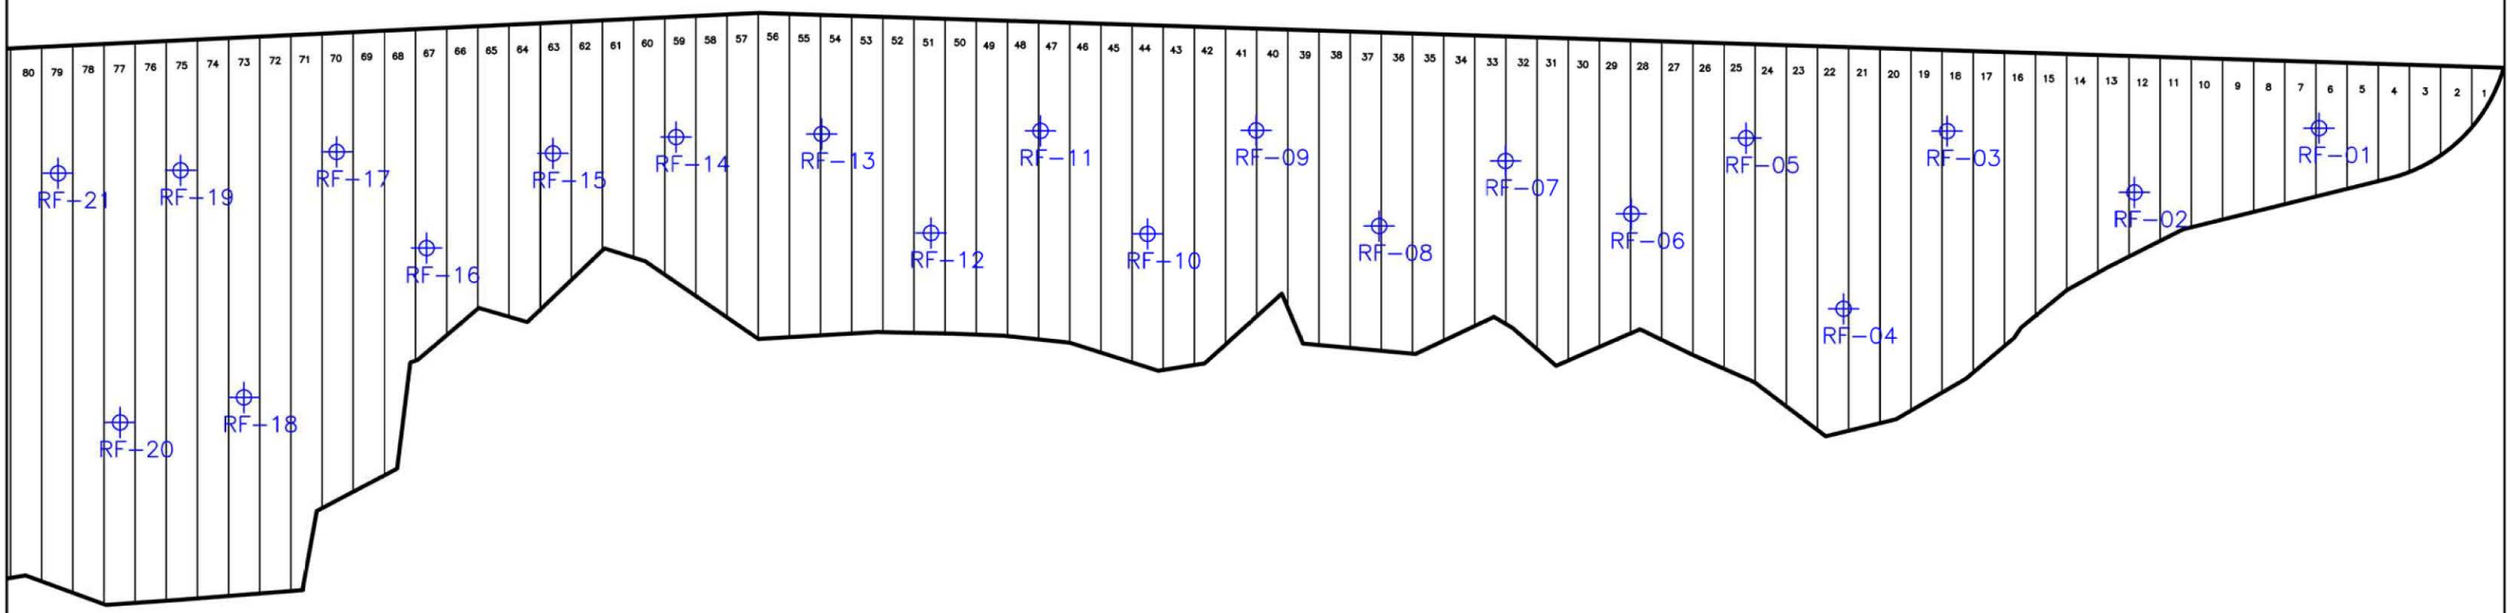
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

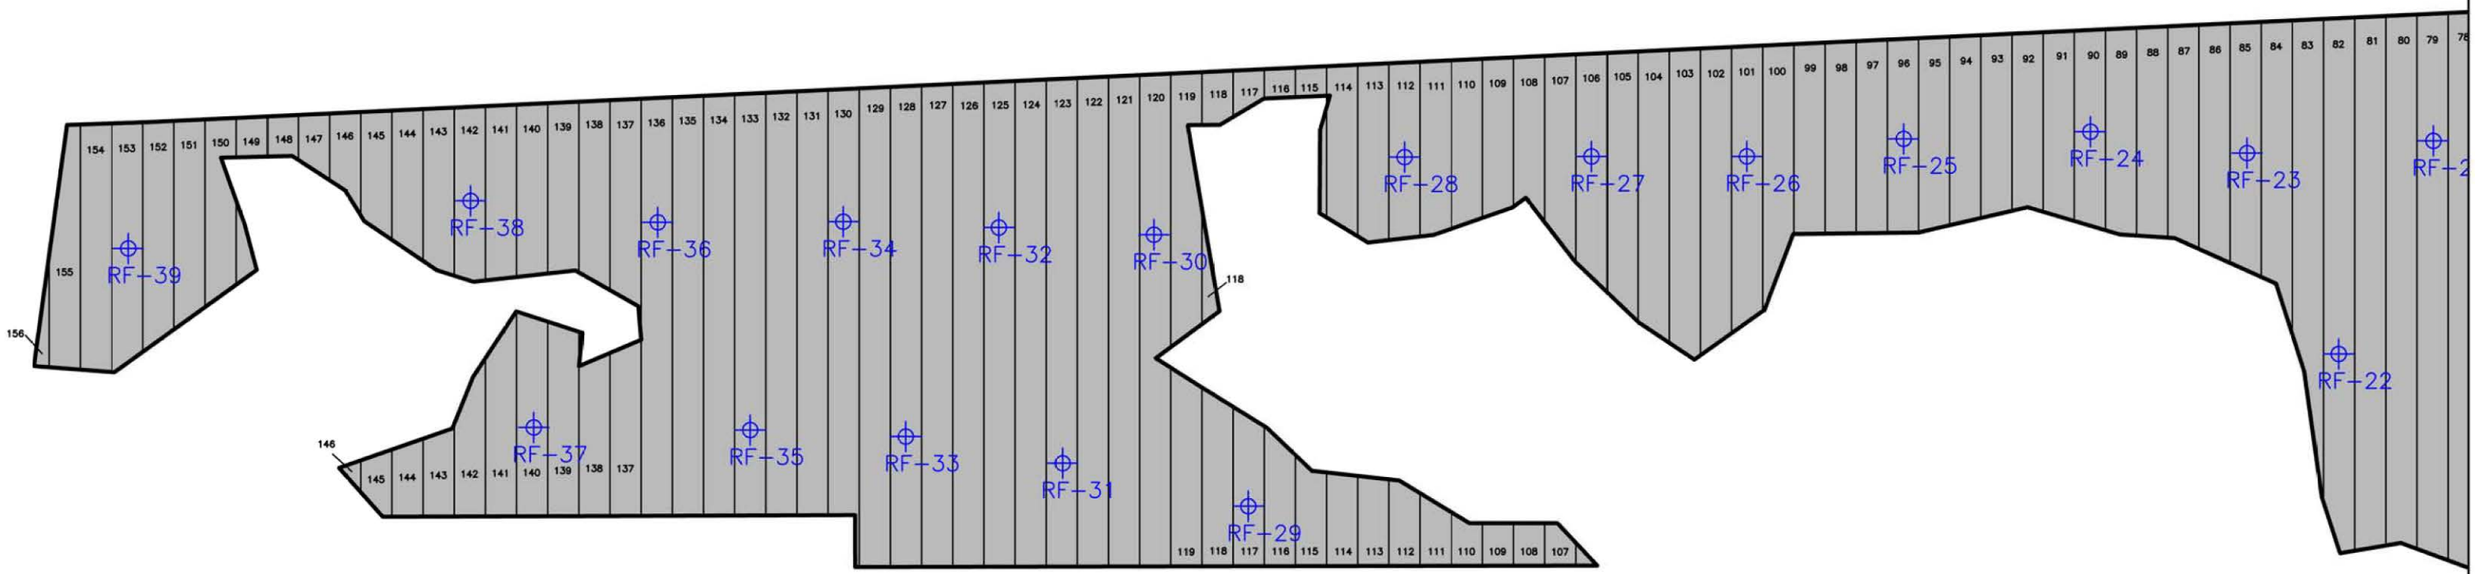
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

Installed Insturment Locations

Insturment Locations Not Installed

NOTES:

1. PRIOR TO SURCHARGING REMOVE SA-7 FENCE AND SA-7 FLOODLIGHTS.
2. RELOCATE POWER SUPPLY TO PW1 AND PW2 PRIOR TO SURCHARGE.
3. GEOTECHNICAL MONITORING INSTRUMENTATION TO BE INSTALLED PRIOR TO SURCHARGE.
4. PILE GEOMETRY IS BASED ON THE ASSUMPTION THAT THE SEDIMENTATION BASIN WALLS ARE IN PLACE AT THE TIME OF SURCHARGING.
5. SURCHARGE PILE TO BE SLOPED TO THE SHED FACE WATER TO THE NORTH.
6. LOCATION OF SA-7 PERIMETER POOL RISER PIPES ARE APPROXIMATE. RISER PIPES TO BE FIELD VERIFIED AND EXTENDED WITH SURCHARGE AND MONITORED.

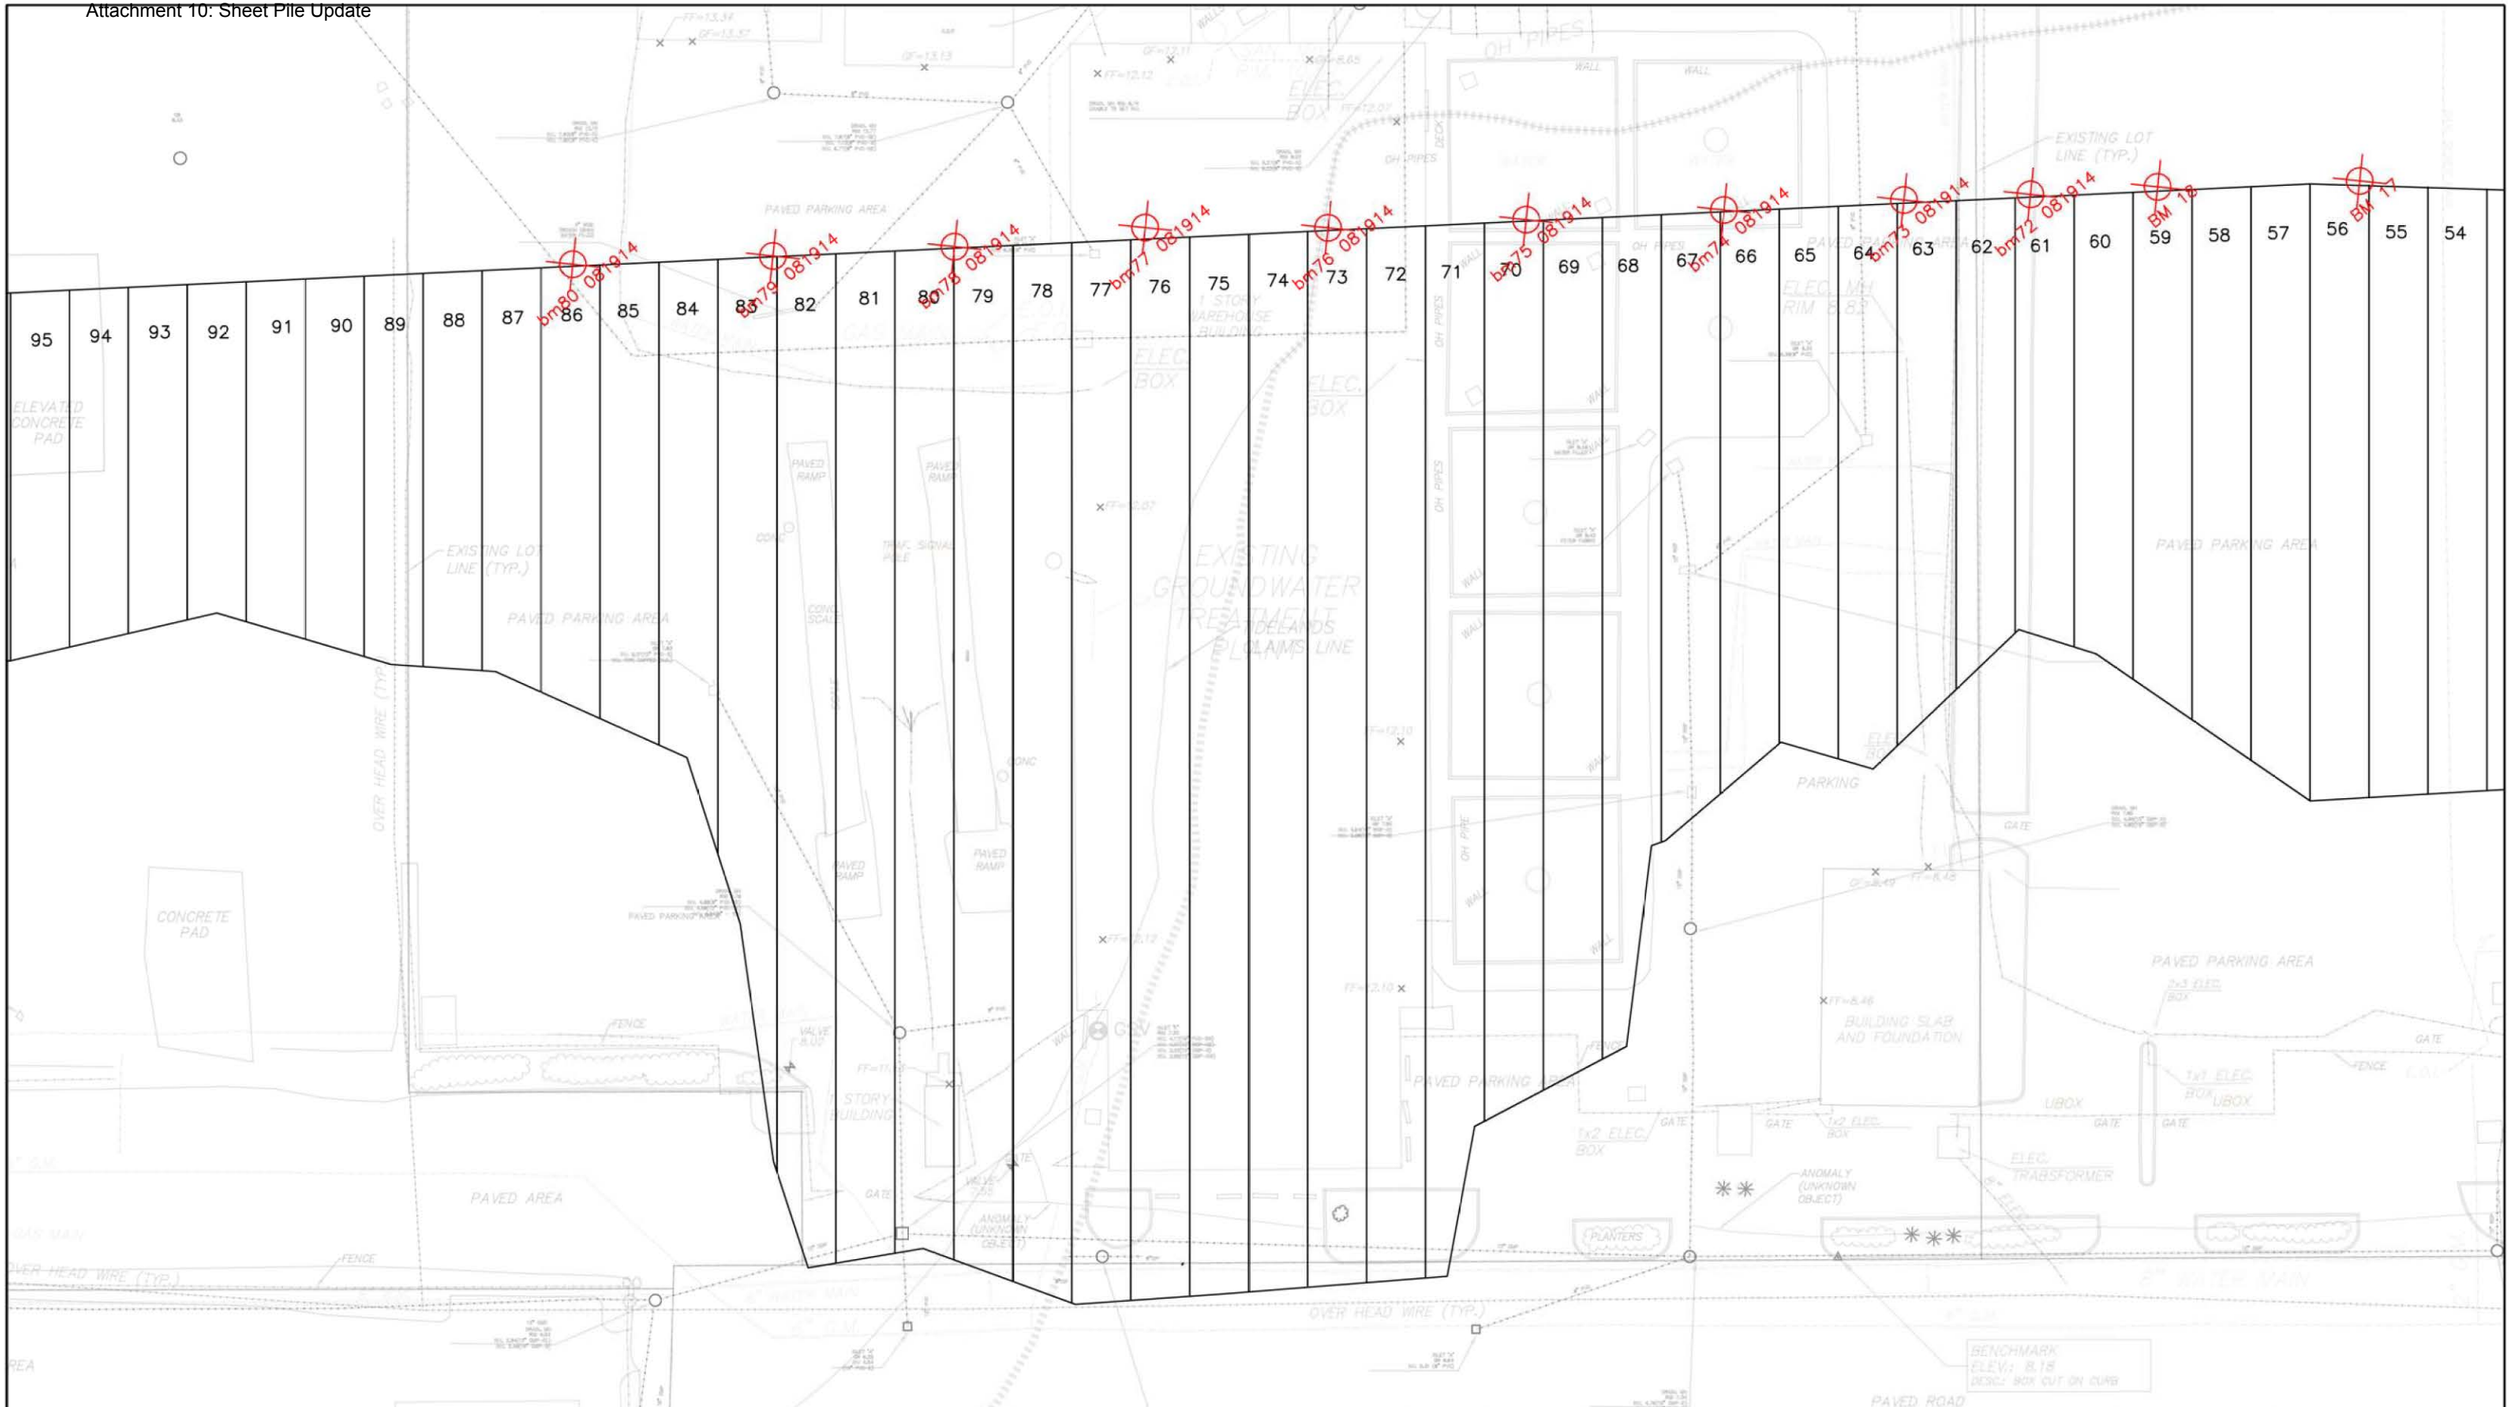
# Attachment 10: Sheet Pile Update

- Sheet Deflection Along Open Excavation
- Sheet Monitoring Locations
- Sheet Pile Repair Log
- Sheet Pile Angle Grout Log

# Sheet Deflection Along Open Excavation

Notes:
1. Deflection monitoring points are established at the top of the barrier wall at approximately 50 ft intervals. See Plan.
2. The barrier wall location was surveyed following installation.
3. Deflection readings are initiated at each Monitoring point in advance of the excavation.
4. Initial x-axis data point uses installed location inserted on a date immediately prior to excavation.
5. - - -The difference between the initial survey and the first reading prior to excavation is shown with a dashed line.
6. Movement during excavation is shown with a solid line.
7. Amec has initiated measures including removal of deadload and lowering the groundwater table on the open space side of the barrier wall with the objective of reducing deflection during excavation.



NOTES:

- Survey data collected with Trimble SPS882 and TSC2 Data Collector.
- Horizontal accuracy of 0.026 ft.
- Deflection measured at the top of the sheet.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-69
Entact ID:
Date Exposed: 8/29/14
Describe Damage: (13) Scrapes by the Cat 349E and 322C excavator buckets - 12"x48", (3) 1"ø, 1x8", 1/4x2", 1/2x3", 2"ø, 1x48", 1/2x12", 1/2x6", 1x5", 1/4x8". Cell 84

Damage Location (ft below top of sheet, inboard side outboard side): 9-14' outboard

Date Repaired: 9-4-14 Partial, 10/3/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-70
Entact ID:
Date Exposed: 8/29/14
Describe Damage: (9) Scrapes by the Cat 349E & 322C excavator buckets- 1x72", 1x60", (4) 1"ø, 1x3", 1/2x12", 1/2x8". Cell 83

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 9/4/14 Partial, 10/3/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-71
Entact ID:
Date Exposed: 8/29/14
Describe Damage: (8) Scrapes by the Cat 349E and 322C excavator buckets - (2) 2"ø, 3"x48", 1x48", 1x8", 1x12", 1/2x36", 1/2x12". Cell 83

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 9/4/14 Partial, 10/3/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-72
Entact ID:
Date Exposed: 8/29/14
Describe Damage: (7) Scrapes by the Cat 349E and 322C excavator buckets - 3"ø, 3x12", 1/2x3", 2x24", 2x12", 1x18", 1"ø. Cell 83

Damage Location (ft below top of sheet, inboard side outboard side): 5-15' outboard

Date Repaired: 9/11/14 Partial, 10/3/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-75
Entact ID:
Date Exposed: 9/2/14
Describe Damage: (10) scrapes by the Cat 349E and 322C excavator buckets - 1/2 x 48", (4) 1x12", 1x6", 1x60", 1/4x24", 3x24", 2"Ø. Cell 82

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 9/11/14 Partial, 10/3/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 19P-76
Entact ID:
Date Exposed: 9/2/14
Describe Damage: (7) Scrapes by the Cat 349E and 322C excavator buckets - 12"Ø, 1/4x12", 1x4", 1x18", 1/2x2", 1/2x6", 1"Ø. Cell 82.

Damage Location (ft below top of sheet, inboard side outboard side): 7-15' outboard

Date Repaired: 9/11/14 Partial, 10/3/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/3/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-4
Entact ID:
Date Exposed: 10/8/14
Describe Damage: (12) scrapes by the Cat 349E and 322C excavator buckets- 2 x 48", 2 x 6", 1 x 30", 1 x 18", (2) 1"Ø, 1/2 x 36", 1/4 x 12", 1/4 x 4", 1/2 x 8", 3 x 8", 3"Ø. Cell 69.

Damage Location (ft below top of sheet, inboard side outboard side): 7-13' outboard

Date Repaired: 10/14/14 Partial, 10/29/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-5
Entact ID:
Date Exposed: 10/10/14
Describe Damage: (15) scrapes by the Cat 349E and 322C excavator buckets- 6×84", 2×36", 8"Ø, (3)1"Ø, 1/4×48", 1/2×6", 1×4", 1/4×6", 1×24", 1/2×3", (2)1/2"Ø, 4"Ø. Cell 69.
Damage Location (ft below top of sheet, inboard side outboard side): 6-16' outboard
Date Repaired: 10/14/14 Partial, 10/29/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-6
Entact ID:
Date Exposed: 10/10/14
Describe Damage: (14) scrapes by the Cat 349E and 322C excavator buckets- (3)1/2"Ø, 2×24", 4"Ø, 1/2×8", 1"Ø, 1×12", 1×36", 1×60", 1/4×60", 1×8", 1×6", 1/2×36". Cell 69.
Damage Location (ft below top of sheet, inboard side outboard side): 4-16' outboard
Date Repaired: 10/14/14 Partial, 10/29/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-7
Entact ID:
Date Exposed: 10/10/14
Describe Damage: (16) scrapes by the Cat 349E and 322C excavator buckets- 1/4×48", 6"×120", (4)1/2"Ø, (3)1"Ø, 1/2×24", 1×8", 1×18", 1×48", 1/4×4", 1×3", 1×18". Cell 68.
Damage Location (ft below top of sheet, inboard side outboard side): 7-16' outboard
Date Repaired: 10/14/14 Partial, 10/29/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-8
Entact ID:
Date Exposed: 10/10/14
Describe Damage: (12) scrapes by the Cat 349E and 322C excavator buckets- 1×120", 2"Ø, 2×48", 1×6", 1/2×4", (3)1"Ø, 1×108", 1/2×18", 3"Ø, 1"Ø. Cell 68
Damage Location (ft below top of sheet, inboard side outboard side): 6-16' outboard
Date Repaired: 10/14/14 Partial, 10/29/14 Total
Inspected by: Brian Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P-9

Entact ID:

Date Exposed: 10/13/14

Describe Damage: (19) Scrapes by the Cat 349E and 322C excavator buckets - (8) 1"Ø, 1x12", 4"Ø, 4x84", 1/2x72", 2x12", 1/2x4", 1x4", (3) 1/2x8", 1/4x60". Cell 68.

Damage Location (ft below top of sheet, inboard side outboard side): 10-16' outboard

Date Repaired: 10/14/14 partial, 10/29/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-10

Entact ID:

Date Exposed: 10/13/14

Describe Damage: (13) scrapes by the Cat 349E and 322C excavator buckets (6) 1"Ø, 1/2x84", (2) 1/2x12", 1x8", 1/4x36", (2) 1x4". Cell 67

Damage Location (ft below top of sheet, inboard side outboard side): 10-17' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-11

Entact ID:

Date Exposed: 10/14/14

Describe Damage: (15) Scrapes by the Cat 349E and 322C excavator buckets (4) 1/2"Ø, (3) 1"Ø, (2) 1x48", 1x18", 2x10", 1/2x6", 1/2x3", 4"Ø, 2"Ø. Cell 67

Damage Location (ft below top of sheet, inboard side outboard side): 10-17' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P-12

Entact ID:

Date Exposed: 10/14/14

Describe Damage: (10) scrapes by the Cat 349E and 322 C excavator buckets - 1/2x36", 1/2x24", 1x12, (4) 1/2"Ø, (2) 1x6", 1/4x24". Cell 67.

Damage Location (ft below top of sheet, inboard side outboard side): 10-15' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Bnan Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22PI-13
Entact ID:
Date Exposed: 10/21/14
Describe Damage: (13) scrapes by the Cat 349E and 322C excavator buckets- (6) 1/2"Ø, (3) 1/2x12", 2x12", 1/2x18", 1/2x3", 3"Ø. Cell 67/66

Damage Location (ft below top of sheet, inboard side outboard side): 11-15' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22PI-14
Entact ID:
Date Exposed: 10/21/14
Describe Damage: (20) scrapes by the Cat 349E and 322C excavator buckets- (10) 1/2"Ø, 1x12", 1x6", 4"Ø, (3) 1"Ø, 1/2x6", 1/2x3", 1/2x12", 1x4". Cell 66.

Damage Location (ft below top of sheet, inboard side outboard side): 8-14' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22PI-15
Entact ID:
Date Exposed: 10/21/14
Describe Damage: (12) scrapes by the Cat 349E and 322C excavator buckets- (4) 1"Ø, 1/2"Ø, 1x12", 1/2x6", 1/2x24", 3x6", 1x2", 1/4x3", 1x4". Cell 66

Damage Location (ft below top of sheet, inboard side outboard side): 9-13' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22PI-16
Entact ID:
Date Exposed: 10/21/14
Describe Damage: (9) scrapes by the Cat 349E and 322C excavator buckets- 1x3, 1x4, (3) 1"Ø, (2) 1/2"Ø, 1x36", 1/2x24. Cell 66/65

Damage Location (ft below top of sheet, inboard side outboard side): 2-13' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total
Inspected by: Bnan Shea
Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.
Repair Log Closure: AMEC Signature: BShea
Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-17

Entact ID:

Date Exposed: 10/21/14

Describe Damage: (10) scrapes by the Cat 349E and 322C excavator buckets- 1/2x48", 1x12", 1x8", 1/2x3", 1/2x24", (4) 1"Ø, 6"Ø. Cell 65

Damage Location (ft below top of sheet, inboard side outboard side): 7-13' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-18

Entact ID:

Date Exposed: 10/21/14

Describe Damage: (8) Scrapes by the Cat 349E and 322C excavator buckets- 1/2x12", 12x24", (2) 1/2x6", 1"Ø, 4"Ø, 1/2x36", 1x8". Cell 65

Damage Location (ft below top of sheet, inboard side outboard side): 3-13' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-19

Entact ID:

Date Exposed: 10/21/14

Describe Damage: (8) scrapes by the Cat 349E and 322C excavator buckets- 1x18", 4x12", 3"Ø, (3) 1/2"Ø, 1x24, 1/4x24". Cell 65

Damage Location (ft below top of sheet, inboard side outboard side): 4-14' outboard

Date Repaired: 10/21/14 Partial, 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-20

Entact ID:

Date Exposed: 10/21/14

Describe Damage: (10) Scrapes by the Cat 349E and 322C excavator buckets- 8"Ø, (5) 1"Ø, 1/2x36", 1/2x8", 1/4x18", 3"Ø. Cell 64

Damage Location (ft below top of sheet, inboard side outboard side): 6-14' outboard

Date Repaired: 10/27/14 Partial, 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 22P1-21

Entact ID:

Sheet Number/DB ID: 24P1-7

Entact ID:

Date Exposed: 10/28/14

Describe Damage: (27) scrapes by the Cat 349E & 322C excavator buckets- (6) 1×6", 3×18", (6) 1"Ø, 1/2×36", 2×18", 12"Ø, (3) 2"Ø, 1×24", 1/4×36", 1×3", (5) 1/2"Ø. Cell 60

Damage Location (ft below top of sheet, inboard side outboard side): 0 - 13' outboard

Date Repaired: 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush.

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

amec

SHEET PILE REPAIR LOG[1]

Sheet Number/DB ID: 24P1-8

Entact ID:

Date Exposed: 10/28/14

Describe Damage: (29) Scrapes by the Cat 349E and 322C excavator buckets- (11) 1"Ø, (8) 1×6", (3) 1×24", 3×6", 2×18", 6"Ø, (4) 1/2"Ø. Cell 60.

Damage Location (ft below top of sheet, inboard side outboard side): 1-13' outboard

Date Repaired: 10/29/14 Total

Inspected by: Brian Shea

Describe Repair: Pressure wash, wire brush, apply epoxy w/ a 2" paint brush

Repair Log Closure: AMEC Signature: BShea

Date: 10/29/14

[1] A repair log is to be completed for each sheet pile section that is exposed and in need of repair.

| Comment Number | Permit Number | SWAP Observer's Comments |
|---|---|---|
| 1 | IA2Q4A1AL8 | Silt fence on both the northern and the southern slopes of surcharge area 1-S is improperly toed in or requires maintenance. |
| 2 | IA2Q4A1AL8 | Exclusion Zone signage on the temporary sheet pile at the west end of Kellogg Street is still in place after the area has been excavated and partially backfilled and is no longer considered an EZ. |
| 3 | IA2Q4A1AL8 | Exclusion Zone fencing requires maintenance or is completely missing at several locations along the northern perimeter of SA-6 South EZ. |
| 4 | IA2Q4A1AL8 | No Exclusion Zone signage or barrier is present between the clean surcharge area and the consolidated cap material in surcharge area 2-S. |
| 5 | IA2Q4A1AL8 | No silt dams are present at the toe of the 2-S surcharge area along the north side. |
| 6 | IA2Q4A1AL8 | An installed well vault in the SA-6 South backfill area sticks up 3"-4" above surrounding grade. |
| 7 | IA2Q4A1AL8 | The stone on the roadway outside of the eastern exit of the SA-6 South Exclusion Zone is becoming blinded with sediment. |
| 8 | IA2Q4A1AL8 | Straw wattle at the gaps in the 12" berm along the western SA-7 roadway has degraded and is no longer functional. |
| 9 | IA2Q4A1AL8 | Sediment is present on the southern and northern SA-7 roadways. |

**Project Name:** SA-6 COURT ORDERED REMEDIATION ACTION
**Facility Location:** Jersey City, New Jersey
**SWAP Observer:** _____ (Signature) **Date:** 10/03/14

| Comment Number | Construction Manager's Comments to Contractor | Date Completed |
|---|---|---|
| 1 | Repair or re-install the missing or damaged sections of silt fence at the toe of the 1-S surcharge pile. Insure that all silt fence is properly toed in. | 10-8-14 RAD |
| 2 | Remove all Exclusion Zone signage which is no longer required. | 10-3-14 RAD |
| 3 | Repair or replace any sections of orange warning fencing which surrounds the SA-6 South EZ. Install fencing to eliminate any gaps which may be present. | 10-3-14 RAD |
| 4 | Install Exclusion Zone signs to delineate the western edge of the EZ in surcharge area 2-S. | 10-6-14 RAD |
| 5 | Construct silt dams or install acceptable erosion control measures along the northern edge of the 2-S surcharge area. | 10-3-14 RAD |
| 6 | Install backfill material around the well vault in the western backfill area of SA-6 South, bringing it to grade and protecting the vault and/or vehicles from damage. | 10-7-14 RAD |
| 7 | Remove and replace any stone containing sediment on the outside of the eastern SA-6 South CRZ. | 10-7-14 RAD |
| 8 | Replace any degraded straw wattle along the western SA-7 roadway. | 10-6-14 RAD |
| 9 | Clean the northern and southern SA-7 roadways. | 10-8-14 RAD |

## PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets):

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used:

All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3.

SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler.

All samples are iced in a cooler during transport to the lab.

# Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending October 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Submitted to all Parties on July 10, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to all Parties on August 26, 2014. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal to Parties' per request. |
| **DC 2014-8-13** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Submitted to all Parties on August 19, 2014. |
| **DC 2014-9-2** | Revised hydraulic barrier wall alignment adjacent the 72" force main in order to provide a clearance of 25 ft. between the centerline of the 72" force main and the barrier wall as previously agreed with PVSC. | Submitted to all Parties on September 4, 2014. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-11**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from November 1 – November 30, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

WJH:jtc/sgf

# B. SITE OPERATIONS

## 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | |
|---|---|---|---|---|
| | 11/9/14 | 11/16/14 | 11/23/14 | 11/30/14 |
| Construction Management (AMEC) | 12 | 11 | 12 | 11 |
| Engineering (AMEC) | 1 | 1 | 1 | 1 |
| Air Monitoring (Emilcott) | 1 | 1 | 1 | 1 |
| Security (Securitas) | 3 | 3 | 3 | 3 |
| Entact/Subcontractors | 36 | 36 | 34 | 34 |
| Arecon/US Ecology Subcontractors | 1 | 1 | 1 | 1 |
| Evoqua | 1 | 1 | 1 | 1 |
| HBS (SA-6N GWTP Security System) | 0 | 0 | 0 | 0 |
| Gramercy | 21 | 20 | 17 | 22 |
| **TOTAL STAFF** | **76** | **74** | **70** | **74** |

## 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6 South and SA-6 North.
- Collected November PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- PVSC collected yearly compliance samples associated with the Construction Water Treatment Plant and the Ground Water Treatment Plant on November 5, 2014.
- Continued site preparation, universal waste removal and asbestos abatements activities at the JCIA demolition project.
- Environ and Aquasurvey representatives completed long term monitoring activities in accordance with the SA-7 sediment monitoring plan, including the bathometric survey, cap thickness verifications, sediment profile imaging (SPI), biological sampling, and pore water sampling on November 3, 2014.
- Completed bench testing of candidate redevelopment chemicals for use in injections well 088-IW-01.
- Continued to advance permit application and discussions with New Jersey Department of Transportation (NJDOT) regarding Highway Occupancy and Drainage Permits for upcoming SA-6 activities proximate to the Rt. 440 frontage.

- On December 8, 2014, a leaking diesel line was identified on a water truck. This necessitated several yards of surficial soil to be removed and segregated. The incident was called in to the NJDEP hotline and Incident no. for this non-emergency incident is: 14-12-08-1503-35.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on November 12, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 11/9/14 | 11/16/14 | 11/23/14 | 11/30/14 |
| Avg. Gallons Treated & Discharged (per day) | 74,758 | 76,857 | 76,584 | 75,300 |
| Average Flow (gpm) for Operating Period | 53 | 53 | 54 | 52 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 |
| GWTP Influent Tanks (gal.) | 5,690 | 7,932 | 7,078 | 6,900 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued storm-water management activities.
- Completed Site 163 shallow soil excavation activities on November 12, 2014.
- Collected a post-excavation sidewall sample, 134-SB-177, from the southeast side of the anomalous material excavation on December 2, 2014, results are pending and will be reported when final.
- On November 11 and 12, 2014, encountered and removed a former unidentified 550-gallon underground storage tank in the eastern portion of the Site 163 excavation. Peter Jaran, LSRP was contacted and a representative was onsite to oversee the UST removal and soil sampling in accordance with NJDEP requirements.
- Continued Site 163 backfill activities.
- Began excavation activities associated with the lens of anomalous material on SA-6 South proximate to Cell 104.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

## 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |
| **Entact/ Horwith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 50 | 21.35 | 1,067.75 |
| **Entact/ Montecalvo** | 30 cyd roll-off | Bayshore Recycling | NA | Non Haz Creosote Debris | 0 | 0 | 0 |
| **Entact/ FCI** | 30 cyd roll off | Tullytown, Pa | WM Grows | ACM Tile & Mastic | 0 | 0 | 0 |
| **Entact/ FCI** | Tri-axle Dump | Kearny, NJ | NJ Meadowlands | Dieldrin Stained Concrete | 12 | 21.75 | 261 |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | TCE Impacted Soil | 0 | 0 | 0 |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | Mercury Impacted Soil | 0 | 0 | 0 |

## 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Excavation Completed** | Cell Number(s) 75-59<br>Volume Excavated - Total for Reporting Period: 0 CY/ Total to Date: 151,313 CY |
| **Backfill in Progress** | Cell Number(s) 104-59 |

## 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | |
|---|---|---|---|---|
| | 11/9/14 | 11/16/14 | 11/23/14 | 11/30/14 |
| <20ppm re-use, CY | 0 | 0 | 0 | 0 |
| Weldon, Import-Tons Screenings | 4,248 | 4,756 | 713 | 0 |
| Tilcon, Import-Tons DGA | 884 | 0 | 508 | 451 |
| Tilcon, Import Tons – 1.5” Stone | 0 | 0 | 0 | 0 |
| Weldon, Imported Tons - QP | 0 | 0 | 0 | 0 |
| Weldon, Imported Tons - DGA | 0 | 0 | 134 | 0 |
| Tilcon, Imported 6”-8” stone | 61 | 0 | 0 | 0 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 50 | 50 | 0 |

## E. SURCHARGE OPERATIONS

- Area 1S: Continue offloading 1S from west to east, approximately 50% complete.
- Area 2S: Surcharging continued on Area 2S. Surcharge placement consisted of both chromium impacted soils to the design sub-grade and both imported Celgene and Novartis soils. Surcharge placement is approximately 85% complete.
- Area 3S: Instrumentation installation was completed as of November 6, 2013 and all baseline readings recorded. Temporary stockpiles are located in this area. Surcharge has been initiated and is approximately 10% complete surcharge
- Area 1N: Continued surcharge removal activities. Surcharge removal activities area approximately 75% complete. Details were provided in the November 2014 Surcharge Monitoring Report No. 6.
- Area 2N: Instrumentation Installation 100% complete. Surcharge placement is complete. Surcharge placement is 100% complete.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Continue grouting angles of sheet pile at SA-6 South.
- Excavation proximate to the SA-6 South barrier wall was completed in October 28, 2014 and backfill has been progressed in all areas against the SA-6 South barrier wall. Deflection readings are therefore no longer required.

## G. PERMIT STATUS

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDEP Waterfront Development | SA-6 North Only | Obtained 6/23/2010 | Not Specified, Est. 3/31/2015 | 6/23/2015 | - |
| NJDEP CAFRA/FHA | SA-6 South Only | Obtained 9/26/2012 | Renewal Not Needed | 9/25/2017 | 10/09/2012 |
| HEPSCD SESCP | Novartis Soil Pile/SA-7 | Obtained 8/21/2012 | Renewal Not Needed | 2/21/2016 | - |
| NJDEP RFA | Novartis Soil Pile/SA-7 | Obtained 9/7/2012 | Renewal Not Needed | Not Specified | - |
| PVSC SUP No. 31630019 | SA-6 Chromium Remedy | Obtained 3/26/2014 Final Revision 5/23/14 | Renewal Not Needed | 8/31/2018 | 04/19/2014 |
| SESCP | SA-6 Chromium Remedy | Obtained 5/16/2013 | Renewal Not Needed | 11/16/2016 | - |

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| RFA | SA-6 Chromium Remedy | Obtained 5/29/2013 | Not Specified | Not Specified | - |
| NJDEP - Water Allocation | SA-6 Chromium Remedy | Obtained 6/19/2013 | Renewal Not Needed | 5/31/2018 | - |
| NJDEP – Treatment Works Approval | SA-6 Chromium Remedy | Obtained 7/8/2013 | Not Specified, Est. 3/31/2015 | 7/7/2015 | - |
| NJDOT - Highway Occupancy Permit | SA-6 Chromium Remedy | Obtained 9/11/2013 | Not Specified, Est. 6/11/2014 | 9/11/2014, 1 yr. extension granted 10/6/14 | - |
| NJDEP CAFRA/WFD/FHA GWTP Force Mains | GWTP | Obtained 4/22/2008 | Renewal Not Needed | 4/22/2013 | - |
| HEPSCD SESCP | GWTP | Obtained 8/27/2012 | Renewal Not Needed | 2/27/2016 | - |
| NJDEP CAFRA/WFD/FHA | GWTP | Obtained 11/16/2012 | Renewal Not Needed | 6/23/2015 | - |
| NJDEP Treatment Works Approval | GWTP | Obtained 4/11/2013 | Renewal Not Needed | 4/10/2015 | 4/23/2013 |
| NJDEP Air Pollution Control Preconstruction Permit | Existing GWTP | Obtained 9/24/2013 | Not Specified, Est. 3/31/2014 | 6/23/2014 | 11/20/2013 |
| PVSC SUP No. 31630016 | New GWTP | Obtained 10/1/2013 | 6/30/2018 | 9/30/2018 | 10/29/2013 |
| PVSC SUP No. 31630005 | Existing GWTP/SA-7 | Obtained 1/1/2014 | Renewal Not Needed | 12/31/2018 | - |
| NJDEP Discharge to Groundwater (DGW) for In-Situ Treatment of Chromium Impacted Soils | SA-6 North Only | Obtained 4/30/2012 | Not Specified | Not Specified | 5/10/2012 |
| NJDEP DGW for In-Situ Treatment of Chromium Impacted Soils | SA-6 South Only | Obtained 1/3/2013 | Not Specified | Not Specified | - |
| NJPDES Permit | SA-7 | Renewed: Effective 12/01/2012 | Renewal Not Needed | 6/30/2015 | 1/11/2013 |
| Subchapter 8 Air Permit Application for the Waste Water Treatment Plant | SA-7 | Issued: 06/24/2009 | Renewal Not Needed | 6/23/2014 | 7/15/2009 |
| Individual Waterfront Development Permit and Water Quality Certificate for Sediment Remedy | SA-7 | Issued: 05/27/2011 Modified: 07/02/2012 | N/A | 5/26/2016 | 5/27/2011, 7/5/2012 |

| PERMIT | SITE | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| Tidelands Licenses for Sediment Remedy | SA-7 | Re-Issuance of Final Tidelands License is pending and will be effective 7/21/2013 | N/A | 7/21/2014 | 7/19/2012 |
| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |
| NJDOT – Application for Drainage Connection, Post Remediation Grading and Drainage | SA-6 Chromium Remedy | Application Submitted 8/19/14 Permit Application Rescinded 12/1/14 | Pending | Pending | Pending |
| NJDOT – Highway Occupancy Permit – Installation of Sheet Piling and Excavation Adjacent to Rte 440 ROW | SA-6 Chromium Remedy | Application Submitted 9/8/14 Final Executed Permit Issued 12/2/14 | Pending | Pending | Pending |

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Continue JCIA Structures Demolition activities to include site preparation, abatement activities, and utility disconnect activities.
- Continue placement of surcharge materials in SA-6 South Area 2S and Area 3S.
- Continue off loading of surcharge materials from SA-6 South Area 1S.
- Continue installation of the contingent groundwater system trench on SA-6 South.
- Complete Site 163 excavation and backfilling activities.
- Complete excavation of standalone Areas 41 and 43.
- Complete excavation of the lens of anomalous material proximate to Cell 104.
- Continue loadout and transportation and disposal activities at SA-6 South.
- Continue backfill placement and associated compaction testing activities at SA-6 South.
- Begin accepting delivery of steel sheetpile for SA-6 North barrier wall installation.
- Complete well cleaning of injection well 088-IW-01 on SA-6N.
- Continue dewatering and storm-water management activities.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.
- Complete sediment long term monitoring activities and final report preparation.

- Obtain NJDOT Highway Occupancy Permit for upcoming SA-6 North activities proximate to Rt. 440 frontage.
- Conduct semi-annual sampling of S-3 mass removal injection and related monitoring wells.

**ATTACHMENTS:**

1. Schedule – 6 Month Look Ahead
2. Site Photographs
3. Excavation and Backfill
   - Progression Chart
   - Excavation Bottom Elevations
   - Maser Survey Tables: SA-6 South Excavation: Confirmatory/Center/ Sidewall Confirmatory Points
   - Field Density Test Summary Log (Every 2,500SF/5 Tests per Acre)
   - Backfill Compaction Locations (Every 2,500SF/5 Tests per Acre)
4. Dewatering Operations Update
   - SA-6 South Deep Well Data (DW-4)
5. SA-6 Construction Water Discharge Data (To PVSC)
6. Backfill Analytical Data
   - Stockpiled Material Tracking and Sampling Log
7. Perimeter Pools Update
8. *Groundwater Quality Data Surcharge Monitoring Update (not included in this reporting period)*
9. *Surcharge Monitoring Update (not included in this reporting period)*
10. Sheet Pile Update
    - Sheet Pile Angle Grout Log
11. Weekly SWPPP Reports
12. GWTP Update
    - 525/575 Route 440 GWTP PVSC Discharge Monitoring Repot (October 2014)
13. SA-6 North & South Design Change Tracking Log

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

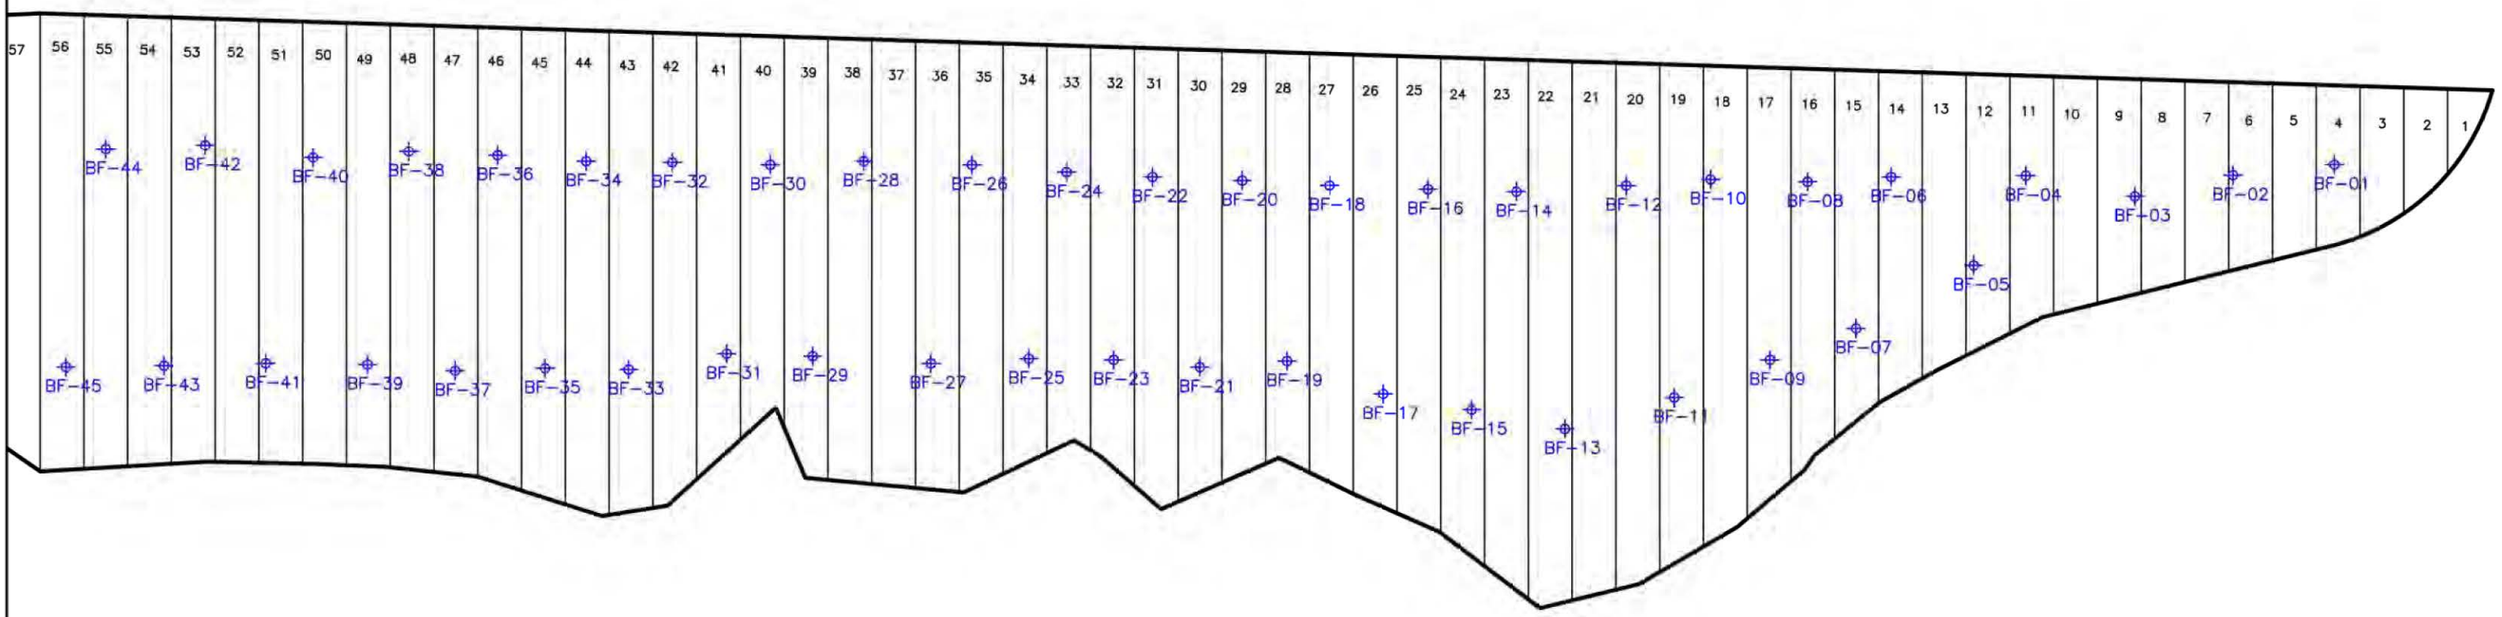
Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Maximum Dry Density for Weldon LH Screenings based on Vertical V Laboratory Report No. 12643 dated 9/29/14.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



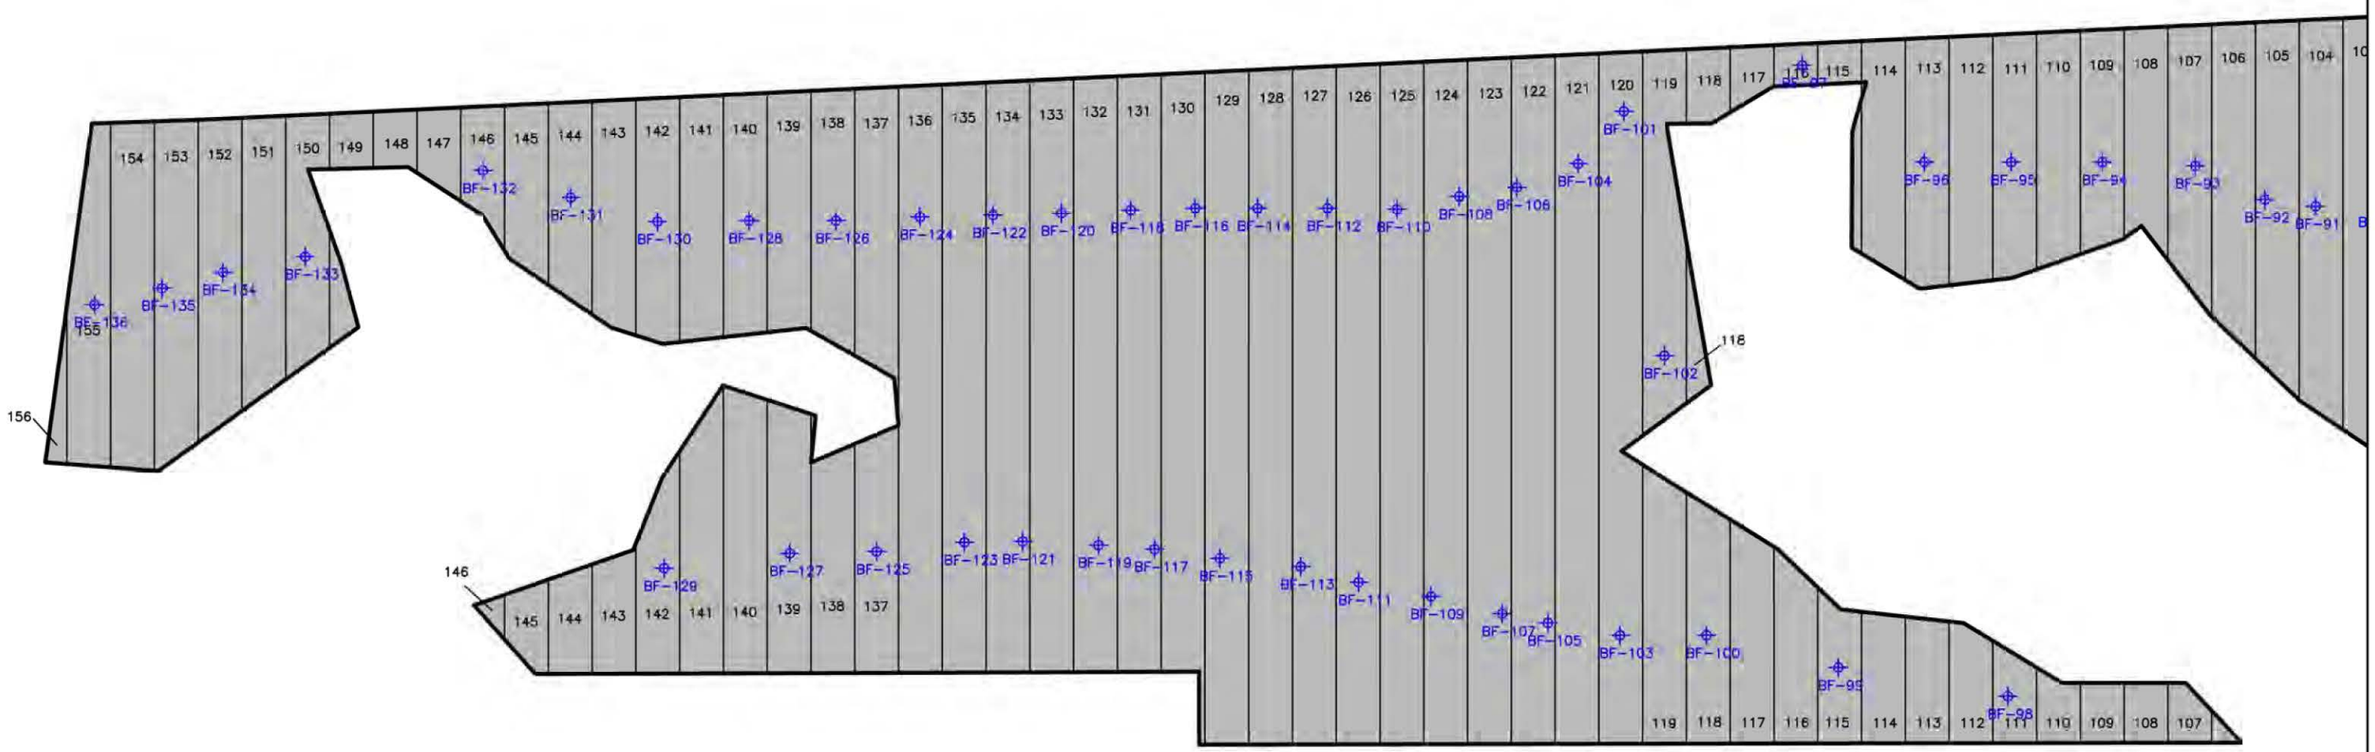
Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:***

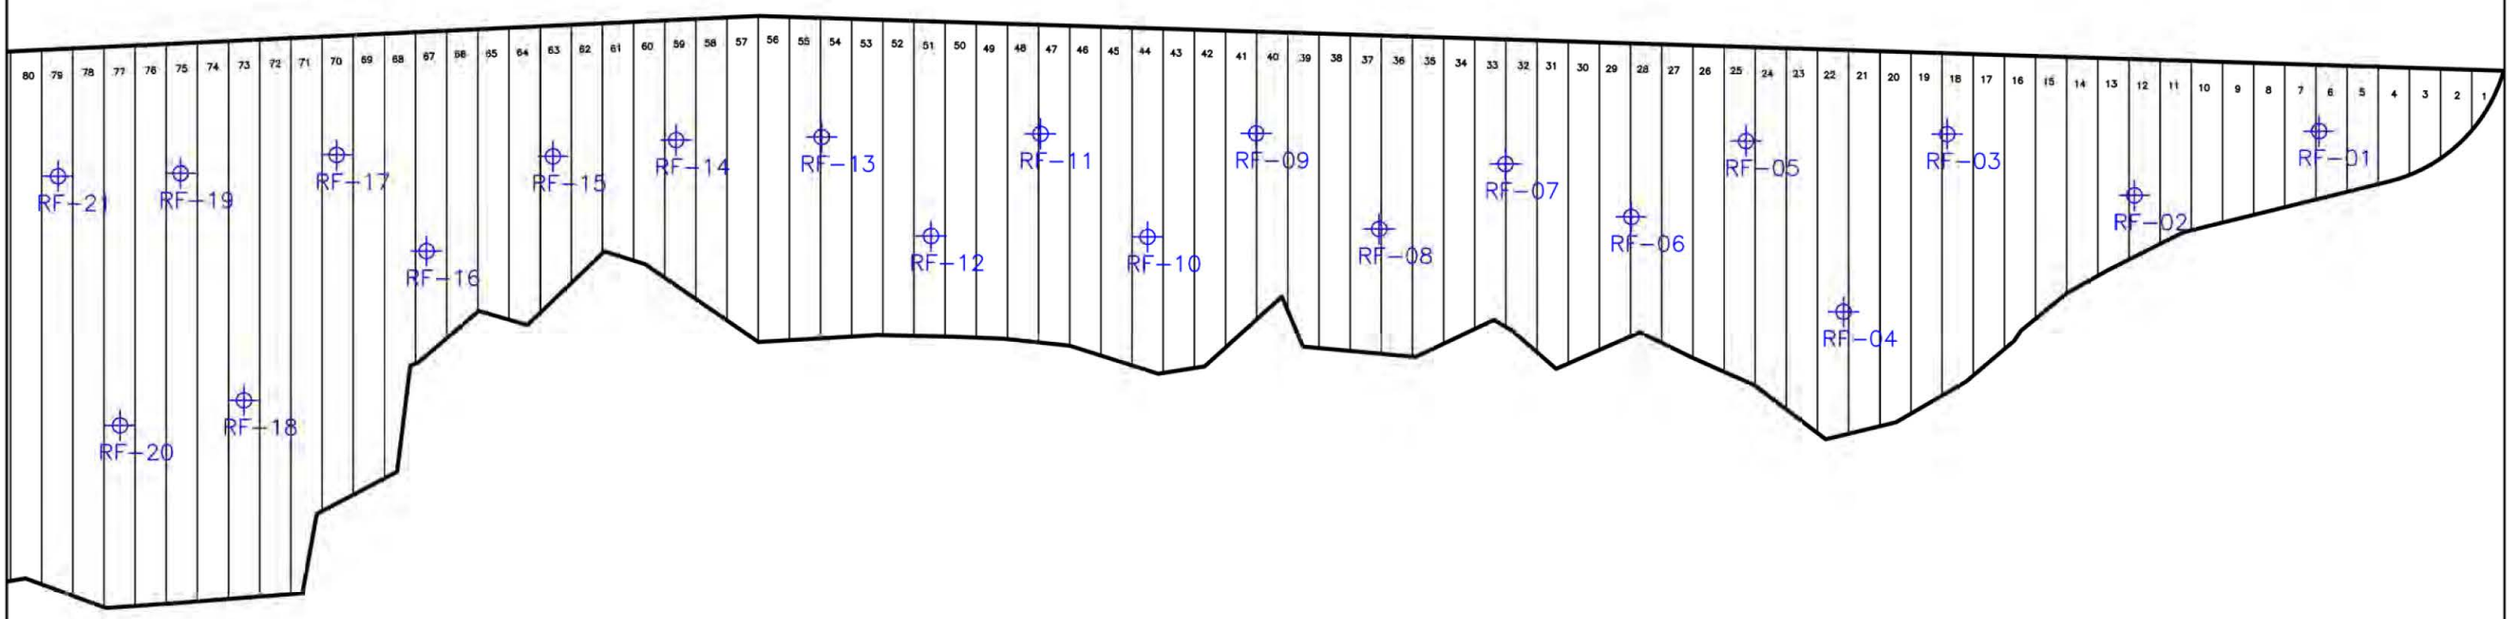
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

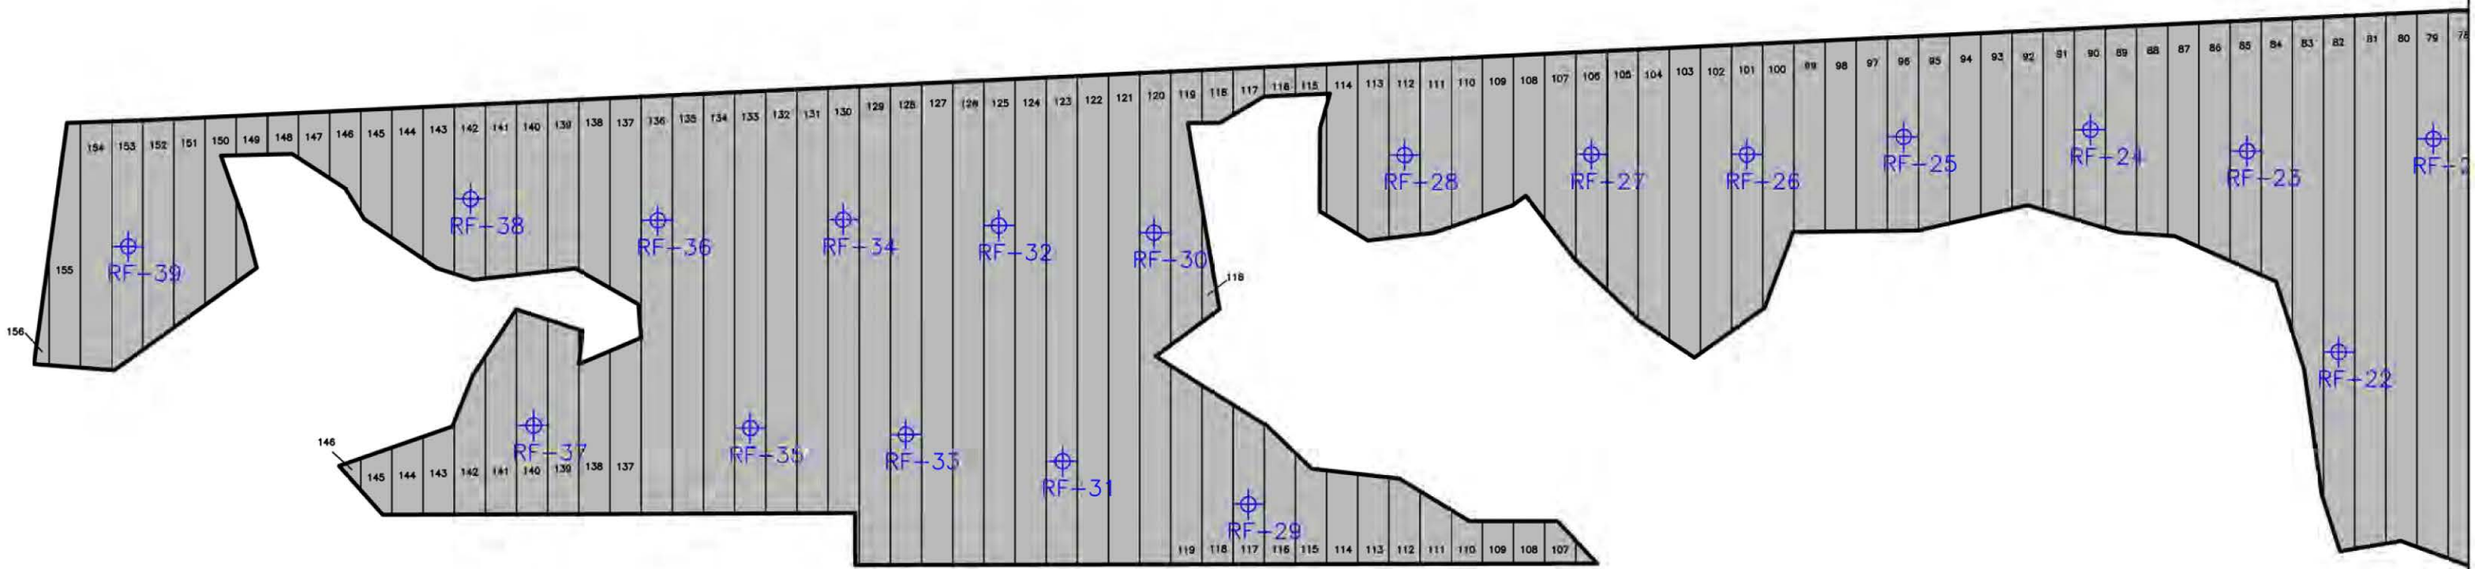
RF = Reduced Frequency

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

# PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets): _____

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used: All analyte results are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3. SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler. All samples are iced in a cooler during transport to the lab.

# Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending November 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Submitted to all Parties on July 10, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to all Parties on August 26, 2014. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal to Parties' per request. |
| **DC 2014-8-13** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Submitted to all Parties on August 19, 2014. |
| **DC 2014-9-2** | Revised hydraulic barrier wall alignment adjacent the 72" force main in order to provide a clearance of 25 ft. between the centerline of the 72" force main and the barrier wall as previously agreed with PVSC. | Submitted to all Parties on September 4, 2014. |
| **DC 2014-10-31** | Revised Soil Management Plan (Appendix G - SA-6 North 100% Design Report) to indicate that any asphalt or concrete that meets NJDEP reuse requirements or is granted a variance by the NJDEP may be reused as backfill or placed underneath the cap.<br>Contractor directed to consolidate arsenic-impacted asphalt in Cap Areas in a footprint that does not exceed 44,000 SF and to cover the asphalt with chromium-impacted soil. | Submitted to Contractor only. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Subject:** **Riverkeeper et al v. Honeywell International Inc. et al**
**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2014-12**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from December 1 – December 31, 2014.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

WJH:jtc/sgf

# B. SITE OPERATIONS

## 1. AVERAGE WEEKLY SITE RESOURCES

| Team | Week Ending | | | |
|---|---|---|---|---|
| | 12/7/14 | 12/14/14 | 12/21/14 | 12/28/14 |
| **Construction Management (AMEC)** | 11 | 11 | 12 | 8 |
| **Engineering (AMEC)** | 1 | 1 | 1 | 0 |
| **Air Monitoring (Emilcott)** | 1 | 1 | 1 | 1 |
| **Security (Securitas)** | 3 | 3 | 3 | 3 |
| **Entact/Subcontractors** | 33 | 33 | 29 | 29 |
| **Arecon/US Ecology Subcontractors** | 1 | 1 | 1 | 0 |
| **Evoqua** | 1 | 1 | 1 | 1 |
| **HBS (SA-6N GWTP Security System)** | 0 | 0 | 0 | 0 |
| **Gramercy** | 22 | 19 | 8 | 7 |
| **TOTAL STAFF** | **73** | **70** | **56** | **49** |

## 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6 South and SA-6 North.
- Collected December PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed universal waste removal and asbestos abatements activities at the JCIA demolition project. Contractor continued site preparation and began trash pit protection activities.
- Conducted a round of quarterly groundwater level measurements. Conducted quarterly groundwater sampling of GWET extraction wells.
- Conducted semi-annual groundwater sampling under the S-3 Mass Removal Injection program.
- Continued to advance permit application and discussions with New Jersey Department of Transportation (NJDOT) regarding Highway Occupancy and Drainage Permits for upcoming SA-6 activities proximate to the Rt. 440 frontage.
- On December 8, 2014, a leaking diesel line was identified on a water truck. This necessitated several yards of surficial soil to be removed and segregated. The incident was called in to the NJDEP hotline, and Incident number for this non-emergency incident is: 14-12-08-1503-35.

- On December 29, 2014, obtained the JCIA Structures Demolition Permit from the City of Jersey City.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on December 9, 2014.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | |
|---|---|---|---|---|
| | 12/7/14 | 12/14/14 | 12/21/14 | 12/28/14 |
| Avg. Gallons Treated & Discharged (per day) | 76,366 | 76,513 | 75,612 | 77,129 |
| Average Flow (gpm) for Operating Period | 53 | 53 | 53 | 54 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 |
| GWTP Influent Tanks (gal.) | 6,840 | 6,916 | 5,566 | 10,356 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued storm-water management activities.
- Completed excavation activities associated with the lens of anomalous material on SA-6 South proximate to Cell 104.
- Collected a post-excavation sidewall sample, 134-SB-177, from the southeast side of the anomalous material excavation on December 2, 2014. Laboratory analysis received on December 12, 2014 indicated the result was 2.6 mg/kg. Submitted the certification of excavation complete to the parties with all sampling results on January 7, 2015.
- Completed excavation of locations designated as Area 41 and Area 43. Began backfill activities associated with the anomalous material excavation, Site 163 and Area 41.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.
- Continued compaction testing associated with imported backfill. Adjusted the frequency of testing in accordance with specifications.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 0 | 0 | 0 |

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Entact/ Horwith** | Tri-axle Dump | PA Transload | US Ecology | >1000 mg/kg Soils | 65 | 21.54 | 1400.5 |
| **Entact/ Montecalvo** | 30 cyd roll-off | Bayshore Recycling | Bayshore | Non Haz Creosote Debris | 1 | 10.46 | 10.46 |
| **Gramercy-(JCIA Demo)** | 40 cyd roll off | West Babylon, NY | 110 Sand Company | Non Friable ACM | 6 | 17.40 | 104.44 |
| **Gramercy-(JCIA Demo)** | 40 cyd rol off | Newburg, PA | Cumberland County Landfill | Friable ACM | 1 | * | * |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | Petroleum Impacted Soil | 20 | 24.34 | 486.85 |
| **Entact/ Arecon** | Tri-axle Dump | Keasbey, NJ | Bayshore | Non-HAZ PAH_PET 124/140 | 19 | 25.0 | 476.41 |

** Not currently available. To be provided in Progress Report No. 2015-01*

## 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Excavation Completed** | Anomalous Material near Cell 104, Site 163, Area 41<br>Volume Excavated - Total for Reporting Period: 10,910CY/ Total to Date: 162,210CY |
| **Backfill in Progress** | Cell Number(s) 104-59, Site 163, Area 41 |

## 3. BACKFILL MATERIALS USED

| Source | Week Ending | | | |
|---|---|---|---|---|
| | 12/7/14 | 12/14/14 | 121/21/14 | 12/28/14 |
| <20ppm re-use, CY | 0 | 113 | 1,598 | 0 |
| Weldon, Import-Tons Screenings | 0 | 0 | 0 | 0 |
| Tilcon, Import-Tons DGA | 755 | 0 | 0 | 0 |
| Tilcon, Import Tons – 1.5” Stone | 0 | 0 | 0 | 0 |
| Weldon, Imported Tons - QP | 0 | 0 | 0 | 0 |
| Weldon, Imported Tons - DGA | 0 | 0 | 0 | 0 |
| Tilcon, Imported 6”-8” stone | 0 | 0 | 0 | 0 |
| Tilcon, Imported Tons – 2.5” Stone | 0 | 0 | 0 | 0 |

## E. SURCHARGE OPERATIONS

- Area 1S: Continue offloading Celgene material from 1S and relocating to 2S approximately 75% complete.
- Area 2S: Surcharging continued on Area 2S. Surcharge placement consisted of both chromium impacted soils to the design sub-grade and both imported Celgene and Novartis soils. Surcharge placement is approximately 90% complete.
- Area 3S: Surcharge placement continued on Area 3S and is approximately 40% complete.
- Area 1N: Continued surcharge removal activities. Surcharge removal activities are approximately 80% complete. Details were provided in the December 2014 Surcharge Monitoring Report No. 7.
- Area 2N: Surcharge placement is 100% complete. Monitoring data (provided in Surcharge Monitoring Report No. 7) indicates that surcharge has attained the goals per the 100% Design and may be removed.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

## F. SHEET PILE OPERATIONS *(see **Attachment 10**)*

- Continue grouting angles of sheet pile at SA-6 South.
- Excavation proximate to the SA-6 South barrier wall was completed on October 28, 2014 and backfill has been progressed in all areas against the SA-6 South barrier wall. Deflection readings are therefore no longer required.

## G. PERMIT STATUS

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Continue JCIA Structures Demolition activities to include trash pit protection and initiation of above-grade structure demolition activities.
- Continue placement of surcharge materials in SA-6 South Area 2S and Area 3S.
- Continue off loading of surcharge materials from SA-6 South Area 1S.
- Continue installation of the contingent groundwater system trench on SA-6 South.
- Complete excavation of Area 42 and the remaining soil on the eastern side of Site 163.
- Continue loadout and transportation and disposal activities at SA-6 South.
- Continue backfill placement and associated compaction testing activities at SA-6 South.
- Continue accepting delivery of steel sheetpile for SA-6 North Barrier Wall installation.
- Conduct well development of injection well 088-IW-01 on SA-6 North.
- Conduct well development of GWET extraction well PW-2.
- Conduct acid cleaning of the PW-2 force main.
- Continue dewatering and storm-water management activities.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.
- Complete sediment long term monitoring activities and final report preparation.

- Obtain NJDOT Highway Occupancy Permit for upcoming SA-6 North activities proximate to Rt. 440 frontage.

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

2 This is the Bottom Elevation identified in the 100% design. It is one of the predetermined bottom elevations that correspond with the 9 excavation intervals shown in the design.

Green shading indicates 100% Design Bottom Elevation Field Modified to reach < 20 PPM soils .

***Notes:*** Maximum Dry Density (gravel corrected) for Weldon WC QP based on Sor Testing Laboratories Report No. 13-2027 dated 12/9/13. Sample collected from on site soils.

Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

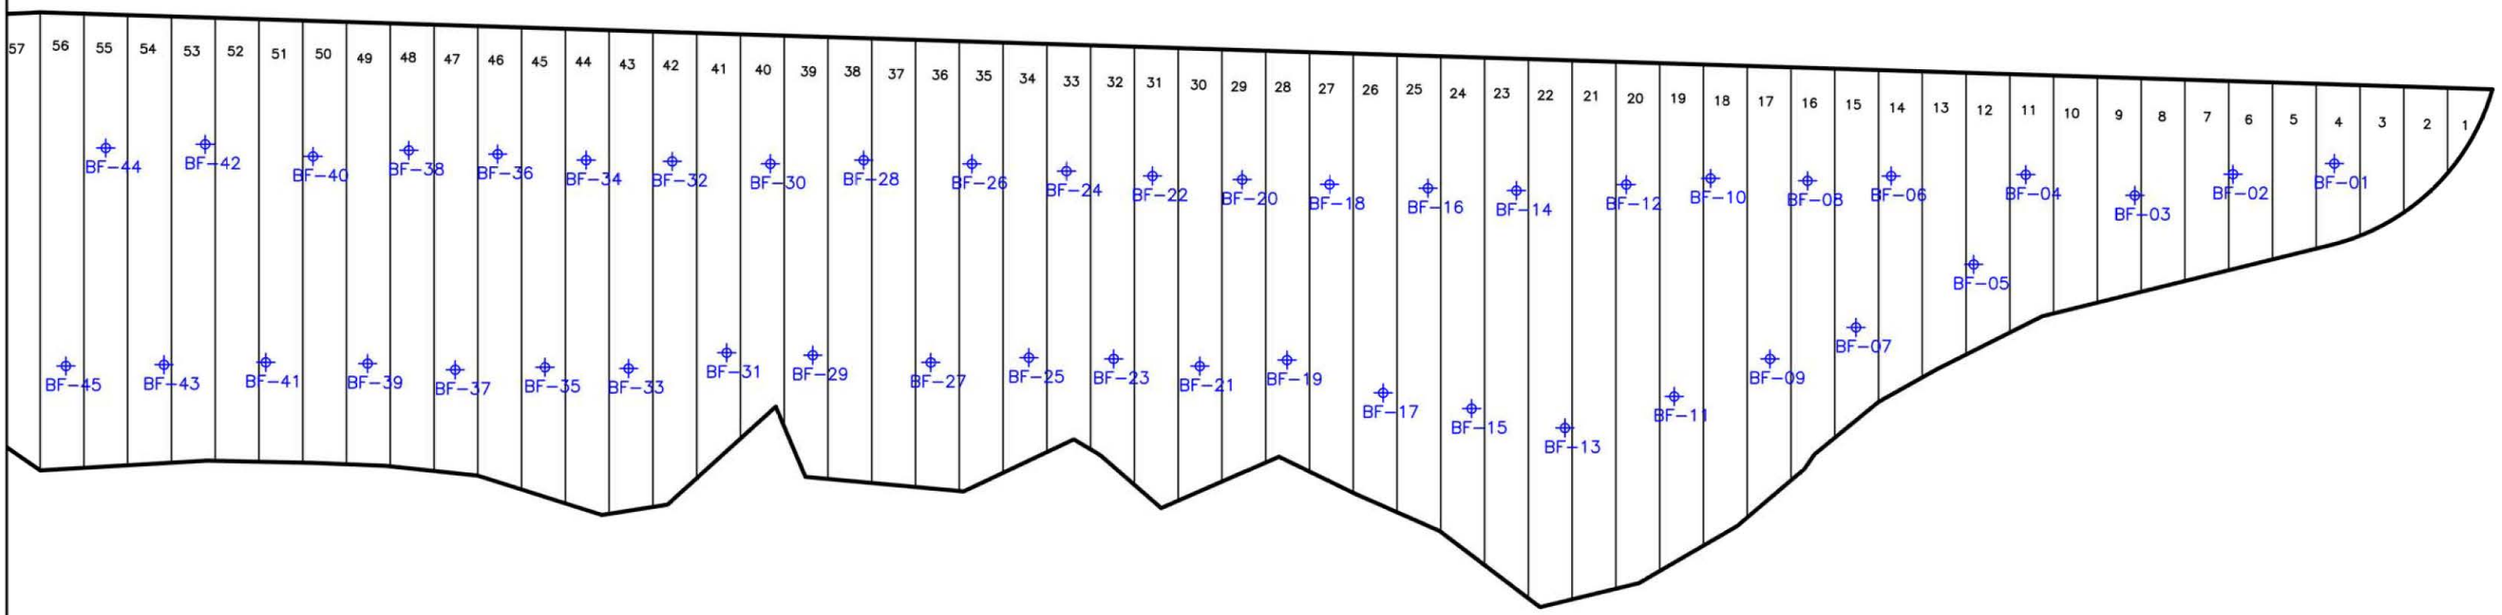
Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Maximum Dry Density for Weldon LH Screenings based on Vertical V Laboratory Report No. 12643 dated 9/29/14.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



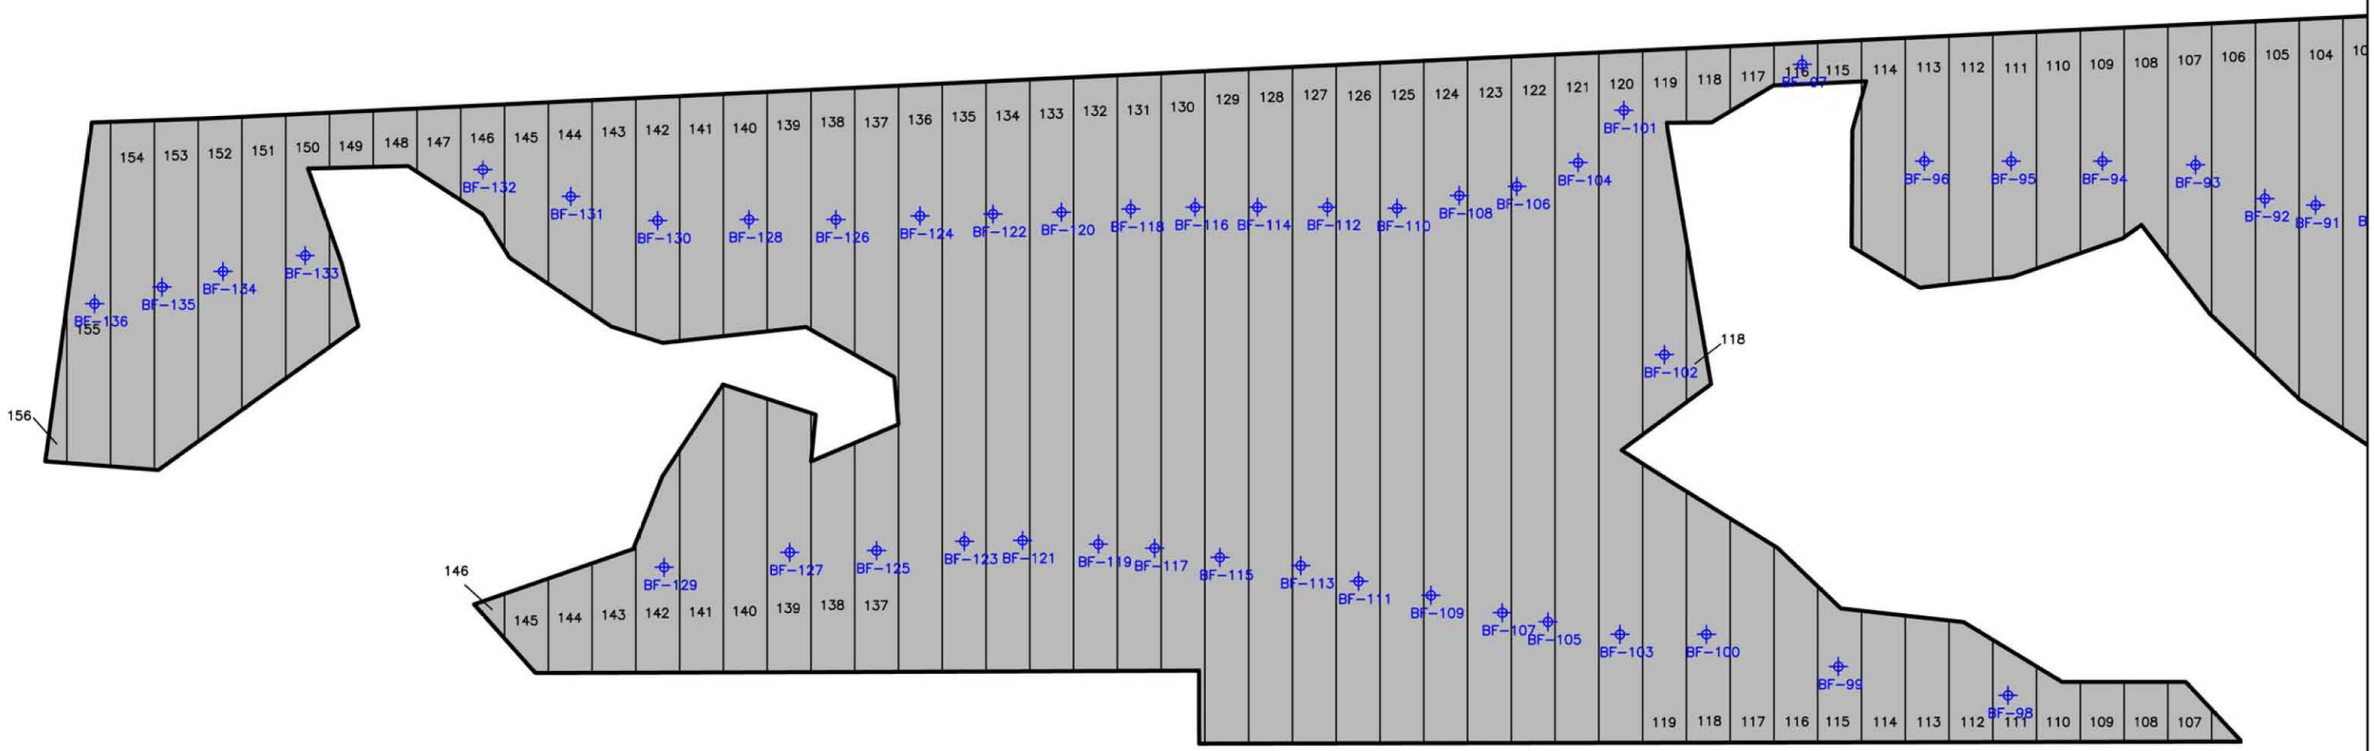
Sample ID BF-01-01 where:

BF = Backfill (At frequency of 1 test/2500 SF)

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)

R = Will be placed after sample ID if the test location is reworked and the compaction test is run again



NOTE:

Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 2. a.

***Notes:***

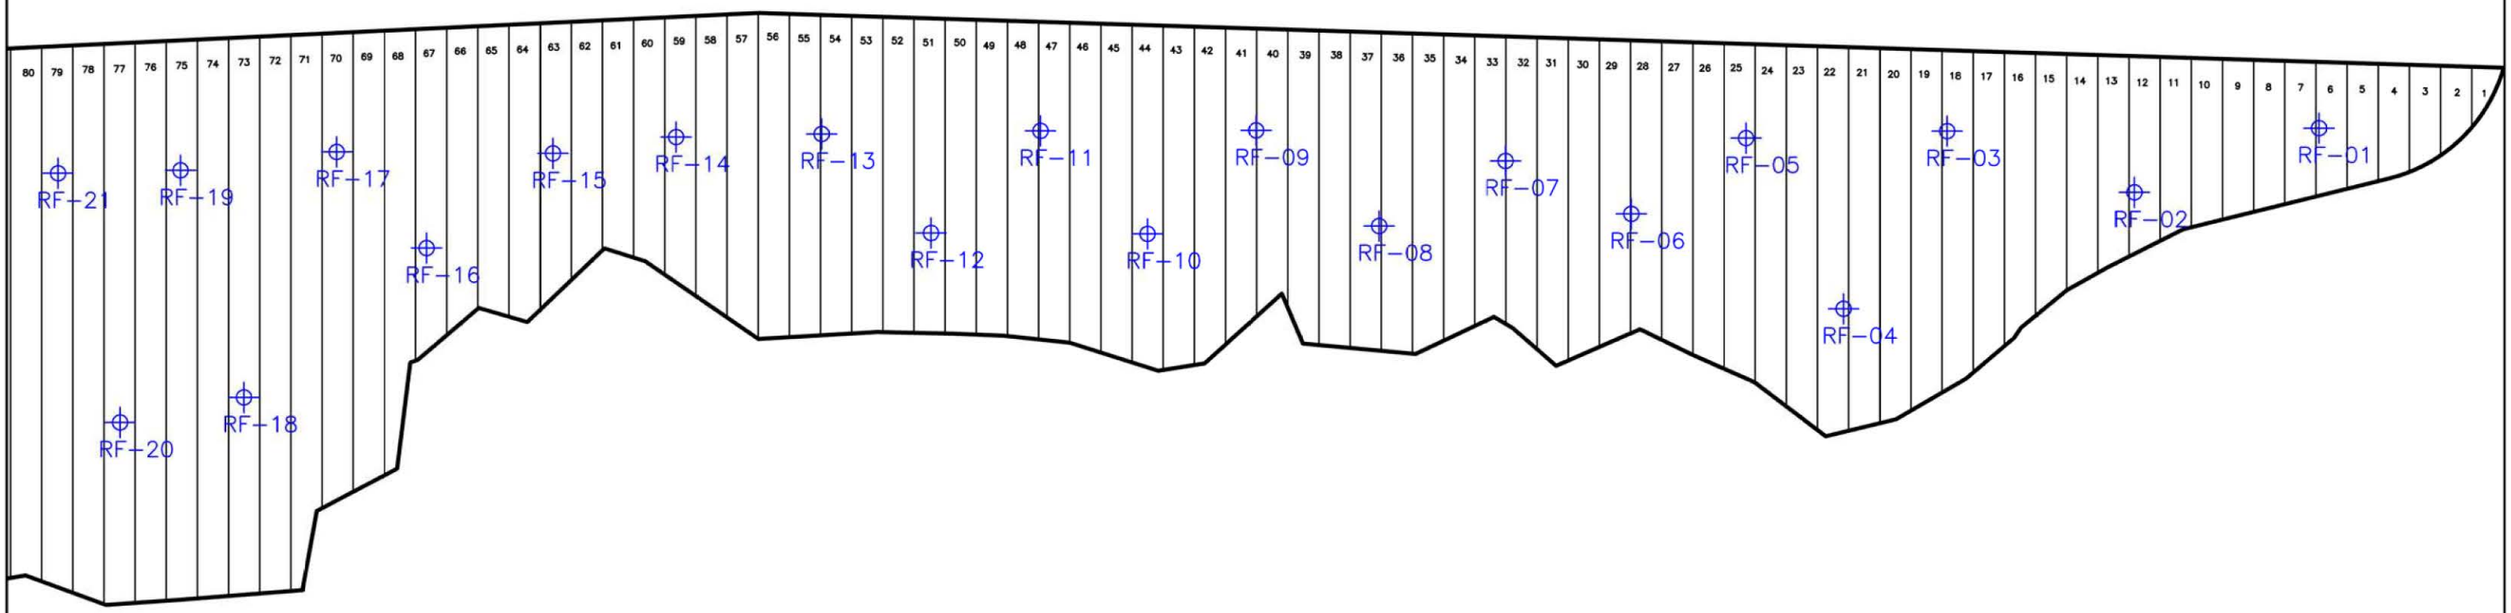
Maximum Dry Density for Weldon WC Screenings based on Sor Testing Laboratories Report No. 13-1877 dated 11/6/13.

Maximum Dry Density (gravel corrected) for Tilcon MH DGA based on Sor Testing Laboratories Report No. 13-1334 dated 8/7/13.

Re-used on site historical fill material (Type A) will not be tested for compaction per Specification Section 02315-3.13 A.2.b

Moisture content not to exceed 3% above optimum per Specification Section 02315-2.04C

Bottom of excavation elevation based on Maser survey data (Center Point elevations)



Sample ID RF-01-01 where:

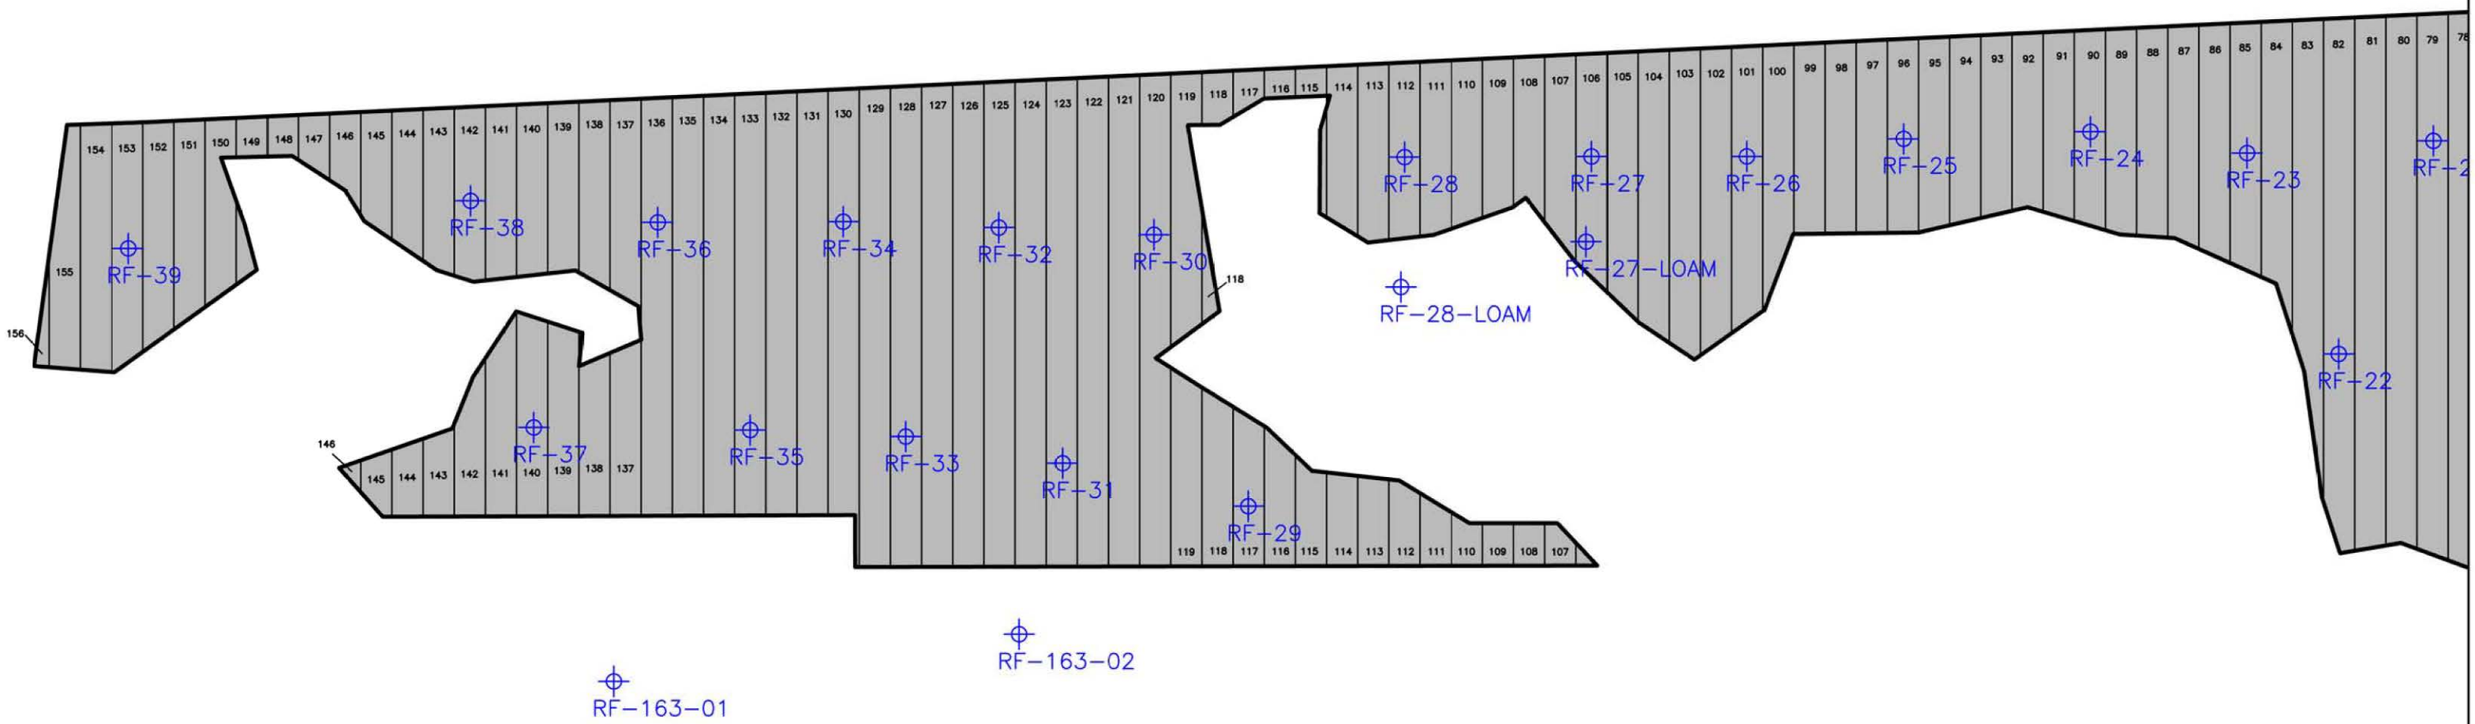
RF = Reduced Frequency

**FIELD DENSITY TEST SUMMARY LOG**
Testing Frequency - 5 Tests per Acre
HONEYWELL STUDY AREA 6 REMEDIATION PROJECT

01 = Test Location (as noted on Backfill Compaction Location Figure)

01 = Number of test performed at that location (sequential)
R = Will be placed after sample ID if the test location is reworked and the compaction test is run again

NOTE:



Testing locations are based on reduced testing frequency specified in 012315 3.13 A. 3.

Weldon Watchung screenings testing frequency reduced as of 2/11/14.

**Re: Honeywell International Inc.**
**Court Ordered Regional Groundwater Remedy Treatment Plant**
**Located at 525 & 575 Route 440, Jersey City**
**MR 1 and MR 2**
**Permit ID# 31630016**

Dear Mr. Caltagirone:

Honeywell is submitting the November 2014 discharge monitoring reports, MR 1 and MR 2, for the Court Ordered Regional Groundwater Remedy treatment plant located at 525 & 575 Route 440 in Jersey City.

Please contact me at 973-455-2989 if you need further clarification or have questions.

On Behalf of Honeywell
Sincerely

Helen Fahy

## PRETREATMENT MONITORING REPORT

Certification of Non-Use if applicable (use additional sheets):

Compliance or non compliance statement with compliance schedule (use additional sheets if necessary) for every parameter used:

All analytes are compliant (see attached report).

Explain Method for preserving samples: Monthly metals are preserved with HNO3.

SGT-HEM & TVOC samples are preserved using HCl. BOD samples are collected in a refrigerated sampler.

All samples are iced in a cooler during transport to the lab.

# Attachment 13: SA-6 North & South Design Change Tracking Log

**SA-6 North/South Field Change Log - Month Ending December 2014**

| Changed Item Identifier | Description of Change | Comments |
|---|---|---|
| **DC 2013-7-29** | Surcharge Monitoring Plan modifications to match changes associated with relocation of the hydraulic barrier wall near the 72" force main. 72-Inch Force Main Monitoring Layout Plan, Details, and Notes developed. Surcharge pile layout redesign and instrumentation adjustments. The format of the Daily Report, Instrumentaion Installation Forms, and Monitoring Data Forms has been modified to allow for generation using a "tablet application". | Submitted to all Parties on March 12, 2014. |
| **DC 2013-8-14** | Modifications to the Barrier Wall alignment and Surcharge Program to address concerns of NJDEP/PVSC/JCMUA and Honeywell regarding protection of 72 inch force main. Design drawings have been modified and design calculations revised in support of the required modifications to subgrade/liner grading and final grades. | Submitted to all Parties on September 12, 2013. |
| **DC 2013-8-14** | The area indicated on sheets S-201 to S-203 from Station 0+00 to 17+80 will be sealed with a cement bentonite grout in lieu of hydraulic sealant. This area will include a grouted angle. | Contingency to Expand Use of Grouted Joint Called out in 100% Design. Submitted to Contractor only. |
| **DC 2013-9-12** | Hydraulic barrier alignment for SA-6 South between 21+00 and 22+00 to be straightened. Stationing from 21+00 on is to be adjusted to account for the elimination of the 3-ft offset in the wall. | Minor alignment adjustment now that Boatyard Property transaction to Bayfront completed. Submitted to Contractor only. |
| **DC 2013-9-24** | Testing frequency for analytic parameters for imported borrow material is to be modified to 1 test/5,000 CY of borrow. | Honeywell directive to be more conservative than 100% Design. Submitted to Contractor only. |
| **DC 2013-12-12** | The proposed bottom of excavation elevations may be deepened as required to expose Post-Excavation Samples as reported on the revised PDI summary tables which were submitted to Parties in HON/Amec Response to Comments dated 02/06/14. | In addition to the periodic notice of excavation complete emails to the Parties, Honeywell submitted the following documents that further defined excavation extents, updated PDI Tables (converted to elevations), Colorized Area Excavation Depth Drawing, and procedures to certify those extents:<br>1) 2/6/14 RTC letter on 1/28/14 & 1/31/14 Plaintiff comment letters Re: Cells 17 - 29.<br>2) 3/3/14 SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits.<br>3) 4/17/14 RTC letter on 4/11/14 Plaintiff comment letters Re: Cells 44 - 52.<br>4) 4/24/14 Revised SA-6 South Standard Operating Procedure, Confirmation of Excavation Limits. |
| **DC 2014-3-25** | Change Contingent GW system from wells to trench on both SA-6 S and SA-6N. | Submitted to all Parties on March 25, 2014 and April 23, 2014. |
| **DC 2013-8-14** | Modify surcharge pile toe of slope to reduce load on the bulkhead | Submitted to all Parties on July 10, 2014. |
| **DC 2014-5-6** | Excavate down to 4 ft bgs (instead of 3 ft bgs) in a portion of the Site 163 excavation area. | 5/6/14 letter from Honeywell summarizing the ERFS SiteVision field testing program indicated that this portion of Site 163 would be excavated instead of treated in-situ. |
| **DC 2014-5-19** | Defer removal of concrete/asphalt berm, demolition of subsurface concrete, and excavation to design elevations in the SA-6 South excavation area adjacent the bulkhead. | Submitted to all Parties on May 19, 2014. |
| **DC 2014-7-28** | Update the list of monitoring wells to be abandoned / retained. | Submitted to all Parties on August 26, 2014. |
| **DC 2014** | Direction on the handling of petroleum soils under the cap. | Pending submittal to Parties' per request. |
| **DC 2014-8-13** | Revised hydraulic barrier wall alignment through the sedimentation basin to reduce potential conflict with existing timber piles. | Submitted to all Parties on August 19, 2014. |
| **DC 2014-9-2** | Revised hydraulic barrier wall alignment adjacent the 72" force main in order to provide a clearance of 25 ft. between the centerline of the 72" force main and the barrier wall as previously agreed with PVSC. | Submitted to all Parties on September 4, 2014. |
| **DC 2014-10-31** | Revised Soil Management Plan (Appendix G - SA-6 North 100% Design Report) to indicate that any asphalt or concrete that meets NJDEP reuse requirements or is granted a variance by the NJDEP may be reused as backfill or placed underneath the cap.<br>Contractor directed to consolidate arsenic-impacted asphalt in Cap Areas in a footprint that does not exceed 44,000 SF and to cover the asphalt with chromium-impacted soil. | Submitted to Contractor only. |
| **DC 2014-12-01** | The Southern limits of the Site 163 Chromium remediation extend close to the existing bulkhead. The bulkhead is in a dilapidated condition and has deteriorated subsequent to design of the remedy. During implementation of the remedy the condition of the bulkhead was visually assessed. As a result of this assessment it was determined that it was necessary to add additional protection to the backfill placed in Site 163 pending installation of the permanent replacement bulkhead. The design was modified in the field to include placement of geotextile fabrics and a sloped rip-rap facing to provide additional protection to the backfill. | Submitted to Contractor only. |

**Notes:** All tracked changes will be reflected in the as-built drawings and Final Record Documents as agreed to with the Parties.

**Study Areas 6 and 7 Combined Monthly Progress/Highlights**
**Report No. 2015-01**

Dear Senator Torricelli:

Attached is the combined Chromium Remedy Monthly Progress Report for Study Areas 6 and 7, for activities conducted by Honeywell during the period from January 1 – January 31, 2015.

If you have any questions concerning the content of the report, please feel free to contact the undersigned.

Sincerely,

William J. Hague
Director, Remediation
Engineering and Construction

| HBS (SA-6N GWTP Security System) | 0 | 0 | 0 | 0 | 0 |
| Gramercy | 7 | 6 | 8 | 10 | 11 |
| **TOTAL STAFF** | **50** | **50** | **50** | **50** | **54** |

## 2. SITE HIGHLIGHTS (GENERAL)

- Performed routine groundwater monitoring and GWET inspections.
- Continued Ground Water Treatment Plant (GWTP) processing activities.
- Continued perimeter air monitoring activities on SA-6 South and SA-6 North.
- Collected January PVSC compliance sample from the Construction Water Treatment Plant (CWTP).
- Completed protection of JCIA incinerator building trash pit.
- On January 5, 2015, began demolition and load out of the JCIA structures.
- Fence contractor installed new fence and gate posts at entrance to the Department of Public Works (DPW).
- Received confirmation from New Jersey Department of Transportation (NJDOT) that the Drainage Permit at SA-6 North is no longer needed.
- On December 8, 2014 a leaking diesel line was identified on a water truck. Sampling of the impacted soil was performed and laboratory analysis received on January 5, 2015 indicated the result was Non-Hazardous. On January 15, 2015 the surficial soil was transported off site to non-hazardous disposal facility.

- On January 21, 2015, meeting was held with representatives of the City of Jersey City and DPW to review progress of the remaining relocation activities.
- On February 10, submitted Year 1 Implementation Report for Study Area 7 Sediment Remedy Long-term Monitoring Program.

## C. SA-6N GROUND WATER TREATMENT PLANT

- Cleaned all process vessel pH and ORP probes, and mixed /refilled the polymer.
- Cleaned upstream process (tank 201 and tank 202) pH probes, and the tank 201.
- Received monthly lab results for the GWTP effluent PVSC sampling conducted on January 16. 2015.

### 1. WEEKLY SUMMARY

| 80 Kellogg GWTP Data | Week Ending | | | | |
|---|---|---|---|---|---|
| | 01/04/15 | 01/11/15 | 01/18/15 | 01/25/15 | 02/01/15 |
| Avg. Gallons Treated & Discharged (per day) | 76,532 | 75,901 | 75,971 | 75,238 | 76,089 |
| Average Flow (gpm) for Operating Period | 56 | 53 | 53 | 53 | 53 |
| Avg. Hours of Plant Operation | 24 | 24 | 24 | 24 | 24 |
| GWTP Influent Tanks (gal.) | 11,840 | 6,556 | 8,173 | 10,308 | 6,256 |

## D. EXCAVATION AND BACKFILL *(see **Attachment 3** for Progression Chart, Weekly Excavation and Survey Data, Backfill Compaction Locations, and Field Density Test Summary Log)*

- Continued storm-water management activities.
- Completed excavation of locations designated as Site 163-1, Area 42 and Area 43.
- Continued routine dewatering activities and associated discharge to the construction water treatment facility.

### 1. OFF-SITE DISPOSAL MONTHLY WASTE MATERIALS SUMMARY

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Siemens/ FCI** | Roll-Off | TSDF | Stablex-Canada | WWTP Filter Cake | 1 | 17.31 | 17.31 |
| **Gramercy/ Horwith *** | 40 Cyd Roll off | Newburg, PA | Cumberland County Landfill | Friable ACM | 2 | 3.61 | 7.23 |
| **Gramercy- (JCIA Demo)** | 20 cyd rol off | Jersey City, NJ | Sims Metal | Aluminum | 1 | 1.4 | 1.4 |
| **Gramercy- (JCIA Demo)** | 40 Cyd Roll off | Jersey City, NJ | Sims Metal | Metal | 41 | 9.4 | 386.1 |

| Contractor/ Transporter | Truck Type | Destination | TSDF | Material | Truck Loads | Avg. T/ Truck | Tons Shipped |
|---|---|---|---|---|---|---|---|
| **Gramercy- (JCIA Demo)** | 40 Cyd Roll off | North Bergen, NJ | Cardella Waste | C&D | 14 | 12.5 | 175.2 |
| **Gramercy- (JCIA Demo)** | 30 cyd roll off | Bayonne, NJ | Durable Recycling | Concrete | 57 | 14.1 | 803.4 |
| **Gramercy- (JCIA Demo)** | 40 Cyd Roll off | Bayonne, NJ | Durable Recycling | Brick/Masonry | 2 | 18.3 | 36.5 |
| **Entact/ Arecon** | Tri-axle Dump | South Brunswick, NJ | MCUA | Petroleum Impacted Soil | 121 | 25.1 | 3,045.50 |
| **Entact/ Arecon** | Tri-axle Dump | South Brunswick, NJ | MCUA | Diesel Impacted Soil | 2 | 14 | 28 |

** December 2014 Transport*

### 2. EXCAVATION & BACKFILL PROGRESS

| Description | Cells |
|---|---|
| **Excavation Completed** | Anomalous Material near Site 163-1, Area 42, Area 43 |
| **Backfill in Progress** | No backfill occurred during the reporting period |

### 3. BACKFILL MATERIALS USED

No backfill occurred and dropping table this month.

## E. SURCHARGE OPERATIONS

- Area 1S: Continue offloading Celgene material from 1S and relocating to 2S approximately 80% complete.
- Area 2S: Surcharging continued on Area 2S. Surcharge placement consisted of both chromium impacted soils to the design sub-grade and both imported Celgene and Novartis soils. Surcharge placement is approximately 95% complete.
- Area 3S: Surcharge placement continued on Area 3S and is approximately 60% complete.
- Area 1N: Continued surcharge removal activities. Surcharge removal activities are approximately 85% complete. Details will be provided in the January 2015 Surcharge Monitoring Report No. 10.
- Area 2N: Surcharge placement is 100% complete. Monitoring data (provided in Surcharge Monitoring Report No. 7) indicates that surcharge has attained the goals per the 100% Design and may be removed.
- Area 3N: No activity in this area pending JCIA Demolition.
- Area 4N: No activity in this area pending JCIA Demolition.

- Active Monitoring for Surcharge is currently limited to Areas 2S and 3S. The combination of snow and temperatures are preventing personnel from taking readings at many locations in these areas at the frequency stated in the Surcharge Monitoring Plan Monitoring will resume at all points when it is feasible and safe to do so.

## F. SHEET PILE OPERATIONS

- Excavation proximate to the SA-6 South barrier wall was completed on October 28, 2014 and backfill has been progressed in all areas against the SA-6 South barrier wall. Deflection readings are therefore no longer required.

## G. PERMIT STATUS

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |

| Pre-Construction Notice – Nationwide Permit #38 for Sediment Remedy | SA-7 | Issued: 3/21/2013 | N/A | 3/18/2015 | 3/25/2013 |
| NJDOT – Application for Drainage Connection, Post Remediation Grading and Drainage | SA-6 Chromium Remedy | Application Submitted 8/19/14 Permit Application Rescinded 12/1/14 & Approved by DOT on 12/18/14 | N/A | N/A | N/A |

| Permit | Site | Status | Renewal Application Due Date | Expiration Date | Date Transmitted to the Louis Berger Group |
|---|---|---|---|---|---|
| NJDOT – Highway Occupancy Permit – Installation of Sheet Piling and Excavation Adjacent to Rte 440 ROW | SA-6 Chromium Remedy | Application Submitted 9/8/14 Final Executed Permit Issued 12/2/14 | 11/2/15 | 12/2/15 | Pending |

## H. PLANNED HIGHLIGHTS FOR NEXT MONTH

- Continue JCIA Structures Demolition and load out activities.
- Continue placement of surcharge materials in SA-6 South Area 2S and Area 3S.
- Continue loadout and transportation and disposal activities at SA-6 South.
- Continue accepting delivery of steel sheetpile for remaining SA-6 North Barrier Wall installation.
- Conduct well development of injection well 088-IW-01 on SA-6 North.
- Conduct well development of GWET extraction well PW-2.
- Conduct acid cleaning of the PW-2 force main.
- Continue dewatering and storm-water management activities.
- Continue SWPPP inspections.
- Complete PVSC Monthly compliance sampling.
- Obtain NJDOT Highway Occupancy Permit for upcoming SA-6 North activities proximate to Rt. 440 frontage.
- Continue the SA-6 North Bench-Scale treatability study for Treatment Area 10 proximate to force main.
- Continue to coordinate with the JCDPW on their off-site relocation of remaining equipment from SA-6 North.

# Attachment 1: Schedule – 6 Month Look Ahead

# SA-6 North/South Combined Chromium Remediation Schedule

| ID | Task Name | Duration | Start |
|---|---|---|---|
| **1** | **SA-6 North Chromium Remedy Preparation (Sites 087 and 088)** | **1891 days** | **Fri 1/4/08** |
| **18** | **JCIA/JCDPW Relocation** | **1735 days** | **Mon 8/11/08** |
| 19 | Develop Site Relocation Master Plan | 38 days | Mon 8/11/08 |
| 20 | Submit Site Relocation Master Plan | 0 days | Wed 10/1/08 |
| 21 | JC Construction of New Facilities | 1309 days | Tue 6/2/09 |
| 22 | Relocation Contractor Procurement | 392 days | Thu 4/15/10 |
| 23 | JCIA and JCDPW Relocation | 753 days | Mon 10/17/11 |
| 24 | Demolition of Existing JCIA Facilities - Sedimentation Basin | 101 days | Mon 12/12/11 |
| 24a | Demolition of JCIA Structures | 151 days | Mon 9/1/14 |
| **25** | **SA-6 South Chromium Remedy Preparation (Sites 073, 124, 125, 134, 140 and 163)** | **1518 days** | **Fri 7/11/08** |
| **57** | **SA-6 South Relocation** | **616 days** | **Mon 12/26/11** |
| 58 | New GWTP Construction Completion | 502 days | Mon 3/5/12 |
| 59 | Demolition of 80 Kellogg | 857 days | Mon 12/26/11 |
| **60** | **SA-6 North/South Field Implementation** | **838 days** | **Fri 3/1/13** |
| 60a | SA-6N In-Situ Treatment Areas 7, 8 and 10 | 403 days | Mon 6/17/13 |
| 60b | SA-6S (Site 163) In-Situ Treatment | 294 days | Fri 11/15/13 |
| **61** | **Mobilization (Inclues new GWTP, In-situ Treatment & Main Remedy)** | **87 days** | **Fri 3/1/13** |
| 61a | Mobilization | 87 days | Fri 3/1/13 |
| **62** | **Surcharge Install/Instrumentation** | **620 days** | **Mon 6/17/13** |
| 62a | Prepare Open Space Areas for Surcharge/Install Instrumentation | 142 days | Mon 6/17/13 |
| 62b | Place Stockpile Surcharge SA6N Western Areas | 195 days | Mon 6/2/14 |
| 62c | Place Stockpile Surcharge SA6N Eastern Areas | 175 days | Mon 3/2/15 |
| 62d | Place Stockpile Surcharge SA6S Western Areas | 182 days | Mon 10/20/14 |
| 62e | Place Stockpile Surcharge SA6S Eastern Areas | 195 days | Mon 3/3/14 |
| **63** | **Barrier Wall Install** | **489 days** | **Mon 6/17/13** |
| **63a** | **SA 6N Installation of Barrier Wall** | **369 days** | **Mon 12/2/13** |
| 63b | SA-6N Barrier Wall Delivery and Installation Preparation | 55 days | Mon 12/2/13 |
| 63c | SA-6N Stations 23+38 to 14+25 | 90 days | Mon 2/17/14 |
| 63d | SA-6N Stations 14+25 to 0+00 | 224 days | Mon 6/23/14 |
| **63f** | **SA 6S Installation of Barrier Wall** | **250 days** | **Mon 6/17/13** |
| 63g | SA-6S Barrier Wall Delivery and Installation Preparation | 44 days | Mon 6/17/13 |
| 63h | SA-6S Stations 1+54 to 8+37 | 7 days | Fri 8/16/13 |
| 63i | SA-6S Stations 0+00 to 1+54; 8+37 to 8+60; 24+40 to 14+87; 24+40 to 25+89 | 27 days | Thu 10/3/13 |
| 63j | SA-6S Stations 8+60 to 14+87 | 145 days | Mon 11/11/13 |
| **64** | **Excavation** | **507 days** | **Tue 10/22/13** |
| 64a | SA 6N Excavation | 218 days | Mon 12/1/14 |
| **64b** | **SA 6S Excavation** | **226 days** | **Tue 10/22/13** |
| 64c | SA-6S Excavation of Cells 1 - 25 | 53 days | Tue 10/22/13 |
| 64d | SA-6S Excavation of Cells 26 - 60 | 90 days | Fri 1/3/14 |
| 64e | SA-6S Excavation of Cells 156 - 61 | 83 days | Fri 5/9/14 |
| **65** | **Backfill** | **493 days** | **Mon 11/11/13** |
| 65a | SA 6N Backfill | 218 days | Mon 12/1/14 |
| 65b | SA 6S Backfill | 232 days | Mon 11/11/13 |
| **66** | **Capping and Cover Soil Placement** | **315 days** | **Mon 12/1/14** |
| 66a | SA 6N Capping and Cover Soil Placement | 119 days | Tue 9/1/15 |
| 66b | SA 6S Capping and Cover Soil Placement | 283 days | Mon 12/1/14 |
| **67** | **Restoration** | **164 days** | **Tue 9/1/15** |
| 67a | Restoration | 164 days | Tue 9/1/15 |

## SA-6 South Excavation (Site 163): Confirmatory Points (Table 1.0)

| Bottom Target Coordinates (based on PDI) | | | | | As-built Elevations | | |
|---|---|---|---|---|---|---|---|
| Northing | Easting | Elevation 1 | Sample ID | Corresponding Cell # | Date Obtained | Elevation | Comments |
| 685185.6 | 601432.8 | 5.8 | 163-SB-107 | N/A | 10/30/2014 | 5.0 | Area 43 - Target Elevation Reached |
| 685169.6 | 601446.1 | 6.0 | 163-SB-020 | N/A | 10/30/2014 | 4.8 | Area 43 - Target Elevation Reached |
| 685102.9 | 601588.4 | 5.2 | 163-SB-015 | N/A | 10/30/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 685125.0 | 601586.5 | 6.3 | 163-SB-043 | N/A | 10/30/2014 | 5.7 | Area 163 - Target Elevation Reached |
| 685037.6 | 601660.2 | 4.5 | 163-SB-010 | N/A | 11/5/2014 | 4.2 | Area 163 - Target Elevation Reached |
| 685029.9 | 601632.6 | 5.2 | 163-SB-013 | N/A | 11/5/2014 | 4.2 | Area 163 - Target Elevation Reached |
| 685028.1 | 601625.3 | 6.8 | 163-SB-064 | N/A | 11/5/2014 | 4.0 | Area 163 - Target Elevation Reached |
| 685064.3 | 601635.5 | 4.9 | 163-SB-112 | N/A | 11/5/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 685069.7 | 601654.2 | 5.0 | 163-SB-011 | N/A | 11/5/2014 | 4.2 | Area 163 - Target Elevation Reached |
| 685054.7 | 601600.3 | 3.6 | 163-SB-063 | N/A | 10/31/2014 | 3.5 | Area 163 - Target Elevation Reached |
| 685062.5 | 601603.2 | 4.6 | 163-SB-014 | N/A | 10/31/2014 | 3.4 | Area 163 - Target Elevation Reached |
| 685100.1 | 601617.6 | 5.3 | 163-SB-012 | N/A | 10/31/2014 | 3.7 | Area 163 - Target Elevation Reached |
| 684984.0 | 601680.9 | 5.5 | 163-SB-113 | N/A | 11/7/2014 | 5.0 | Area 163 - Target Elevation Reached |
| 684997.7 | 601696.5 | 5.5 | 163-SB-093 | N/A | 11/7/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 685012.8 | 601711.3 | 5.6 | 163-SB-092 | N/A | 11/7/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 685001.4 | 601739.4 | 6.6 | 163-SB-086 | N/A | 11/7/2014 | 4.8 | Area 163 - Target Elevation Reached |
| 684854.7 | 601827.8 | 5.7 | 163-SB-008 | N/A | 11/12/2014 | 5.1 | Area 163 - Target Elevation Reached |
| 684889.4 | 601833.1 | 6.2 | 163-SB-072 | N/A | 11/12/2014 | 4.7 | Area 163 - Target Elevation Reached |
| 684901.6 | 601758.2 | 7.6 | 163-SB-085 | N/A | 11/12/2014 | 4.0 | Area 163 - Target Elevation Reached |
| 684913.3 | 601758.5 | 5.7 | 163-SB-009 | N/A | 11/12/2014 | 5.1 | Area 163 - Target Elevation Reached |
| 684943.7 | 601757.2 | 5.9 | 163-SB-073 | N/A | 11/12/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 684970.6 | 601767.7 | 3.3 | 163-SB-007 | N/A | 11/12/2014 | 3.1 | Area 163 - Target Elevation Reached |
| 684970.3 | 601782.2 | 3.3 | 163-SB-060 | N/A | 11/12/2014 | 2.6 | Area 163 - Target Elevation Reached |
| 684784.2 | 602004.7 | 4.9 | 134-SB-114 | N/A | 12/12/2014 | 4.0 | Area 42 - Target Elevation Reached |
| 684779.6 | 601989.9 | 4.8 | 134-SB-003 | N/A | 12/12/2014 | 4.4 | Area 42 - Target Elevation Reached |
| 684756.5 | 602015.6 | 5.8 | 134-SB-108 | N/A | 12/12/2014 | 4.4 | Area 42 - Target Elevation Reached |

143-SB-43R: "R" designation indicates Reference Confirmatory Point for a designated Bottom Excavation Area. Coordinates come from Center Points within that specific cell.

1 This is the actual elevation of the PDI Bottom sample included in the 100% design.

* Target Reached. Over excavation conducted as directed by engineer.

## SA-6 South Excavation: Sidewall Confirmatory Points (Table 3.0)

| Sidewall Target Coordinates | | | | | As-built Elevations | | |
|---|---|---|---|---|---|---|---|
| 685197.1 | 601418.1 | 5.2 | 163-SB-097 | N/A | 10/30/2014 | 5.0 | Area 43 - Target Elevation Reached |
| 685181.4 | 601455.3 | 6.0 | 163-SB-035 | N/A | 10/30/2014 | 5.1 | Area 43 - Target Elevation Reached |
| 685158.1 | 601437.3 | 7.0 | 163-SB-061 | N/A | 10/30/2014 | 8.9 | Area 43 - deferred to preserve Bulk Head |
| 685160.1 | 601457.8 | 7.5 | 163-SB-036 | N/A | 10/30/2014 | 4.6 | Area 43 - Target Elevation Reached |
| 685026.9 | 601624.6 | 7.8 | 163-SB-076 | N/A | 11/5/2014 | 4.0 | Area 163 - Target Elevation Reached |
| 685045.9 | 601596.1 | 7.9 | 163-SB-077 | N/A | 10/31/2014 | 3.2 | Area 163 - Target Elevation Reached |
| 685072.2 | 601547.5 | 7.1 | 163-SB-062 | N/A | 10/30/2014 | 3.6 | Area 163 - Target Elevation Reached |
| 684993.2 | 601662.1 | 6.4 | 163-SB-100 | N/A | 11/7/2014 | 4.2 | Area 163 - Target Elevation Reached |
| 684961.1 | 601691.9 | 7.3 | 163-SB-113 | N/A | 11/7/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 684871.6 | 601791.8 | 5.6 | 163-SB-066 | N/A | 11/12/2014 | 7.2 | Area deferred to preserve Bulk Head |
| 684893.3 | 601758.8 | 5.6 | 163-SB-085 | N/A | 11/12/2014 | 4.8 | Area 163 - Target Elevation Reached |
| 684929.4 | 601730.4 | 5.2 | 163-SB-084 | N/A | 11/12/2014 | 5.0 | Area 163 - Target Elevation Reached |
| 684891.6 | 601853.5 | 6.9 | 163-SB-051 | N/A | 11/12/2014 | 4.5 | Area 163 - Target Elevation Reached |
| 684852.1 | 601829.3 | 5.6 | 163-SB-052 | N/A | 11/12/2014 | 4.9 | Area 163 - Target Elevation Reached |
| 684843.0 | 601829.0 | 5.6 | 163-SB-067 | N/A | 11/12/2014 | 6.8 | Area 163 (deferred to preserve Bulk Head) |
| 684797.0 | 601966.1 | 5.7 | 134-SB-069 | N/A | 12/12/2014 | 4.1 | Area 42 - Target Elevation Reached |
| 684807.5 | 602016.1 | 5.9 | 134-SB-146 | N/A | 12/12/2014 | 4.1 | Area 42 - Target Elevation Reached |
| 684750.1 | 602027.2 | 6.4 | 134-SB-091 | N/A | 12/12/2014 | 4.5 | Area 42 - Target Elevation Reached |
| 684747.0 | 601998.4 | 6.0 | 134-SB-058 | N/A | 12/12/2014 | 4.4 | Area 42 - Target Elevation Reached |
| 684751.6 | 601971.2 | 5.6 | 134-SB-071 | N/A | 12/12/2014 | 4.2 | Area 42 - Target Elevation Reached |
| 685138.0 | 601563.6 | 6.2 | 163-SB-078 | N/A | 12/22/2014 | 4.7 | Area 163-1 - Target Elevation reached |
| 685083.7 | 601558.5 | 6.0 | 163-SB-017 | N/A | 12/22/2014 | 4.3 | Area 163-1 - Target Elevation reached |
| 685165.5 | 601546.0 | 6.5 | 163-SB-080 | N/A | 12/22/2014 | 5.6 | Area 163-1 - Target Elevation reached |

**Maser Consulting P.A. certifies that the elevations, with their corresponding date obtained, of the Confirmatory Points depicted in Table 1, Center Points in Table 2, Sidewall Confirmatory Sidewall Points Table 3 and Bottom of Excavation topographic spot elevations are correct, and representative of the as-built post-excavation grades throughout the corresponding excavation cells.**
