**Subject: Annual Notice to Stakeholders/Utilities
SA-5 Consent Decrees**

This letter documents Honeywell's compliance with the obligation to provide an annual update notice to New Jersey One Call and other underground alert hotlines regarding site conditions and activities at Site 153 Former Morris Canal (north and south) and New Jersey City University (NJCU) Property. These obligations are stated in paragraph 81 of the Consent Decree Regarding Sites 79 and 153 South, and Paragraph 104 of the Consent Decree Regarding Remediation of the New Jersey City University Redevelopment Area, which includes Site 153 North. The update letters are being transmitted to New Jersey One Call as the appropriate underground utility hotline in New Jersey, and also to the individual utility companies with services in the area of the NJCU and Former Morris Canal Sites. Copies of the notification letters are attached for reference. Honeywell provided previous annual update notice letters to stakeholders including utility entities on April 22, 2014.

During 2014, repair and restoration of the cap was completed at the following locations with the Commercial Area which had been disturbed work by a contractor for NJCU: guard shack area, bollards area for handicapped parking spaces, and a temporary post location. The repair work in these areas was completed in March, June and August, respectively. A report of the cap disturbance and restoration activities was submitted by NJCU to the NJDEP on September 12, 2014.

During March 2015, the asphalt pavement cap within a portion of Site 153 North was disturbed during work by Verizon for the installation of utility pole anchors. The area of disturbance consisted of five small locations (1 foot by 1 foot), which were subsequently restored using asphalt patch. A report of disturbance and restoration will be submitted to the NJDEP during the second quarter of 2015.

In the annual notice letters dated April 20, 2012, Honeywell provided utility maps including as-built drawings associated with the completed remedial actions for Site 153 and NJCU Commercial Area (as required by paragraph 70 of the Consent Decree Regarding Sites 79 and 153 South and paragraph 79 of the Consent Decree Regarding Remediation of the New Jersey City University Redevelopment Area). Updated utility maps will be provided with subsequent annual notification letters to utility entities, if needed, based on any changes to the maps or following any further remediation in conjunction with sewer repair or replacement.

The notification letters, in addition, will be posted on a web site, as per the requirements of the above Consent Decrees. Honeywell is currently using the following web to provide information on the status of
